SISTER LADIES OF THE THWAITE, CONISTON,

BY THEIR THANKFUL FRIEND  
JOHN RUSKIN, LL.D.

## PREFACE.

---

THE ladies to whom these letters were written have been, throughout their brightly tranquil lives, at once sources and loadstones of all good to the village in which they had their homes, and to all loving people who cared for the village and its vale and secluded lake, and whatever remained in them or around of the former peace, beauty, and pride of English Shepherd Land.

Sources they have been of good, like one of its mountain springs, ever to be found at need. They did not travel; they did not go up to London in its season; they did not receive idle visitors to jar or waste their leisure in the waning year. The poor and the sick could find them always; or rather, they watched for and prevented all poverty and pain that care or tenderness could relieve or heal. Loadstones they were, as steadily bringing the light of gentle and wise souls about them as the crest of their guardian mountain gives pause to the morning clouds; in themselves they were types of perfect womanhood in its constant happiness, queens alike of their own hearts and of a Paradise in which they knew the names and sympathized with the spirits of every living creature that God had made to play therein, or to blossom in its sunshine or shade.

They had lost their dearly-loved younger sister, Margaret, before I knew them. Mary and Susie, alike in benevolence, serenity, and practical judgment, were yet widely different, nay, almost contrary, in tone and impulse of intellect. Both of them capable of understanding whatever women should know, the elder was yet chiefly interested in the course of

immediate English business, policy, and progressive science, while Susie lived an aërial and enchanted life, possessing all the highest joys of imagination, while she yielded to none of its deceits, sicknesses, or errors. She saw and felt, and believed all good, as it had ever been, and was to be, in the reality and eternity of its goodness, with the acceptance and the hope of a child; the least things were treasures to her, and her moments fuller of joy than some people's days.

What she has been to me, in the days and years when other friendship has been failing, and others' "loving, mere folly," the reader will enough see from these letters, written certainly for her only, but from which she has permitted my Master of the Rural Industries at Loughrigg, Albert Fleming, to choose what he thinks, among the tendrils of clinging thought, and mossy cups for dew in the Garden of Herbs where Love is, may be trusted to the memorial sympathy of the readers of "Frondes Agrestes."

J. R.

BRANTWOOD, *June*, 1887.

## INTRODUCTION.

---

OFTEN during those visits to the Thwaite which have grown to be the best-spent hours of my later years, I have urged my dear friend, Miss Beever, to open to the larger world the pleasant paths of this her Garden Enclosed. The inner circle of her friends knew that she had a goodly store of Mr. Ruskin's letters, extending over many years. She for her part had long desired to share with others the pleasure these letters had given her, but she shrank from the fatigue of selecting and arranging them. It was, therefore, with no small feeling of satisfaction that I drove home from the Thwaite one day in February last with a parcel containing nearly two thousand of these treasured letters. I was gladdened also by generous permission, both from Brantwood and the Thwaite, to choose what I liked best for publication. The letters themselves are the fruit of the most beautiful friendship I have ever been permitted to witness, a friendship so unique in some aspects of it, so sacred in all, that I may only give it the praise of silence. I count myself happy to have been allowed to throw open to all wise and quiet souls the portals of this Armida's Garden, where there are no spells save those woven by love, and no magic save that of grace and kindness. Here my pleasant share in this little book would have ended, but Mr. Ruskin has desired me to add a few words, giving my own description of Susie, and speaking of my relationship to them both. To him I owe the guidance of my life—all its best impulses, all its worthiest efforts; to her some of its happiest hours, and the blessings alike of incentive and reproof. In reading over Mr. Ruskin's Preface, I note that,

either by grace of purpose or happy chance, he has left me one point untouched in our dear friend's character. Her letters inserted here give some evidence of it, but I should like to place on record how her intense delight in sweet and simple things has blossomed into a kind of mental frolic and dainty wit, so that even now, in the calm autumn of her days, her friends are not only lessoned by her ripened wisdom, but cheered and recreated by her quaint and sprightly humor.

In the Royal Order of Gardens, as Bacon puts it, there was always a quiet resting-place called the Pleasaunce; there the daisies grew unchecked, and the grass was ever the greenest. Such a Pleasaunce do these Letters seem to me. Here and there, indeed, there are shadows on the grass, but no shadow ever falls between the two dear friends who walk together hand in hand along its pleasant paths. So may they walk in peace till they stand at the gate of another Garden, where

“Co' fiori eterni, eterno il frutto dura.”

THE SACRISTAN'S CELL.

ASSISI, 14<sup>th</sup> April, 1874.

I got to-day your lovely letter of the 6th, but I never knew my Susie *could* be such a naughty little girl before; to burn her pretty story \* instead of sending it to me. It would have come to me so exactly in the right place here, where St. Francis made the grasshopper (cicada, at least) sing to him upon his hand, and preached to the birds, and made the wolf go its rounds every day as regularly as any Franciscan friar, to ask for a little contribution to its modest dinner. The Bee and Narcissus would have delighted to talk in this enchanted air.

Yes, that *is* really very pretty of Dr. John to inscribe your books so, and it's so like him. How these kind people understand things! And that bit of his about the child is wholly lovely; I am so glad you copied it.

I often think of you, and of Coniston and Brantwood. You will see, in the May Fors, reflections upon the temptations to the life of a Franciscan.

There are two monks here, one the sacristan who has charge of the entire church, and is responsible for its treasures; the other exercising what authority is left to the convent among the people of the town. They are both so good and innocent and sweet, one can't pity them enough. For this time in Italy is just like the Reformation in Scotland, with

---

\* The Bee and Narcissus.

only the difference that the Reform movement is carried on here simply for the sake of what money can be got by Church confiscation. And these two brothers are living by indulgence, as the Abbot in the Monastery of St. Mary's in the Regent Moray's time.

The people of the village, however, are all true to their faith ; it is only the governing body which is modern-infidel and radical. The population is quite charming—a word of kindness makes them as bright as if you brought them news of a friend. All the same, it does not do to offend them ; Monsieur Cavalcasella, who is expecting the Government order to take the Tabernacle from the Sanctuary of St. Francis, cannot, it is said, go out at night with safety. He decamped the day before I came, having some notion, I fancy, that I would make his life a burden to him, if he didn't, by day, as much as it was in peril by night. I promise myself a month of very happy time here (happy for *me*, I mean) when I return in May.

The sacristan gives me my coffee for lunch, in his own little cell, looking out on the olive woods ; then he tells me stories of conversions and miracles, and then perhaps we go into the sacristy and have a reverent little poke out of relics. Fancy a great carved cupboard in a vaulted chamber full of most precious things (the box which the Holy Virgin's veil used to be kept in, to begin with), and leave to rummage in it at will ! Things that are only shown twice in the year or so, with fumigation ! all the congregation on their knees ; and the sacristan and I having a great heap of them on the table at once, like a dinner service ! I really looked with great respect at St. Francis's old camel-hair dress.

I am obliged to go to Rome to-morrow, however, and to Naples on Saturday, My witch of Sicily \* expects me this day week, and she's going to take me such lovely drives, and talks of "excursions" which I see by the map are thirty miles away. I wonder if she thinks me so horribly old that it's quite proper. It will be very nice if she does, but not flatter-

---

\* Miss Amy Yule. See "Præterita," Vol. III., Chap. vii.

ing. I know her mother can't go with her, I suppose her maid will. If she wants any other chaperone I won't go.

She's really very beautiful, I believe, to some people's tastes (I shall be horribly disappointed if she isn't, in her own dark style), and she writes, next to Susie, the loveliest letters I ever get.

Now, Susie, mind, you're to be a very good child while I'm away, and never to burn any more stories; and above all, you're to write me just what comes into your head, and ever to believe me your loving

J. R.

---

NAPLES, 2d May, 1874.

I heard of your great sorrow \* from Joan † six days ago, and have not been able to write since. Nothing silences me so much as sorrow, and for this of yours I have no comfort. I write only that you may know that I am thinking of you, and would help you if I could. And I write to-day because your lovely letters and your lovely old age have been forced into my thoughts often by dreadful contrast during these days in Italy. You who are so purely and brightly happy in all natural and simple things, seem now to belong to another and a younger world. And your letters have been to me like the pure air of Yewdale Crags breathed among the Pontine Marshes; but you must not think I am ungrateful for them when I can't answer. You can have no idea how impossible it is for me to do all the work necessary even for memory of the things I came here to see; how much escapes me, how much is done in a broken and weary way. I am the only author on art who does the work of illustration with his own hand; the only one therefore—and I am not insolent in saying this—who has learned his business thoroughly; but after a day's drawing I assure you one cannot sit down to write unless it be the merest nonsense to please Joanie. Believe it or not, there is no one of my friends whom I write so scrupulously to as to you. You may be vexed at this,

---

\* The death of Miss Margaret Beaver.

† Mrs. Arthur Severn.

but indeed I can't but try to write carefully in answer to all your kind words, and so sometimes I can't at all. I *must* tell you, however, to-day, what I saw in the Pompeian frescoes—the great characteristic of falling Rome, in her furious desire of pleasure, and brutal incapability of it. The walls of Pompeii are covered with paintings meant only to give pleasure, but nothing they represent is beautiful or delightful, and yesterday, among other calumniated and caricatured birds, I saw one of my Susie's pets, a peacock ; and he had only eleven eyes in his tail. Fancy the feverish wretchedness of the humanity which, in mere pursuit of pleasure or power, had reduced itself to see no more than eleven eyes in a peacock's tail ! What were the Cyclops to this ?

I hope to get to Rome this evening, and to be there settled for some time, and to have quieter hours for my letters.

---

ROME, 23d May, 1874.

A number of business letters and the increasing instinct for work here as time shortens, have kept me too long from even writing a mere mamma-note to you ; though not without thought of you daily.

I have your last most lovely line about your sister—and giving me that most touching fact about poor Dr. John Brown, which I am grieved and yet thankful to know, that I may better still reverence his unfailing kindness and quick sympathy. I have a quite wonderful letter from him about you ; but I will not tell you what he says, only it is so *very*, very true, and so very, very pretty, you can't think.

I have written to my bookseller to find for you, and send, a complete edition of “Modern Painters,” if findable. If not, I will make my assistant send you down my own fourth and fifth volumes, which you can keep till I come for them in the autumn.

There is nothing now in the year but autumn and winter. I really begin to think there is some terrible change of climate coming upon the world for its sin, like another deluge. It will have its rainbow, I suppose, after its manner—promising not to darken the world again, and then not to drown.

ROME, 24th May, 1874 (*Whit-Sunday*).

I have to-day, to make the day whiter for me, your lovely letter of the 14th, telling me your age. I am so glad it is no more; you are only thirteen years older than I, and much more able to be my sister than mamma, and I hope you will have many years of youth yet. I think I *must* tell you in return for this letter what Dr. John Brown said, or part of it at least. He said you had the playfulness of a lamb without its selfishness. I think that perfect as far as it goes. Of course my Susie's wise and grave gifts must be told of afterward. There is no one I know, or have known, so well able as you are to be in a degree what my mother was to me. In this chief way (as well as many other ways) (the puzzlement I have had to force that sentence into grammar!), that I have had the same certainty of giving you pleasure by a few words and by any little account of what I am doing. But then you know I have just got out of the way of doing as I am bid, and unless you can scold me back into that, you can't give me the sense of support.

Tell me more about yourself first, and how those years came to be "lost." I am not sure that they were; though I am very far from holding the empty theory of compensation; but much of the slighter pleasure you lost then is evidently still open to you, fresh all the more from having been for a time withdrawn.

The Roman peasants are very gay to-day, with roses in their hair; legitimately and honorably decorated, and looking lovely. Oh me, if they had a few Susies to take human care of them, what a glorious people they would be!

---

#### THE LOST CHURCH IN THE CAMPAGNA.

ROME, 2d June, 1874.

Ah, if you were but among the marbles here, though there are none finer than that you so strangely discerned in my study; but they are as a white company innumerable, ghost after ghost. And how you would rejoice in them and in a

thousand things besides, to which I am dead, from having seen too much or worked too painfully—or, worst of all, lost the hope which gives all life.

Last Sunday I was in a lost church found again—a church of the second or third century, dug in a green hill of the Campagna, built underground ;—its secret entrance like a sand-martin's nest. Such the temple of the Lord, as the King Solomon of that time had to build it ; not “ the mountains of the Lord's house shall be established above the hills,” but the cave of the Lord's house as the fox's hole, beneath them.

And here, now lighted by the sun for the first time (for they are still digging the earth from the steps), are the marbles of those early Christian days ; the first efforts of their new hope to show itself in enduring record, the new hope of a Good Shepherd ;—there they carved Him, with a spring flowing at His feet, and round Him the cattle of the Campagna in which they had dug their church, the very self-same goats which this morning have been trotting past my window through the most populous streets of Rome, innocently following their shepherd, tinkling their bells, and shaking their long spiral horns and white beards ; the very same dew-lapped cattle which were that Sunday morning feeding on the hillside above, carved on the tomb-marbles sixteen hundred years ago.

How you would have liked to see it, Susie !

And now to-day I am going to work in an eleventh century church of quite proud and victorious Christianity, with its grand bishops and saints lording it over Italy. The bishop's throne all marble and mosaic of precious colors and of gold, high under the vaulted roof at the end behind the altar ; and line upon line of pillars of massive porphyry and marble, gathered out of the ruins of the temples of the great race who had persecuted them, till they had said to the hills, Cover us, like the wicked. And then *their* proud time came, and their enthronement on the seven hills ; and now, what is to be their fate once more ?—of pope and cardinal and dome, Peter's or Paul's by name only,—“ My house, no more a house of prayer, but a den of thieves.”

I can't write any more this morning. Oh me, if one could only write and draw all one wanted, and have our Susies and be young again, oneself and they! (As if there were two Susies, or *could* be!

Ever my one Susie's very loving,

J. RUSKIN.

I have sent word to my father's old head-clerk, now a great merchant himself, to send you a little case of that champagne. Please like it.

---

REGRETS.

ASSIST, *June 9th.*

Yes, I am a little oppressed just now with overwork, nor is this avoidable. I am obliged to leave all my drawings unfinished as the last days come, and the point possible of approximate completion fatally contracts, every hour, to a more ludicrous and warped mockery of the hope in which one began. It is impossible not to work against time, and *that* is killing. It is not labor itself, but competitive, anxious, disappointed labor that dries one's soul out.

But don't be frightened about me, you sweet Susie. I know when I *must* stop; forgive and pity me only, because sometimes, nay often my letter (or word) to Susie must be sacrificed to the last effort on one's drawing.

The letter to one's Susie should be a rest, do you think? It is always more or less comforting, but not rest; it means further employment of the already extremely strained sensational power. What one really wants! I believe the only true restorative is the natural one, the actual presence of one's "helpmeet." The far worse than absence of mine *reverses* rest, and what is more, destroys one's power of receiving from others or giving.

How much love of mine have *others* lost, because that poor sick child would not have the part of love that belonged to her!

I am very anxious about your eyes too. For any favor don't write more extracts just now. The books are yours forever and a day—no loan; enjoy any bits that you find enjoyable, but don't copy just now.

I left Rome yesterday, and am on my way home ; but, alas ! might as well be on my way home from Cochin China, for any chance I have of speedily arriving. Meantime your letters will reach me here with speed, and will be a great comfort to me, if they don't fatigue *you*.

---

“FRONDES AGRESTES.”

PERUGIA, 12th June.

I am more and more pleased at the thought of this gathering of yours, and soon expect to tell you what the bookseller says.

Meantime I want you to think of the form the collection should take with reference to my proposed re-publication. I mean to take the botany, the geology, the Turner defence, and the general art criticism of “Modern Painters,” as four separate books, cutting out nearly all the preaching, and a good deal of the sentiment. Now what you find pleasant and helpful to you of general maxim or reflection, *must* be of some value ; and I think therefore that your selection will just do for me what no other reader could have done, least of all I myself ; keep together, that is to say, what may be right and true of those youthful thoughts. I should like you to add anything that specially pleases you, of whatever kind ; but to keep the notion of your book being the didactic one as opposed to the other picturesque and scientific volumes, will I think help you in choosing between passages when one or other is to be rejected.

---

HOW I FELL AMONG THIEVES.

ASSISI, 17th June.

I have been having a bad time lately, and have no heart to write to you. Very difficult and melancholy work, deciphering what remains of a great painter among stains of ruin and blotches of repair, of five hundred years' gathering. It makes me sadder than idleness, which is saying much.

I was greatly flattered and petted by a saying in one of your last letters, about the difficulty I had in unpacking my

mind. That is true; one of my chief troubles at present is with the quantity of things I want to say at once. But you don't know how I find things I laid by carefully in it, all mouldy and moth-eaten when I take them out; and what a lot of mending and airing they need, and what a wearisome and bothering business it is compared to the early packing,—one used to be so proud to get things into the corners neatly!

I have been failing in my drawings, too, and I'm in a horrible inn kept by a Garibaldian bandit; and the various sorts of disgusting dishes sent up to look like a dinner, and to be charged for, are a daily increasing horror and amazement to me. They succeed in getting *everything* bad; no exertion, no invention, could produce such badness, I believe, anywhere else. The hills are covered for leagues with olive-trees, and the oil's bad; there are no such lovely cattle elsewhere in the world, and the butter's bad; half the country people are shepherds, but there's no mutton; half the old women walk about with a pig tied to their waists, but there's no pork; the vine grows wild anywhere, and the wine would make my teeth drop out of my head if I took a glass of it; there are no strawberries, no oranges, no melons, the cherries are as hard as their stones, the beans only good for horses, or Jack and the beanstalk, and this is the size of the biggest asparagus—

I live here in a narrow street ten feet wide only, winding up a hill, and it was full this morning of sheep as close as they could pack, at least a thousand, as far as the eye could reach,—tinkle tinkle, bleat bleat, for a quarter of an hour.

---

IN PARADISE.

ASSISI, SACRISTAN'S CELL,  
25th June.

This letter is all upside down, and this first page written last; for I didn't like something I had written about myself last night when I was tired, and have torn it off.

That star you saw beat like a heart must have been a dog star. A planet would not have twinkled. Far mightier, he, than any planet; burning with his own planetary host doubtless round him; and, on some speckiest of the specks of them, evangelical persons thinking our sun was made for *them*.

Ah, Susie, I do not pass, unthought of, the many sorrows of which you kindly tell me, to show me—for that is in your heart—how others have suffered also.

But, Susie, *you* expect to see your Margaret again, and you will be happy with her in heaven. I wanted my Rosie *here*. In heaven I mean to go and talk to Pythagoras and Socrates and Valerius Publicola. I shan't care a bit for Rosie there, she needn't think it. What will grey eyes and red cheeks be good for *there*?

These pious sentiments are all written in my sacristan's cell.

Now, Susie, mind, though you're only eight years old, you must try to fancy you're ten or eleven, and attend to what I say.

This extract book\* of yours will be most precious in its help to me, provided it is kept within somewhat narrow limits. As soon as it is done I mean to have it published in a strong and pretty but *cheap* form, and it must not be too bulky. Consider, therefore, not only what you like, but how far and with whom each bit is likely to find consent and service. You will have to choose perhaps, after a little while, among what you have already chosen. I mean to leave it *wholly* in your hands; it is to be Susie's choice of my writings.

Don't get into a flurry of responsibility, but don't at once write down all you have a mind to; I know you'll find a good deal! for you are exactly in sympathy with me in all things.

---

ASSISI, 9th July, 1874.

Your lovely letters are always a comfort to me; and not least when you tell me you are sad. You would be far less in

---

\* Frondes Agrestes.

sympathy with me if you were not, and in the "everything right" humor of some, even of some really good and kind persons, whose own matters are to their mind, and who understand by "Providence" the power which particularly takes care of *them*. This favoritism which goes so sweetly and pleasantly down with so many pious people is the chief of all stumbling-blocks to *me*. I must pray for everybody or nobody, and can't get into any conceptions of relation between Heaven and *me*, if not also between Heaven and earth (and why Heaven should allow hairs in pens I can't think).

I take great care of myself, be quite sure of that, Susie; the worst of it is, here in Assisi everybody else wants me to take care of them.

Catharine brought me up as a great treat yesterday, at dinner, ham dressed with as much garlic as could be stewed into it, and a plate of raw figs, telling me I was to eat them together!

The sun is changing the entire mountains of Assisi into a hot bottle with no flannel round it; but I can't get a ripe plum, peach, or cherry. All the milk turns sour, and one has to eat one's meat as its toughest or the thunder gets into it next day.

---

FOAM OF TIBER.

PERUGIA, 17th July.

I am made anxious by your sweet letter of the 6th saying you have been ill and are "not much better."

The letter is all like yours, but I suppose however ill you were you would always write prettily, so that's little comfort.

About the Narcissus, please. I want them for my fishpond stream rather than for the bee-house one. The fishpond stream is very doleful, and wants to dance with daffodils if they would come and teach it. How happy we are in our native streams! A thunder-storm swelled the Tiber yesterday, and it rolled over its mill weirs in heaps, literally, of tossed water, the size of haycocks, but black-brown like coffee with the grounds in it, mixed with a very little yellow milk. In some

lights the foam flew like cast handfuls of heavy gravel. The chief flowers here are only broom and bindweed, and I begin to weary for my heather and for my Susie ; but, oh dear, the ways are long and the days few.

---

LUCCA, 29th July.

I'm not going to be devoured when I come, by anybody, unless *you* like to. I shall come to your window with the birds, to be fed myself.

And please at present always complain to me whenever you like. It is the over-boisterous cheerfulness of common people that hurts me ; your sadness is a help to me.

You shall have whatever name you like for your book, provided you continue to like it after thinking over it long enough. You will not like "Gleanings," because you know that one only gleans refuse—dropped ears—that other people don't care for. *You* go into the garden and gather with choice the flowers you like best. That is not gleaning!

---

LUCCA, 10th August.

I have been grieved not to write to you ; but the number of things that vex me are so great just now, that unless by false effort I could write you nothing nice. It is very dreadful to live in Italy, and more dreadful to see one's England and one's English friends, all but a field or two, and a stream or two, and a one Susie and one Dr. Brown, fast becoming like Italy and the Italians.

I have too *much sympathy* with your sorrow to write to you of it. What I have not sympathy with, is your hope ; and how cruel it is to say this ! But I am driven more and more to think there is to be no more good for a time, but a reign of terror of men and the elements alike ; and yet it is so like what is foretold before the coming of the Son of man, that perhaps in the extremest evil of it I may some day read the sign that our redemption draws nigh.

Now, Susie, invent a nice cluster of titles for the book and

send them to me to choose from, to Hotel de l'Arno, Florence. I must get that out before the day of judgment, if I can. I'm so glad of your sweet flatteries in this note received to-day.

---

FLORENCE, 25th August.

I have not been able to write to you, or anyone lately, whom I don't want to tease, except Dr. Brown, whom I write to for counsel. My time is passed in a fierce steady struggle to save all I can every day, as a fireman from a smouldering ruin, of history or aspect. To-day, for instance, I've been just in time to ascertain the form of the cross of the Emperor, representing the power of the State in the greatest *political* fresco of old times—fourteenth century. By next year, it may be next month, it will have dropped from the wall with the vibration of the railway outside, and be touched up with new gilding for the mob.

I am keeping well, but am in a terrible spell (literally, "spell," enchanted maze, that I can't get out of) of work.

I was a little scandalized at the idea of your calling the book "word painting." My dearest Susie, it is the chief provocation of my life to be called a "word painter" instead of a thinker. I hope you haven't filled your book with descriptions. I thought it was the thoughts you were looking for?

"Posie" would be pretty. If you ask Joanie she will tell you perhaps *too* pretty for *me*, and I can't think a bit to-night, for instead of robins singing I hear only blaspheming gamesters on the other side of the narrow street.

---

FLORENCE, 1st September.

Don't be in despair about your book. I am sure it will be lovely. I'll see to it the moment I get home, but I've got into an entirely unexpected piece of business here, the interpretation of a large chapel full of misunderstood, or not at all understood, frescoes; and I'm terribly afraid of breaking

down, so much drawing has to be done at the same time. It has stranded botany and everything.

I was kept awake half of last night by drunken blackguards howling on the bridge of the Holy Trinity in the pure half-moonlight. This is the kind of discord I have to bear, corresponding to your uncongenial company. But, alas! Susie, you ought at ten years old to have more firmness, and to resolve that you won't be bored. I think I shall try to enforce it on you as a very solemn duty not to *lie* to people as the vulgar public do. If they bore you, say so, and they'll go away. That is the right state of things.

How am I to know that *I* don't bore you, when *I* come, when you're so civil to people you hate?

---

PASS OF BOCCHETTA, 1st October.

All that is lovely and wonderful in the Alps may be seen without the slightest danger, in general, and it is especially good for little girls of eleven, who can't climb, to know this—all the best views of hills are at the bottom of them. I know one or two places indeed where there is a grand peeping over precipices, one or two where the mountain seclusion and strength are worth climbing to see. But all the entirely beautiful things I could show you, Susie; only for the very highest sublime of them sometimes asking you to endure half an hour of *chaise à porteur*, but mostly from a post-chaise or smoothest of turnpike roads.

But, Susie, do you know, I'm greatly horrified at the pen-wipers of peacock's feathers! *I* always use my left-hand coat-tail, indeed, and if only I were a peacock and a pet of yours, how you'd scold me!

Sun just coming out over sea (at Sestri), which is sighing in toward the window, within your drive, round before the door's breadth of it,\* seen between two masses of acacia copse and two orange-trees at the side of the inn courtyard.

---

\* That is, within that distance of the window.

GENEVA, 19th October.

How I have been neglecting you! Perhaps Joanie may have told you that just at my last gasp of hand-work, I had to write quite an unexpected number of letters. But poor Joanie will think herself neglected now, for I have been stopped among the Alps by a state of their glaciers entirely unexampled, and shall be a week after my "latest possible" day, in getting home. It is eleven years since I was here, and very sad to me to return, yet delightful with a moonlight paleness of the past, precious of its kind.

I shall be at home with Joan in ten days now, God willing. I have much to tell you, which will give you pleasure and pain; but I don't know how much it will be—to tell you—for a little while yet, so I don't begin.

---

OXFORD, 26th October.

Home at last with your lovely, most lovely, letter in my breast pocket, from Joan's all the way here.

I am so very grateful to you for not writing on black paper.

Oh, dear Susie, why should we ever wear black for the guests of God?

---

WHARFE IN FLOOD.

BOLTON ABBEY, 24th January, 1875.

The black rain, much as I growled at it, has let me see Wharfe in flood; and I would have borne many days in prison to see that.

No one need go to the Alps to see wild water. Seldom, unless in the Rhine or Rhone themselves at their rapids, have I seen anything much grander. An Alpine stream, besides, nearly always has its bed full of loose stones, and becomes a series of humps and dumps of water wherever it is shallow; while the Wharfe swept round its curves of shore like a black Damascus sabre, coiled into eddies of steel. At the Strid, it had risen eight feet vertical since yesterday, sheeting the flat rocks with foam from side to side, while the treacherous mid-

channel was filled with a succession of boiling domes of water, charged through and through with churning white, and rolling out into the broader stream, each like a vast sea-wave bursting on a beach.

There is something in the soft and comparatively unbroken slopes of these Yorkshire shales which must give the water a peculiar sweeping power, for I have seen Tay and Tummel and Ness, and many a big stream besides, savage enough, but I don't remember anything so grim as this.

I came home to quiet tea and a black kitten called Sweep, who lapped half my cream jugful (and yet I had plenty) sitting on my shoulder—and Life of Sir Walter Scott. I was reading his great Scottish history tour, when he was twenty-three, and got his materials for everything nearly, but especially for Waverley, though not used till long afterward.

Do you recollect Gibbie Gellatly? I was thinking over that question of yours, "What did I think?"\* But, my dear Susie, you might as well ask Gibbie Gellatly what *he* thought. What does it matter what any of us think? We are but simpletons, the best of us, and I am a very inconsistent and wayward simpleton. I know how to roast eggs, in the ashes, perhaps—but for the next world? Why don't you ask your squirrel what *he* thinks too? The great point—the one for all of us—is, not to take false words in our mouths, and to crack our nuts innocently through winter and rough weather.

I shall post this to-morrow as I pass through Skipton or any post-worthy place on my way to Wakefield. Write to Warwick. Oh, me, what places England had, when she was herself! Now, rail stations mostly. But I never can make out how Warwick Castle got built by that dull bit of river.

---

"FRONDES."

WAKEFIELD, 25th January, 1875.

Here's our book in form at last, and it seems to me just a nice size, and on the whole very taking. I've put a touch or

---

\* Of the things that shall be, hereafter.

two more to the preface, and I'm sadly afraid there's a naughty note somewhere. I hope you won't find it, and that you will like the order the things are put in.

Such ill roads as we came over to-day, I never thought to see in England.

---

CASTLETON, 26th January, 1875.

Here I have your long, dear letter. I am very thankful I can be so much to you. Of all the people I have yet known, you are the only one I can find complete sympathy in; you are so nice and young, without the hardness of youth, and may be the best of sisters to me. I am not so sure about letting you be an elder one; I am not going to be lectured when I'm naughty.

I've been so busy at *wasps* all day coming along, having got a nice book about them. It tells me, too, of a delightful German doctor who kept tame hornets—a whole nest in his study! They knew him perfectly, and would let him do anything with them, even pull bits off their nest to look in at it.

Wasps, too, my author says, are really much more amiable than bees, and never get angry without cause. All the same, they have a tiresome way of inspecting one, too closely, sometimes, I think.

I'm immensely struck with the Peak Cavern, but it was in twilight.

I'm going to stay here all to-morrow, the place is so entirely unspoiled. I've not seen such a primitive village, rock, or stream, this twenty years; Langdale is as sophisticated as Pall Mall in comparison.

Alas, I've other letters to write!

---

WASP STINGS.

BOLTON BRIDGE, *Saturday*.

I never was more thankful than for your sweet note, being stopped here by bad weather again; the worst of posting is

that one has to think of one's servant outside, and so lose a day.

It was bitter wind and snow this morning, too bad to send any human creature to sit idle in. Black enough still, and I, more than usual, because it is just that point of distinction from brutes which I truly say is our only one,\* of which I have now so little hold.

The bee Fors † will be got quickly into proof, but I must add a good deal to it. I can't get into good humor for natural history in this weather.

I've got a good book on wasps which says they are our chief protectors against flies. In Cumberland the wet, cold spring is so bad for the wasps that I partly think this may be so, and the terrible plague of flies in August might perhaps be checked by our teaching our little Agneses to keep wasps' nests instead of bees.

Yes, that is a pretty bit of mine about Hamlet, and I think I must surely be a little pathetic sometimes, in a doggish way.

"You're so dreadfully faithful!" said Arthur Severn to me, fretting over the way I was being ill-treated the other day by R.

Oh, dear, I wish I were at Brantwood again, now, and could send you my wasp book! It is pathetic, and yet so dreadful—the wasp bringing in the caterpillar for its young wasp, stinging each enough to paralyze, but not to kill, and so laying them up in the cupboard.

I wonder how the clergymen's wives will feel after the next Fors or two! I've done a bit to-day which I think will go in with a shiver. Do you recollect the curious *thrill* there is—the cold *tingle* of the pang of a nice deep wasp sting?

Well, I'm not in a fit temper to write to Susie to-day, clearly.

\* I've forgotten what it was, and don't feel now as if I had 'got hold of *any* one.

† See Fors Clavigera, Letter LI.

## BOLTON STRID.

I stopped here to see the Strid again—not seen these many years. It is curious that life is embittered to me, now, by its former pleasantness; while *you* have of these same places painful recollections, but you could enjoy them now with your whole heart.

Instead of the drive with the poor over-labored one horse through the long wet day, here, when I was a youth, my father and mother brought me, and let me sketch in the Abbey and ramble in the woods as I chose, only demanding promise that I should not go near the Strid. Pleasant drives, with, on the whole, well paid and pleased drivers, never with over-burdened cattle; cheerful dinner or tea waiting for me always, on my return from solitary rambles. Everything right and good for me, except only that they never put me through any trials to harden me, or give me decision of character, or make me feel how much they did for me.

But that error was a fearful one, and cost them and me, Heaven only knows how much. And now, I walk to Strid, and Abbey, and everywhere, with the ghosts of the past days haunting me, and other darker spirits of sorrow and remorse and wonder. Black spirits among the gray, all like a mist between me and the green woods. And I feel like a caterpillar—stung *just enough*. Foul weather and mist enough, of quite a real kind besides. An hour's sunshine to-day, broken up speedily, and now veiled utterly.

---

HERNE HILL, LONDON,

11th February, 1875.

I have your sweet letter with news of Dr. John and his brother. I have been working on the book to-day very hard, after much interruption; it is two-thirds done now. So glad people are on tiptoe.

Paddocks are frogs, not toads in that grace.\* And why

---

\* Herrick's. See Fors Clavigera, Letter XLIII.

should not people smile? Do you think that God does not like smiling graces? He only dislikes frowns. But you know when once habitual, the child would be told on a cold day to say "Cold as paddocks," and everybody would know what was coming. Finally the deep under-meaning, that as the cold hand is lifted, so also the cold heart, and yet accepted, makes it one of the prettiest little hymns I know.

I cannot tell you how very apposite to my work these two feathers are. I am just going to dwell on the exquisite result of the division into successive leaves, by which nature obtains the glittering look to set off her color; and you just send me two feathers which have it more in perfection than any I ever saw, and I think are more vivid in color.

How these boys must tease you! but you will be rewarded in the world that good Susies go to.

You must show me the drawing of the grebe. The moss is getting on.

---

VENICE, 12th September, 1876.

I must just say how thankful it makes me to hear of this true gentleness of English gentlewomen in the midst of the vice and cruelty in which I am forced to live here, where oppression on one side and license on the other rage as two war-wolves in continual havoc.

It is very characteristic of fallen Venice, as of modern Europe, that here in the principal rooms of one of the chief palaces, in the very headmost sweep of the Grand Canal, there is not a room for a servant fit to keep a cat or a dog in (as Susie would keep cat or dog, at least).

---

VENICE, 18th September.

I never knew such a fight as the good and wicked fairies are having over my poor body and spirit just now. The good fairies have got down the St. Ursula for me and given her to me all to myself, and sent me fine weather and nice gondoliers, and a good cook, and a pleasant waiter; and the bad fairies

keep putting everything upside down, and putting black in my box when I want white, and making me forget all I want, and find all I don't, and making the hinges come off my boards, and the leaves out of my books, and driving me as wild as wild can be ; but I'm getting something done in spite of them, only I never *can* get my letters written.

---

VENICE, *September 29th.*

I have woful letters telling me you also were woful in saying good-by. My darling Susie, what *is* the use of your being so good and dear if you can't enjoy thinking of heaven, and what fine goings on we shall all have there ?

All the same, even when I'm at my very piourest, it puts me out if my drawings go wrong. I'm going to draw St. Ursula's blue slippers to-day, and if I can't do them nicely shall be in great despair. I've just found a little cunning inscription on her bedpost, 'IN FANNTIA.' The double N puzzled me at first, but Carpaccio spells anyhow. My head is not good enough for a bedpost. . . . Oh me, the sweet Grange !—Thwaite, I mean (bedpost again) ; to think of it in this mass of weeds and ruin !

---

ST. URSULA.

VENICE, *13th November.*

I have to-day your dear little note, and have desired Joan to send you one just written to her, in which I have given some account of myself, that may partly interest, partly win your pardon for apparent neglect. Coming here, after practically an interval of twenty-four years—for I have not seriously looked at anything during the two hurried visits with Joan—my old unfinished work, and the possibilities of its better completion, rise grievously and beguilingly before me, and I have been stretching my hands to the shadow of old designs and striving to fulfil shortcomings, always painful to me, but now, for the moment, intolerable.

I am also approaching the close of the sixth year of Fors, and have plans for the Sabbatical year of it, which make my thoughts active and troubled. I am drawing much, and have got a study of St. Ursula which will give you pleasure; but the pain of being separate from my friends and of knowing they miss me! I wonder if you will think you are making me too vain, Susie. Such vanity is a very painful one, for I know that you look out of the window on Sundays now, wistfully, for Joan's handkerchief. This pain seems always at my heart, with the other which is its own.

I am thankful, always, you like St. Ursula. *One* quite fixed plan for the last year of Fors, is that there shall be absolutely no abuse or controversy in it, but things which will either give pleasure or help; and some clear statements of principle, in language as temperate as hitherto violent; to show, for one thing, that the violence was not for want of self-command.

I'm going to have a good fling at the Bishops in next Fors to finish with, and then for January!—only I mustn't be too good, Susie, or something would happen to me. So I shall say naughty things still, but in the mildest way.

I am very grateful to you for that comparison about my mind being as crisp as a lettuce. I am *so* thankful you can feel that still. I was beginning to doubt, myself.

---

ST. MARK'S DOVES.

VENICE, 2d December.

I have been very dismal lately. I hope the next captain of St. George's Company will be a merrier one and happier, in being of use. I am inherently selfish, and don't enjoy being of use. I enjoy painting and picking up stones and flirting with Susies and Kathleens; it's very odd that I never much care to flirt with any but little girls! And here I've no Susies nor Kathleens nor Diddies, and I'm only doing lots of good, and I'm very miserable. I've been going late to bed too. I picked myself up last night and went to bed at nine, and feel cheerful enough to ask Susie how she does, and send

her love from St. Mark's doves. They're really tiresome now, among one's feet in St. Mark's Place, and I don't know what it will come to. In old times, when there were not so many idlers about, the doves were used to brisk walkers, and moved away a foot or two in front of one; but now everybody lounges, or stands talking about the Government, and the doves won't stir till one just touches them; and I who walk fast\* am always expecting to tread on them, and it's a nuisance.

If I only had time I would fain make friends with the seagulls, who would be quite like angels if they would only stop on one's balcony. If there were the least bit of truth in Darwinism, Venice would have had her own born seagulls by this time building their nests at her thresholds.

Now I must get to work. Love to Mary and Miss Rigbye. Now mind you give my message carefully, Susie, because you're a careless little thing.

---

VENICE, 11th December.

My mouth's watering so for that Thwaite currant jelly, you can't think. I haven't had the least taste of anything of the sort this three months. These wretches of Venetians live on cigars and garlic, and have no taste in their mouths for anything that God makes nice.

The little drawing (returned) is nice in color and feeling, but, which surprises me, not at all intelligent in line. It is not weakness of hand but fault of perspective instinct, which spoils so many otherwise good botanical drawings.

Bright morning. Sickle moon just hiding in a red cloud, and the morning stars just vanished in light. But we've had nearly three weeks of dark weather, so we mustn't think it poor Coniston's fault—though Coniston *has* faults. Poor little Susie, it shan't have any more nasty messages to carry.

---

\* See Fors Clavigera, Letter LXXXII.

## ST. MARK'S REST.

23d January, 1877.

I've caught cold and can think of nothing to do me good but making you miserable by telling you so.

It's not a very bad one. And it's a wonder I've got so far through the winter without any.

Things have gone very well for me, hitherto, but I have been depressed by hearing of my poor Kate's \* illness; and can't think of Brantwood with any comfort, so I come across the lake to the Thwaite.

A great many lovely things happened to me this Christmas, but if I were to tell Susie of them I am sure she would be frightened out of her bright little wits, and think I was going to be a Roman Catholic. I'm writing *such* a Catholic history of Venice, and chiselling all the Protestantism off the old "Stones" as they do here the grass off steps.

All the pigeons of St. Mark's Place send you their love. St. Ursula adds hers to the eleven thousand bird's love. And the darlingest old Pope who went a pilgrimage with her, hopes you won't be too much shocked if he sends *his* too! (If you're not shocked, *I* am!)

My new Catholic history of Venice is to be called "St. Mark's Rest."

---

 27th January.

Joanie tells me you are writing her such sad little letters. How *can* it be that anyone so good and true as my Susie should be sad? I am sad, bitterly enough and often, but only with sense of fault and folly and lost opportunity such as you have never fallen into or lost. It is very cruel of Fate, I think, to make us sad, who would fain see everybody cheerful, and (cruel of Fate too) to make so many cheerful who make others wretched. The little history of Venice is well on, and will be clear and interesting, I think—more than most histories of anything. And the stories of saints and nice people will be

---

\* Then, my head servant; now Kate Raven, of Coniston.

plenty. Oh me, I wonder, Susie dear, whether you and I are saints, or what we are. You know you're really a little wicked sometimes as well as me, aren't you?

Such moonlight as there is to-night, but nothing to what it is at Coniston! It makes the lagoon water look brown instead of green, which I never noticed before.

---

SAINTS AND FLOWERS.

VENICE, 17th February.

It is very grievous to me to hear of your being in that woful weather while I have two days' sunshine out of three, and starlight or moonlight always; to-day the whole chain of the Alps from Vicenza to Trieste shining cloudless all day long, and the seagulls floating high in the blue, like little dazzling boys' kites.

Yes, St. Francis would have been greatly pleased with you watching pussy drink your milk; so would St. Theodore, as you will see by next Fors, which I have ordered to be sent you in first proof, for I am eager that you should have it. What wonderful flowers these pinks of St. Ursula's are, for life! They seem to bloom like everlastings.

I get my first rosebud and violets of this year from St. Helena's Island to-day. How I begin to pity people who have no saints to be good to them! Who is yours at Coniston? There must have been some in the country once upon a time.

With their help I am really getting well on with my history and drawing, and hope for a sweet time at home in the heathery days, and many a nice afternoon tea at the Thwaite.

---

VENICE, 8th March.

That is entirely new and wonderful to me about the singing mouse.\* Douglas (was it the Douglas?) saying "he had

---

\* A pleasant story that a friend sent me from France. The mouse often came into their sitting-room and actually sang to them, the notes being a little like a canary's.—S. B.

rather hear the lark sing than the mouse squeak" needs revision. It is a marvellous fact in natural history.

The wind is singing a wild tune to-night—cannot be colder on our own heaths—and the waves dash like our Waterhead. Oh me, when I'm walking round it again, how like a sad dream all this Venice will be !

---

OXFORD, 2d December.

I write first to you this morning to tell you that I gave yesterday the twelfth and last of my course of lectures this term, to a room crowded by six hundred people, two-thirds members of the University, and with its door wedged open by those who could not get in ; this interest of theirs being granted to me, I doubt not, because for the first time in Oxford, I have been able to speak to them boldly of immortal life. I intended, when I began the course, only to have read "Modern Painters" to them ; but when I began, some of your favorite bits interested the men so much, and brought so much larger a proportion of undergraduates than usual, that I took pains to reinforce and press them home ; and people say I have never given so useful a course yet. But it has taken all my time and strength, and I have not been able even to tell Susie a word about it until now. In one of my lectures I made my text your pretty peacock and the design \* of him. But did not venture to say, what really must be true, that his voice is an example of "the Devil sowed tares," and of the angels letting both grow together. Joanie was "wae" to leave Brantwood and you (and between you and me her letters have been so dull ever since, that I think she has left her wits as well as her heart with you). I am going to see her on Monday week, the 10th, and shall start from home *about* the 20th, undertaking (D. V.), at all events, to come on Christmas morning to your ever kindly opening door.

Love to Mary, and cousin Mary ; how happy it is for me you are all so nice !

---

\* Decorative art of his plumage.

My grateful compliments to the peacock. And little (but warm) loves to all your little birds. And best of little loves to the squirrels, only you must send *them* in dream-words, I suppose, up to their nests.

---

HERNE HILL, *Sunday, 16th December.*

It is a long while since I've felt so good for nothing as I do this morning. My very wristbands curl up in a dog's-eared and disconsolate manner; my little room is all a heap of disorder. I've got a hoarseness and wheezing and sneezing and coughing and choking. I can't speak and I can't think, I'm miserable in bed and useless out of it; and it seems to me as if I could never venture to open a window or go out of a door any more. I have the dimmest sort of diabolical pleasure in thinking how miserable I shall make Susie by telling her all this; but in other respects I seem entirely devoid of all moral sentiments. I have arrived at this state of things, first by catching cold, and since by trying to "amuse myself" for three days. I tried to read "Pickwick," but found that vulgar, and, besides, I know it all by heart. I sent from town for some chivalric romances, but found them immeasurably stupid. I made Baxter read me the *Daily Telegraph*, and found that the Home Secretary had been making an absurd speech about art, without any consciousness that such a person as I had ever existed. I read a lot of games of chess out of Mr. Staunton's handbook, and couldn't understand any of them. I analyzed the Dock Company's bill of charges on a box from Venice, and sent them an examination paper on it. I think *that* did amuse me a little, but the account doesn't. £1 8s. 6d. for bringing a box two feet square from the Tower Wharf to here! But the worst of all is, that the doctor keeps me shut up here, and I can't get my business done; and now there isn't the least chance of my getting down to Brantwood for Christmas, nor, as far as I can see, for a fortnight after it. There's perhaps a little of the diabolical enjoyment again in that estimate; but really the days *do* go, more like dew

shaken off branches than real sunrisings and settings. But I'll send you word every day now for a little while how things are going on.

---

CORPUS CHRISTI COLLEGE,  
 OXFORD, 26th December.

I don't know really whether I *ought* to be at Brantwood or here on Christmas. Yesterday I had two lovely services in my own cathedral. You know the *cathedral* of Oxford is the chapel of Christ Church College, and I have my own high seat in the chancel, as an honorary student, besides being bred there, and so one is ever so proud and ever so pious all at once, which is ever so nice, you know ; and my own dean, that's the Dean of Christ's Church, who is as big as any bishop, read the services, and the psalms and anthems were lovely ; and then I dined with Henry Acland and his family, where I am an adopted son—all the more wanted yesterday because the favorite son Herbert died this year in Ceylon—the first death out of seven sons. So they were glad to have me. Then I've all my Turners here, and shall really enjoy myself a little to-day, I think ; but I do wish I could be at Brantwood too.

Oh dear, I've scribbled this dreadfully. Can you really read my scribble, Susie ? Love, you may always read, however scribbled.

---

OXFORD, 27th December.

Yes, I really think that must be the way of it. I *am* wholly cattish in that love of teasing. How delighted I used to be if Rosie would ever condescend to be the least bit jealous !

By the way, what a shame it is that we keep that word in the second commandment, as if it meant that God was jealous of images. It means burning, zealous or full of life, visiting, etc., *i.e.*, necessarily when leaving the father, leaving the child ; necessarily, when giving the father life, giving life to the child, and to thousands of the race of them that love me.

It is very comic the way people have of being so particular about the second and fourth commandments, and breaking all the rest with the greatest comfort. For me, I try to keep all the rest rather carefully, and let the second and fourth take care of themselves.

Cold quite gone ; now it's your turn, Susie. I've got a love letter in Chinese, and can't read it !

---

WINDSOR CASTLE, 2d January, 1878.

I'm horribly sulky this morning, for I expected to have a room with a view, if the room was ever so little, and I've got a great big one looking into the Castle yard, and I feel exactly as if I was in a big modern county gaol with beautiful turrets of modern Gothic.

I came to see Prince Leopold, who has been a prisoner to his sofa lately, but I trust he is better ; he is very bright and gentle, under severe and almost continual pain. My dear little Susie, about that rheumatism of yours ? If it wasn't for that, how happy we both ought to be, living in Thwaites and woods, instead of nasty castles ? Well, about that Shakespeare guide ? I cannot, cannot, at all fancy what it is. In and out among the stars ; it sounds like a plan for stringing the stars. I am so very glad you told me of it.

“Unwritten books in my brain ?” Yes, but also in how many other brains of quiet people, books unthought of, “In the Book and Volume” which will be read some day in Heaven, aloud, “When saw we thee ?” Yes, and “When read we ourselves ?”

My dear Susie, if I were to think really *lost*, what you for instance have new found in your own powers of receiving and giving pleasure, the beautiful faculties you have, scarcely venturing even to show the consciousness of them, when it awakes in you, what a woful conception I should have of God's not caring for us. He will gather all the wheat into His garner.

INGLETON, 17th January.

It's a charming post here, and brings me my letters the first thing in the morning; and I took care to tell nobody where I was going, except people I wanted to hear from. What a little busy bee of a Susie you've been to get all those extracts ready by this time. I've got nothing done all the while I've been away, but a few mathematical figures, and the less I do the less I find I can do it; and yesterday, for the first time these twenty years at least, I hadn't so much as a "plan" in my head all day. But I had a lot to look at in the moorland flowers and quiet little ancient Yorkshire farm-houses, not to speak of Ingleborough, who was, I think, a little depressed because he knew you were only going to send your remembrances, and not your love to him. The clouds gathered on his brow occasionally in a fretful manner, but toward evening he resumed his peace of mind and sends you his "remembrances" and his "blessing." I believe he saves both you and me from a great deal of east wind.

Well, I've got a plan in my head *this* morning for the new extracts. Shall we call them "Lapides (or "Marmora") Portici;" and put a little preface to them about the pavement of St. Mark's porch and its symbolism of what the education of a good man's early days must be to him? I think I can write something a little true and trustworthy about it. Love to Mary and singing little Joan. You are very right about it's not being good for me to be alone, but I had some nice little times in London with Mary Gladstone, or I shouldn't have known what to do. And now I'm coming home as fast as I can.

---

26th November.

I have entirely resigned all hope of ever thanking you rightly for bread, sweet odors, roses and pearls, and must just allow myself to be fed, scented, rose-garlanded and bepearled as if I were a poor little pet dog or pet pig. But my cold is better, and I *am* getting on with this botany; but it is really too important a work to be pushed for a week or a fortnight. And Mary and you will be pleased at last, I am sure.

I have only to-day got my four families, Clarissa, Lychnis, Scintilla, and Mica, perfectly and simply defined. See how nicely they come.

- A. Clarissa changed from Dianthus, which is bad Greek (and all my pretty flowers have names of girls). Petal *jagged* at the outside.
- B. Lychnis. Petal *divided in two* at the outside, and the fringe retired to the top of the limb.
- C. Scintilla (changed from Stellaria, because I want Stella for the house leeks). Petal formed by the *two* lobes of Lychnis without the retired fringe.
- D. Mica. *Single* lobed petal.

When once these four families are well understood in typical examples, how easy it will be to attach either subordinate groups or specialties of habitat, as in America, to some kinds of them! The entire order, for their purity and wildness, are to be named, from Artemis, "Artemides," instead of Caryophyllaceæ; and next them come the Vestals (mints, lavenders, etc.); and then the Cytheride Viola, Veronica, Giulietta, the last changed from Polygala.

That third herb Robert one is just the drawing that nobody but me (never mind grammar) could have made. Nobody! because it means ever so much careful watching of the ways of the leaf, and a lot of work in cramp perspective besittles. It is not quite right yet, but it is nice.

---

It is so nice to be able to find anything that is in the least new to *you*, and interesting; my rocks are quite proud of rooting that little saxifrage.

I'm scarcely able to look at one flower because of the two on each side, in my garden just now. I want to have bees' eyes, there are so many lovely things.

I must tell you, interrupting my botanical work this morning, something that has just chanced to me.

I am arranging the caryophylls which I mass broadly into "Clarissa," the true jagged-leaved and clove-scented ones; "Lychnis," those whose leaves are essentially in two lobes;

“Arenaria,” which I leave untouched; and “Mica,” a new name of my own for the pearlworts, of which the French name is to be Miette, and the representative type (now *Sagina procumbent*) is to be in—

*Latin*—Mica amica.

*French*—Miette l'amie.

*English*—Pet pearlwort.

Then the next to this is to be—

*Latin*—Mica millegrana.

*French*—Miette aux mille perles.

*English*—Thousand pearls.

Now this on the whole I consider the prettiest of the group, and so look for a plate of it which I can copy. Hunting all through my botanical books, I find the best of all is Baxter's Oxford one, and determine at once to engrave that. When turning the page of his text I find: “The specimen of this curious and interesting little plant from which the accompanying drawing was made, was communicated to me by Miss Susan Beaver. To the kindness of this young lady, and that of her sister, Miss Mary Beaver, I am indebted for the four plants figured in this number.”

I have copied lest you should have trouble in looking for the book, but now, you darling Susie, please tell me whether I may not separate these lovely pearlworts wholly from the spergulas—by the pearlworts having only two leaves like real pinks at the joints, and the spergulas, a *cluster*; and tell me how the spergulas scatter their seeds, I can't find any account of it.

---

I would fain have come to see that St. Bruno lily; but if I don't come to see Susie and you, be sure I am able to come to see nothing. At present I am very deeply involved in the classification of the minerals in the Sheffield Museum, important as the first practical arrangement ever yet attempted for popular teaching, and this with my other work makes me fit for nothing in the afternoon but wood-chopping. But I will call to-day on Dr. Brown's friends.

I hope you will not be too much shocked with the audacities of the new number of "Proserpina," or with its ignorances. I am going during my wood-chopping really to ascertain in my own way what simple persons ought to know about tree growth, and give it clearly in the next number. I meant to do the whole book very differently, but can only now give the fragmentary pieces as they chance to come, or it would never be done at all.

You must know before anybody else how the exogens are to be completely divided. I keep the four great useful groups, mallow, geranium, mint, and wall-flower, under the head of domestic orders, that their sweet service and companionship with us may be understood; then the water-lily and the heath, both four foils, are to be studied in their solitudes (I shall throw all that are not four foils out of the Ericacæe); then finally there are to be seven orders of the dark proserpine, headed by the draconids (snapdragons), and including the anemones, hellebores, ivies, and forget-me-nots.

What plants I cannot get arranged under these  $12 + 4 + 2 + 7 = 25$  in all, orders, I shall give broken notices of, as I have time, leaving my pupils to arrange them as they like. I can't do it all.

The whole household was out after breakfast to-day to the top of the moor to plant cranberries; and we squeezed and splashed and spluttered in the boggiest places the lovely sunshine had left, till we found places squashy and squeezey enough to please the most particular and coolest of cranberry minds; and then each of us choosing a little special bed of bog, the tufts were deeply put in with every manner of tacit benediction, such as might befit a bog and a berry, and many an expressed thanksgiving to Susie and to the kind sender of the luxuriant plants. I have never had gift from you, dear Susie, more truly interesting and gladdening to me, and many a day I shall climb the moor to see the fate of the plants and look across to the Thwaite. I've been out most of the forenoon and am too sleepy to shape letters, but will try and get a word of thanks to the far finder of the dainty things to-morrow.

What loveliness everywhere in a duckling sort of state just now.

---

27th November.

We've all been counting and considering how old you can possibly be to-day, and have made up our minds that you are really thirteen, and must begin to be serious. There have been some hints about the necessity of sending you to school, which I have taken no notice of, hoping that you will really at last make up your mind to do your lessons at home like a dear good little girl as you are. And because to-day you enter into your "teens" I have sent you a crystal, and a little bit of native gold, and a little bit of native silver, for symbols of this lovely "nativity" of previous years; and I do wish you all love and joy and peace in them.

---

TO MISS BEEVER.

20th January, 1879.

You will not doubt the extreme sorrow with which I have heard of all that was ordered to be, of terrible, in your peaceful and happy household. Without for an instant supposing, but, on the contrary, utterly refusing to admit, that such calamities\* may be used to point a moral (all useful morality having every point that God meant it to have, perfectly sharp and bright without any burnishing of *ours*), still less to adorn a tale (the tales of modern days depending far too much upon Scythian decoration with Death's heads); I, yet, if I had been Mr. Chapman, would have pointed out that all concealments, even of trivial matters, on the part of young servants from kind mistresses, are dangerous no less than unkind and ungenerous, and that a great deal of preaching respecting the evil nature of man and the anger of God might be spared, if children and servants were only taught, as a religious prin-

---

\* One of our younger servants had gone on to the frozen lake; the ice gave way, and she was drowned.—S. B.

ciple, to tell their mothers and mistresses, when they go out, exactly where they are going and what they are going to do. I think both you and Miss Susan ought to use every possible means of changing, or at least checking, the current of such thoughts in your minds ; and I am in hopes that you may have a little pleasure in examining the plates in the volume of Sibthorpe's "F. Græca" which I send to-day, in comparison with those of "F. Danica." The vulgarity and lifelessness of Sibthorpe's plates are the more striking, because in mere execution they are the more elaborate of the two ; the chief point in the "F. Danica" being the lovely artistic skill. The drawings for Sibthorpe, by a young German, were as exquisite as the Danes, but the English engraver and colorist spoiled all.

I will send you, if you like them, the other volumes in succession. I find immense interest in comparing the Greek and Danish forms or conditions of the same English flower.

I send the second volume, in which the Rufias are lovely, and scarcely come under my above condemnation. The *first* is nearly all of grass.

---

*4th February.*

You know I'm getting my Oxford minerals gradually to Brantwood, and whenever a box comes, I think whether there are any that I don't want myself, which might yet have leave to live on Susie's table. And to-day I've found a very soft purple agate, that looks as if it were nearly melted away with pity for birds and flies, which is like Susie ; and another piece of hard wooden agate with only a little ragged sky of blue here and there, which is like me ; and a group of crystals with grass of Epidote inside, which is like what my own little cascade has been all the winter by the garden side ; and so I've had them all packed up, and I hope you will let them live at the Thwaite.

Then here are some more bits, if you will be a child. Here's a green piece, long, of the stone they cut those green, weedy brooches out of, and a nice mouse-colored natural agate,

and a great black and white one, stained with sulphuric acid, black, but very fine always, and interesting in its lines.

Oh, dear, the cold ; but it's worth *any* cold to have that delicious Robin dialogue. Please write some more of it ; you hear all they say, I'm sure.

I cannot tell you how delighted I am with your lovely gift to Joanie. The perfection of the stone, its exquisite color, and superb weight, and flawless clearness, and the delicate cutting, which makes the light flash from it like a wave of the Lake, make it altogether the most perfect mineralogical and heraldic jewel that Joanie could be bedecked with, and it is as if Susie had given her a piece of Coniston Water itself.

And the setting is delicious, and positively must not be altered. I shall come on Sunday to thank you myself for it. Meantime I'm working hard at the Psalter, which I am almost sure Susie will like.

---

25th May.

This is a most wonderful stone that Dr. Kendall has found—at least to *me*. I have never seen anything quite like it, the arborescent forms of the central thread of iron being hardly ever assumed by an ore of so much metallic lustre. I think it would be very desirable to cut it, so as to get a perfectly smooth surface to show the arborescent forms ; if Dr. Kendall would like to have it done, I can easily send it up to London with my own next parcel.

I want very much to know exactly where it was found ; might I come and ask about it on Dr. Kendall's next visit to you ? I could be there waiting for him any day.

I am thinking greatly of our George Herbert, but me's so wicked I don't know where to begin.

But I never have had nicer letters "since first I saw your face" and tried to honor and reverence you.

Violet's better, and I'm pretty well, but have a little too much thinking of old days.

Have you any word of the Collies lately? I keep sending stones and books; they answer not. It is delightful of you to be interested in that stone book. I send you one of my pictures of stones. They're not very like, but they're pretty. I wish they did such pictures now.

What lovely pies (pictures?) you would have made, in the old butterfly times, of opal and felspar! What lost creatures we all are, we nice ones! The Alps and clouds that I could have done, if I had been shown how.

---

*27th June.*

Everybody's gone! and I have all the new potatoes, and all the asparagus, and all the oranges and everything, and my Susie too, all to myself.

I wrote in my diary this morning that really on the whole I never felt better in my life. Mouth, eyes, head, feet, and fingers all fairly in trim; older than they were, yes, but if the head and heart grow wiser, they won't want feet or fingers some day.

Indeed that is too sad about Florence. I've written a line to her by this post, and will do all the little I can to cheer her.

And I'll come to be cheered and scolded myself the moment I've got things a little to rights here. I think imps get into the shelves and drawers, if they're kept long locked, and must be caught like mice. The boys have been very good, and left everything untouched but the imps; and to hear people say there aren't any! How happy you and I should always be if it weren't for them! But we're both so naughty we can't expect them to let us alone. Can we?

How gay you were and how you cheered me up after the dark lake.

Please say "John Inglesant" is harder than real history and of no mortal use. I couldn't read four pages of it. Clever, of course.

HERNE HILL, 14th August, 1880.

I've *just* finished my Scott paper, but it has retouchings and notings yet to do. I couldn't write a word before; haven't so much as a syllable to Diddie, and only a move at chess to Macdonald, for you know, to keep a chess-player waiting for a move is like keeping St. Lawrence unturned.

---

21st August, 1880.

I'm leaving to-day for Dover, and a line from you to-morrow or Monday would find me certainly at Poste Restante, Abbeville, and please, please tell me the funny thing Miss — said.

I have not been working at all, but enjoying myself (only that takes up time all the same) at Crystal Palace concerts, and jugglings, and at Zoological Gardens, where I had a snake seven feet long to play with, only I hadn't much time to make friends, and it rather wanted to get away all the time. And I gave the hippopotamus *whole* buns, and he was delighted, and saw the cormorant catch fish thrown to him six yards off; never missed one; you would have thought the fish ran along a wire up to him and down his throat. And I saw the penguin swim under water, and the sea-lions sit up, four of them on four wooden chairs, and catch fish also; but they missed sometimes and had to flop off their chairs into the water, and then flop out again and flop up again.

And I lunched with Cardinal Manning, and he gave me *such* a plum pie. I never tasted a Protestant pie to touch it.

---

Now you're just wrong about my darling Cardinal. See what it is to be jealous! He gave me lovely soup, roast beef, hare and currant jelly, puff pastry like Papal pretensions—you had but to breathe on it and it was nowhere—raisins and almonds, and those lovely preserved cherries like

kisses kept in amber. And told me delicious stories all through lunch. *There!*

And we really do see the sun here! And last night the sky was all a spangle and delicate glitter of stars, the glare of them and spikiness softened off by a young darling of a moon.

And I'm having rather a time of it in boudoirs, turned into smiling instead of pouting service. But I'm not going to stay over my three weeks. How nice that you *can* and will walk round the dining-room for exercise!

---

CALAIS, 24th August.

I'm not very far away yet, you see. I stayed here for auld lang syne, but with endless sorrow, of which I need not give you any part of the burden.

The sea has been beautiful, and I am better for the great rest and change.

---

AMIENS, 29th August.

You have been made happy doubtless with us by the news from Herne Hill. I've only a telegram yet though, but write at once to congratulate you on your little goddaughter.

Also to say that I am very well, and sadly longing for Brantwood; but that I am glad to see some vestige of beloved things here, once more.

We have glorious weather, and I am getting perfect rest most of the day—mere saunter in the sunny air, taking all the good I can of it. To-morrow we get (D. V.) to Beauvais, where perhaps I may find a letter from Susie; in any case you may write to Hotel Meurice, Paris.

The oleanders are coming out and geraniums in all cottage windows, and golden corn like Etruscan jewelry over all the fields.

---

BEAUVAIS, 3d September.

We are having the most perfect weather I ever saw in France, much less anywhere else, and I'm taking a thorough

rest, writing scarcely anything and sauntering about old town streets all day.

I made a little sketch of the lake from above the Waterhead which goes everywhere with me, and it is so curious when the wind blows the leaf open when I am sketching here at Beauvais, where all is so differently delightful, as if we were on the other side of the world.

I think I shall be able to write some passages about architecture yet, which Susie will like. I hear of countless qualities being discovered in the new little Susie! And all things will be happy for me if you send me a line to Hotel Meurice, saying *you* are happy too.

---

PARIS, 4th September.

I have all your letters, and rejoice in them; though it is a little sadder for you looking at empty Brantwood, than for me to fancy the bright full Thwaite, and then it's a great shame that I've everything to amuse me, and lovely Louvres and shops and cathedrals and coquettes and pictures and plays and prettinesses of every color and quality, and you've only your old, old hills and quiet lake. Very thankful I shall be to get back to them, though.

We have finished our Paris this afternoon, and hope to leave for Chartres on Monday.

---

HOTEL DE MEURICE, PARIS, 4th September.

Is it such pain to you when people say what they ought not to say about *me*? But when do they say what they ought to say about anything? Nearly everything I have ever done or said is as much above the present level of public understanding as the Old Man is above the Waterhead.

We have had the most marvellous weather thus far, and have seen Paris better than ever I've seen it yet—and to-day at the Louvre we saw the Casette of St. Louis, the Coffre of Anne of Austria, the porphyry vase, made into an eagle, of an

old Abbé Segur, or some such name. All these you can see also, you know, in those lovely photographs of Miss Rigbye's, if you can only make out in this vile writing of mine what I mean.

But it is so hot. I can scarcely sit up or hold the pen, but tumble back into the chair every half-minute and unbutton another button of waistcoat, and gasp a little, and nod a little, and wink a little, and sprinkle some eau de Cologne a little, and try a little to write a little, and forget what I had to say, and where I was, and whether it's Susie or Joan I'm writing to; and then I see some letters I've never opened that came by this morning's post, and think I'd better open them perhaps; and here I find in one of them a delightful account of the quarrel that goes on in this weather between the nicest elephant in the 'Zoo' and his keeper, because he won't come out of his bath. I saw them at it myself, when I was in London, and saw the elephant take up a stone and throw it hard against a door which the keeper was behind—but my friend writes, "I *must* believe from what I saw that the elephant knew he would injure the man with the stones, for he threw them hard to the *side* of him, and then stood his ground; when, however, he threw water and wetted the man, he plunged into the bath to avoid the whip; not fearing punishment when he merely showed what he could do and did not."

The throwing the stone hard at the door when the keeper was on the other side of it, must have been great fun for him!

I am so sorry to have crushed this enclosed scrawl. It has been carried about in my pocket to be finished, and I see there's no room for the least bit of love at the bottom. So here's a leaf full from the Bois de Boulogne, which is very lovely; and we drive about by night or day, as if all the sky were only the roof of a sapphire palace set with warm stars.

---

CHARTRES, 8th September.

(*Hôtel du Grand Monarque.*)

I suppose *I'm* the grand Monarque! I don't know of any other going just now, but I don't feel quite the right thing

without a wig. Anyhow, I'm having everything my own way just now—weather, dinner, news from Joanie and news from Susie, only I don't like her to be so very, very sad, though it is nice to be missed so tenderly. But I do hope you will like to think of my getting some joy in old ways again, and once more exploring old streets and finding forgotten churches.

The sunshine is life and health to me, and I am gaining knowledge faster than ever I could when I was young.

This is just to say where I am, and that you might know where to write.

The cathedral here is the grandest in France, and I stay a week at least.

---

CHARTRES, 13th September.

I must be back in England by the 1st October, and by the 10th shall be myself ready to start for Brantwood, but may perhaps stay, if Joanie is not ready, till she can come too. Anyway, I trust very earnestly to be safe in the shelter of my own woodside by the end of October. I wonder what you will say of my account of the Five Lovers of Nature\* and seclusion in the last *Nineteenth Century*.

I am a little ashamed to find that, in spite of my sublimely savage temperament, I take a good deal more pleasure in Paris than of old, and am even going back there on Friday for three more days.

We find the people here very amiable, and the French old character unchanged. The perfect cleanliness and unruffledness of white cap is always a marvel, and the market groups exquisite, but our enjoyment of the fair is subdued by pity for a dutiful dog, who turns a large wheel (by walking up it inside) the whole afternoon, producing awful sounds out of a huge grinding organ, of which his wheel and he are the unfortunate instruments. Him we love, his wheel we hate! and in general all French musical instruments. I have become quite sure of one thing on this journey, that the French of

---

\* Rousseau, Shelley, Byron, Turner, and John Ruskin.

to-day have no sense of harmony, but only of more or less lively tune, and even, for a time, will be content with any kind of clash or din produced in time.

The Cathedral service is, however, still impressive.

---

16th February, 1881.

I've much to tell you "to-day"\* of answer to those prayers you prayed for me. But you must be told it by our good angels, for your eyes must not be worn. God willing, you shall see men as trees walking in the garden of God, on this pretty Coniston earth of ours. Don't be afraid, and please be happy, for I can't be, if you are not. Love to Mary, to Miss Rigbye, and my own St. Ursula,† and mind you give the messages *to all three, heartily.*

---

22d April.

I'm not able to scratch or fight to-day, or I wouldn't let you cover me up with this heap of gold; but I've got a rheumatic creak in my neck, which makes me physically stiff and morally supple and unprincipled, so I've put two pounds sixteen in my own "till," where it just fills up some lowering of the tide lately by German bands and the like; and I've put ten pounds aside for Sheffield Museum, now in instant mendicity; and I've put ten pounds aside till you and I can have a talk and you be made reasonable, after being scolded and scratched; after which, on your promise to keep to our old bargain and enjoy spending your little "Frondes" income, I'll be your lovingest again. And for the two pounds ten, and the ten, I am really most heartily grateful, meaning as they do so much that is delightful for both of us in the good done by this work of yours.

I send you Spenser; perhaps you had better begin with

---

\* The motto on Mr. Ruskin's seal. See *Præterita*, Vol. II., p. 286.

† Photograph of Carpaccio's.

the Hymn to Beauty, page 39, and then go on to the Tears ; but you'll see how you like it. It's better than Longfellow ; see line 52—

“The house of blessed gods which men call skye.”

Now I'm going to look out Dr. Kendall's crystal. It *must* be crystal,\* for having brought back the light to your eyes.

12th July.

How delightful that you have that nice Mrs. Howard to hear you say “The Ode to Beauty,” and how nice that you can learn it and enjoy saying it ! † I do not know it myself. I only know that it should be known and said and heard and loved.

I *am* often near you in thought, but can't get over the lake, somehow. There's always somebody to be looked after here, now. I've to rout the gardeners out of the greenhouse, or I should never have a strawberry or a pink, but only nasty gloxinias and glaring fuchsias ; and I've been giving lessons to dozens of people, and writing charming sermons in the “Bible of Amiens ;” but I get so sleepy in the afternoon, I can't pull myself over it.

I was looking at your notes on birds, yesterday. How sweet they are ! But I can't forgive that young blackbird for getting wild again.

*Last day of 1881. And the last letter  
I write on it, with new pen.*

I've lunched on *your* oysters, and am feasting eyes and mind on *your* birds.

What birds ?

---

\* For a present to Dr. Kendall.

† I learned the whole of it by heart, and could then say it without a break. I have always loved it, and in return it has helped me through many a long and sleepless night.—S. B.

Woodcock? Yes, I suppose, and never before noticed the *sheath* of his bill going over the front of the lower mandible, that he may dig comfortably! But the others! the glory of velvet and silk and cloud and light, and black and tau and gold, and golden sand, and dark tresses, and purple shadows, and moors and mists, and night and starlight, and woods and wilds, and dells and deeps, and every mystery of heaven and its finger-work, is in those little birds' backs and wings. I am so grateful. All love and joy to you, and wings to fly with and birds' hearts to comfort, and mine, be to you in the coming year.

---

*Easter Day, 1882.*

I have had a happy Easter morning, entirely bright in its sun and clear in sky; and with renewed strength, enough to begin again the piece of St. Benedict's life, where I broke off to lose these four weeks in London—weeks not wholly lost, neither, for I have learned more and more of what I should have known without lessoning; but I *have* learnt it, from these repeated dreams and fantasies, that we walk in a vain shadow, and disquiet ourselves in vain. So I am for the present, everybody says, quite good, and give as little trouble as possible; but people *will* take it, you know, sometimes, even when I don't give it, and there's a great fuss about me yet. But *you* must not be anxious any more, Susie, for really there is no more occasion at one time than another. All the doctors say I needn't be ill unless I like, and I don't mean to like any more; and as far as chances of ordinary danger, I think one runs more risks in a single railway journey than in the sicknesses of a whole year.

---

*8th June.*

You write as well as ever, and the eyes must surely be better, and it was a joyful amazement to me to hear that Mary was able to read and could enjoy my child's botany. You always have things before other people; will you please

send me some rosemary and lavender as soon as they are out? I am busy on the *Labiata*, and a good deal bothered. Also St. Benedict, whom I shall get done with long before I've made out the nettles he rolled in.

I'm sure I ought to roll myself in nettles, burdocks, and blackthorn, for here in London I can't really think now of anything but flirting, and I'm only much the worse for it afterward.

And I'm generally wicked and weary, like the people who ought to be put to rest. But you'd miss me, and so would Joanie; so I suppose I shall be let stay a little while longer.

---

SALLENCHES, SAVOY, 13th September.

I saw Mont Blanc again to-day, unseen since 1877; and was very thankful. It is a sight that always redeems me to what I am capable of at my poor little best, and to what loves and memories are most precious to me. So I write to *you*, one of the few true loves left. The snow has fallen fresh on the hills, and it makes me feel that I must soon be seeking shelter at Brantwood and the Thwaite.

---

GENOA, Sunday, 24th September.

I got your delightful note yesterday at Turin, and it made me wish to run back through the tunnel directly instead of coming on here. But I had a wonderful day, the Alps clear all the morning all round Italy—two hundred miles of them; and then in the afternoon blue waves of the Gulf of Genoa breaking like blue clouds, thunder-clouds, under groves of olive and palm. But I wished they were my sparkling waves of Coniston instead, when I read your letter again.

What a gay Susie, receiving all the world, like a Queen Susan (how odd one has never heard of a Queen Susan!), only you *are* so naughty, and you never do tell me of any of those nice girls when they're *coming*, but only when they're gone, and I never shall get glimpse of them as long as I live.

But you know you really represent the entire Ruskin school of the Lake Country, and I think these *levées* of yours must be very amusing and enchanting ; but it's very dear and good of you to let the people come and enjoy themselves, and how really well and strong you must be to be able for it.

I am very glad to hear of those sweet, shy girls, poor things.\* I suppose the sister they are now anxious about is the one that would live by herself on the other side of the Lake, and study Emerson and aspire to Buddhism.

I'm trying to put my own poor little fragmentary Ism into a rather more connected form of imagery. I've never quite set myself up enough to impress *some* people ; and I've written so much that I can't quite make out what I am myself, nor what it all comes to.

---

10th January, 1883.

I cannot tell you how grateful and glad I am, to have your lovely note and to know that the Bewick gave you pleasure, and that you are so entirely well now, as to enjoy anything requiring so much energy and attention to this degree. For indeed I can scarcely now take pleasure myself in things that give me the least trouble to look at, but I know that the pretty book and its chosen woodcuts ought to be sent to you, first of all my friends (I have not yet thought of sending it to anyone else), and I am quite put in heart after a very despondent yesterday, past inanely, in thinking of what *I couldn't* do, by feeling what you *can*, and hoping to share the happy Christmas time with you and Susie in future years. Will you please tell my dear Susie I'm going to bring over a drawing to show ! (so thankful that I am still able to draw after these strange and terrible illnesses) this afternoon. I am in hopes it may clear, but dark or bright I'm coming, about half-past three, and am ever your and her most affectionate and faithful servant.

---

\* Florence, Alice, and May Bennett. Florence is gone. Alice and May still sometimes at Coniston, D. G. (March, 1887).

24th September, 1884.

I wandered literally "up and down" your mountain garden—(how beautifully the native rocks slope to its paths in the sweet evening light, Susiesque light!)—with great happiness and admiration, as I went home, and I came indeed upon what I conceived to be—discovered in the course of recent excavations—two deeply interesting thrones of the ancient Abbots of Furness, typifying their humility in that the seats thereof were only level with the ground between two clusters of the earth; contemplating cyclamen, and their severity of penance, in the points of stone prepared for the mortification of their backs; but truly, Susie's seat of repose and meditation I was unable as yet to discern, but propose to myself further investigation of that apple-perfumed paradise, and am ever your devoted and enchanted.

---

1st December.

I gave my fourteenth, and last for this year, lecture this afternoon with vigor and effect, and am safe and well (D. G.), after such a spell of work as I never did before. I have been thrown a week out in all my plans, by having to write two new Lectures, instead of those the University was frightened at. The scientists slink out of my way now, as if I was a mad dog, for I let them have it hot and heavy whenever I've a chance at them.

But as I said, I'm a week late, and though I start for the North this day week, I can't get home till this day fortnight at soonest, but I hope not later than to-morrow fortnight. Very thankful I shall be to find myself again at the little room door.

Fancy Mary Gladstone forgiving me even that second naughtiness! She's going to let me come to see her this week, and to play to me, which is a great comfort.

---

ST. SUSIE, 27th November, 1885.

Behold Athena and Apollo both come to bless you on your birthday, and all the buds of the year to come, rejoice with

you, and your poor cat \* is able to purr again, and is extremely comfortable and even cheerful "to-day." And we will make more and more of the days, won't we, and we will burn our candle at both beginnings instead of both ends, every day beginning two worlds—the old one to be lived over again, the new to learn our golden letters in. Not that I mean to write books in that world. I hope to be set to do something, there; and what lovely "receptions" you will have in your little heavenly Thwaite, and celestial teas. And you won't spoil the cream with hot water, will you, any more?

The whole village is enjoying itself, I hear, and the widows and orphans to be much the better for it, and altogether, you and I have a jolly time of it, haven't we?

---

20th February, 1886.

I haven't had anything nice to send you this ever so long, but here's a little bird's nest of native silver which you could almost live in as comfortably as a tit. It will stand nicely on your table without upsetting, and is so comfortable to hold, and altogether I'm pleased to have got it for you.

---

1st March.

Yes, I knew you would like that silver shrine! and it is an extremely rare and perfect specimen. But you need not be afraid in handling it; if the little bit of spar does come off it, or out of it, no matter.

But of course nobody else should touch it, till you give them leave, and show them how.

I am sorry for poor Miss Brown, and for your not having known the Doctor. He should have come here when I told him. I believe he would have been alive yet, and I never should have been ill.

I believe you know more Latin than I do, and can certainly make more delightful use of it.

Your mornings' ministry to the birds must be remembered for you by the angels who paint their feathers. They will all, one day, be birds of Paradise, and say, when the adverse angel accuses you of being naughty to *some* people, "But we were hungry and she gave us corn, and took care that nobody else ate it."

I am indeed thankful you are better. But you must please tell me what the thing was I said which gave you so much pain. Do you recollect also what the little bit in "Proserpina" was that said so much to you? Were you not thinking of "Fors?"

I am very thankful for all your dear letters always—greatly delighted above all with the squirrel one, and Chaucer. Didn't he love squirrels! and don't I wish I was a squirrel in Susie's pear-trees, instead of a hobbling disconsolate old man, with no teeth to bite, much less crack, anything, and particularly forbidden to eat nuts!

---

Your precious letter, showing me you are a little better, came this morning, with the exquisite feathers, one, darker and lovelier than any I have seen, but please, I still want one not in the least flattened; all these have lost just the least bit of their shell-like bending. You can so easily devise a little padding to keep two strong cards or bits of wood separate for one or two to lie happily in. I don't mind giving you this tease, for the throat will be better the less you remember it. But for all of us, a dark sky is assuredly a poisonous and depressing power, which neither surgery nor medicine can resist. The difference to me between nature as she is now, and as she was ten years ago, is as great as between Lapland and Italy, and the total loss of comfort in morning and evening sky, the most difficult to resist of all spiritual hostility.

1st May, 1886.

What lovely letters you are writing *me* just now, but as for my not having said any pretty things of *you* for a long while, you know perfectly that I am saying them in my heart every day and all day long! I can't find a shell marble, but I send you (to look at, it's too ugly for a present) a shell *agate* made of shells, *in* a shell, as if in a pot!

And I send you for a May-day gift, with all loving May, June, and December, and January wishes, such a pretty green and white stone gone maying, as one doesn't often see with the rest of the Jacks-in-the-green.

And I'm ever (or at least for a while yet) your curled up old cat. I shall come out of curl and get frisky when the hyacinths come out. Telegram just come from Ireland: "Rose queen elected; sweetly pretty, and all most happy."

22d May, 1886.

Of course the little pyramid in crystal is a present. With that enjoyment of Pinkerton,\* you will have quite a new indoors interest, whatever the rain may say.

How very lucky you asked me what basalt was! How much has come out of it (written in falling asleep)? I've been out all the morning and am so sleepy.

But I've written a nice little bit of "Præterita" before I went out, trying to describe the Rhone at Geneva. I think Susie will like it, if nobody else.

That "not enjoying the beauty of things" goes ever so much deeper than mere blindness. It is a form of antagonism, and is essentially Satanic. A most strange form of demonology in otherwise good people, or shall we say in "good people?" You know *we* are not good at all, are we, now?

I don't think you've got any green in your mica, I've sent you a bit enclosed with some jealous spots in.

---

\* Pinkerton on Petralogy.

*Last day of May.*

I'm bringing to-day with the strawroots, twelve more sketches in folio, and the plan is that out of those, making with the rest twenty-four, you choose twelve to keep next week, with the new folio of twelve to be then brought, and you then put aside twelve to be given back in exchange for it; then next to next week you choose twelve out of that twenty-four, and then next week twelve out of its twenty-four, and then when I can't send any more you choose the one to keep out of the last lot, which you see will then be the creamiest cream, not to say cheesiest cheese of the rest! Now isn't that a nice amusing categorical, cataloquizical, catechismic, cat-cataceous plan?

---

*7th June.*

You have been what Joanie calls a "Doosie Dandy" about those dozens of sketches! You're always to have twenty-four on hand, then those I send to-day are to stay with the twelve you have, till next Monday, and you'll have time then to know which you like best to keep. Next Monday I send *another* twelve and take back the twelve you've done with.

It was very beautiful yesterday looking from here.

I'm pretty well, and writing saucy things to everybody.

I told a Cambridge man yesterday that he had been clever enough to put into a shilling pamphlet all the mistakes of his generation.

---

*6th November.*

Do you know how to make sugar candy? In my present abject state the only way of amusing myself I can hit on is setting the girls of the school to garden and cook! By way of beginning in cooking, I offered to pay for any quantity of wasted sugar if they could produce me a crystal or two of sugar candy. (On the way to twelfth cakes, you know, and sugar animals. One of Francesca's friends made her a life-size Easter lamb in sugar.) The first try this morning was brought me in a state of sticky jelly.

And after sending me a recipe for candy, would you please ask Harry to look at the school garden? I'm going to get the *boys* to keep that in order; but if Harry would look at it and order some mine gravel down for the walks, and, with Mr. Brocklebank's authority (to whom I have spoken already), direct any of the boys who are willing to form a corps of little gardeners, and under Harry's orders make the best that can be made of that neglected bit of earth, I think you and I should enjoy hearing of it.

Mr. Kendall is a Delphic oracle. Do you think you could take sherry instead of port? My sherry is—well, I only wish Falstaff were alive to tell you what it is, or Will himself; but shall I send you a bottle? And mind you don't mind the smarting if Dr. K. gives you things to make you cry. And I'll be so good, and not make you cry for a week at least.

---

27th November, 1886.

For once, I have a birthday stone for you, a little worth your having, and a little gladsome to me in the giving. It is blue like the air that you were born into, and always live in. It is as deep as gentians, and has their gleams of green in it, and it is precious all through within and without, as Susie herself is. Many and many returns of all the birthdays that have gone away, and crowds yet of those that never were here before.

---

### MISCELLANEOUS.

I never heard the like, my writing good! and just now!! If you only saw the wretched notes on the back of lecture leaves.

But I am so very glad you think it enduring, and it is so nice to be able to give you a moment's pleasure by such a thing. I'm better to-day, but still extremely languid. I believe that there is often something in the spring which weakens one by its very tenderness; the violets in the wood

send one home sorrowful that one isn't worthy to see them, or else, that one isn't one of them.

It is mere Midsummer dream in the wood to-day.

You could not possibly have sent me a more delightful present than this *Lychuis*; it is the kind of flower that gives me pleasure and health and memory and hope and everything that Alpine meadows and air can. I'm getting better generally, too. The sun *did* take one by surprise at first.

How blessedly happy Joanie and the children were yesterday at the 'Thwaite! I'm coming to be happy myself there to-morrow (D. V.).

Here are the two bits of study I did in Malham Cove; the small couples of leaves are different portraits of the first shoots of the two geraniums. I don't find in any botany an account of their little round side leaves, or of the definite central one above the branching of them.

Here's your lovely note just come. I am very thankful that "Venice" gives you so much pleasure.

I *have*, at least, one certainty, which few authors could hold so surely, that no one was ever harmed by a book of mine; they may have been offended, but have never been discouraged or discomfited, still less corrupted.

*There's* a saucy speech for Susie's friend. You won't like me any more if I begin to talk like that.

The nice bread is come. May I come to tea again to-morrow?

I never send my love to Miss Beaver, but I do love her for all that.

A sapphire is the same stone as a ruby; both are the pure earth of clay crystallized. No one knows why one is red and the other blue.

A diamond is pure *coal* crystallized.

An opal, pure flint—in a state of fixed *jelly*.

I'll find a Susie-book on them.

I'll send II. Carlyle. I am so very glad you enjoy it.

I'm in a great passion with the horrid people who write

letters to tease my good little Susie. *I won't have it.* She shall have some more stones to-morrow.

I must have a walk to-day, and can't give account of them, but I've looked them out. It's so very nice that you like stones. If my father, when I was a little boy, would only have given me stones for bread, how I should have thanked him, but one doesn't expect such a taste in little girls.

What infinite power and treasure you have in being able thus to enjoy the least things, yet having at the same time all the fastidiousness of taste and imagination which lays hold of what is greatest in the least, and best in all things!

Never hurt your eyes by writing; keep them wholly for admiration and wonder. I hope to write little more myself of books, and to join with you in joy over crystals and flowers in the way we used to do when we were both more children than we are.

I have been rather depressed by that tragic story of the codling. I hoped the thief of that apple has suffered more than Eve, and fallen farther than either she or Adam.

Joan had to be out early this morning, and I won't let her write more, for it's getting dark; but she thinks of you and loves you, and so do I, every day more and more.

---

TO MISS BEEVER.

I am ashamed not to have sent you a word of expression of my real and very deep feelings of regard and respect for you, and of my, not *fervent* (in the usual phrase, which means only hasty and ebullient), but serenely *warm*, hope that you may keep your present power of benevolent happiness to length of many days to come. But I hope you will sometimes take the simpler view of the little agate box than that of birthday token, and that you will wonder sometimes at its labyrinth of mineral vegetable! I assure you there is nothing in all my collection of agates in its way quite so perfect as the little fiery forests of dotty trees in the corner of the

piece which forms the bottom. I ought to have set it in silver, but was always afraid to trust it to a lapidary.

What you say of the Greek want of violets is also very interesting to me, for it is one of my little pet discoveries that Homer means the blue iris by the word translated "violet."

I am utterly sorry not to come to see you and Susie before leaving for town, but can't face this bitter day. I hope and solemnly propose to be back in a week.

---

*Thursday morning.*

I'm ever so much better, and the jackdaw has come. But why wasn't I there to meet his pathetic desire for art knowledge? To think of that poor bird's genius and love of scarlet ribbons, shut up in a cage! What it might have come to!

If ever my St. George's schools come to any perfection, they shall have every one a jackdaw to give the children their first lessons in arithmetic. I'm sure he could do it perfectly. "Now, Jack, take two from four, and show them how many are left." "Now, Jack, if you take the teaspoon out of this saucer, and put it into *that*, and then if you take two teaspoons out of two saucers, and put them into this, and then if you take one teaspoon out of this and put it into that, how many spoons are there in this, and how many in that?" —and so on.

Oh, Susie, when we *do* get old, you and I, won't we have nice schools for the birds first, and then for the children?

That photograph is indeed like a visit; how thankful I am that it is still my hope to get the real visit some day!

I was yesterday, and am always, certainly at present, very unwell, and a mere trouble to my Joanies and Susies and all who care for me. But I'm painting another bit of moss which I think Susie will enjoy, and hope for better times.

Did you see the white cloud that stayed quiet for three hours this morning over the Old Man's summit? It was one

of the few remains of the heaven one used to see. The heaven one had a Father in, not a raging enemy.

I send you Rogers' "Italy," that is no more. I do think you'll have pleasure in it.

---

I've been made so miserable by a paper of Sir J. Lubbock's on flowers and insects, that I must come and whine to you. He says, and really as if he knew it, that insects, chiefly bees, entirely originate flowers; that all scent, color, pretty form, is owing to bees; that flowers which insects don't take care of, have no scent, color, nor honey.

It seems to me that it is likelier that the flowers which have no scent, color, nor honey, don't get any attention from the bees.

But the man really knows so much about it, and has tried so many pretty experiments, that he makes me miserable.

So I'm afraid you're miserable too. Write to tell me about it all.

It is very lovely of you to send me so sweet a note when I have not been near you since the tenth century. But it is all I can do to get my men and my moor looked after; they have both the instinct of doing what I don't want, the moment my back's turned; and then there has not been light enough to know a hawk from a hand-saw, or a crow from a ptarmigan, or a moor from a meadow. But how much better your eyes must be when you can write such lovely notes!

I don't understand how the strange cat came to love you so quickly, after one dinner and a rest by the fire! I should have thought an ill-treated and outcast animal would have regarded everything as a trap, for a month at least—dined in tremors, warmed itself with its back to the fire, watching the door, and jumped up the chimney if you stepped on the rug.

The pheasant had come from Lachin-y-gair, with two others, which I've been eating hot, cold, broiled, and devilled, and with your oysters for lunch. Mattie, Diddie, and Joanie have fine times of it together, they say, and that I ought to be there instead of here. Do you think so?

If you only knew the good your peacock's feathers have done me, and if you could only see the clever drawing I'm making, of one from the blue breast! You know what lovely little fern or equisetum stalks of 'sapphire the filaments are; they beat me so, but they're coming nice.

Joanie says she thinks you are not well; and I'm easily frightened about you, because you never take any care of yourself, and will not do what Mary or Joan or I bid you, you naughty little thing.

You won't even submit quietly to my publishing arrangements, but I'm resolved to have the book ("Fronde") remain yours altogether; you had all the trouble with it, and it will help me ever so much more than I could myself.

---

That is so intensely true what you say about Turner's work being like nature's in its slowness and tenderness. I always think of him as a great natural force in a human frame.

So nice all you say of the "Ethics!" And I'm a monster of ingratitude, as bad as the Dragon of Wantley. Don't like Dr. Brown's friend's book at all. It's neither Scotch nor English, nor fish nor flesh, and it's tiresome.

I'm in the worst humor I've been in this month, which is saying much; and have been writing the wickedest "Fors" I ever wrote, which is saying more; you will be so angry.

---

I'm so very glad you will mark the bits you like, but are there not a good many here and there that you *don't* like?—I mean that sound hard or ironical. Please don't mind them. They're partly because I never count on readers who will really care for the prettiest things, and it gets me into a bad habit of expressing contempt which is not indeed any natural part of my mind.

It pleases me especially that you have read "The Queen of the Air." As far as I know, myself, of my books, it is the

most useful and careful piece I have done. But that again—did it not shock you to have a heathen goddess so much believed in? (I've believed in English ones long ago.) If you can really forgive me for "The Queen of the Air," there are all sorts of things I shall come begging you to read some day.

21st July.

I'm always looking at the Thwaite, and thinking how nice it is that you are there. I think it's a little nice, too, that I'm within sight of you, for if I hadn't broken, I don't know how many not exactly promises, but nearly, to be back at Oxford by this time, I might have been dragged from Oxford to London, from London to France, from France who knows where? But I'm here, and settled to produce, as soon as possible, the following works—

1. New number of "Love's Meinie," on the Stormy Petrel.
2. New ditto of "Proserpina," on sap, pith, and bark.
3. New ditto of "Deucalion," on clouds.
4. New "Fors," on new varieties of young ladies.
5. Two new numbers of "Our Fathers," on Brunehaut, and Bertha her niece, and St. Augustine and St. Benedict.
6. Index and epilogue to four Oxford lectures.
7. Report and account of St. George's Guild.

And I've had to turn everything out of every shelf in the house, for mildew and moths.

And I want to paint a little bank of strawberry leaves.

And I've to get a year's dead sticks out of the wood, and see to the new oat field on the moor, and prepare lectures for October!

I'm so idle. I look at the hills out of bed, and at the pictures off the sofa. Let us *both* be useless beings; let us be butterflies, grasshoppers, lambs, larks, anything for an easy life. I'm quite horrified to see, now that these two have come back, what a lot of books I've written, and how cruel I've been to myself and everybody else who ever has to read them. I'm too sleepy to finish this note.

13th June.

I do not know when I have received, or how I *could* receive, so great an encouragement in all my work, as I do in hearing that you, after all your long love and watchfulness of flowers, have yet gained pleasure and insight from "Proserpina" as to leaf structure. The examples you send me are indeed admirable. Can you tell me the exact name of the plant, that I may quote it?

Yes, and the weather also is a great blessing to me—so lovely this morning.

---

I have been simply ashamed to write without being able to say I was coming; and this naughty Joanie has put us all two months behindhand, and now Brantwood still seems as far away as at Florence. (It never really seems far away, anywhere.)

But you will like to know that I'm very well, and extremely good, and writing beautiful new notes to "Modern Painters," and getting on with "Our Fathers." And what lovely accounts I have of "Frondes" from Allen.

I really think *that* one book has made all our business lively.

And I'm so delighted with the new brooch—the one Mary gave to Joan. I never saw a more lovely pearl in any queen's treasury, nor more exquisite setting. Joan and I have no end of pleasure in playing with it, and I vainly try to summon philosophy enough to convince either her or myself, that dew is better than pearls, and moss than emeralds.

I think my days of philosophy must be over. I certainly shall not have enough to console me, if I don't get to Brantwood soon. The fog here is perpetual, and I can only see, and just that, where the edge of my paper is leaving me still room to say how lovingly and faithfully I am

Yours, etc.

---

You won't refuse to give house room or even parlor room again to the *first* volume of your "Stones." It has your name

in it, and feather sketches, which *I* like the memory of doing, and I found another in my stores to make up the set. I have to-day, regretfully, but in proud satisfaction, sent to Mr. Brown's friend, Miss Lawley. You will be thinking I'm never going to write any *new* books more, I've promised so long and done nothing. But No. 2 and No. 4, of "Amiens" have been going on at once, and No. 3 and No. 4 of "Love's Meinie," and No. 7 of "Proserpina" had to be done in the middle of all four, like the stamens in a tormentilla. And now my total tormentilla is all but out. But "all-but" is a long, long word with my printers and me. Still, something has been done every day, and not ill done, lately; and Joanie tells me your friends enjoyed their little visit, as I did seeing them. And Joanie is well, and literally as busy as a bee, and sometimes tumbles down at last on the sofa just at bedtime, like the rather bumbly bees in the grass when they've been too busy. And I'm pretty well, and asking young ladies to come and see me.

---

I'm getting steadily better, and breathing the sunshine a little again in soul and lips. But I always feel so naughty after having had morning prayers, and that the whole house is a sort of little Bethel that I've no business in.

I'm reading history of early saints too, for my Amiens book, and feel that I ought to be scratched, or starved, or boiled, or something unpleasant, and I don't know if I'm a saint or a sinner in the least, in mediæval language. How did saints feel themselves, I wonder, about their saintship!

---

It is *such* a joy to hear that you enjoy anything of mine, and a double joy to have your sympathy in my love of those Italians. How I wish there were more like you! What a happy world it would be if a quarter of the people in it cared a quarter as much as you and I do, for what is good and true!

That Nativity is the deepest of all. It is by the master of Botticelli, you know ; and whatever is most sweet and tender in Botticelli he owes to Lippi.

But, do you know, I quite forget about Cordelia, and where I said it ! please keep it till I come. I hope to be across to see you to-morrow.

They've been doing photographs of me again, and I'm an orang-outang as usual, and am in despair. I thought with my beard I was beginning to be just the least bit nice to look at. I would give up half my books for a new profile.

What a lovely day since twelve o'clock ! I never saw the lake shore more heavenly.

I am very thankful that you like this St. Mark's so much, and do not feel as if I had lost power of mind. I think the illness has told on me more in laziness than foolishness. I feel as if there was as much *in* me as ever, but it is too much trouble to say it. And I find myself reconciled to staying in bed of a morning to a quite woful extent. I have not been affected so much by melancholy, being very thankful to be still alive, and to be able to give pleasure to some people—foolish little Joanies and Susies, and so on.

You have greatly helped me by this dear little note. And the bread's all right, brown again, and I'm ready for asparagus of any stoutness, there ! Are you content ? But my new asparagus is quite *visible* this year, though how much would be wanted for a dish I don't venture to count, but must be congratulated on its definitely stalky appearance.

I was over the water this morning on school committee. How bad I have been to let those poor children be tormented as they are all this time ! I'm going to try and stop all the spelling and counting and catechising, and teach them only—to watch and pray.

The oranges make me think I'm in a castle in Spain !

Your letters always warm me a little, not with laughing, but with the soft glow of life, for I live mostly with "la mort dans l'âme." (It is curious that the French, whom one thinks of as slight and frivolous, have this true and deep expression for the forms of sorrow that kill, as opposed to those that

discipline and strengthen.) And your words and thought just soften and warm like west wind.

It is nice being able to please you with what I'm writing, and that you can tell people I'm not so horrid.

Here's the "Fors" you saw the proof of, but *this* isn't quite right yet.

The Willy \* quotations are very delightful. Do you know that naughty "Cowley" at all? There's all kind of honey and strawberries in him.

It is bitter cold here these last days. I don't stir out, but must this afternoon. I've to go out to dinner and work at the Arundel Society. And if you only knew what was in my thoughts you would be *so* sorry for me, that I can't tell you.

---

CORPUS CHRISTI COLLEGE, OXFORD.

What a sad little letter! written in that returned darkness.

How can *you* ever be sad, looking forward to eternal life with all whom you love, and God over all.

It is only so far as I lose hold of that hope, that anything is ever a trial to me. But I can't think how I'm to get on in a world with no Venice in it.

You were quite right in thinking I would have nothing to do with lawyers. Not one of them shall ever have so much as a crooked sixpence of mine, to save him from being hanged, or to save the Lakes from being filled up. But I really hope there may be feeling enough in Parliament to do a right thing without being deafened with lawyers' slang.

I have never thanked you for the snowdrops. They bloomed here beautifully for four days. Then I had to leave them to go and lecture in London. It was nice to see them, but my whole mind is set on finding whether there is a country where the flowers do not fade. Else there is no spring for me. People liked the lecture, and so many more wanted to come than could get in, that I had to promise to give another.

---

\* Shakespeare.

Here's your little note, first of all. And if you only knew how my wristbands are plaguing me you'd be very sorry. They're too much starched, and *would* come down like mittens; and now I've turned them up, they're just like two horrid china cups upside down, inside my coat, and I'm afraid to write for fear of breaking them. And I've a week's work on the table, to be done before one o'clock, on pain of uproar from my friends, execution from my enemies, reproach from my lovers, triumph from my haters, despair of Joanie, and—what from Susie? I've had such a bad night, too; woke at half-past three and have done a day's work since then—composing my lecture for March, and thinking what's to become of a godson of mine whose—

Well, never mind. I needn't give *you* the trouble, poor little Susie, of thinking too. I wonder if that jackdaw story will come to-day.

This must be folded up and directed all right at once, or I'm sure it will never go. Love to Mary, very much, please, and three times over; I missed these two last times.

I'm going to Oxford to-day (D.V.), really quite well, and rather merry. I went to the circus with my new pet, and saw lovely riding and ball play; and my pet said the only drawback to it all, was that she couldn't sit on both sides of me. And then I went home to tea with her, and gave mamma, who is Evangelical, a beautiful lecture on the piety of dramatic entertainments, which made her laugh, whether she would or no; and then I had my Christmas dinner in advance with Joanie and Arfie and Stacy Marks, and his wife and two pretty daughters, and I had six kisses—two for Christmas, two for New Year's Day, and two for Twelfth Night—and everybody was in the best humor with everybody else. And now my room is ankle deep in unanswered letters, mostly on business, and I'm going to shovel them up and tie them in a parcel labelled "Needing particular attention;" and then that will be put into a cupboard in Oxford, and I shall feel that everything's been done in a business-like way.

That badger's beautiful. I don't think there's any need for such beasts as *that* to turn Christians.

I am indeed most thankful you are well again, though I never looked on that deafness very seriously; but if you *like* hearing watches tick, and boots creak, and plates clatter, so be it to you, for many and many a year to come. I think I should so like to be deaf, mostly, not expected to answer anybody in society, never startled by a bang, never tortured by a railroad whistle, never hearing the nasty cicads in Italy, nor a child cry, nor an owl. Nothing but a nice whisper into my ear, by a pretty girl. Ah, well, I'm very glad I can chatter to you with my weak voice, to my heart's content; and you must come and see me soon, now. All that you say of "Proserpina" is joyful to me. What a Susie you are, drawing like that! and I'm sure you know Latin better than I do.

---

I am better, but not right yet. There is no fear of sore throat, I think, but some of prolonged tooth worry. It is more stomachic than coldic, I believe, and those tea-cakes are too crisply seductive. What *can* it be, that subtle treachery that lurks in tea-cakes, and is wholly absent in the rude honesty of toast?

The metaphysical effect of tea-cake last night was, that I had a perilous and weary journey in a desert, in which I had to dodge hostile tribes round the corners of pyramids.

A very sad letter from Joanie tells me she was going to Scotland last night, at which I am not only very sorry, but very cross.

A chirping cricket on the hearth advises me to keep my heart up. Foolish hedgehog, not to come for that egg. Don't let Abigail be cast down about her tea-cakes. An "honest" egg is just as destructive of my peace of mind.

---

Your happy letters (with the sympathetic misery of complaint of dark days) have cheered me as much as anything could do.

The sight of one of my poor "Companions of St. George," who has sent me, not a widow's but a parlor-maid's (an old schoolmistress) "all her living," and whom I found last

night, dying, slowly and quietly, in a damp room, just the size of your study (which her landlord won't mend the roof of), by the light of a single tallow candle—dying, I say, *slowly*, of consumption, not yet near the end, but contemplating it with sorrow, mixed partly with fear, lest she should not have done all she could for her children!

The sight of all this and my own shameful comforts, three wax candles and blazing fire and dry roof, and Susie and Joanie for friends!

Oh, me, Susie, what *is* to become of me in the next world, who have in this life all my good things!

---

What a sweet, careful, tender letter this is! I re-enclose it at once for fear of mischief, though I've scarcely read, for indeed my eyes are weary, but I see what gentle mind it means.

Yes, you will love and rejoice in your Chaucer more and more. Fancy, I've never time, now, to look at him—obliged to read even my Homer and Shakespeare at a scramble, half missing the sense—the business of life disturbs one so.

---

Will you please thank Miss Watson for the "Queen's Wake." I should like to tell her about Hogg's visit to Herne Hill, and my dog Dash's reception of him; but I'm never pleased with the Shepherd's bearing to Sir W. Scott, as one reads it in "Lockhart."

There's no fear of Susie's notes ever being less bright as long as she remains a child, and it's a long while yet to look forward to.

I had such a nice dinner all alone with Joanie, yesterday, and Sarah waiting. Joanie coughed and startled me. I accused her of having a cold. To defend herself she ~~said~~ (the mockery), Perhaps she oughtn't to kiss me. I said, "Couldn't Sarah \* try first, and see if any harm comes of

---

\* Our Herne Hill parlor-maid for four years. One of quite the brightest and handsomest types of English beauty I ever saw, either in life, or fancied in painting.

it?" (Sarah highly amused.) For goodness' sake don't tell Kate.

I've only a crushed bit of paper to express my crushed heart upon. It's the best!

That *you* should be thinking, designing, undermining, as Mrs. Somebody says in that disgusting "Mill on the Floss," to send to London for port. And *my* port getting crusty, dusty, cobwebby, and generally like its master, just because it's no use to nobody. *I* don't drink it; Joan don't; Arfie's always stuck up with his claret and French vinegaret things (gave him all his rheumatism, *I* say); and now here's my Susie sending to London, and passing me by and my sorrowful bin. I didn't think she'd have bin and done it. Even the Alpine plants of which I hear, as darlings, don't at present console me.

Just you try such a trick again, that's all!

---

HERNE HILL.

Here's your letter first thing in the morning, while I'm sipping my coffee in the midst of such confusion as I've not

often achieved at my best. The little room, which I think is as nearly as possible the size of your study, but with a lower roof, has to begin with—A, my bed; B, my basin stand; C, my table; D, my chest of drawers; thus arranged in relation to E, the window (which has still its dark bars to prevent the little boy getting out); F, the fireplace; G, the golden

or mineralogical cupboard; and H, the grand entrance. The two dots with a back represent my chair, which is properly solid and not *un-easy*. Three others of lighter disposition find place somewhere about. These, with the chimney-piece and drawer's head, are covered, or rather heaped, with all they can carry, and the morning is just looking in, astonished to see what is expected of it, and smiling—(yes, I may fairly say it is smiling, for it is cloudless for its part above the smoke of the horizon line)—at Sarah's hope and mine, of ever getting that room into order by twelve o'clock. The chimney-piece with its bottles, spoons, lozenge boxes, matches, candlesticks, and letters jammed behind them, does appear to me entirely hopeless, and this the more because Sarah, when I tell her to take a bottle away that has a mixture in it which I don't like, looks me full in the face, and says "she *won't*, because I may want it." I submit, because it is so nice to get Sarah to look one full in the face. She really is the prettiest, round-faced, and round-eyed girl I ever saw, and it's a great shame she should be a housemaid; only I wish she would take those bottles away. She says I'm looking better to-day, and I think I'm feeling a little bit more—no, I mean, a little bit less—demoniacal. But I still can do that jackdaw beautifully.

---

I am quite sure you would have felt like Albert Dürer, had you gone on painting wrens.

The way Nature and Heaven waste the gifts and souls they give and make, passes all wonder. You might have done anything you chose, only you were too modest.

No, I never *will* call you my dear lady; certainly, if it comes to that, something too dreadful will follow.

---

That is so very nice, isn't it, about the poor invalid and "Frondes." It is terrible that doctors should say such things, but on the whole, when they feel them strongly they should

speak, else it would be impossible for them to give trust-worthy comfort and healing hope.

I wish that peacock of yours would teach me to brush *my* hair before I come to dinner, for I am, though

Ever your loving

J. R.,

not fit to be seen lately, with fighting midges in my hair.

I am most interested in your criticism of "Queen Mary." I have not read it, but the choice of subject is entirely morbid and wrong, and I am sure all you say must be true. The form of decline which always comes on mental power of Tennyson's passionately sensual character, is always of seeing ugly things, a kind of delirium tremens. Turner had it fatally in his last years.

I am so glad you enjoy writing to me more than anyone else. The book you sent me of Dr. John Brown's on books, has been of extreme utility to me, and contains matter of the deepest interest. Did you read it yourself? If not, I must lend it to you.

I am so glad also to know of your happiness in Chaucer. Don't hurry in reading. I will get you an edition for your own, that you may mark it in peace.

---

I send you two books, neither I fear very amusing, but on my word, I think books are always dull when one really most wants them. No, other people don't feel it as you and I do, nor do the dogs and ponies, but oughtn't we to be thankful that we *do* feel it. The thing I fancy we are both wanting in, is a right power of enjoying the past. What sunshine there *has* been even in this sad year! I have seen beauty enough in one afternoon, not a fortnight ago, to last me for a year if I could rejoice in memory.

But I believe things are a little better at Seascale. Arfies' gone off there, but I have a painter friend, Mr. Goodwin, coming to keep me company, and I'm a little content in this worst of rainy days, in hopes there *may* be now some clearing for him.

Our little kittens pass the days of their youth up against

the wall at the back of the house, where the heat of the oven comes through. What an existence! and yet with all my indoor advantages

I am your sorrowful and repining

J. R.

I am entirely grateful for your letter, and for all the sweet feelings expressed in it, and am entirely reverent of the sorrow which you feel at my speaking thus. If only all were like you. But the chief sins and evils of the day are caused by the Pharisees, exactly as in the time of Christ, and "they make broad their phylacteries" in the same way, the Bible superstitiously read, becoming the authority for every error and heresy and cruelty. To make its readers understand that the God of their own day is as living, and as able to speak to them directly as ever in the days of Isaiah and St. John, and that He would now send messages to His Seven Churches, if the Churches would hear, needs stronger words than any I have yet dared to use, against the idolatry of the historical record of His messages long ago, perverted by men's forgetfulness, and confused by mischance and misapprehension; and if instead of the Latin form "Scripture" we put always "writing" instead of "written" or "write" in one place, and "Scripture," as if it meant our English Bible, in another, it would make such a difference to our natural and easy understanding the range of texts.

The peacock's feathers are marvellous. I am very glad to see them. I never had any of their downy ones before. My compliments to the bird, upon them, please.

I have had a tiring forenoon in the house with dark air, and must go out; and poor Susie will not only scarce find a turned leaf, but an empty line in the unturned one.

But children always like to have letters about anything.

I found a strawberry growing just to please itself, as red as a ruby, high up on Yewdale crag yesterday, in a little corner of rock all its own; so I left it to enjoy itself. It seemed as happy as a lamb, and no more meant to be eaten.

Yes, those are all sweetest bits from Chaucer (the pine new to me); your own copy is being bound. And all the Richard—but you must not copy out the Richard bits, for I like all my Richard alike from beginning to end. Yes, my “seed pearl” bit is pretty, I admit; it was like the thing. The cascades here, I’m afraid, come down more like seed oatmeal.

---

Now it’s very naughty of you, Susie, to think everybody else would have ate that strawberry. Mr. Severn and Mr. Patmore were both with me; and when *I* said, “Now, I don’t believe three other people could be found who would let that alone,” Mr. Patmore was quite shocked, and said, “I’m quite sure nobody but *you* would have thought of eating it!”

Ever your loving, gormandising (Patmore knows me!)

J. R.

---

Actually I’ve never thanked you for that exquisite cheese. The mere look of it puts one in heart like a fresh field. I never tasted anything so perfect in its purity of cream nature. The Chaucer bits, next to the cheese, are delicious, too.

About the railroad circular, I knew and know nothing but that I signed my name. They may have printed said circular perhaps.

At all events, most thankful should I be to anyone who would help in such cause. I’m at work on a piece of moss again, far better, I hope likely to be, than the one you saw.

---

I believe in my hasty answer to your first kind letter I never noticed what you said about Aristophanes. If you will indeed send me some notes of the passages that interest you in the “Birds,” it will not only be very pleasant to me, but quite seriously useful, for the “Birds” have always been to me so mysterious in that comedy, that I have never got the good of it which I know is to be had. The careful study of

it, put off from day to day, was likely enough to fall into the great region of my despair, unless you had chanced thus to remind me of it.

Please, if another chance of good to me come in your way, in another brown spotty-purple peacock's feather, will you yet send it to me, and I will be always your most grateful and faithful

J. R.

---

HERNE HILL.

It is so very sweet and good of you to write such lovely play letters to Joanie and me ; they delight and comfort us more than I can tell you.

What translation of Aristophanes is that? I must get it. I've lost I can't tell you how much knowledge and power through false pride in refusing to read translations, though I couldn't read the original without more trouble and time than I could spare ; nevertheless, you must not think this English gives you a true idea of the original. The English is much more "English" in its temper than its words. Aristophanes is far more dry, severe, and concentrated ; his words are fewer, and have fuller flavor ; this English is to him what currant jelly is to currants. But it's immensely useful to me. Yes, that is very sweet about the kissing. I have done it to rocks often, seldom to flowers, not being sure that they would like it.

I recollect giving a very reverent little kiss to a young sapling that was behaving beautifully in an awkward chink, between two great big ones that were ill-treating it. Poor me (I'm old enough, I hope, to write grammar my own, way), my own little self, meantime, never by any chance got a kiss when I wanted it—and the better I behaved, the less chance I had, it seemed.

---

I never thought the large packet was from you ; it was thrown aside with the rest till evening, and only opened *then* by chance. I was greatly grieved to find what I had thus left unacknowledged. The drawings are entirely beautiful and

wonderful, but, like all the good work done in those bygone days (Donovan's own book being of inestimable excellence in this kind), they affect me with profound melancholy in the thought of the loss to the entire body of the nation of all this perfect artistic capacity, and sweet will, for want of acknowledgment, system, and direction. I must write a careful passage on this matter in my new Elements of Drawing. Your drawings have been sent me not by you, but by my mistress Fors, for a text. It is no wonder, when you can draw like this, that you care so much for all lovely nature. But I shall be ashamed to show you my peacock's feather; I've sent it, however.

What a naughty child you are to pick out all that was useless and leave all that's practical and useful for "Frondes!" You ought to have pounced on all the best bits on drawing from nature!

---

It is *very* sweet of you to give me your book, but I accept it at once most thankfully. It is the best type I can show of the perfect work of an English lady in her own simple peace of enjoyment and natural gift of truth, in her sight and in her mind. And many pretty things are in my mind and heart about it, if my hands were not too cold to shape words for them. The book shall be kept with my Bewicks; it is in no-wise inferior to them in fineness of work. The finished proof of next "Proserpina" will, I think, be sent me by Saturday's post. Much more is done, but this number was hindered by the revisal of the Dean of Christ Church, which puts me at rest about mistakes in my Greek.

---

It is a great joy to me that *you* like the Wordsworth bits; there are worse coming (unless Diddie, perhaps, begs them off); but I've been put into a dreadful passion by two of my cleverest girl pupils "going off pious!" It's exactly like a nice pear getting "sleepy;" and I'm pretty nearly in the worst temper I *can* be in, for W. W. But what *are* these blessed feathers? Everything that's best of grass and clouds

and chrysoprase. What incomparable little creature wears such things, or lets fall? The "fringe of flame" is Carlyle's, not mine, but we feel so much alike, that you may often mistake one for the other now.

You cannot in the least tell what a help you are to me, in caring so much for my things and seeing what I try to do in them. You are quite one of a thousand for sympathy with everybody, and one of the ten times ten thousand, for special sympathy with my own feelings and tries. Yes, that second column is rather nicely touched, though I say it, for hands and eyes of sixty-two; but when once the wind stops I hope to do a bit of primrose ground that will be richer.

---

Here, not I, but a thing with a dozen of colds in its head, am!

I caught one cold on Wednesday last, another on Thursday, two on Friday, four on Saturday, and one at every station between this and Ingleborough on Monday. I never was in such ignoble misery of cold. I've no cough to speak of, nor anything worse than usual in the way of sneezing, but my hands are cold, my pulse nowhere, my nose tickles and wrings me, my ears sing—like kettles, my mouth has no taste, my heart no hope of ever being good for anything, any more. I never passed such a wretched morning by my own fireside in all my days, and I've quite a fiendish pleasure in telling you all this, and thinking how miserable you'll be too. Oh, me, if I ever get to feel like myself again, won't I take care of myself.

---

Seven of the eleven colds are better, but the other four are worse, and they were the worst before, and I'm such a wreck and rag and lump of dust being made mud of, that I'm ashamed to let the maids bring me my dinner.

Your contemptible, miserable, beyond pitiable, past deplorable

J. R.

The little book is very lovely, all of it that is your *own*. The religion of it you know is, anybody's, what my poor little Susie was told when she was a year or two younger than she is now.

What we should all try to do, is to find out something certain about God, for *ourselves*.

---

The feathers nearly made me fly away from all my Psalters and Exoduses, to you, and my dear peacocks. I wonder, when Solomon got his ivory and apes and peacocks, whether he ever had time to look at them. He couldn't always be ordering children to be chopped in two. Alas, I suppose his wisdom, in England of to-day, would have been taxed to find out which mother lied in saying which child *wasn't* hers!

But you *will* like my psalter, I'm sure. Diddie wouldn't copy the wickedest bits, so I was obliged to leave them out!

Oh, dear, I feel *so* wicked to-day, I could even tease *you*, by telling you Joanie was better, and how it came to pass. I mustn't say more, but that I love you ever so much, and am ever, etc.

I began this note especially to tell you how delighted I was with your idea of the flower show; how good it will be for the people, and how nice for you!

I've been writing to Miss R. again, and Miss L.'s quite right to stay at home. "She thinks I have an eagle's eye." Well, what else should I have, in day time? together with my cat's eye in the dark? But you may tell her I should be very sorry if my eyes were *no* better than eagles'! "Doth the eagle know what is in the pit?" I do.

---

I'm only going away for Sunday, coming back on the Monday, and going to stay for a week longer. Mr. MacD. has begun a pretty drawing of the study (and really depends on my assistant criticism); and Diddie, I think, will enjoy her dinner with you to-morrow better than if I had gone for

good and all ; and I think I shall enjoy my Sunday at Sheffield, if I had gone for evil and all. I've turned the page to say I'm rather pleased with that trans-mutation (what a stupid thing of me to divide that stupid word) of "for good and all," mockingest of common phrases, even if one were going away for a honeymoon it would only be for better or worse—or stay, perhaps it means for good and all *else*. One uses it too without the all—"for good," meaning that nothing that isn't good can be eternal. I am puzzled ; but I believe I'm coming back for good anyhow. And, there now, I've to turn the page once more, and, I was going to say something stupid about good-by, a word that makes me shudder from head to foot.

I've found another stone for you, lapis lazuli, which never fades, and is heaven color to all time.

---

That you may not make a complete infidel of yourself with those insidious "Arabian Nights," or a complete philosopher of yourself, which would be unbecoming at your age, with the "Council of Friends" I send you a Western book of a character at once prosaic, graceful, and simple, which will disenchant and refresh you at once. I will find a second volume before you have finished the first, and meanwhile you must come and *choose* the next book that is to be, out of my library, which you never condescend to look at when you're here.

By hook or by crook, by swans and cygnets, by Carpaccio and the Queen of Sheba, I'll come to see you, please, to-day.

I'm really not quite so bad all over, yet ; and I've written things lately with much in them that will comfort *you* for me, though I can't quite comfort myself. And I'll come often to be lectured ; and I'm not reading novels just now, but only birds and beasts.

I want to know the names of all your five cats ; they were all at the door yesterday, and I should have made six, but they ran away.

I send two of Miss Kate's books for Mary and you to keep

as long as you choose. Miss Arnold is coming to-morrow, but I hope to get to the Thwaite at half-past twelve. Only my morning goes just now like the flash of a Christmas cracker.

---

I'm better ; I trust you are ! It is a day at last ; and the flowers are all off their heads for joy. I've been writing some pretty things too, and thinking naughty ones, as I do when I'm pretty well.

But I've lost my voice and can't sing them !

---

Yes, of course keep that book, any time you like ; but I think you'll find *most* of it unreadable. If you *do* get through it, you'll have to tell me all about it, you know, for *I've* never read a word of it except just the plums here and there.

Publishers *are* brutes, and always spoil one's books, and then say it's *our* fault if they don't sell !

Yes, that is a lovely description of a picture. All the same I believe the picture itself was merely modern sensationalism.

They can't do without death nowadays, not because they want to know how to die, but because they're too stupid to live.

---

I hope you will be comforted in any feeling of languor or depression in yourself by hearing that I also am wholly lack lustrous, *depressed*, *oppressed*, *compressed*, and *downpressed*, by a quite countless pressgang of despondencies, humilities, remorsees, shamefacednesses, all overnesses, all undernesses, sicknesses, dulnesses, darknesses, sulkinesses, and everything that rhymes to lessness and distress, and that I'm sure you and I are at present the mere targets of the darts of the—, etc., etc., and Mattie's waiting and mustn't be loaded with more sorrow ; but I can't tell you how sorry I am to break my promise to-day, but it would not be safe for me to come.

I'll look at the dial to-night. What a cruel thing of you to make *me* "look upon it!" I'm not gone to Venice yet, but thinking of it hourly. I'm very nearly done with toasting my bishop; he just wants another turn or two, and then a little butter.

---

I'm a little better, but can't laugh much yet, and won't cry if I can help it. Yet it always makes me *nearly* cry, to hear of those poor working-men trying to express themselves and nobody ever teaching them, nor anybody in all England, knowing that painting is an *art*, and sculpture also, and that an untaught man can no more carve or paint than play the fiddle. All efforts of the kind mean simply that we have neither master nor scholars in any rank or any place. And I, also, what have *I* done for Coniston schools yet? I don't deserve an oyster shell, far less an oyster.

---

KIRBY LONSDALE,

*Thursday evening.*

You won't get this note to-morrow, I'm afraid, but after that I think they will be regular till I reach Oxford. It is very nice to know that there is someone who does care for a letter, as if she were one's sister. You would be glad to see the clouds break for me; and I had indeed a very lovely morning drive and still lovelier evening, and full moonrise here over the Lune.

I suppose it is Kirk-by-Lune's Dale? for the church, I find, is a very important Norman relic. By the way, I should tell you that the *colored* plates in the "Stones of Venice" do great injustice to my drawings; the patches are worn on the stones. My *drawings* were not *good*, but the plates are total failures. The only one even of the engravings which is rightly done is the (*last*, I think, in Appendix) inlaid dove and raven. I'll show you the drawing for that when I come back, and perhaps for the San Michele, if I recollect to fetch it from Oxford, and I'll fetch you the second volume, which has really good plates. That blue beginning, I forgot to say, is of

the Straits of Messina, and it is really *very* like the color of the sea.

That is intensely curious about the parasitical plant of Borneo. But—very dreadful!

---

You are like Timon of Athens, and I'm like one of his parasites. The oranges are delicious, the brown bread dainty; what the melon is going to be I have no imagination to tell. But, oh me, I had such a lovely letter from Dr. John, sent me from Joan this morning, and I've lost it. It said, "Is Susie as good as her letters? If so, she must be better. What freshness of enjoyment in everything she says!"

Alas! not in everything she feels in *this* weather, I fear. Was ever anything so awful?

---

Do you know, Susie, everything that has happened to me (and the leaf I sent you this morning may show you it has had some hurting in it) is *little* in comparison to the crushing and depressing effect on me of what I learn day by day as I work on, of the cruelty and ghastliness of the *nature* I used to think so Divine? But I get out of it by remembering, This is but a crumb of dust we call the "world," and a moment of eternity which we call "time." Can't answer the great question to-night.

---

I can only thank you for telling me; and say, Praised be God for giving him back to us.

Worldly people say "Thank God" when they get what they want; as if it amused God to plague them, and was a vast piece of self-denial on His part to give them what they liked. But I, who am a simple person, thank God when He hurts me, because I don't think He likes it any more than I do; but I can't *praise* Him, because—I don't understand why—I can only praise what's pretty and pleasant, like getting back our doctor.

26th November.

And to-morrow I'm not to be there ; and I've no present for you, and I am so sorry for both of us ; but oh, my dear little Susie, the good people all say this wretched makeshift of a world is coming to an end next year, and you and I and everybody who likes birds and roses are to have new birth-days and presents of such sugar plums. Crystals of candied cloud and manna in sticks with no ends, all the way to the sun, and white stones ; and new names in them, and heaven knows what besides.

It sounds all too good to be true ; but the good people are positive of it, and so's the great Pyramid, and the Book of Daniel, and the "Bible of Amiens." You can't possibly believe in any more promises of mine, I know, but if I *do* come to see you this day week, don't think it's a ghost ; and believe at least that we all love you and rejoice in your birthday wherever we are.

I'm so thankful you're better.

Reading my old diary, I came on a sentence of yours last year about the clouds being all "trimmed with swansdown," so pretty. (I copied it out of a letter.) The thoughts of you always trim *me* with swansdown.

---

I never got your note written yesterday ; meant at least to do it even after post time, but was too stupid, and am infinitely so to-day also. Only I *must* pray you to tell Sarah we all had elder wine to finish our evening with, and I mulled it myself, and poured it out from the saucepan into the expectants' glasses, and everybody asked for more ; and I slept like a dormouse. But, as I said, I am so stupid this morning that——. Well, there's no "that" able to say how stupid I am, unless the fly that wouldn't keep out of the candle last night ; and *he* had some notion of bliss to be found in candles, and I've no notion of anything.

---

The blue sky is so wonderful to-day, and the woods after the rain so delicious for walking in, that I must still delay

any school talk one day more. Meantime I've sent you a book which is in a nice large print, and may in some parts interest you. I got it that I might be able to see Scott's material for "Peveril;" and it seems to me that he might have made more of the real attack on Latham House than of the fictitious one on Front de Bœuf's castle, had he been so minded, but perhaps he felt himself hampered by too much known fact.

I've just finished and sent off the index to "Deucalion," first volume, and didn't feel inclined for more schooling to-day.

I've just had a charming message from Martha Gale, under the address of "that old duckling." Isn't that nice? Ethel was coming to see you to-day, but I've confiscated her for the woodcock, and she shan't come to-morrow, for I want you all to myself; only it isn't *her* fault.

---

But you gave my present before, a month ago, and I've been presenting myself with all sorts of things ever since; and now it's not half gone. I'm very thankful for this, however, just now, for St. George, who is cramped in his career, and I'll accept it, if you like, for *him*. Meantime I've sent it to the bank, and hold him your debtor. I've had the most delicious gift besides I ever had in my life—the Patriarch of Venice's blessing written with his own hand, with his portrait.

I'll bring you this to see to-morrow, and a fresh Turner.

---

I have forbidden Joanie's going out to-day, for she got a little chill in the wind last night, and looked pale and *défate* in the evening; she's all right again, but I can't risk her out, though she was much minded to come, and I am sure you and Mary will say I am right. She will be delighted and refreshed by seeing the young ladies; and the Turners look grand in the gray light.

So I have told Baxter to bring up a fly from the Waterhead, and to secure your guests on their way here, and put up to bring them so far back. I shall also send back by it a purple bit of Venice, which pleases me, though the mount's too large and spoils it a little ; but you will be gracious to it.

What delicious asparagus and brown bread I've been having!!!!!!! I should like to write as many notes of admiration as there are waves on the lake ; the octave must do. I've been writing a pretty bit of chant for Byron's heroic measure. Joan must play it to you when she next comes. I'm mighty well, and rather mischievous.

---

The weather has grievously depressed me this last week, and I have not been fit to speak to anybody. I had much interruption in the early part of it, though, from a pleasant visitor ; and I have not been able to look rightly at your pretty little book. Nevertheless, I'm quite sure your strength is in private letter writing, and that a curious kind of shyness prevents your doing yourself justice in print. You might also surely have found a more pregnant motto about birds' nests !

Am not I cross ? But these gray skies are mere poison to my thoughts, and I have been writing such letters that I don't think many of my friends are likely to speak to me again.

---

I think you must have been spinning the sunbeams into gold to be able to scatter gifts like this.

It is your own light of the eyes that has made the woodland leaves so golden brown.

Well, I have just opened a St. George account at the Coniston Bank, and this will make me grandly miserly and careful.

I am very thankful for it.

Also for Harry's saying of me that I am gentle ! I've been quarrelling with so many people lately I had forgotten all grace, till you brought it back yesterday and made me still your gentle, etc.

SUSIE'S LETTERS.

## SUSIE'S LETTERS.

---

THE following Letters and the little notes on Birds are inserted here by the express wish of Mr. Ruskin. I had it in my mind to pay Susie some extremely fine compliments about these Letters and Notes, and to compare her method of observation with Thoreau's, and, above all, to tell some very pretty stories showing her St. Francis-like sympathy with, and gentle power over, all living creatures; but Susie says that she is already far too prominent, and we hope that the readers of "Hortus" will see for themselves how she reverences and cherishes all noble life, with a special tenderness, I think, for furred and feathered creatures. To all outcast and hungry things the Thwaite is a veritable Bethlehem, or House of Bread, and to her, their sweet "Madonna Nourrice," no less than to her Teacher, the sparrows and linnets that crowd its thresholds are in a very particular sense "Sons of God."

A. F.

---

April 14th, 1874.

I sent off such a long letter to you yesterday, my dear friend. Did you think of your own quotation from Homer, when you told me that field of yours was full of violets? But where are the four fountains of *white* water?—through a meadow full of violets and parsley? How delicious Calypso's fire of finely chopped cedar! How shall I thank you for allowing *me*, Susie the little, to *distil* your writings? Such a joy and comfort to me—for I shall need much very soon now. I do so thank and love you for it; I am sure I may say so to *you*. I rejoice again and again that I have such a friend.

May I never love him less, never prove unworthy of his friendship! How I wanted my letter, and now it has come, and I have told our Dr. John of your safe progress so far. I trust you will be kept safe from *everything* that might injure you in any way.

The snow has melted away, and this is a really sweet April day and *ought* to be enjoyed—if only Susie *could*. But both she and her dear friend must strive with their grief. When I was a girl—(I was once)—I used to delight in Pope's Homer. I do believe I rather enjoyed the killing and slaying, specially the splitting down the *chine!* But when I tried to read it again not *very* long ago, I got tired of this kind of thing. If *you* had only translated Homer! then I should have had a feast. When a schoolgirl, going each day with my bag of books into Manchester, I used to like Don Quixote and Sir Charles Grandison with my milk porridge. I must send you only this short letter to-day. I can see your violet field from this window. How sweetly the little limpid stream would *tinkle* to-day; and how the primroses are sitting listening to it and the little birds sipping it! I have come to the conclusion that bees go more by *sight* than by scent. As I stand by my peacock with his gloriously gorgeous tail all spread out, a bee comes *right at it* (very vulgar, but expressive); and I have an Alpine Primula on this window-stone brightly in flower, and a bee came and alighted, but went away again at once, not finding the expected honey. I wonder what you do the livelong day, for I know you and idleness are not acquaintances. I am so sorry your favorite places are spoiled. But dear Brantwood will grow prettier and prettier under your care.

---

April 9th.

I have just been pleased by seeing a blackbird enjoying, with schoolboy appetite, portions of a moistened crust of bread which I threw out for him and his fellow-creatures. How he dug with his orange bill!—even more orange than usual perhaps at this season of the year. At length the

robins have built a nest in the ivy in our yard—a very secure and sheltered place, and a very convenient distance from the crumb market. Like the old woman, *he* sings with a merry devotion, and *she* thinks there never was such music, as she sits upon her eggs ; he comes again and again, with every little dainty that his limited income allows, and *she* thinks it all the sweeter because *he* brings it to her. Now and then she leaves her nest to stretch her wings, and to shake off the dust of care, and to prevent her pretty *ankles* being cramped. But she knows her duty too well to remain absent long from her precious eggs.

Now another little note from Dr. John, and he actually begins, “My dear ‘Susie,’”—and ends, “Let me hear from you soon. Ever yours affectionately.” Also he says, “It is very kind in you to let me get at once close to you.” The rest of his short letter (like you, he was busy) is nearly all about *you*, so of course it is interesting to *me*, and he hopes you are already getting good from the change, and I indulge the same hope.

---

10th April.

Brantwood looked so very nice this morning decorated by the coming into leaf of the larches. I wish you could have seen them in the distance as I did : the early sunshine had glanced upon them lighting up one side, and leaving the other in softest shade, and the tender green contrasted with the deep browns, and grays stood out in a wonderful way, and the trees looked like spirits of the wood, which you might think would melt away like the White Lady of Avenel.

Dear sweet April still looks coldly upon us—the month you love so dearly. Little white lambs are in the fields now, and so much that is sweet is coming ; but there is a shadow over this house *now* ; and, also, my dear kind friend is far away. The horse-chestnuts have thrown away the winter coverings of their buds, and given them to that dear economical mother earth, who makes such good use of everything, and works up old materials again in a wonderful way, and is delightfully unlike most economists—the very soul of generous liberality.

Now some of your own words, so powerful as they are—you are speaking of the Alp and of the “Great Builder”—of your own transientness, as of the grass upon its sides ; and in this very sadness, a sense of strange companionship with past generations, in seeing what they saw. They have ceased to look upon it, you will soon cease to look also ; and the granite wall will be for others, etc., etc.

My dear friend, was there ever anyone so pathetic as you ? And you have the power of bringing things before one, both to the eye and to the mind : you do indeed paint with your pen. Now I have a photograph of you—not a very satisfactory one, but still I am glad to have it, rather than none. It was done at Newcastle-on-Tyne. Were you in search of something of Bewick’s ?

I have just given the squirrel his little loaf (so you see I am a lady),\* he has bounded away with it, full of joy and gladness. I wish that this were my case and yours, for whatever we may wish for, that we have not. We have a variety and abundance of loaves. I have asked Dr. J. Brown whether he would like photographs of your house and the picturesque breakwater. I do so wish that you and he and I did not suffer so much, but *could* be at least moderately happy. I am sure you would be glad if you knew, even in this time of sorrow, when all seems stale, flat, unprofitable, the pleasure and interest I have had in reading your Vol. 3 [“Modern Painters”]. I study your character in your writings, and I find so much to elevate, to love, to admire—a sort of education for my poor old self—and oh ! such beauty of thought and word.

---

Even yet my birds want so much bread ; I do believe the worms are sealed up in the dry earth, and they have many little mouths to fill just now—and there is one old blackbird whose devotion to his wife and children is lovely. I should like him never to die, he is *one* of my heroes. And now a dog

---

\* See Fors Clavigera, Letter XLV.

which calls upon me sometimes at the window, and I point kitchenward and the creature knows what I mean, and goes and gets a good meal. So if I can only make a dog happy (as you do, only you take yours to live with you, and I cannot do that) it is a pleasant thing. I do so like to make things happier, and I should like to put bunches of hay in the fields for the poor horses, for there is very scant supply of grass, and too many for the supply.

---

1st May.

I cannot longer refrain from writing to you, my dear kind friend, so often are you in my thoughts. Dearest Joanie has told you, I doubt not, and I know how sorry you are, and how truly you are feeling for your poor Susie. So *knowing that*, I will say no more about my sorrow. There is no need for words. I am wishing, oh, so much, to know how you are: quite safe and well, I hope, and able to have much real enjoyment in the many beautiful things by which you are surrounded. May you lay up a great stock of good health and receive much good in many ways, and then return to those who so much miss you, and by whom you are so greatly beloved.

Coniston would go into your heart if you could see it now—so very lovely, the oak trees so early, nearly in leaf already. Your beloved blue hyacinths will soon be out, and the cuckoo has come, but it is long since Susie has been out. She only stands at an open window, but she must try next week to go into the garden; and she is finding a real pleasure in making extracts from your writings *for you*, often wondering “will he let that remain?” and hoping that he will.

Do you ever send home orders about your Brantwood? I have been wishing so much that your gardener might be told to mix quantities of old mortar and soil together, and to fill many crevices in your new walls with it; then the breezes will bring fern seeds and plant them, or rather sow them in such fashion as no human being can do. When time and the showers brought by the west wind have mellowed it a little,

the tiny beginnings of mosses will be there. The sooner this can be done the better. Do not think Susie presumptuous.

We have hot sun and a *very* cool air, which I do not at all like.

I hope your visit to Palermo and your lady have been all that you could wish. Please *do* write to me ; it would do me so much good and so greatly refresh me.

This poor little letter is scarcely worth sending, only it says that I am your loving Susie.

---

14th May.

MY DEAREST FRIEND,—Your letter yesterday did me so much good, and though I answered it at once yet here I am again. A kind woman from the other side has sent me the loveliest group of drooping and very tender ferns, soft as of some velvet belonging to the fairies, and of the most exquisite green, and primroses, and a slender-stalked white flower, and so arranged that they continually remind me of that enchanting group of yours in Vol. 3, which you said I might cut out. What would you have thought of me if I had? Oh, that you would and could sketch this group—or even that your eye could rest upon it! Now you will laugh if I ask you whether harpies ever increase in number? or whether they are only the “old original.” They quite torment me when I open the window, and blow chaff at me. I suppose at this moment dearest Joanie is steaming away to Liverpool; one always wants to know now whether people accomplish a journey safely. When the blackbirds come for soaked bread, they generally eat a nice little lot themselves, before carrying any away from the window for their little ones; but Bobbie, “our little English Robin,” has just been twice, took none for himself, but carries beak-load after beak-load for his speckled infants. How curious the universal love of bread is; so many things like and eat it—even flies, and snails!

You know you inserted a letter from Jersey about fish!\*

---

\* See Fors Clavigera, Letter XXX.

A lady there tells me that formerly you might have a bucket of oysters for sixpence, and that now you can scarcely get anything but such coarse kinds of fish as are not liked ; and she has a sister, a sad invalid, to whom fish would be a very pleasant and wholesome change. This is really a sad state of things, and *here* the railways seem very likely to carry away our butter, and it is now such a price, quite ex[h]orbitant. Why did I put an *h* in ? Is it to prove the truth of what you say, that ladies do not spell well ? A letter which I once wrote when a girl was a wonderful specimen of bad spelling.

---

15th May.

I have found such lovely passages in Vol. 1 this morning that I am delighted, and have begun to copy one of them. You do float in such beautiful things sometimes that you make me feel I don't know how !

How I thank you for ever having written them, for though late in the day, they were written for *me*, and have at length reached me !

You are so candid about your age that I shall tell you mine ! I am astonished to find myself sixty-eight—very near the Psalmist's threescore and ten. Much illness and much sorrow, and then I woke up to find myself *old*, and as if I had lost a great part of my life. Let us hope it was not all lost.

I think *you* can understand me when I say that I have a great fund of love, and no one to spend it upon, because there are not any to whom I could give it *fully*, and I love my pets so dearly, but I *dare not* and cannot enjoy it fully because—they *die*, or get injured, and then my misery is intense. I feel as if I could tell *you* much, because your sympathy is so refined and so tender and true. Cannot I be a sort of second mother to you ? I am sure the first one was often praying for blessings for you, and in this, at least, I resemble her.

Am I tiresome writing all this ? It just came, and you said I was to write what did. We have had some nice rain, but followed not by warmth, but a cruel *east* wind.

## ABOUT WRENS.

This year I have seen wrens' nests in three different kinds of places—one built in the angle of a doorway, one under a bank, and a third near the top of a raspberry bush; this last was so large that when our gardener first saw it, he thought it was a swarm of bees. It seems a pleasure to this active bird to build; he will begin to build several nests sometimes before he completes one for Jenny Wren to lay her eggs and make her nursery. Think how busy both he and Jenny are when the sixteen young ones come out of their shells—little helpless gaping things wanting feeding in their turns the live-long summer day! What hundreds and thousands of small insects they devour! They catch flies with good-sized wings. I have seen a parent wren with its beak so full that the wings stood out at each side like the whiskers of a cat.

Once in America, in the month of June, a mower hung up his coat under a shed near a barn; two or three days passed before he had occasion to put it on again. Thrusting his arm up the sleeve he found it completely filled with something, and on pulling out the mass he found it to be the nest of a wren, completely finished and lined with feathers. What a pity that all the labor of the little pair had been in vain! Great was the distress of the birds, who vehemently and angrily scolded him for destroying their house; happily it was an empty one, without either eggs or young birds.

---

HISTORY OF A BLACKBIRD.

We had had one of those summer storms which so injure the beautiful flowers and the young leaves of the trees. A blackbird's nest with young ones in it was blown out of the ivy on the wall, and the little ones, with the exception of one, were killed! The poor little bird did not escape without a wound upon his head, and when he was brought to me it did not seem very likely that I should ever be able to rear him;

but I could not refuse to take in the little helpless stranger, so I put him into a covered basket for a while.

I soon found that I had undertaken what was no easy task, for he required feeding so early in a morning that I was obliged to take him and his bread crumbs into my bed-room, and jump up to feed him as soon as he began to chirp, which he did in very good time.

Then in the daytime I did not dare to have him in the sitting-room with me, because my sleek favorites, the cats, would soon have devoured him, so I carried him up into an attic, and as he required feeding very often in the day, you may imagine that I had quite enough of exercise in running up and down stairs.

But I was not going to neglect the helpless thing after once undertaking to nurse him, and I had the pleasure of seeing him thrive well upon his diet of dry-bread crumbs and a little scrap of raw meat occasionally ; this last delicacy, you know, was a sort of imitation of worms !

Very soon my birdie knew my step, and though he never exactly said so, I am sure he thought it had "music in't," for as soon as I touched the handle of the door he set up a shriek of joy !

"The bird that we nurse is the bird that we love," and I soon loved Dick. And the love was not all on one side, for my bonnie bird would sit upon my finger uttering complacent little chirps, and when I sang to him in a low voice he would gently peck my hair.

As he grew on and wanted to use his limbs, I put him into a large wicker bonnet-basket, having taken out the lining ; it made him a large, cheerful, airy cage. Of course I had a perch put across it, and he had plenty of white sand and a pan of water ; sometimes I set his bath on the floor of the room, and he delighted in bathing until he looked half-drowned ; then what shaking of his feathers, what *preening* and arranging there was ! And how happy and clean and comfortable he looked when his toilet was completed !

You may be sure that I took him some of the first ripe currants and strawberries, for blackbirds like fruit, and so

do boys! When he was fledged I let him out in the room, and so he could exercise his wings. It is a curious fact that if I went up to him with my bonnet on he did not know me at all, but was in a state of great alarm.

Blackbirds are wild birds, and do not bear being kept in a cage, not even so well as some other birds do; and as this bird grew up he was not so tame, and was rather restless. I knew that, though I loved him so much, I ought not to keep him shut up against his will. He was carried down into the garden while the raspberries were ripe, and allowed to fly away; and I have never seen him since. Do you wonder that my eyes filled with tears when he left?

IN MONTIBUS SANCTIS.

*STUDIES OF MOUNTAIN FORM*  
AND OF ITS VISIBLE CAUSES.

COLLECTED AND COMPLETED OUT OF  
"MODERN PAINTERS."

## PREFACE.

---

I RECEIVE at present with increasing frequency requests or counsels from people whose wishes and advice I respect, for the reprinting of "Modern Painters." When I formerly stated my determination not to republish that work in its original form, it was always with the purpose of giving its scientific sections with farther illustration in "Deucalion" and "Proserpina," and extracts from those relating to art and education in my Oxford Lectures. But finding, usually, for these last, subjects more immediately interesting; and seeing that Deucalion and Proserpina have quite enough to do in their own way—for the time they have any chance of doing it in—I am indeed minded now to reprint the three scientific sections of "Modern Painters" in their original terms, which, very thankfully I find, cannot much be bettered, for what they intend or attempt. The scientific portions, divided prospectively, in the first volume, into four sections, were meant to define the essential forms of sky, earth, water, and vegetation; but finding that I had not the mathematical knowledge required for the analysis of wave-action, the chapters on Seapainting were never finished, the materials for them being partly used in the "Harbors of England," and the rest of the design remitted till I could learn more dynamics. But it was never abandoned, and the corrections already given in "Deucalion" of the errors of Agassiz and Tyndall on the glacier theory are based on studies of wave-motion which I hope still to complete the detail of in that work.

My reprints from "Modern Painters" will therefore fall only into three divisions, on the origin of form in clouds, mountains, and trees. They will be given in the pages and

type now chosen for my Oxford Lectures; and the two lectures on existing Storm-cloud already published will form a proper introduction to the cloud-studies of former times, of which the first number is already in the press. In like manner, the following paper, prepared to be read before the Mineralogical Society on the occasion of their meeting in Edinburgh, this year, and proposing, in brief abstract, the questions which are at the root of rock-science, may not unfitly introduce the chapters of geological inquiry, begun at the foot of the Matterhorn thirty years ago, inquiries which were the proper sequel of those instituted by Saussure, and from which the fury of investigation in extinct zoölogy has since so far diverted the attention of mineralogists, that I have been virtually left to pursue them alone; not without some results, for which, fortified as they are by the recent advance of rock-chemistry, I might claim, did I care to claim, the dignity of Discoveries. For the separate enumeration of these, the reader is referred to the postscript to the opening paper.

The original wood-cuts will all be used in this edition, but in order not to add to the expense of the republished text, I have thought it best that such of the steel plates as are still in a state to give fair impressions, should be printed and bound apart; purchasable either collectively or in separate parts, illustrative of the three several sections of text. These will be advertised when ready.

The text of the old book, as in the already reprinted second volume, will be in nothing changed, and only occasionally explained or amplified by notes in brackets.

It is also probable that a volume especially devoted to the subject of Education may be composed of passages gathered out of the entire series of my works; and since the parts of "Modern Painters" bearing on the principles of art will be incorporated in the school lectures connected with my duty at Oxford, whatever is worth preservation in the whole book will be thus placed at the command of the public.

BRANTWOOD,

16th September, 1884.

# IN MONTIBUS SANCTIS.

---

## CHAPTER I.

### OF THE DISTINCTIONS OF FORM IN SILICA.

*(Read before the Mineralogical Society, July 24, 1884.)*

As this paper, by the courtesy of the secretaries, stands first on the list of those to be read at the meeting, I avail myself of the privilege thus granted me of congratulating the Society on this occasion of its meeting in the capital of a country which is itself one magnificent mineralogical specimen, reaching from Cheviot to Cape Wrath; thus gathering into the most convenient compass, and presenting in the most instructive forms, examples of nearly every mineralogical process and phenomenon which have taken place in the construction of the world.

May I be permitted, also, to felicitate myself, on the permission thus given me, to bring before the Mineralogical Society a question which, in Edinburgh, of all cities of the world, it should be easiest to solve, namely, the methods of the construction and painting of a Scotch pebble?

I am the more happy in this unexpected privilege, because, though an old member of the Geological Society, my geological observations have always been as completely ignored by that Society, as my remarks on political economy by the Directors of the Bank of England; and although I have repeatedly solicited from them the charity of their assistance in so small a matter as the explanation of an agate stone on the forefinger of an alderman, they still, as I stated the case in

closing my first volume of "Deucalion," discourse on the catastrophes of chaos, and the processes of creation, without being able to tell why a slate splits, or how a pebble is colored.

Pebble—or crystal; here in Scotland the main questions respecting these two main forms of silica are put to us, with a close solicitude, by the beautiful conditions of agate, and the glowing colors of the Cairngorm, which have always variegated and illuminated the favorite jewelry of Scottish laird and lassie.

May I hope, with especial reference to the

"favorite gem  
Of Scotland's mountain diadem,"

to prevail on some Scottish mineralogist to take up the hitherto totally neglected subject of the relation of color in minerals to their state of substance: why, for instance, large and well-developed quartz crystals are frequently topaz color or smoke color,—never rose-color; while massive quartz may be rose-color, and pure white or gray, but never smoke color;—again, why amethyst quartz may continually, as at Schemnitz and other places, be infinitely complex and multiplex in crystallization, but never warped; while smoky quartz may be continually found warped, but never, in the amethystine way, multiplex;—why, again, smoky quartz and Cairngorm are continually found in short crystals, but never in long slender ones,—as, to take instance in another mineral, white beryl is usually short or even tabular, and green beryl long, almost in proportion to its purity?

And, for the better solution, or at least proposition, of the many questions, such as these, hitherto undealt with by science, might I also hope that the efforts of the Mineralogical Society may be directed, among other quite feasible objects not yet attained, to the formation of a museum of what might be called mineral-geology, showing examples of all familiar minerals in association with their native rocks, on a sufficiently large and intelligible scale. There may be, perhaps, by this time, in the museum of Edinburgh,—but there

is not in the British Museum, nor have I ever myself seen,—either a specimen of pure Cairngorm in the gangue, or a block of trap containing agates of really high quality, whether from Scotland, Germany, or India.

Knowing the value of time to the meeting, I leave this, to my thinking, deeply important subject of the encouragement of geognostic mineralogy, to their own farther consideration; and pass to a point of terminology which is of extreme significance in the study of siliceous minerals, namely, the desirableness, and I should myself even say the necessity, of substituting the term “spheroidal” for “reniform” in mineralogical description. Every so-called “kidney-shaped” mineral is an aggregate of spheroidal crystallizations, and it would be just as rational and elegant to call sea-foam kidney-shaped, as to call chalcedony so. The word “Botryoidal” is yet more objectionable, because it is wholly untrue. There are many minerals that resemble kidneys; but there is no substance in the whole mineral kingdom that resembles a bunch of grapes. The pisolitic aggregations which a careless observer might think grape-like, are only like grape-*shot*, and lie in heaps, not clusters.

But the change I would propose is not a matter of mere accuracy or elegance in description. For want of observing that the segmental surfaces of so-called reniform and botryoidal minerals are spheroidal, the really crystalline structure producing that external form has been overlooked, and, in consequence, minerals have been continually described either as amorphous, or as mixtures of different substances, which are neither formless nor mingled, but are absolutely defined in structure, and absolutely homogeneous in substance.

There are at least six states of siliceous substance which are thus entirely distinct,—flint, jasper, chalcedony, hyalite, opal, and quartz. They are only liable to be confused with each other in bad specimens; each has its own special and separate character, and needs peculiar circumstances for its production and development. The careful history of the forms of these six minerals, and the careful collection of the facts respecting the mode of their occurrence, would require a volume as large

as any that are usually issued by way of complete systems of mineralogy. Whereas, sufficient account is usually supposed to be rendered of them in a few sentences, and, moreover, every sentence of these concise abstracts usually contains, or implies, an unchallenged fallacy.

I take, for example, from the account of "chalcedonic varieties of quartz" given in Dana's octavo of 456 close-printed pages (Trübner, 1879),—the entire account occupies no more than a page and three lines,—the following sentences:

"Chalcedony oftens occurs lining or filling cavities in amygdaloidal rocks, and sometimes in other kinds. These cavities are nothing but little caverns, into which siliceous waters have filtrated at some period. The stalactites are 'icles' of chalcedony, hung from the roof of the cavity.

"Agate, a variegated chalcedony. The colors are distributed in clouds, spots, or concentric lines. These lines take straight, circular, or zigzag forms, and when the last, it is called fortification agate, so named from the resemblance to the angular outlines of a fortification. These lines are the edges of layers of chalcedony, and these layers are successive deposits during the process of its formation.

"Mocha stone, or moss agate, is a brownish agate, consisting of chalcedony with dentritic or moss-like delineations, of an opaque yellowish-brown color."

Now, with respect to the first of these statements, it is true that cavities in amygdaloidal rocks are nothing but little caverns, just as caverns in any rocks are nothing but large cavities. But the rocks are called "amygdaloidal," because their cavities are in the shape of almonds, and there must be a reason for this almond shape, which will bear on the structure of their contents. It is also true that in the rocks of Iceland there are cavities lined with stalactites of chalcedony. But I believe no member of this Society has ever seen a cavity in Scotch trap lined with stalactites of chalcedony; nor a Scotch pebble which gave the slightest evidence of the direction of its infiltration.

The second sentence is still more misleading, for in no sense is it true that agate is a "variegated chalcedony." It is

chalcedony separated into bands of various consistence, and associated with parallel bands of jasper and quartz. And whether these bands are successive deposits during the process of formation or not, must be questionable until we produce the resemblance of an agate by a similar operation, which I would very earnestly request some of the members of the Mineralogical Society to do, before allowing statements of this positive kind to be made on the subject in popular text-books.

The third sentence confounds Mocha stone with moss agate, they being entirely different minerals. The delineations in Mocha stone are dendritic, and produced by mechanical dissemination of metallic oxides, easily imitable by dropping earthy colors into paste. But moss agates are of two kinds, brown and green, the one really like moss, the other filiform and like seaweed; and neither of them is at present explicable or imitable.

The inaccuracy of the statements thus made in so elaborate a work on mineralogy as Dana's, may, I think, justify me in asking the attention of the Mineralogical Society to the distinctions in the forms of silica which they will find illustrated by the chosen examples from my own collection, placed on the table for their inspection. I place, first, side by side, No. 1, the rudest, and No. 7, the most delicate, conditions of pure chalcedony; the first, coarsely spheroidal, and associated with common flint; the second, filiform, its threads and rods combining into plates,—each rod, on close examination, being seen to consist of associated spheroidal concretions.

Next to these I place No. 2, a common small-globed chalcedony formed on the common quartzite of South England, with opaque concentric zones developing themselves subsequently over its translucent masses. I have not the slightest idea how any of these three specimens can have been formed, and simply lay them before the Society in hope of receiving some elucidatory suggestions about them.

My ignorance need not have remained so abject, had my other work left me leisure to follow out the deeply interesting experiments instituted by Mr. E. A. Pankhurst and Mr.

J. F'Anson, of which the first results, being indeed the beginning of the true history of silica, were published by those gentlemen in the *Mineralogical Magazine* for 1882. I have laid their paper, kindly then communicated to me, on the table, for immediate comparison of its plates with the specimens, and I have arranged the first two groups of these, adopting from that paper the terms exogenous and endogenous, for the two great families of agates, so as to illustrate the principal statements made in its pages.

It would materially facilitate the pursuit of their discoveries if some of the members of the Society would register and describe the successive phenomena of crystallization in any easily soluble or fusible minerals. The history of a mineral is not given by ascertainment of the number or the angles of the planes of its crystals, but by ascertaining the manner in which those crystals originate, increase, and associate. The ordinary mineralogist is content to tell us that gold, silver, and diamond are all cubic;—it is for the mineralogist of the future to say why gold associates its countless cubes into arborescent laminae, and silver into capillary wreaths; while diamond condemns its every octahedron to monastic life, and never, except by accident, permits one of them to crystallize beside another.

At pages 5 and 6 of Mr. J. F'Anson's paper will be found explanations, more or less complete, of the forms which I have called folded "agates" and "lake" agates, reaching to No. 40. The specimens from 40 to 60 then illustrate the conditions of siliceous action which I am still alone among modern mineralogists in my mode of interpreting.

The minor points of debate concerning them are stated in the descriptions of each in the catalogue; but there are some examples among them from which branch lines of observation leading far beyond the history of siliceous pebbles. To these I venture here to direct your special attention.

No. 3 is a fragment of black flint on which blue chalcedony is deposited as a film extending itself in circles, exactly like the growth of some lichens. I have never seen this form of chalcedony solidify from circles into globes, and it is evident

that for this condition we must use the term "cycloidal," instead of "spheroidal." I need not point out that "reniform" would be here entirely absurd.

This apparently common specimen (and, as far as regards frequency of occurrence, indeed common enough) is nevertheless one of the most profoundly instructive of the whole series. It is, to begin with, a perfect type of the finest possible *flint*, properly so called. Its surface, eminently characteristic of the forms of flint-concretion, is literally a white dust of organic fragments, while the narrow fissure which has opened in it, apparently owing to the contraction of its mass, is besprinkled and studded, as closely, with what might not unfitly be called pearl-chalcedony, or seed-chalcedony, or hail-chalcedony; for seen through the lens it exactly resembles the grains of minute hail, sticking together as they melt; in places, forming very solid crests—in others, and especially in the rifted fissure, stalactites, possibly more or less vertical to the plane in which the flint lay.

In No. 5 the separation into concentric films is a condition peculiar to flint-chalcedony, and *never found in true agates*.

In No. 6 (chalcedony in stalactitic coats, on amethyst) the variation of the stalactites in direction, and their modes of agglutination, are alike unintelligible.

No. 8 is only an ordinary specimen of chalcedony on hæmatite, in short, closely combined vertical stalactites, each with a central stalactite of black iron-oxide; but it is to be observed, in comparing it with No. 6, that when chalcedony is thus formed on rods of hæmatite, the stalactites are almost unexceptionally vertical, and quite straight. The radiate ridge at one side of this example is, however, entirely anomalous.

No. 9. The succeeding specimen, though small, is a notable one, consisting of extremely minute and delicate shells or crusts of spheroidal hæmatite, establishing themselves in the heart of quartz. I have no idea of the method, or successions in time, of this process. These I leave to the consideration of the Society, but I point to the specimen as exquisitely exhibiting the laws of true spheroidal crystallization, in a min-

eral which both in its massive and crystalline state is continually associated with quartz. And it cannot but be felt that this spheroidal structure of hæmatite could as little be explained by calling or supposing it a mixture of micaceous hæmatite with amorphous hæmatite, as that of chalcedony by calling it a mixture of hexagonal with amorphous quartz.

No. 10. Next follows a beautiful and perfectly characteristic example of massively spheroidal agate, in which first gray and then white chalcedony, peculiarly waved and faulted by a tendency to become quartz, surrounds earthy centres, and is externally coated with pure quartz. And here I must ask the Society to ratify for me the general law, that in all solid globular or stalactitic conditions of chalcedony, if any foreign substance occurs mixed with them, it is thrown to their centres, while the pure quartz is always found on the outside.\* On the other hand, the usual condition of geodes of chalcedony found in the cavities of rocks, is to purify themselves toward the interior, and either coat themselves with quartz on the interior surface, or entirely fill the central cavity with quartz.

No. 46 is a most literally amygdaloidal—almond-shaped—mass of silica; only, not poured into an almond-shaped cavity in basalt, but gathered into a knot out of Jurassic limestone, as flint is out of chalk.

It is, however, banded quite otherwise than flint, the bands giving occasion to its form, and composed of different substances. Whereas those of flint are of the flint itself in different states, and always independent of external form.

Secondly. It seems to me a question of considerable interest, why the coarse substance of flint and of this dull hornstone can be stained with black, but not chalcedony, nor quartz. The blackest so-called quartz is only a clear umber, and opaque quartz is never so stained at all. Natural black onyx is of extreme rarity, the onyx of commerce being artificially stained; the black band in the lake agate, No. 32, is

---

\* It is to be noticed also that often in stalactitic or tubular concretions the purest chalcedony immediately surrounds the centre.

probably bituminous. And in connection with this part of the inquiry, it seems to be the peculiar duty of the mineralogist to explain the gradual darkening of the limestones toward the central metamorphic chains.

Thirdly, and principally. This stone gives us an example of waved or contorted strata which are unquestionably produced by concretion and partial crystallization, not compression, or any kind of violence. I shall take occasion, in concluding, to insist farther on the extreme importance of this character.

The specimen was found by my good publisher, Mr. Allen, on the southern slope of the Salève; and it is extremely desirable that geologists in Savoy should obtain and describe more pebbles of the same sort, this one being, as far as my knowledge goes, hitherto unique.

71-77. These seven examples of opal have been chosen merely to illustrate farther the modes of siliceous solution and segregation, not with that of illustrating opal itself,—every one of the seven examples presenting phenomena more or less unusual. The two larger blocks, 71, 72 (Australian), give examples in one or two places of obscurely nodular and hollow concretion, before unknown in opal, but of which a wonderful specimen, partly with a vitreous superficial glaze, has been sent me by Mr. Henry Willett, of Arnold House, Brighton, a most accurate investigator of the history of silica. It is to be carefully noted, however, that the moment the opal shows a tendency to nodular concretion, its colors vanish.

No. 73 is sent only as an example of the normal state of Australian opal, disseminated in a rock of which it seems partly to have opened for itself the shapeless spaces it fills. In No. 71, it may be observed, there is a tendency in them to become tabular. No. 74, an apparently once fluent state of opal in veins, shows in perfection the arrangement in straight zones *transverse* to the vein, which I pointed out in my earliest papers on silica as a constant distinctive character in opal-crystallization. No. 75 is the only example I ever saw of stellar crystallization in opal. No. 76, from the same

locality, is like a lake agate associated with a brecciate condition of the gangue ; while No. 77, though small, will be found an extremely interesting example of hydrophane. The blue bloom seen in some lights on it, when dry, as opposed to the somewhat vulgar vivacity of its colors when wet, is a perfect example of the opal's faculty of *selecting* for its lustre the most lovely combinations of the separated rays. A diamond, or a piece of fissured quartz, reflects indiscriminately all the colors of the prism ; an opal, only those which are most delightful to human sight and mental association.

78-80. These three geological specimens are placed at the term of the series, that the importance of the structure already illustrated by No. 46 may be finally represented to the Society ; No. 46 being an undulated chalcedony ; No. 78 an undulated jasper ; No. 79, a hornstone ; and No. 80 a fully developed gneiss.

I have no hesitation in affirming,—though it is not usual with me to affirm anything I have not seen, and seen close,—that every one of these types of undulated structure has been produced by crystallization only, and absolutely without compression or violence. But the transition from the contorted gneiss which has been formed by crystallization only, to that which has been subjected to the forces of upheaval, or of lateral compression, is so gradual and so mysterious, that all the chemistry and geology of modern science is hitherto at fault in its explanation ; and this meeting would confer a memorable benefit on future observers by merely determining for them the *conditions* of the problem. Up to a certain point, however, these were determined by Saussure, from whose frequent and always acutely distinct descriptions of contorted rocks I select the following, because it refers to a scene of which the rock structure was a subject of constant interest to the painter Turner ; the ravine, namely, by which, on the Italian side of the St. Gothard, the Ticino escapes from the valley of Airolo.

“At a league from Faïdo the traveller ascends by a road carried on a cornice above the Ticino, which precipitates itself between the rocks with the greatest violence. I made the

ascent on foot, in order to examine with care the beautiful rocks, worthy of all the attention of a rock-lover. The veins of that granite form in many places redoubled zigzags, precisely like the ancient tapestries known as point of Hungary, and there it is impossible to say whether the veins of the stone are, or are not, parallel to the beds; while finally I observed several beds which in the middle of their thickness appeared filled with veins in zigzag, while near their borders they were arranged all in straight lines. This observation proves that the zig-zags are the effect of crystallization, and not that of a compression of the beds when they were in a state of softness. In effect, the middle of a bed could not be pushed together ('refoulé') unless the upper and lower parts of it were pushed at the same time."

This conclusive remark of Saussure renders debate impossible respecting the cause of the contortions of gneiss on a small scale; and a very few experiments with clay, dough, or any other ductile substance, such as those of which I have figured the results in the VIth plate of "Deucalion," will prove, what otherwise is evident on sufficient reflection, that minutely rhythmic undulations of beds cannot be obtained by compression on a large scale. But I am myself prepared to go much farther than this. During half a century of various march among the Alps, I never saw the gneiss yet, which I could believe to have been wrinkled by pressure, and so far am I disposed to carry this denial of external force, that I live in hopes of hearing the Matterhorn itself, whose contorted beds I engraved thirty years ago in the fourth volume of "Modern Painters" (the book is laid on the table, open at the plate), pronounced by the Mineralogical Society to be nothing else than a large gneissitic crystal, curiously cut!

Whether this hope be vain or not, I believe it will soon be felt by the members of this Society, that an immense field of observation is opened to them by recent chemistry, peculiarly their own: and that mineralogy, instead of being merely the servant of geology, must be ultimately her guide. No movement of rocks on a large scale can ever be explained until we

understand rightly the formation of a quartz vein, and the growth, to take the most familiar of fusible minerals, of an ice-crystal.\*

And I would especially plead with the younger members of the Society, that they should quit themselves of the idea that they need large laboratories, fine microscopes, or rare minerals, for the effective pursuit of their science. A quick eye, a candid mind, and an earnest heart, are all the microscopes and laboratories which any of us need ; and with a little clay, sand, salt, and sugar a man may find out more of the methods of geological phenomenon than ever were known to Sir Charles Lyell. Of the interest and entertainment of such unpretending science I hope the children of this generation may know more than their fathers, and that the study of the Earth, which hitherto has shown them little more than the monsters of a chaotic past, may at last interpret for them the beautiful work of the creative present, and lead them day by day to find a loveliness, till then unthought of, in the rock. and a value, till then uncounted, in the gem.

---

## POSTSCRIPT TO CHAPTER I.

I believe that one of the causes which has prevented my writings on subjects of science from obtaining the influence with the public which they have accorded to those on art, though precisely the same faculties of eye and mind are concerned in the analysis of natural and of pictorial forms, may have been my constant practice of teaching by question rather than assertion. So far as I am able, I will henceforward mend this fault as I best may ; beginning here with the assertion of the four facts for which, being after long observation convinced of them, I claim now, as I said in the Preface, the dignity of Discoveries.

I. That a large number of agates, and other siliceous substances, hitherto supposed to be rolled pebbles in a conglomerate paste, are in truth crystalline secretions out of that paste in situ, as garnets out of mica-slate.

II. That a large number of agates, hitherto supposed to be formed by

---

\* A translation into English of Dr. Schumacher's admirable essay, *Die Krystallisation des Eises*, Leipzig, 1844, is extremely desirable.

broken fragments of older agate, cemented by a gelatinous chalcedony, are indeed secretions out of a siliceous fluid containing miscellaneous elements, and their apparent fractures are indeed produced by the same kind of tranquil division which terminates the bands in banded flints.

III. That the contortions in gneiss and other metamorphic rocks, constantly ascribed by geologists to pressure, are only modes of crystallization.

And IV. That many of the faults and contortions produced on a large scale in metamorphic rocks are owing to the quiet operation of similar causes.

These four principles, as aforesaid, I have indeed worked out and discovered for myself, not in hasty rivalry with other mineralogists, but continually laying before them what evidence I had noted, and praying them to carry forward the inquiry themselves. Finding they would not, I have given much time this year to the collection of the data in my journals, and to the arrangement of various collections of siliceous and metallic minerals, illustrating such phenomena, of which the primary one is that just completed and catalogued in the British Museum (Nat. Hist.), instituting there, by the permission of the Trustees, the description of specimens by separate numbers; the next in importance is that at St. George's Museum in Sheffield; the third is one which I presented this spring to the Museum of Kirkcudbright; the fourth that placed at St. David's School, Reigate; and a fifth is in course of arrangement for the Mechanics' Institute here at Coniston; the sixth, described in the preceding chapter, may probably, with some modification, be placed at Edinburgh, but remains for the present at Brantwood, with unchanged numbers.

The six catalogues describing these collections will enable any student to follow out the history of siliceous minerals with reference to the best possible cabinet examples; but for a guide to their localities and the modes of their occurrence, he will find the following extracts from Pinkerton's "Petalogy,"\* more useful than anything in modern books; and I am entirely happy to find that my above-claimed discoveries were all anticipated by him, and are, by his close descriptions, in all points confirmed. His general term "Glutenites," for stones apparently formed of cemented fragments, entirely deserves restoration and future acceptance.

"The division of glutenites into bricias and pudding-stones, the former consisting of angular fragments, the latter of round or oval peb-

---

\* Two vols. 8vo, Cochrane & Co., Fleet Street, 1811. A quite invaluable book for clearness of description, usefulness of suggestion, and extent of geognostic reference. It has twenty beautiful little vignettes also, which are models of steel engraving.

bles, would not be unadvisable, were it in strict conformity with nature. But there are many rocks of this kind; as, for example, the celebrated Egyptian bricia, in which the fragments are partly round and partly angular; while the term glutenite is liable to no such objections, and the several structures identify the various substances.

“The celebrated English pudding-stone, found nowhere in the world but in Hertfordshire, appears to me to be rather an original rock, formed in the manner of amygdalites, because the pebbles do not seem to have been rolled by water, which would have worn off the substances in various directions; while, on the contrary, the white, black, brown, or red circlets are always entire, and parallel with the surface, like those of agates. Pebbles, therefore, instead of being united to form such rocks, may, in many circumstances, proceed from their decomposition; the circumjacent sand also arising from the decomposition of the cement.

“Mountains or regions of real glutenite often, however, accompany the skirts of extensive chains of mountains, as on the northwest and southeast sides of the Grampian Mountains in Scotland, in which instance the cement is affirmed by many travellers to be ferruginous, or sometimes argillaceous. The largeness or minuteness of the pebbles or particles cannot be said to alter the nature of the substance; so that a fine sandstone is also a glutenite, if viewed by the microscope. They may be divided into two structures: the large-grained, comprising bricias and pudding-stones; and the small-grained, or sandstones.

“At Dunstaffnage, in Scotland,\* romantic rocks of a singularly abrupt appearance, in some parts resembling walls, are formed by glutenite, in which the kernels consist of white quartz, with green or black trap porphyries, and basalts.

“In the glutenite from the south of the Grampians, from Ayrshire, from Inglestone Bridge, on the road between Edinburgh and Lanark, the cement is often siliceous, as in those at the foot of the Alps observed by Saussure.

“Another glutenite consists of fragments of granite, cemented by trap.

“Siderous glutenite, or pudding-stone of the most modern formation, is formed around cannon, pistols, and other instruments of iron, by the sand of the sea.

“Glutenite of small quartz pebbles, in a red ferruginous cement, is found in the coal mines near Bristol, etc.

“Porphyritic bricia (*Linn. a Gmelin*, 247), from Dalecarlia in Sweden, and Saxony. Calton-hill, Edinburgh?

---

\* For convenience in quotation, I occasionally alter Pinkerton's phrases—but, it will be found by reference to the original, without the slightest change in, or loss of, their meaning.

“The entirely siliceous glutenites will comprehend many important substances of various structures, from the celebrated Egyptian bricia, containing large pebbles of jasper, granite, and porphyry, to the siliceous sandstone of Stonehenge. These glutenites are of various formations; and the pudding-stone of England would rather seem, as already mentioned, to be an original rock, the pebbles or rather kernels having no appearance of having been rolled in water. Patrin\* has expressed the same idea concerning those pudding-stones which so much embarrassed Saussure, as he found their beds in a vertical position, while he argues that they could only have been formed on a horizontal level. This curious question might, as would seem, be easily decided by examining if the kernels have been rolled, or if, on the contrary, they retain their uniform concentric tints, observable in the pudding stone of England, and well represented in the specimen which Patrin has engraved. But the same idea had arisen to me before I had seen Patrin’s ingenious system of mineralogy. In like manner rocks now universally admitted to consist of granular quartz, or that substance crystallized in the form of sand, were formerly supposed to consist of sand agglutinated. Several primitive rocks contain glands of the same substance, and that great observer, Saussure, has called them Glandulites, an useful denomination when the glands are of the same substance with the rock; while Amygdalites are those rocks which contain kernels of quite a different nature. He observes, that in such a rock a central point of crystallization may attract the circumjacent matter into a round or oval form, perfectly defined and distinct; while other parts of the substance, having no point of attraction, may coalesce into a mass. The agency of iron may also be suspected, that metal, as appears from its ores, often occurring in detached round and oval forms of many sizes, and even a small proportion having a great power.

“On the other hand, many kinds of pudding-stone consist merely of rounded pebbles. Saussure describes the Rigiberg, near the lake of Lucerne, a mountain not less than 5,800 feet in height above the sea, and said to be eight leagues in circumference, which consists entirely of rolled pebbles, and among them some of pudding-stone, probably original, disposed in regular layers, and embedded in a calcareous cement. The pudding rocks around the great lake Baikal, in the centre of Asia, present the same phenomenon; but it has not been observed whether the fragments be of an original or derivative rock.

“The siliceous sandstones form another important division of this class. They may sometimes, as already mentioned, be confounded with granular quartz, which must be regarded as a primary crystallization. The sand, which has also been found in micaceous schistus, and at a

---

\* i., 154.

vast depth in many mines, may be well regarded as belonging to this formation; for it is well known that, if the crystallization be much disturbed, the substance will descend in small irregular particles.

“Siliceous sandstones are far more uncommon than the calcareous or argillaceous. The limits of the chalk country in England are singularly marked by large masses of siliceous sandstone, irregularly dispersed. Those of Stonehenge afford remarkable examples of the size and nature of those fragments, but the original rock has not been discovered. Trap or basaltin often reposes on siliceous sandstone.

“But the most eminent and singular pudding-stones are those occurring in Egypt, in the celebrated bricia of the Valley of Cosseir, and in the siliceous bricia of the same chain, in which are embedded those curious pebbles known by the name of Egyptian jasper; and which also sometimes contain agates. Bricias, with red jasper, also occur in France, Switzerland, and other countries; but the cement is friable, and they seldom take a good polish. All these rocks present both round and angular fragments, which shows that the division into bricias and pudding-stones cannot be accepted: a better division, when properly ascertained, would be into original and derivative glutenites. In a geological point of view, the most remarkable pudding-stones, which might more classically be called Kollanites, from the Greek,\* are those which border the chains of primitive mountains, as already mentioned. The English Hertfordshire pudding-stone is unique, and beautiful specimens are highly valued in France, and other countries. It is certainly an original rock, arising from a peculiar crystallization, being composed of round and oval kernels of a red, yellow, brown, or gray tint, in a base consisting of particles of the same, united by a siliceous cement.

“Of small-grained argillaceous glutenite, the most celebrated rock is the Grison, or Bergmanite, just mentioned, being composed of grains of sand, various in size, sometimes even kernels of quartz; which, with occasional bits of hard clay slate, are embedded in an argillaceous cement, of the nature of common gray clay slate. When the particles are very fine, it assumes the slaty structure, and forms the grauwack slate of the Germans. It is the chief of Werner’s transitive rocks, nearly approaching to the primitive; while at the same time it sometimes contains shells and other petrifications.

“This important rock was formerly considered as being almost peculiar to the Hartz, where it contains the richest mines; but has since been observed in many other countries. The slaty grison, or Bergmanite, has been confounded with a clay slate, and we are obliged to Mr. Jameson for the following distinctions: 1. It is commonly of a bluish,

---

\* Κόλλα, cement; the more proper, as it also implies iron, often the chief agent.

ash, or smoke gray, and rarely presents the greenish or light yellowish-gray color of primitive clay slate. 2. Its lustre is sometimes glimmering from specks of mica, but it never shows the silky lustre of clay slate. 3. It never presents siderite nor garnets. 4. It alternates with massive grauwack. But is not the chief distinction its aspect of a sandstone, which has led to the trivial French name of *grès-gris*, and the English *rubble-stone*, which may imply that it was formed of rubbed fragments, or of the rubbish of other rocks? The fracture is also different; and three specimens of various fineness, which I received from Daubuisson, at Paris, could never be confounded with clay slate.

“This rock is uncommonly productive of metals, not only in beds but also in veins, which latter are frequently of great magnitude. Thus almost the whole of the mines in the Hartz are situated in greywack. These mines afford principally argentiferous lead-glance, which is usually accompanied with blend, fahl ore, black silver ore, and copper pyrites. A more particular examination discloses several distinct venigenous formations that traverse the mountains of the Hartz. The greywack of the Saxon Erzgebirge, of the Rhine at Rheinbreidenbach, Andernach, etc., of Leogang in Salzburg, is rich in ores, particularly those of lead and copper. At Vorospatak and Facebay, in Transylvania, the greywack is traversed by numerous small veins of gold.”

These passages from Pinkerton, with those translated at p. 9 from Saussure, are enough to do justice to the clear insight of old geologists, respecting matters still at issue among younger ones; and I must therefore ask the reader's patience with the hesitating assertions in the following chapters of many points on which a wider acquaintance with the writings of the true Fathers of the science might have enabled me to speak with grateful confidence.

## CHAPTER II.

### THE DRY LAND.

“*Modern Painters*,” Vol. IV., chap. vii.

“*And God said, Let the waters which are under the heaven be gathered together unto one place, and let the dry land appear.*”

WE do not, perhaps, often enough consider the deep significance of this sentence. We are too apt to receive it as the description of an event vaster only in its extent, not in its nature, than the compelling the Red Sea to draw back, that Israel might pass by. We imagine the Deity in like manner rolling the waves of the greater ocean together on an heap, and setting bars and doors to them eternally.

But there is a far deeper meaning than this in the solemn words of Genesis, and in the correspondent verse of the Psalm, “His hands prepared the dry land.” Up to that moment the earth had been *void*, for it had been *without form*. The command that the waters should be *gathered*, was the command that the earth should be *sculptured*. The sea was not driven to his place in suddenly restrained rebellion, but withdrawn to his place in perfect and patient obedience. The dry land appeared, not in level sands, forsaken by the surges, which those surges might again claim for their own; but in range beyond range of swelling hill and iron rock, forever to claim kindred with the firmament, and be companioned by the clouds of heaven.

2. What space of time was in reality occupied by the “day” of Genesis, is not, at present, of any importance for us to consider. By what furnaces of fire the adamant was melted, and by what wheels of earthquake it was torn, and by

what teeth of glacier \* and weight of sea-waves it was engraven and finished into its perfect form, we may perhaps hereafter endeavor to conjecture ; but here, as in few words the work is summed by the historian, so in few broad thoughts it should be comprehended by us ; and as we read the mighty sentence, " Let the dry land appear," we should try to follow the finger of God, as it engraved upon the stone tables of the earth the letters and the law of its everlasting form ; as, gulf by gulf, the channels of the deep were ploughed ; and, cape by cape, the lines were traced, with Divine foreknowledge, of the shores that were to limit the nations ; and, chain by chain, the mountain walls were lengthened forth, and their foundations fastened for ever ; and the compass was set upon the face of the depth, and the fields, and the highest part of the dust of the world were made ; and the right hand of Christ first strewed the snow on Lebanon, and smoothed the slopes of Calvary.

3. It is not, I repeat, always needful, in many respects it is not possible, to conjecture the manner, or the time, in which this work was done ; but it is deeply necessary for all men to consider the magnificence of the accomplished purpose, and the depth of the wisdom and love which are manifested in the ordinances of the hills. For observe, in order to bring the world into the form which it now bears, it was not mere *sculpture* that was needed ; the mountains could not stand for a day unless they were formed of materials altogether different from those which constitute the lower hills, and the surfaces of the valleys. A harder substance had to be prepared for every mountain chain ; yet not so hard but that it might be capable of crumbling down into earth fit to nourish the Alpine forest and the Alpine flower ; not so hard but that, in the midst of the utmost majesty of its enthroned strength, there should be seen on it the seal of death, and the

---

\* Though I had already learned from James Forbes the laws of glacier motion, I still fancied that ice could drive embedded blocks and wear down rock surfaces. See for correction of this error, *Arrows of the Chase*, vol. i, pp. 255-273, and *Deucalion*, *passim*.

writing of the same sentence that had gone forth against the human frame, "Dust thou art, and unto dust thou shalt return." \* And with this perishable substance the most majestic forms were to be framed that were consistent with the safety of man; and the peak was to be lifted, and the cliff rent, as high and as steeply as was possible, in order yet to permit the shepherd to feed his flocks upon the slope, and the cottage to nestle beneath their shadow.

4. And observe, two distinct ends were to be accomplished in the doing this. It was, indeed, absolutely necessary that such eminences should be created, in order to fit the earth in any wise for human habitation; for without mountains the air could not be purified, nor the flowing of the rivers sustained, and the earth must have become for the most part desert plain, or stagnant marsh. But the feeding of the rivers and the purifying of the winds are the least of the services appointed to the hills. To fill the thirst of the human heart for the beauty of God's working—to startle its lethargy with the deep and pure agitation of astonishment—are their higher missions. They are as a great and noble architecture; first giving shelter, comfort, and rest; and covered also with mighty sculpture and painted legend. It is impossible to examine in their connected system the features of even the most ordinary mountain scenery, without concluding that it has been prepared in order to unite, as far as possible, and in the closest compass, every means of delighting and sanctifying the heart of man. "As far as possible;" that is, as far as is consistent with the fulfilment of the sentence of condemnation on the whole earth. Death must be upon the hills; and the cruelty of the tempests smite them, and the brier and thorn spring up upon them: but they so smite, as to bring their rocks into the fairest forms; and so spring, as to make the very desert blossom as the rose. Even among

---

\* "Surely the mountain falling cometh to nought, and the rock is removed out of his place. The waters wear the stones: thou wastest away the things which grow out of the dust of the earth, and thou destroyest the hope of man."—*Job* xiv. 18, 19.

our own hills of Scotland and Cumberland, though often too barren to be perfectly beautiful, and always too low to be perfectly sublime, it is strange how many deep sources of delight are gathered into the compass of their glens and vales; and how, down to the most secret cluster of their far-away flowers, and the idlest leap of their straying streamlets, the whole heart of Nature seems thirsting to give, and still to give, shedding forth her everlasting beneficence with a profusion so patient, so passionate, that our utmost observance and thankfulness are but, at last, neglect of her nobleness, and apathy to her love.

But among the true mountains of the greater orders the Divine purpose of appeal at once to all the faculties of the human spirit becomes still more manifest. Inferior hills ordinarily interrupt, in some degree, the richness of the valleys at their feet; the gray downs of southern England, and treeless coteaux of central France, and gray swells of Scottish moor, whatever peculiar charm they may possess in themselves, are at least destitute of those which belong to the woods and fields of the lowlands. But the great mountains *lift* the lowlands *on their sides*. Let the reader imagine, first, the appearance of the most varied plain of some richly cultivated country; let him imagine it dark with graceful woods, and soft with deepest pastures; let him fill the space of it, to the utmost horizon, with innumerable and changeful incidents of scenery and life; leading pleasant streamlets through its meadows, strewing clusters of cottages beside their banks, tracing sweet footpaths through its avenues, and animating its fields with happy flocks, and slow wandering spots of cattle; and when he has wearied himself with endless imagining, and left no space without some loveliness of its own, let him conceive all this great plain, with its infinite treasures of natural beauty and happy human life, gathered up in God's hands from one edge of the horizon to the other, like a woven garment; and shaken into deep falling folds, as the robes droop from a king's shoulders; all its bright rivers leaping into cataracts along the hollows of its fall, and all its forests rearing themselves aslant against its slopes, as a rider rears himself back when his horse

plunges ; and all its villages nestling themselves into the new windings of its glens ; and all its pastures thrown into steep waves of greensward, dashed with dew along the edges of their folds, and sweeping down into endless slopes, with a cloud here and there lying quietly, half on the grass, half in the air ; and he will have as yet, in all this lifted world, only the foundation of one of the great Alps. And whatever is lovely in the lowland scenery becomes lovelier in this change : the trees which grew heavily and stiffly from the level line of plain assume strange curves of strength and grace as they bend themselves against the mountain side ; they breathe more freely, and toss their branches more carelessly as each climbs higher, looking to the clear light above the topmost leaves of its brother tree : the flowers which on the arable plain fell before the plough, now find out for themselves unapproachable places, where year by year they gather into happier fellowship, and fear no evil ; and the streams which in the level land crept in dark eddies by unwholesome banks, now move in showers of silver, and are clothed with rainbows, and bring health and life wherever the glance of their waves can reach.

5. And although this beauty seems at first, in its wildness, inconsistent with the service of man, it is in fact more necessary to his happy existence than all the level and easily subdued land which he rejoices to possess. It seems almost an insult to the reader's intelligence to ask him to dwell (as if they could be doubted) on the uses of the hills, and yet so little until lately have those uses been understood that, in the seventeenth century, one of the most enlightened of the religious men of his day (Fleming), himself a native of a mountain country, casting about for some reason to explain to himself the existence of mountains, and prove their harmony with the providential government of creation, can light upon this reason only, "They are inhabited by the beasts."

6. It may not, therefore, even at this day, be profitless to review briefly the nature of the three great offices which mountain ranges are appointed to fulfil, in order to preserve the health and increase the happiness of mankind.

I. Their first use is of course *to give motion to (fresh) water.*

Every fountain and river, from the inch-deep streamlet that crosses the village lane in trembling clearness, to the massy and silent march of the everlasting multitude of waters in Amazon or Ganges, owe their play and purity and power to the ordained elevations of the Earth. Gentle or steep, extended or abrupt, some determined slope of the earth's surface is of course necessary, before any wave can so much as overtake one sedge in its pilgrimage; and how seldom do we enough consider, as we walk beside the margins of our pleasant brooks, how beautiful and wonderful is that ordinance, of which every blade of grass that waves in their clear water is a perpetual sign; that the dew and rain fallen on the face of the earth shall find *no resting-place*; shall find, on the contrary, fixed channels traced for them, from the ravines of the central crests down which they roar in sudden ranks of foam, to the dark hollows beneath the banks of lowland pasture, round which they must circle slowly among the stems and beneath the leaves of the lilies; paths prepared for them, by which, at some appointed rate of journey, they must evermore descend, sometimes slow and sometimes swift, but never pausing; the daily portion of the earth they have to glide over marked for them at each successive sunrise, the place which has known them knowing them no more, and the gateways of guarding mountains opened for them in cleft and chasm, none letting them in their pilgrimage; and, from far off, the great heart of the sea calling them to itself! Deep calleth unto deep.

I know not which of the two is the more wonderful,—that calm, gradated, invisible slope\* of the champaign land, which gives motion to the stream; or that passage cloven for it through the ranks of hill, which, necessary for the health of the land immediately around them, would yet, unless so supernaturally divided, have fatally intercepted the flow of the

---

\* (Only true on a large scale. I have perhaps not allowed enough for the mere secession of flowing water, supplying the evaporation of the sea, whether the plains be level or not;—it must find its way to the place where there is a fall, as through a mill pond to the weir.)

waters from far-off countries. When did the great spirit of the river first knock at those adamantine gates? When did the porter open to it, and cast his keys away for ever, lapped in whirling sand? I am not satisfied—no one should be satisfied with that vague answer—the river *cut* its way. Not so. The river *found* its way.\* I do not see that rivers, in their own strength, can do much in cutting their way; they are nearly as apt to choke their channels up, as to carve them out. Only give a river some little sudden power in a valley, and see how it will use it. Cut itself a bed? Not so, by any means, but fill up its bed, and look for another, in a wild, dissatisfied, inconsistent manner. Any way, rather than the old one, will better please it; and even if it is banked up and forced to keep to the old one, it will not deepen, but do all it can to raise it, and leap out of it. And although, wherever water has a steep fall, it will swiftly cut itself a bed deep into the rock or ground, it will not, when the rock is hard, cut a wider channel than it actually needs; so that if the existing river beds, through ranges of mountain, had in reality been cut by the streams, they would be found, wherever the rocks are hard, only in the form of narrow and profound ravines—like the well-known channel of the Niagara, below the fall; not in that of extended valleys. And the actual work of true mountain rivers, though often much greater in proportion to their body of water than that of the Niagara, is quite insignificant when compared with the area and depth of the valleys through which they flow; so that, although in many cases it appears that those larger valleys have been excavated at earlier periods by more powerful streams, or by the existing stream in a more powerful condition, still the great fact remains always equally plain, and equally admirable, that, whatever the nature and duration of the agencies employed, the earth was so shaped at first as to direct the currents of its rivers in the manner most

---

\* (It is very delightful to me,—at least to the proud spirit in me,—to find myself thus early perceiving and clearly announcing a fact of which modern geology is still incognizant; see the postscript to this chapter.)

healthy and convenient for man. The valley of the Rhone may, though it is not likely, have been in great part excavated in early time by torrents a thousand times larger than the Rhone ; but it could not have been excavated at all, unless the mountains had been thrown at first into two chains, between which the torrents were set to work in a given direction. And it is easy to conceive how, under any less beneficent dispositions of their masses of hill, the continents of the earth might either have been covered with enormous lakes, as parts of North America actually are covered ; or have become wildernesses of pestiferous marsh ; or lifeless plains, upon which the water would have dried as it fell, leaving them for great part of the year desert. Such districts do exist, and exist in vastness ; the *whole* earth is not prepared for the habitation of man ; only certain small portions are prepared for him—the houses, as it were, of the human race, from which they are to look abroad upon the rest of the world, not to wonder or complain that it is not all house, but to be grateful for the kindness of the admirable building, in the house itself, as compared with the rest. It would be as absurd to think it an evil that all the world is not fit for us to inhabit, as to think it an evil that the globe is no larger than it is. As much as we shall ever need is evidently assigned to us for our dwelling-place ; the rest, covered with rolling waves or drifting sands, fretted with ice, or crested with fire, is set before us for contemplation in an uninhabitable magnificence ; and that part which we are enabled to inhabit owes its fitness for human life chiefly to its mountain ranges, which, throwing the superfluous rain off as it falls, collect it in streams or lakes, and guide it into given places, and in given directions ; so that men can build their cities in the midst of fields which they know will be always fertile, and establish the lines of their commerce upon streams which will not fail.

7. Nor is this giving of motion to water to be considered as confined only to the *surface* of the earth. A no less important function of the hills is in directing the flow of the fountains and springs, from subterranean reservoirs. There

is no miraculous springing up of water out of the ground at our feet ; but every fountain and well is supplied from a reservoir among the hills, so placed as to involve some slight fall or pressure, enough to secure the constant flowing of the stream. And the incalculable blessing of the power given to us in most valleys, of reaching by excavation some point whence the water will rise to the surface of the ground in perennial flow, is entirely owing to the concave disposition of the beds of clay or rock raised from beneath the bosom of the valley into ranks of enclosing hills.

8. II. The second great use of mountains is to maintain a constant change in the currents and nature of the *air*. Such change would, of course, have been partly caused by differences in soils and vegetation, even if the earth had been level ; but to a far less extent than it is now by the chains of hills, which, exposing on one side their masses of rock to the full heat of the sun (increased by the angle at which the rays strike on the slope), and on the other casting a soft shadow for leagues over the plains at their feet, divide the earth not only into districts, but into climates, and cause perpetual currents of air to traverse their passes,\* and ascend or descend their ravines, altering both the temperature and nature of the air as it passes, in a thousand different ways ; moistening it with the spray of their waterfalls, sucking it down and beating it hither and thither in the pools of their torrents, closing it within clefts and caves, where the sunbeams never reach, till it is as cold as November mists, then sending it forth again to breathe softly across the slopes of velvet fields, or to be scorched among sunburnt shales and grassless crags ; then drawing it back in moaning swirls through clefts of ice, and up into dewy wreaths above the snow-fields ; then piercing it with strange electric darts and flashes of mountain fire, and tossing it high in fantastic storm-cloud, as the dried grass is tossed by the mower, only suffering it to depart at last, when

---

\* This second division of my subject, compressed into one paragraph, is treated with curious insufficiency. See again postscript to this chapter.

chastened and pure, to refresh the faded air of the far-off plains.

9. III. The third great use of mountains is to cause perpetual change in the *soils* of the earth. Without such provision, the ground under cultivation would in a series of years become exhausted, and require to be upturned laboriously by the hand of man. But the elevations of the earth's surface provide for it a perpetual renovation. The higher mountains suffer their summits to be broken into fragments and to be cast down in sheets of massy rock, full, as we shall see presently, of every substance necessary for the nourishment of plants; these fallen fragments are again broken by frost, and ground by torrents, into various conditions of sand and clay—materials which are distributed perpetually by the streams farther and farther from the mountain's base. Every shower which swells the rivulets enables their waters to carry certain portions of earth into new positions, and exposes new banks of ground to be mined in their turn. That turbid foaming of the angry water—that tearing down of bank and rock along the flanks of its fury—are no disturbances of the kind course of nature; they are beneficent operations of laws necessary to the existence of man and to the beauty of the earth. The process is continued more gently, but not less effectively, over all the surface of the lower undulating country; and each filtering thread of summer rain which trickles through the short turf of the uplands is bearing its own appointed burden of earth to be thrown down on some new natural garden in the dingles below.

And it is not, in reality, a degrading, but a true, large, and ennobling view of the mountain ranges of the world, if we compare them to heaps of fertile and fresh earth, laid up by a prudent gardener beside his garden beds, whence, at intervals, he casts on them some scattering of new and virgin ground. That which we so often lament as convulsion or destruction is nothing else \* than the momentary shaking of

---

\* (I should call it a good deal else, now! but must leave the text untouched; being, in its statements of pure fact—putting its theology aside for the moment—quite one of the best pieces I have ever done.)

the dust from the spade. The winter floods, which inflict a temporary devastation, bear with them the elements of succeeding fertility ; the fruitful field is covered with sand and shingle in momentary judgment, but in enduring mercy ; and the great river, which chokes its mouth with marsh, and tosses terror along its shore, is but scattering the seeds of the harvests of futurity, and preparing the seats of unborn generations.

10. I have not spoken of the local and peculiar utilities of mountains ; I do not count the benefit of the supply of summer streams from the moors of the higher ranges—of the various medicinal plants which are nested among their rocks—of the delicate pasturage which they furnish for cattle\*—of the forests in which they bear timber for shipping—the stones they supply for building, or the ores of metal which they collect into spots open to discovery, and easy for working. All these benefits are of a secondary or a limited nature. But the three great functions which I have just described—those of giving motion and change to water, air, and earth—are indispensable to human existence ; they are operations to be regarded with as full a depth of gratitude as the laws which bid the tree bear fruit, or the seed multiply itself in the earth. And thus those desolate and threatening ranges of dark mountains, which, in nearly all ages of the world, men have looked upon with aversion or with terror, and shrunk back from as if they were haunted by perpetual images of death, are, in reality, sources of life and happiness far fuller and more beneficent than all the bright fruitfulness of the plain. The valleys only feed ; the mountains feed, and guard, and strengthen us. We take our ideas of fearfulness and sublimity alternately from the mountains and the sea ; but we associate them unjustly. The sea wave, with all its beneficence, is yet devouring and terrible ; but the silent wave of the blue mountain is lifted toward heaven in a stillness of perpetual mercy ; and the one surge, unfathomable

---

\* The *highest* pasturages (at least so say the Savoyards) being always the best and richest.

in its darkness, the other, unshaken in its faithfulness, for ever bear the seal of their appointed symbolism,

“ THY JUSTICE IS LIKE THE GREAT MOUNTAINS :  
THY JUDGMENTS ARE A GREAT DEEP.”

---

## POSTSCRIPT TO CHAPTER II

The subject of erosion by water, referred to in the note at p. 134, is treated of at length in the 12th chapter of “ Deucalion,” of which the conclusions may be summed in the warning to young geologists not to suppose that because Shanklin Chine was “ chined ” by its central gutter, therefore Salisbury Craigs were cut out by the Water of Leith—Ingleborough by the Ribble, or Monte Rosa by the Rhone.

The subject has since been farther illustrated by the admirable drawings and sections given by Mr. Collingwood in his “ Limestone Alps of Savoy,” 1884.

The paragraph at p. 136 is chiefly, and enormously, defective in speaking only of the changes effected by mountains in the nature of air, and not following out their good offices in lifting the mountaineer nations to live in the air they purify, or rise into, already pure.

## CHAPTER III.

### OF THE MATERIALS OF MOUNTAINS.

*“Modern Painters,” Part V., the beginning of chap. viii.*

In the early days of geological science the substances which composed the crust of the earth, as far as it could be examined, were supposed to be referable to three distinct classes: the first consisting of rocks which not only supported all the rest, but from which all the rest were derived, therefore called “Primary;” the second class consisting of rock formed of the broken fragments or altered substance of the primary ones, therefore called “Secondary;” and, thirdly, rocks or earthy deposits formed by the ruins and detritus of both primary and secondary rocks, called therefore “Tertiary.” This classification was always, in some degree, uncertain; and has been lately superseded by more complicated systems, founded on the character of the fossils contained in the various deposits, and on the circumstances of position, by which their relative ages are more accurately ascertainable. But the original rude classification, though of little, if any, use for scientific purposes, was based on certain broad and conspicuous phenomena, which it brought clearly before the popular mind. In this way it may still be serviceable, and ought, I think, to be permitted to retain its place, as an introduction to systems more defined and authoritative.\*

2. For the fact is, that in approaching any large mountain

---

\* I am still entirely of this opinion. See postscript to chapter. These opening paragraphs are to my mind extremely well put, and should be read to young people by their tutors as an introduction to geological study. I have here and there retouched a loose sentence, and leave them as good as I could do now.

range, the ground over which the spectator passes, if he examine it with any intelligence, will almost always arrange itself in his mind under three great heads. There will be, first, the ground of the plains or valleys he is about to quit, composed of sand, clay, gravel, rolled stones, and variously mingled soils ; which, when there is opportunity, at the banks of a stream, or the sides of a railway cutting, to examine to any depth, he will find arranged in beds exactly resembling those of modern sandbanks or sea-beaches, and appearing to have been formed under natural laws such as are in operation daily around us. At the outskirts of the hill district, he may, perhaps, find considerable eminences, formed of these beds of loose gravel and sand ; but, as he enters into it farther, he will soon discover the hills to be composed of some harder substance, properly deserving the name of rock, sustaining itself in picturesque forms, and appearing, at first, to owe both its hardness and its outlines to the action of laws such as do not hold at the present day. He can easily explain the nature, and account for the distribution, of the banks which overhang the lowland road, or of the dark earthy deposits which enrich the lowland pasture ; but he cannot so distinctly imagine how the limestone hills of Derbyshire and Yorkshire were hardened into their stubborn whiteness, or raised into their cavernous cliffs. Still, if he carefully examine the substance of these more noble rocks, he will, in nine cases out of ten, discover them to be composed of fine calcareous dust, or closely united particles of sand ; and will be ready to accept as possible, or even probable, the suggestion of their having been formed, by slow deposit, at the bottom of deep lakes and ancient seas, and then gradually consolidated under such laws of Nature as are still in operation.

3. But, as he advances yet farther into the hill district, he finds the rocks around him assuming a gloomier and more majestic condition. Their tint darkens ; their outlines become wild and irregular ; and whereas before they had only appeared at the roadside in narrow ledges among the turf, or glanced out from among the thickets above the brooks in

white walls and fantastic towers, they now rear themselves up in solemn and shattered masses far and near ; softened, indeed, with strange harmony of clouded \* colors, but possessing the whole scene with their iron spirit ; and rising, in all probability, into eminences as much prouder in actual elevation than those of the intermediate rocks, as more powerful in their influence over every minor feature of the landscape.

4. And when the traveller proceeds to observe closely the materials of which these nobler ranges are composed, he finds also a complete change in their internal structure. They are no longer formed of delicate sand or dust—each particle of that dust the same as every other, and the whole mass depending for its hardness merely on their closely cemented unity ; but they are now formed of several distinct substances visibly unlike each other ; and not *pressed*, but *crystallized* into one mass—crystallized into a unity far more perfect than that of the dusty limestone, but yet without the least mingling of their several natures with each other. Such a rock, freshly broken, has a spotty, granulated, and, in almost all instances, sparkling, appearance ; it requires a much harder blow to break it than the limestone or sandstone ; but when once thoroughly shattered, it is easy to separate from each other the various substances of which it is composed, and to examine them in their individual grains or crystals ; of which each variety will be found to have a different degree of hardness, a different shade of color, a different character of form, and a different chemical composition.

But this examination will not enable the observer to comprehend the method either of their formation or aggregation, at least by any process such as he now sees taking place around him ; he will at once be driven to admit that some

---

\* “ *Clouded* ” referring to the peculiar softness and richness of the dark lichens on many primitive rocks, as opposed to the whiteness or gray yellow of many among the secondaries. “ *Iron spirit*,” just after, meaning a strength having the toughness of iron in it, unassailable ; but I find with pleasant surprise in extremely “ old English ” geology, a large family of these rocks called “ *siderous*,” from the quantity of latent iron they contain.

strange and powerful operation has taken place upon these rocks, different from any of which he is at present cognizant.\*

5. Now, although these three great groups of rocks do indeed often pass into each other by imperceptible gradations, and although their peculiar aspect is never a severe indication of their relative ages, yet their characters are for the most part so defined as to make a strong impression on the mind of an ordinary observer; and their age is also for the most part approximately indicated by their degrees of hardness and crystalline aspect. It does, indeed, sometimes † happen that a soft and slimy clay will pass into a rock like Aberdeen granite by transitions so subtle that no point of separation can be determined; and it very often happens that rocks like Aberdeen granite are of more recent formation than certain beds of sandstone and limestone. But in spite of all these uncertainties and exceptions, I believe that unless actual pains be taken to efface from the mind its natural impressions, the idea of three great classes of rocks and earth will maintain its ground in the thoughts of the generally intelligent observer; that, whether he desire it or not, he will find himself throwing the soft and loose clays and sands together under one head; placing the hard rocks, of a dull, compact, homogeneous substance, under another head; and the hardest rocks, of a crystalline, glittering, and various substance, under a third head; and having done this, he will also find that, with certain easily admissible exceptions, these three classes of rocks are, in every district which he examines, of three different ages; that the softest are the youngest, the hard and homogeneous ones are older, and the crystalline are the oldest; and he will, perhaps, in the end, find it a somewhat

---

\* The original text proceeded thus—"and farther inquiry will probably induce him to admit, as more than probable, the supposition that their structure is in great part owing to the action of enormous heat prolonged for indefinite periods"—which sentence I remove into this note to prevent the lucidity and straightforward descriptive truth of these paragraphs to be soiled with conjecture.

† Very rarely! I forget what instance I was thinking of—anyhow the sentence is too strongly put.

inconvenient piece of respect to the complexity and accuracy of modern geological science, if he refuse to the three classes, thus defined in his imagination, their ancient titles of Tertiary, Secondary, and Primary.

6. But however this may be, there is one lesson evidently intended to be taught by the different characters of these rocks, which we must not allow to escape us. We have to observe, first, the state of perfect powerlessness, and loss of all beauty, exhibited in those beds of earth in which the separated pieces or particles are entirely independent of each other, more especially in the gravel whose pebbles have all been *rolled into one shape*; secondly, the greater degree of permanence, power, and beauty possessed by the rocks whose component atoms have some affection and attraction for each other, though all of one kind; and, lastly, the utmost form and highest beauty of the rocks in which the several atoms have all *different shapes, characters, and offices*; but are inseparably united by some fiery, or baptismal,\* process which has purified them all.

It can hardly be necessary to point out how these natural ordinances seem intended † to teach us the great truths which are the basis of all political science; how the polishing friction which separates, the affection that binds, and the affliction that fuses and confirms, are accurately symbolized by the processes to which the several ranks of hills appear to owe their present aspect; and how, even if the knowledge of those processes be denied to us, that present aspect may in itself seem no imperfect image of the various states of mankind: first, that which is powerless through total disorganization; secondly, that which, though united, and in some degree powerful, is yet incapable of great effort, or result, owing to the too great similarity and confusion of offices, both

---

\* The words "or baptismal" now inserted.

† Most people being unable to imagine intention under the guise of fixed law, I should have said now, rather than "seem intended to teach us," "*do*, if we will consider them, teach us." See however, below, the old note to § 9. This 6th paragraph is the germ, or rather bulb, of Ethics of the Dust.

in ranks and individuals; and finally, the perfect state of brotherhood and strength in which each character is clearly distinguished, separately perfected, and employed in its proper place and office.

7. I shall not, however, so oppose myself to the views of our leading geologists as to retain here the names of Primary, Secondary, and Tertiary rocks. But as I wish the reader to keep the ideas of the three classes clearly in his mind, I will ask his leave to give them names which involve no theory, and can be liable, therefore, to no grave objections. We will call the hard, and (generally) central, masses, Crystalline Rocks, because they almost always present an appearance of crystallization.\* The less hard substances, which appear compact and homogeneous, we will call Coherent Rocks, and for the scattered débris we will use the general term Diluvium.

8. All these orders of substance agree in one character, that of being more or less frangible or soluble. One material, indeed, which enters largely into the composition of most of them, *flint*, is harder than iron; but even this, their chief source of strength, is easily broken by a sudden blow; and it is so combined in the large rocks with softer substances, that time and the violence or chemical agency of the weather invariably produce certain destructive effects on their masses. Some of them become soft, and moulder away; others break, little by little, into angular fragments or slaty sheets; but all yield in some way or other; and the problem to be solved in every mountain range appears to be, that under these conditions of decay, the cliffs and peaks may be raised as high and thrown into as noble forms, as is possible, consistently with an effective, though not perfect, permanence, and a general, though not absolute, security.

9. Perfect permanence and absolute security were evidently in nowise intended.† It would have been as easy for the

\* Not strongly enough put, this time. They always are crystalline, whether they present the appearance of it or not.

† I am well aware that to the minds of many persons nothing bears a greater appearance of presumption than any attempt at reasoning re-

Creator to have made mountains of steel as of granite, of adamant as of lime ; but this was clearly no part of the Divine counsels : mountains were to be destructible and frail—to melt under the soft lambency of the streamlet, to shiver before the subtle wedge of the frost, to wither with untraceable decay in their own substance—and yet, under all these conditions of destruction, to be maintained in magnificent eminence before the eyes of men.

Nor is it in anywise difficult for us to perceive the beneficent reasons for this appointed frailness of the mountains. They appear to be threefold : the first, and the most important, that successive soils might be supplied to the plains, in the manner explained in the last chapter, and that men might be furnished with a material for their works of architecture and sculpture, at once soft enough to be subdued, and hard enough to be preserved ; the second, that some sense of danger might always be connected with the most precipitous forms, and thus increase their sublimity ; and the third, that a subject of perpetual interest might be opened to the human mind in observing the changes of form brought about by time on these monuments of Creation.

10. In order, therefore, to understand the method in which these various substances break, so as to produce the forms which are of chief importance in landscape, as well as the exquisite adaptation of all their qualities to the service of men, it will be well that I should take some note of them in their order ; not with any far-followed mineralogical detail, but with care enough to enable me hereafter to explain, without

---

specting the purposes of the Divine Being ; and that in many cases it would be thought more consistent with the modesty of humanity to limit its endeavor to the ascertaining of physical causes than to form conjectures respecting Divine intentions. But I believe this feeling to be false and dangerous. Wisdom can only be demonstrated in its ends, and goodness only perceived in its motives. He who in a morbid modesty supposes that he is incapable of apprehending any of the purposes of God renders himself also incapable of witnessing His wisdom ; and he who supposes that favors may be bestowed without intention will soon learn to receive them without gratitude.

obscurity, any phenomena dependent upon such peculiarities of substance.

(I have cut the eighth chapter of the old book in half here, for better arrangement of subject. The reader will perhaps forego, once in a way, without painful sense of loss, my customary burst of terminal eloquence.)

---

### POSTSCRIPT TO CHAPTER III.

For many reasons, which will appear one by one in the course of this work, I think it well to give, for postscript to this chapter, a translation of Saussure's introductory account of granite, published in 1803, at Neuchatel, chez Louis Fauche-Borel, imprimeur *du Roi* (King of Prussia), "Voyages dans les Alpes," vol. i. chap. v. Les Roches Composées. Granit.

"Granites belong to that class of stones which naturalists name composed stones, or rocks, or living rock, *roc vif*,\* the *saxa mixta* of Wallerius. This class includes stones which are composed of two, three, or four different species of stones, intermixed under the form of angular grains, or *folia* (*feuilletés*) *united by the intimacy of their contact, without the help of any stronger gluten.*

"Those which divide themselves by *folia* are called schistous rocks, or foliated rocks (*Roches schisteuses* ou *Roches feuilletées*). *Saxa fissilia*, Wall. Those which appear composed of grains, and which present neither *folia* nor sensible veins, are named Rocks in mass. *Saxa solida*, Wall. Such are the granites.

"It is these two species of rocks which form the matter of the most elevated mountains, such as the central chains of the Alps, the Cordillera, the Ural, Caucasus, and Altaic mountains. One never finds them seated upon (*assises sur*) mountains of slate (*ardoise*) or of calcareous stone; they serve, on the contrary, for base to these, and have consequently existed before them. They bear then, by just claim, the name

---

\* The modern reader passes as merely poetical the words "*living rock*" of former good writers. But living rock is as distinct from dead, as heart of oak from dry rot. In accuracy, "*living*" is the word used by the natural human sense to express the difference between a crystalline rock and one of mere coagulated sand or slime.

of primitive mountains, while those of slate and calcareous stone are qualified as secondary."

The young reader will do well to fix these simple statements in his head, and by no means let them be shaken in it. Modern geologists will tell him that Mont Blanc is young; but the date of a mountain's elevation is not that of its substance. Granite no more becomes a secondary rock in lifting a bed of chalk than an old man becomes a boy in throwing off his bedclothes. All modern geologists will tell you that granite and basalt are pretty much the same thing, that each may become the other, and any come to the top. Recollect simply, to begin with, that granite forms delightful and healthy countries, basalt gloomy and oppressive ones, and that, if you have the misfortune to live under Etna or Hecla, you and your house may both be buried in basalt tomorrow morning; but that nobody was ever buried in granite, unless somebody paid for his tomb. Recollect farther, that granite is for the most part visibly composed of three substances, always easily recognizable—quartz, felspar, and mica; but basalt may be made of anything on the face or in the stomach of the Earth. And recollect finally, that there was assuredly a time when the Earth had no animals upon it; another time when it had only nasty and beastly animals upon it; and that at this time it has a great many beautiful and angelic animals upon it, tormented out of their lives by one extremely foolish two-legged one. To these three periods, the first of chaotic solitude, the second of rampant monstrosity, and the third of ruthless beauty, the names of Primary, Secondary, and Tertiary may justly hold for ever—be the Fourth Age what it may.

PHYSICS 310

## PREFACE.

---

THE studies of the nature and form of clouds, reprinted in the following pages from the fourth and fifth volumes of "Modern Painters," will be in this series third in order, as they are in those volumes, of the treatises on natural history which were there made the foundation of judgment in landscape art. But the essay on trees will require more careful annotation than I have at present time for, and I am also desirous of placing these cloud studies quickly in the hands of anyone who may have been interested in my account of recent storms.

I find nothing to alter,\* and little to explain, in the following portions of my former work, in which such passages as the eighth and ninth paragraphs of the opening chapter—usually thought of by the public merely as word-painting, but which are in reality accurately abstracted, and finally concentrated, expressions of the general laws of natural phenomena †—are indeed among the best I have ever written, and in their

---

\* Sometimes a now useless reference to other parts of the book is omitted, or one necessary to connect the sentence broken by such omission; otherwise I do not retouch the original text.

† Thus the sentence at page 7, "murmuring only when the winds raise them, or rocks divide." does not describe, or word-paint, the sound of waters, but (with only the admitted art of a carefully reiterated "r") sums the general *causes* of it; while, again, the immediately following one, defining the limitations of sea and river, "restrained by established shores, and guided through unchanging channels," attempts no word-painting either of coast or burnside; but states, with only such ornament of its simplicity as could be got of the doubled "t" and doubled "ch," the fact of the stability of existing rock structure which I was, at that time, alone among geologists in asserting.

way, I am not ashamed to express my conviction, unlikely to be surpassed by any other author. But it may be necessary to advise the student of these now isolated chapters not to interpret any of their expressions of awe or wonder as meaning to attribute any supernatural, or in any special sense miraculous, character to the phenomena described, other than that of their adaptation to human feeling or need. I did not in the least mean to insinuate, because it was not easy to explain the buoyancy of clouds, that they were supported in the air as St. Francis in his ecstasy; or because the forms of a thunder-cloud were terrific, that they were less natural than those of a diamond; but in all the forms and actions of non-sentient things, I recognized (as more at length explained in the conclusion of my essay on the plague cloud) constant miracle, and according to the need and deserving of man, more or less constantly manifest Deity. Time, and times, have since passed over my head, and have taught me to hope for more than this — nay, perhaps so much more as that in English cities, where two or three are gathered in His name, such vision as that recorded by the sea-king Dandolo\* might again be seen, when he was commanded that in the midst of the city he should build a church, “in the place above which he should see a red cloud rest.”

## CHAPTER I.

### THE FIRMAMENT.

“*Modern Painters,*” Vol. IV., Part V., Chap. VI.

I. THE task which we now enter upon, as explained in the close of the preceding chapter, is the ascertaining as far as possible what the proper effect of the natural beauty of different objects *ought* to be on the human mind, and the degree in which this nature of theirs, and true influence, have been understood and transmitted by Turner.

I mean to begin with the mountains, for the sake of convenience in illustration, but, in the proper order of thought, the clouds ought to be considered first; and I think it will be well, in this intermediate chapter, to bring to a close that line of reasoning by which we have gradually, as I hope, strengthened the defences around the love of mystery, which distinguishes our modern art; and to show, on final and conclusive authority, what noble things these clouds are, and with what feeling it seems to be intended by their Creator that we should contemplate them.

2. The account given of the stages of creation in the first chapter of Genesis is in every respect clear and intelligible to the simplest reader, except in the statement of the work of the second day. I suppose that this statement is passed over by careless readers as a sublime mystery which was not intended to be understood. But there is no mystery in any other part of the chapter, and it seems to me unjust to conclude that any was intended here.

And the passage ought to be peculiarly interesting to us, as being the first in the Bible in which the *heavens* are named, and the only one in which the word "Heaven," all-important as that word is to our understanding of the most precious promises of Scripture, receives a definite explanation.

Let us, therefore, see whether by a careful comparison of the verse with other passages in which the word occurs, we may not be able to arrive at as clear an understanding of this portion of the chapter as of the rest.

3. In the first place the English word "Firmament" itself is useless, because we never employ it but as a synonym of heaven; it conveys no other distinct idea to us; and the verse, though from our familiarity with it we imagine that it possesses meaning, has in reality no more point or value than if it were written, "God said, Let there be a something in the midst of the waters, and God called the something Heaven."

But the marginal reading, "Expansion," has definite value; and the statement that "God said, Let there be an expansion in the midst of the waters, and God called the expansion Heaven," has an apprehensible meaning.

4. Accepting this expression as the one intended, we have next to ask what expansion there is between two waters, describable by the term Heaven. Milton adopts the term "expanse;"\* but he understands it of the whole volume of the air which surrounds the earth. Whereas, so far as we can tell, there is no water beyond the air, in the fields of space; and the whole expression of division of waters from waters is thus rendered valueless.

5. Now, with respect to this whole chapter, we must remember always that it is intended for the instruction of all mankind, not for the learned reader only; and that, therefore, the most simple and natural interpretation is the likeliest in

---

\* "God made

The firmament, expanse of liquid, pure,

Transparent, elemental air, diffused

In circuit to the uttermost convex

Of this great round."

—*Paradise Lost*, Book VII

general to be the true one. An unscientific reader knows little about the manner in which the volume of the atmosphere surrounds the earth ; but I imagine that he could hardly glance at the sky when rain was falling in the distance, and see the level line of the bases of the clouds from which the shower descended, without being able to attach an instant and easy meaning to the words “ expansion in the midst of the waters.” And, if having once seized this idea, he proceeded to examine it more accurately, he would perceive at once, if he had ever noticed *anything* of the nature of clouds, that the level line of their bases did indeed most severely and stringently divide “ waters from waters,” that is to say, divide water in its collective and tangible state, from water in its divided and aerial state ; or the waters which *fall* and *flow*, from those which *rise* and *flow*. Next, if we try this interpretation in the theological sense of the word *Heaven*, and examine whether the clouds are spoken of as God’s dwelling-place, we find God going before the Israelites in a pillar of cloud ; revealing Himself in a cloud on Sinai ; appearing in a cloud on the mercy seat ; filling the Temple of Solomon with the cloud when its dedication is accepted ; appearing in a great cloud to Ezekiel ; ascending into a cloud before the eyes of the disciples on Mount Olivet, and in like manner returning to Judgment. “ Behold He cometh with clouds, and every eye shall see Him.” “ Then shall they see the Son of Man coming in the clouds of heaven, with power and great glory.”\* While farther, the “ clouds ” and “ heavens ” are used as interchangeable words in those Psalms which most distinctly set forth the power of God : “ He bowed the heavens also, and came down ; He made darkness pavilions around about Him, dark waters, and thick clouds of the skies.” And again : “ Thy mercy, O Lord, is in the heavens, and Thy faithfulness reacheth unto the clouds.” And again : “ His excellency is over Israel, and His strength

---

\* The reader may refer to the following texts, which it is needless to quote:—Exod. xiii. 21, xvi. 10, xix. 9, xxiv. 16, xxxiv. 5 ; Levit. xvi. 2 ; Num. x. 34 ; Judges v. 4 ; 1 Kings viii. 10 ; Ezek. i. 4 ; Dan. vii. 13 ; Matt. xxiv. 30 ; 1 Thess. iv. 17 ; Rev. i. 7.

is in the clouds." Again: "The clouds poured out water, the skies sent out a sound, the voice of Thy thunder was in the heaven." Again: "Clouds and darkness are round about Him, righteousness and judgment are the habitation of His throne; the heavens declare His righteousness, and all the people see His glory."

6. In all these passages the meaning is unmistakable, if they possess definite meaning at all. We are too apt to take them merely for sublime and vague imagery, and therefore gradually to lose the apprehension of their life and power. The expression, "He bowed the heavens," for instance, is, I suppose, received by most readers as a magnificent hyperbole, having reference to some peculiar and fearful manifestation of God's power to the writer of the Psalm in which the words occur. But the expression either has plain meaning, or it has *no* meaning. Understand by the term "Heavens" the compass of infinite space around the earth, and the expression, "bowed the Heavens," however sublime, is wholly without meaning; infinite space cannot be bent or bowed. But understand by the "Heavens" the veil of clouds above the earth, and the expression is neither hyperbolical nor obscure; it is pure, plain, and accurate truth, and it describes God, not as revealing Himself in any peculiar way to David, but doing what He is still doing before our own eyes day by day. By accepting the words in their simple sense, we are thus led to apprehend the immediate presence of the Deity, and His purpose of manifesting Himself as near us whenever the storm-cloud stoops upon its course; while by our vague and inaccurate acceptance of the words we remove the idea of His presence far from us, into a region which we can neither see nor know; and gradually, from the close realization of a living God who "maketh the clouds His chariot," we refine and explain ourselves into dim and distant suspicion of an inactive God, inhabiting inconceivable places, and fading into the multitudinous formalisms of the laws of Nature.

7. All errors of this kind—and in the present day we are in constant and grievous danger of falling into them—arise from the originally mistaken idea that man can, "by search-

ing, find out God—find out the Almighty to perfection ;” that is to say, by help of courses of reasoning and accumulations of science, apprehend the nature of the Deity in a more exalted and more accurate manner than in a state of comparative ignorance ; whereas it is clearly necessary, from the beginning to the end of time, that God’s way of revealing Himself to His creatures should be a *simple* way, which *all* those creatures may understand. Whether taught or untaught, whether of mean capacity or enlarged, it is necessary that communion with their Creator should be possible to all ; and the admission to such communion must be rested, not on their having a knowledge of astronomy, but on their having a human soul. In order to render this communion possible, the Deity has stooped from His throne, and has not only, in the person of the Son, taken upon Him the veil of our human *flesh*, but, in the person of the Father, taken upon Him the veil of our human *thoughts*, and permitted *us*, by His own spoken authority, to conceive Him simply and clearly as a loving Father and Friend ;—a being to be walked with and reasoned with ; to be moved by our entreaties, angered by our rebellion, alienated by our coldness, pleased by our love, and glorified by our labor ; and finally, to be beheld in immediate and active presence in all the powers and changes of creation.

This conception of God, which is the child’s, is evidently the only one which can be universal, and therefore, the only one which *for us* can be true. The moment that, in our pride of heart, we refuse to accept the condescension of the Almighty, and desire Him, instead of stooping to hold our hands, to rise up before us into His glory—we, hoping that by standing on a grain of dust or two of human knowledge higher than our fellows, we may behold the Creator as He rises—God takes us at our word ; He rises, into His own invisible and inconceivable Majesty ; He goes forth upon the ways which are not our ways, and retires into the thoughts which are not our thoughts ; and we are left alone. And presently we say in our vain hearts, “There is no God.”

8. I would desire, therefore, to receive God’s account of

His own creation as, under the ordinary limits of human knowledge and imagination, it would be received by a simple-minded man ; and finding that the “heavens and the earth” are spoken of always as having something like equal relation to each other (“thus the heavens and the earth were finished, and all the host of them”), I reject at once all idea of the term “Heavens” being intended to signify the infinity of space inhabited by countless sand, with which space though we measured not the earth only, but the sun itself, with all the solar system, no relation of equality or comparison could be inferred. But I suppose the heavens to mean that part of the creation which holds equal companionship with our globe ; I understand the “rolling of those heavens together as a scroll” to be an equal and relative destruction with the “melting of the elements in fervent heat ;” \* and I understand the making the firmament to signify that, so far as man is concerned, most magnificent ordinance of the clouds—the ordinance, that as the great plain of waters was formed on the face of the earth, so also a plain of waters should be stretched along the height of air, and the face of the cloud answer the face of the ocean ; and this upper and heavenly plain should be of waters, as it were, glorified in their nature, no longer quenching the

---

\* Compare also Job xxxvi. 29, “The spreading of the clouds, and the noise of His *tabernacle* ;” and xxxviii. 33, “Knowest thou the ordinances of heaven ? canst thou set the dominion thereof in the earth ? canst thou lift up thy voice to the clouds ?”

Observe that in the passage of Addison’s well-known hymn—

“ The spacious firmament on high,  
 With all the blue, ethereal sky,  
 And spangled heavens, a shining frame,  
 Their great Original proclaim ”—

the writer has clearly the true distinctions in his mind ; he does not use his words, as we too often accept them, in vain tautology. By the *spacious* firmament he means the clouds, using the word “ spacious ” to mark the true meaning of the Hebrew term ; the blue *ethereal* sky is the real air or ether, blue above the clouds ; the heavens are the starry space, for which he uses this word, less accurately indeed than the others, but as the only one available for his meaning.

fire, but now bearing fire in their own bosoms ; no longer murmuring only when the winds raise them or rocks divide, but answering each other with their own voices from pole to pole ; no longer restrained by established shores, and guided through unchanging channels, but going forth at their pleasure like the armies of the angels, and choosing their encampments upon the heights of the hills ; no longer hurried downward for ever, moving but to fall, nor lost in the lightless accumulation of the abyss, but covering the east and west with the waving of their wings, and robing the gloom of the farther infinite with a vesture of divers colors, of which the threads are purple and scarlet, and the embroideries flame.

9. This, I believe, is the ordinance of the firmament ; and it seems to me that in the midst of the material nearness of these heavens God means us to acknowledge His own immediate presence as visiting, judging, and blessing us. “The earth shook, the heavens also dropped, at the presence of God.” “He doth set His bow in the cloud,” and thus renews, in the sound of every drooping swathe of rain, His promises of everlasting love. “In them hath He set a *tabernacle* for the sun,” whose burning ball, which, without the firmament, would be seen but as an intolerable and scorching circle in the blackness of vacuity, is by that firmament surrounded with gorgeous service, and tempered by mediatorial ministries ; by the firmament of clouds the golden pavement is spread for his chariot wheels at morning ; by the firmament of clouds the temple is built for his presence to fill with light at noon ; by the firmament of clouds the purple veil is closed at evening round the sanctuary of his rest ; by the mists of the firmament his implacable light is divided, and its separated fierceness appeased into the soft blue that fills the depth of distance with its bloom, and the flush with which the mountains burn as they drink the overflowing of the dayspring. And in this tabernacling of the unendurable sun with men, through the shadows of the firmament, God would seem to set forth the stooping of His own majesty to men, upon the *throne* of the firmament. As the Creator of all the worlds, and the inhabitor of eternity, we cannot behold Him ; but as

the Judge of the earth and the Preserver of men, those heavens are indeed His dwelling-place. "Swear not, neither by heaven, for it is God's throne; nor by the earth, for it is His footstool." And all those passings to and fro of fruitful shower and grateful shade, and all those visions of silver palaces built about the horizon, and voices of moaning winds and threatening thunders, and glories of colored robe and cloven ray, are but to deepen in our hearts the acceptance, and distinctness, and dearness of the simple words, "Our Father, which art in heaven."

## CHAPTER II.

### THE CLOUD-BALANCINGS.

*“Modern Painters,” Vol. V., Part VII., Chap. I.*

1. WE have seen that when the earth had to be prepared for the habitation of man, a veil, as it were, of intermediate being was spread between him and its darkness, in which were joined, in a subdued measure, the stability and insensibility of the earth, and the passion and perishing of mankind.

But the heavens, also, had to be prepared for his habitation.

Between their burning light—their deep vacuity, and man, as between the earth’s gloom of iron substance, and man, a veil had to be spread of intermediate being; which should appease the unendurable glory to the level of human feebleness, and sign the changeless motion of the heavens with a semblance of human vicissitude.

Between the earth and man arose the leaf. Between the heaven and man came the cloud. His life being partly as the falling leaf, and partly as the flying vapor.

2. Has the reader any distinct idea of what clouds are? We had some talk about them long ago, and perhaps thought their nature, though at that time not clear to us, would be easily enough understandable when we put ourselves seriously to make it out. Shall we begin with one or two easiest questions?

That mist which lies in the morning so softly in the valley, level and white, through which the tops of the trees rise as if through an inundation—why is *it* so heavy? and why does it lie so low, being yet so thin and frail that it will melt away utterly into splendor of morning, when the sun has shone on

it but a few moments more? Those colossal pyramids, huge and firm, with outlines as of rocks, and strength to bear the beating of the high sun full on their fiery flanks—why are *they* so light—their bases high over our heads, high over the heads of Alps? why will these melt away, not as the sun *rises*, but as he *descends*, and leave the stars of twilight clear, while the valley vapor gains again upon the earth like a shroud?

Or that ghost of a cloud, which steals by yonder clump of pines; nay, which does *not* steal by them, but haunts them, wreathing yet round them, and yet—and yet, slowly; now falling in a fair waved line like a woman's veil; now fading, now gone; we look away for an instant, and look back, and it is again there. What has it to do with that clump of pines, that it broods by them and waves itself among their branches, to and fro? Has it hidden a cloudy treasure among the moss at their roots, which it watches thus? Or has some strong enchanter charmed it into fond returning, or bound it fast within those bars of bough? And yonder filmy crescent, bent like an archer's bow above the snowy summit, the highest of all the hill—that white arch which never forms but over the supreme crest—how is it stayed there, repelled apparently from the snow—nowhere touching it, the clear sky seen between it and the mountain edge, yet never leaving it—poised as a white bird hovers over its nest?

Or those war-clouds that gather on the horizon, dragon-crested, tongued with fire; how is their barbed strength bridled? what bits are these they are champing with their vaporous lips; flinging off flakes of black foam? Leagued leviathans of the Sea of Heaven, out of their nostrils goeth smoke, and their eyes are like the eyelids of the morning; the sword of him that layeth at them cannot hold the spear, the dart, nor the habergeon. Where ride the captains of their armies? Where are set the measures of their march? Fierce murmurers, answering each other from morning until evening—what rebuke is this which has awed them into peace?—what hand has reined them back by the way by which they came?

3. I know not if the reader will think at first that questions like these are easily answered. So far from it, I rather believe that some of the mysteries of the clouds never will be understood by us at all. "Knowest thou the balancings of the clouds?" Is the answer ever to be one of pride? "The wondrous works of Him which is *perfect* in knowledge?" Is *our* knowledge ever to be so?

It is one of the most discouraging consequences of the varied character of this work of mine, that I am wholly unable to take note of the advance of modern science. What has conclusively been discovered or observed about clouds I know not; but by the chance inquiry possible to me I find no book which fairly states the difficulties of accounting for even the ordinary aspects of the sky. I shall, therefore, be able in this section to do little more than suggest inquiries to the reader, putting the subject in a clear form for him. All men accustomed to investigation will confirm me in saying that it is a great step when we are personally quite certain what we do *not* know.

4. First, then, I believe we do not know what makes clouds float. Clouds are water, in some fine form or another; but water is heavier than air, and the finest form you can give a heavy thing will not make it float in a light thing.\* *On* it, yes, as a boat; but *in* it, no. Clouds are not boats, nor boat-shaped, and they float in the air, not on the top of it. "Nay, but though unlike boats, may they not be like feathers? If out of quill substance there may be constructed eider-down, and out of vegetable tissue, thistle-down, both buoyant enough for a time, surely of water-tissue may be constructed also water-down, which will be buoyant enough for all cloudy purposes." Not so. Throw out your eider plumage in a calm day, and it will all come settling to the ground—slowly indeed,

---

\* [Compare the old note to § 6: but I had not, when I wrote it, enough reflected on the horrible buoyancy of smoke, nor did I know over what spaces volcanic ashes were diffusible. Will any of my scientific friends now state for me the approximate weight and bulk of a particle of dust of any solid substance which would be buoyant in air of given density?]

to aspect ; but practically so fast that all our finest clouds would be here in a heap about our ears in an hour or two, if they were only made of water feathers. "But may they not be quill feathers, and have air inside them? May not all their particles be minute little balloons?"

A balloon only floats when the air inside it is either specifically, or by heating, lighter than the air it floats in. If the cloud-feathers had warm air inside their quills, a cloud would be warmer than the air about it, which it is not (I believe). And if the cloud-feathers had hydrogen inside their quills, a cloud would be unwholesome for breathing, which it is not—at least so it seems to me.

"But may they not have nothing inside their quills?" Then they would rise, as bubbles do through water, just as certainly as, if they were solid feathers, they would fall. All our clouds would go up to the top of the air, and swim in eddies of cloud-foam.

"But is not that just what they do?" No. They float at different heights, and with definite forms, in the body of the air itself. If they rose like foam, the sky on a cloudy day would look like a very large flat glass of champagne seen from below, with a stream of bubbles (or clouds) going up as fast as they could to a flat foam-ceiling.

"But may they not be just so nicely mixed out of something and nothing, as to float where they are wanted?"

Yes : that is just what they not only may, but must be ; only this way of mixing something and nothing is the very thing I want to explain or have explained, and cannot do it, nor get it done.

5. Except thus far. It is conceivable that minute hollow spherical globules might be formed of water, in which the enclosed vacuity just balanced the weight of the enclosing water, and that the arched sphere formed by the watery film was strong enough to prevent the pressure of the atmosphere from breaking it in. Such a globule would float like a balloon at the height in the atmosphere where the equipoise between the vacuum it enclosed, and its own excess of weight above that of the air, was exact. It would, probably, approach its com-

panion globules by reciprocal attraction, and form aggregations which might be visible.

This is, I believe, the view usually taken by meteorologists. I state it as a possibility, to be taken into account in examining the question—a possibility confirmed by the scriptural words which I have taken for the title of this chapter.

6. Nevertheless, I state it as a possibility only, not seeing how any known operation of physical law could explain the formation of such molecules. This, however, is not the only difficulty. Whatever shape the water is thrown into, it seems at first improbable that it should lose its property of wetness. Minute division of rain, as in “Scotch mist,” makes it capable of floating farther,\* or floating up and down a little, just as dust will float, though pebbles will not; or gold-leaf, though a sovereign will not; but minutely divided rain wets as much as any other kind, whereas a cloud, partially always, some-

\* The buoyancy of solid bodies of a given specific gravity, in a given fluid, depends, first on their size, then on their forms.

First, on their size; that is to say, on the proportion of the magnitude of the object (irrespective of the distribution of its particles) to the magnitude of the particles of the air.

Thus, a grain of sand is buoyant in wind, but a large stone is not; and pebbles and sand are buoyant in water in proportion to their smallness, fine dust taking long to sink, while a large stone sinks at once. Thus, we see that water may be arranged in drops of any magnitude, from the largest rain-drop, about the size of a large pea, to an atom so small as not to be separately visible, the smallest rain passing gradually into mist. Of these drops of different sizes (supposing the strength of the wind the same), the largest fall fastest, the smaller drops are more buoyant, and the small misty rain floats about like a cloud, as often up as down, so that an umbrella is useless in it; though in a heavy thunder-storm, if there is no wind, one may stand gathered up under an umbrella without a drop touching the feet.

Secondly, buoyancy depends on the amount of surface which a given weight of the substance exposes to the resistance of the substance it floats in. Thus, gold-leaf is in a high degree buoyant, while the same quantity of gold in a compact grain would fall like a shot; and a feather is buoyant, though the same quantity of animal matter in a compact form would be as heavy as a little stone. A slate blows far from a house-top, while a brick falls vertically, or nearly so.

times entirely, loses its power of moistening. Some low clouds look, when you are in them, as if they were made of specks of dust, like short hair; and these clouds are entirely dry. And also many clouds will wet some substances, but not others. So that we must grant further, if we are to be happy in our theory, that the spherical molecules are held together by an attraction which prevents their adhering to any foreign body, or perhaps ceases only under some peculiar electric conditions.

7. The question remains, even supposing their production accounted for—What intermediate states of water may exist between these spherical hollow molecules and pure vapor?

Has the reader ever considered the relations of commonest forms of volatile substance? The invisible particles which cause the scent of a rose-leaf, how minute, how multitudinous, passing richly away into the air continually! The visible cloud of frankincense—why visible? Is it in consequence of the greater quantity, or larger size, of the particles, and how does the heat act in throwing them off in this quantity, or of this size?

Ask the same questions respecting water. It dries, that is, becomes volatile, invisibly, at (any?) temperature. Snow dries, as water does. Under increase of heat, it volatilizes faster, so as to become dimly visible in large mass, as a heat-haze. It reaches boiling-point, then becomes entirely visible. But compress it, so that no air shall get between the watery particles—it is invisible again. At the first issuing from the steam-pipe the steam is transparent; but opaque, or visible, as it diffuses itself. The water is indeed closer, because cooler, in that diffusion; but more air is between its particles. Then this very question of visibility is an endless one, wavering between form of substance and action of light. The clearest (or least visible) stream becomes brightly opaque by more minute division in its foam, and the clearest dew in hoar-frost. Dust, unperceived in shade, becomes constantly visible in sunbeam; and watery vapor in the atmosphere, which is itself opaque, when there is promise of fine weather,

becomes exquisitely transparent ; and (questionably) blue, when it is going to rain.

8. Questionably blue ; for besides knowing very little about water, we know what, except by courtesy, must, I think, be called Nothing—about air. Is it the watery vapor, or the air itself, which is blue? Are neither blue, but only white, producing blue when seen over dark spaces? If either blue, or white, why, when crimson is their commanded dress, are the most distant clouds crimsonest? Clouds close to us may be blue, but far off, golden—a strange result, if the air is blue. And again, if blue, why are rays that come through large spaces of it red; and that Alp, or anything else that catches far-away light, why colored red at dawn and sunset? No one knows, I believe. It is true that many substances, as opal, are blue, or green, by reflected light, yellow by transmitted ; but air, if blue at all, is blue always by transmitted light. I hear of a wonderful solution of nettles, or other unlovely herb, which is green when shallow—red when deep. Perhaps some day, as the motion of the heavenly bodies by help of an apple, their light by help of a nettle, may be explained to mankind.

9. But further : these questions of volatility, and visibility, and hue, are all complicated with those of shape. How is a cloud outlined? Granted whatever you choose to ask concerning its material, or its aspect, its loftiness, and luminousness—how of its limitation? What hews it into a heap, or spins it into a web? Cold is usually shapeless, I suppose, extending over large spaces equally, or with gradual diminution. You cannot have, in the open air, angles, and wedges, and coils, and cliffs of cold. Yet the vapor stops suddenly, sharp and steep as a rock, or thrusts itself across the gates of heaven in likeness of a brazen bar ; or braids itself in and out, and across and across, like a tissue of tapestry ; or falls into ripples, like sand ; or into waving shreds and tongues, as fire. On what anvils and wheels is the vapor pointed, twisted, hammered, whirled, as the potter's clay? By what hands is the incense of the sea built up into domes of marble?

And, lastly, all these questions respecting substance, and

aspect, and shape, and line, and division, are involved with others as inscrutable, concerning action. The curves in which clouds move are unknown—nay, the very method of their motion, or apparent motion, how far it is by change of place, how far by appearance in one place and vanishing from another. And these questions about movement lead partly far away into high mathematics, where I cannot follow them, and partly into theories concerning electricity and infinite space, where I suppose at present no one can follow them.

What, then, is the use of asking the questions?

For my own part, I enjoy the mystery, and perhaps the reader may. I think he ought. He should not be less grateful for summer rain, or see less beauty in the clouds of morning, because they come to prove him with hard questions; to which, perhaps, if we look close at the heavenly scroll,\* we may find also a syllable or two of answer illuminated here and there.

---

\* There is a beautiful passage in Sartor Resartus concerning this old Hebrew scroll, in its deeper meanings, and the child's watching it, though long illegible for him, yet "with an eye to the gilding." It signifies in a word or two nearly all that is to be said about clouds.—(Not quite. J. R., 1884.)

## PREFACE.

---

It is now just twenty years since I wrote the first number of these notes ; and fifteen since they were discontinued. I have no intention of renewing the series, unless occasionally, should accident detain me in London during the spring. But this year, for many reasons, it seemed to me imperatively proper to say as much as is here said.

And that the temper of the saying may not, so far as I can prevent it, be mistaken, I will venture to ask my reader to hear, and trust that he will believe, thus much concerning myself. Among various minor, but collectively sufficient, reasons for the cessation of these notes, one of the chief was the exclamation of a young artist, moving in good society—authentically, I doubt not, reported to me—“D—— the fellow, why doesn't he back his friends?” The general want in the English mind of any abstract conception of justice, and the substitution for it of the idea of fidelity to a party, as the first virtue of public action, had never struck me so vividly before ; and thenceforward it seemed to me useless, so far as artists were concerned, to continue criticism which they would esteem dishonorable, unless it was false.

But Fortune has so sternly reversed her wheel during these recent years, that I am more likely now to be accused of malice than of equity ; and I am therefore at the pains to beg the honest reader to believe that, having perhaps as much pleasure as other people, both in backing my friends and fronting my enemies, I have never used, and shall never use, my power of criticism to such end ; but that I write now, and have always written, so far as I am able, what may show that

there is a fixed criterion of separation between right art and wrong; that no opinion, no time, and no circumstances can ever in one jot change this relation of their Good and Evil; and that it would be pleasant for the British public to recognize the one, and wise in them to eschew the other.

HERNE HILL, *May 23, 1875.*

## NOTES, ETC.

---

BEFORE looking at any single picture, let us understand the scope and character of the Exhibition as a whole. The Royal Academy of England, in its annual publication, is now nothing more than a large colored *Illustrated Times* folded in saloons :—the splendidest May Number of the *Graphic*, shall we call it? That is to say, it is a certain quantity of pleasant, but imperfect, “illustration” of passing events, mixed with as much gossip of the past, and tattle of the future, as may be probably agreeable to a populace supremely ignorant of the one, and reckless of the other.

Supremely ignorant, I say — ignorant, that is, on the lofty ground of their supremacy in useless knowledge.

For instance : the actual facts which Shakespeare knew about Rome were, in number and accuracy, compared to those which M. Alma-Tadema knows, as the pictures of a child’s first story-book, compared to Smith’s “*Dictionary of Antiquities*.”

But when Shakespeare wrote,

“The noble sister of Publicola,  
The Moon of Rome ; chaste as the icicle  
That’s curdled by the frost from purest snow,  
And hangs on Dian’s temple,”

he knew Rome herself, to the heart ; and M. Tadema, after reading his Smith’s “*Dictionary*” through from A to Z, knows nothing of her but her shadow ; and that cast at sunset.

Yet observe, in saying that Academy work is now nothing more, virtually, than cheap colored woodcut, I do not mean to depreciate the talent employed in it. Our public press is

supported by an ingenuity and skill in rapid art unrivalled at any period of history ; nor have I ever been so humbled, or astonished, by the mightiest work of Tintoret, Turner, or Velasquez, as I was one afternoon last year, in watching, in the Dudley gallery, two ordinary workmen for a daily newspaper, finishing their drawings on the blocks by gaslight, against time.

Nay, not in skill only, but in pretty sentiment, our press illustration, in its higher ranks, far surpasses—or indeed, in that department finds no rivalship in—the schools of classical art ; and it happens curiously that the only drawing of which the memory remains with me as a possession, out of the old water-color exhibition of this year—Mrs. Allingham's "Young Customers"—should be, not only by an accomplished designer of woodcut, but itself the illustration of a popular story. The drawing, with whatever temporary purpose executed, is forever lovely ; a thing which I believe Gainsborough would have given one of his own pictures for—old-fashioned as red-tipped daisies are—and more precious than rubies.

And I am conscious of, and deeply regret, the inevitable warp which my own lately exclusive training under the elder schools gives to my estimate of this current art of the day ; and submissively bear the blame due to my sullen refusal of what good is offered me in the railroad station, because I cannot find in it what I found in the Ducal Palace. And I may be permitted to say this much, in the outset, in apology for myself, that I determined on writing this number of Academy notes, simply because I was so much delighted with Mr. Leslie's School—Mr. Leighton's little Fatima, Mr. Hook's Hearts of Oak, and Mr. Couldery's kittens—that I thought I should be able to write an entirely good-humored, and therefore, in all likelihood, practically useful, sketch of the socially pleasant qualities of modern English painting, which were not enough acknowledged in my former essays.

As I set myself to the work, and examined more important pictures, my humor changed, though much against my will. Not more reluctantly the son of Beor found his utterances

become benedictory, than I mine—the reverse. But the need of speaking, if not the service (for too often we can help least where need is most), is assuredly greater than if I could have spoken smooth things without ruffling anywhere the calm of praise.

Popular or classic—temporary or eternal—all good art is more or less didactic. My artist-adversaries rage at me for saying so ; but the gayest of them cannot help being momentarily grave ; nor the emptiest-headed occasionally instructive ; and whatever work any of them do, that is indeed honorable to themselves, is also intellectually helpful, no less than entertaining, to others. And it will be the surest way of estimating the intrinsic value of the art of this year, if we proceed to examine it in the several provinces which its didactic functions occupy ; and collect the sum of its teaching on the subjects—which will, I think, sufficiently embrace its efforts in every kind—of Theology, History, Biography, Natural History, Landscape, and as the end of all, Policy.

### THEOLOGY.

584. Dedicated to all the Churches. (G. F. Watts, R.A.)

Here, at least, is one picture meant to teach ; nor failing of its purpose, if we read it rightly. Very beautiful, it might have been ; and is, in no mean measure ; but as years pass by, the artist concedes to himself, more and more, the privilege which none but the feeble should seek, of substituting the sublimity of mystery for that of absolute majesty of form. The relation between this gray and soft cloud of visionary power, and the perfectly substantial, bright, and near presence of the saints, angels, or Deities of early Christian art, involves questions of too subtle interest to be followed here ; but in the essential force of it, belongs to the inevitable expression, in each period, of the character of its own faith. The Christ of the 13th century was vividly present to its thoughts, and dominant over its acts, as a God manifest in

the flesh, well pleased in the people to whom He came ; while ours is either forgotten ; or seen, by those who yet trust in Him, only as a mourning and departing Ghost.

129. Ezekiel's Vision. (P. F. Poole, R.A.)

Though this design cannot for a moment be compared with the one just noticed, in depth of feeling, there is yet, as there has been always in Mr. Poole's work, some acknowledgment of a supernatural influence in physical phenomena, which gives a nobler character to his storm-painting than can belong to any merely literal study of the elements. But the piece is chiefly interesting for its parallelism with that "dedicated to all the churches," in effacing the fearless realities of the elder creed among the confused speculations of our modern one. The beasts in Raphael's vision of Ezekiel are as solid as the cattle in Smithfield ; while here, if traceable at all in the drift of the storm-cloud (which, it is implied, was all that the prophet really saw), their animal character can only be accepted in polite compliance with the prophetic impression, as the weasel by Polonius. And my most Polonian courtesy fails in deciphering the second of the four—not-living—creatures.

218. Rachel and her Flock. (F. Goodall, R.A.)

This is one of the pictures which, with such others as Holman Hunt's "Scapegoat," Millais' "Dove Returning to the Ark," etc., the public owe primarily to the leading genius of Dante Rossetti, the founder, and for some years the vital force, of the pre-Raphaelite school. He was the first assertor in painting, as I believe I was myself in art-literature (Goldsmith and Molière having given the first general statements of it), of the great distinctive principle of that school, that things should be painted as they probably did look and happen, and not as, by rules of art developed under Raphael, Correggio, and Michael Angelo, they might be supposed gracefully, deliciously, or sublimely to have happened.

The adoption of this principle by good and great men, produces the grandest art possible in the world ; the adoption of

it by vile and foolish men—very vile and foolish art ; yet not so entirely nugatory as imitations of Raphael or Correggio would be by persons of the same calibre : an intermediate and large class of pictures have been produced by painters of average powers ; mostly of considerable value, but which fall again into two classes, according to the belief of the artists in the truth, and understanding of the dignity of the subjects they endeavor to illustrate, or their opposite degree of incredulity and materialistic vulgarism of interpretation.

The picture before us belongs to the higher class, but is not a fine example of it. We cannot tell from it whether Mr. Goodall believes Rachel to have wept over Ramah from her throne in heaven ; but at least we gather from it some suggestion of what she must have looked like, when she was no more than a Syrian shepherdess.

That she was a very beautiful shepherdess, so that her lover thought years of waiting but as days, for the love he bore to her, Mr. Goodall has scarcely succeeded in representing. And on the whole he would have measured his powers more reasonably in contenting himself with painting a Yorkshire shepherdess instead of a Syrian one.\* Like everybody except myself—he has been in the East. If that is the appearance of the new moon in the East, I am well enough content to guide, and gild, the lunacies of my declining years by the light of the old western one.

518. Julian the Apostate, presiding, etc. (E. Armytage, R.A.)

This, I presume, is a modern enlightened improvement on the *Disputa del Sacramento*. The English Church is to be congratulated on the education she gives her artists. Fumbling with sham Gothic penny tracts, and twopenny Scripture prints, among the embers of reverence and sacred life that yet linger on from the soul of ancient days, she holds her own, in outward appearance at least, among our simple coun-

---

\* Compare, however, at once, 582, which is, on the whole, the most honorably complete and scholastic life-size figure in the rooms, with well-cast, and unaffectedly well-painted, drapery.

try villages ; and, in our more ignorant manufacturing centres, contentedly enamels the service of Mammon with the praise of God. But in the capital of England—here, on her Vatican hill above St. Peter's church, and beside St. Paul's—*this* is the testimony she wins from art, as compared with the councils of Fathers, and concourses of Saints, which poor dark-minded Italy once loved to paint. Mr. Armytage, however, has not completed his satire with subtlety ; he knows the higher virtue of sectarians as little as Gibbon knew those of Julian,\* whose sincere apostasy was not the act of a soul which could “enjoy the agreeable spectacle” of vile dispute among any men—least of all, among those whom he had once believed messengers of Christ.

1293—1295. Terra-cottas, representing, etc. (S. Tinworth.)

Full of fire and zealous faculty, breaking its way through all conventionalism to such truth as it can conceive ; able also to conceive far more than can be rightly expressed on this scale. And, after all the labors of past art on the Life of Christ, here is an English workman fastening, with more decision than I recollect in any of them, on the gist of the sin of the Jews, and their rulers, in the choice of Barabbas, and making the physical fact of contrast between the man released, and the man condemned, clearly visible. We must receive it, I suppose, as a flash of really prophetic intelligence on the question of Universal Suffrage.

These bas-reliefs are the most earnest work in the Academy, next to Mr. Boehm's study of Carlyle. But how it happens that after millions of money have been spent in the machinery of art education at Kensington, an ornamental designer of so high faculty as this one, should never in his life have found a human being able to explain to him the first principles of relief, or show him the difference between decorative foliage-sculpture, and Norman hatchet-work—I must leave the Kensington authorities to explain ; for it passes all my capacities of conjecture, and all my hitherto experience of the costly

---

\* See note on page 000.

and colossal public institution of—Nothing—out of which, to wise men, as here, can come nothing ; but to fools everywhere, —worse than nothing. Kensington has flattened its thousands of weak students into machine pattern-papers : here, it had a true man to deal with ; and for all he has learned of his business, he might as well have lived in South Australia.

---

## HISTORY.

### 26. The Sculpture Gallery. (L. Alma-Tadema.)

This, I suppose, we must assume to be the principal historical piece of the year ; a work showing artistic skill and classic learning, both in high degree. But both parallel in their method of selection. The artistic skill has succeeded with all its objects in the degree of their unimportance. The piece of silver plate is painted best ; the griffin bas-relief it stands on, second best ; the statue of the empress worse than the griffins, and the living personages worse than the statue. I do not know what feathers the fan with the frightful mask in the handle, held by the nearest lady, is supposed to be made of ; to a simple spectator they look like peacock's, without the eyes. And, indeed, the feathers, under which the motto "I serve" of French art seems to be written in these days, are, I think, very literally, all feather and no eyes—the Raven's feather to wit, of Sycorax. The selection of the subject is similarly—one might say, filamentous—of the extremity, instead of the centre. The old French Republicans, reading of Rome, chose such events to illustrate her history, as the battle of Romulus with the Sabines, the vow of the Horatii, or the self-martyrdom of Lucretia. The modern Republican sees in the Rome he studies so profoundly, only a central establishment for the manufacture and sale of imitation-Greek articles of virtù.

The execution is dextrous, but more with mechanical steadiness of practice than innate fineness of nerve. It is impossible, however, to say how much the personal nervous faculty

of an artist of this calibre is paralyzed by his education in schools which I could not characterize in my Oxford inaugural lectures otherwise than as the "schools of clay," in which he is never shown what Venetians or Florentines meant by "painting," and allowed to draw his flesh steadily and systematically with shadows of charcoal, and lights of cream-soap, without ever considering whether there would be any reflections in the one, or any flush of life in the other. The head on the extreme left is exceptionally good; but who ever saw a woman's neck and hand blue-black under reflection from white drapery, as they are in the nearer figure? It is well worth while to go straight from this picture to the two small studies by Mr. Albert Moore, 356 and 357, which are consummately artistic and scientific work: examine them closely, and with patience; the sofa and basket especially, in 357, with a lens of moderate power; and, by way of a lesson in composition, hide in this picture the little honeysuckle ornament above the head, and the riband hanging over the basket, and see what becomes of everything! Or try the effect of concealing the yellow flower in the hair, in the "flower walk." And for comparison with the elementary method of M. Tadema, look at the blue reflection on the chin in this figure; at the reflection of the warm brick wall on its right arm; and at the general modes of unaffected relief by which the extended left arm in "Pansies" detaches itself from the background. And you ought afterward, if you have eye for color, never more to mistake a tinted drawing for a painting.

233. The Festival. (E. J. Poynter, A.)

I wonder how long Mr. Poynter thinks a young lady could stand barefoot on a round-runged ladder; or that a sensible Greek girl would take her sandals off to try, on an occasion when she had festive arrangements to make with care. The ladders themselves, here and in No. 236 (The Golden Age), appear to me not so classical, or so rude, in type, as might have been expected; but to savor somewhat of the expeditious gas-lighting. Of course Mr. Poynter's object in No. 236 is to show us, like Michael Angelo, the adaptability of limbs to

awkward positions. But he can only, by this anatomical science, interest his surgical spectators ; while the Golden Age, in this pinchbeck one, interests nobody. Not even the painter—for had he looked at the best authorities for account of it, he would have found that its people lived chiefly on corn and strawberries, both growing wild ; and doubtless the loaded fruit-branches drooped to their reach. Both these pictures are merely studies of decorative composition, and have far too much pains taken with them for their purpose. Decorative work, however complete, should be easy.

401. Ready! (P. Cockerell.)

I suppose this is meant for portrait, not history. At all events, the painter has been misled in his endeavor, if he made any, to render Swiss character, by Schiller's absurd lines. Schiller, of all men high in poetic fame whose works are in anywise known to me, has the feeblest hold of facts and the dullest imagination. "Still as a lamb!" Sucking, I suppose? They are so very quiet in that special occupation ; and never think of such a thing as jumping, when they have had enough, of course? And I should like to hear a Swiss (or English) boy, with any stuff in him, liken himself to a lamb! If there were any real event from which the legend sprung, the boy's saying would have been not in the smallest degree pathetic: "Never fear *me*, father ; I'll stand like grandmother's donkey when she wants him to go"—or something to such effect.

482. The Babylonian Marriage Market. (E. Long.)

A painting of great merit, and well deserving purchase by the Anthropological Society. For the varieties of character in the heads are rendered with extreme subtlety, while, as a mere piece of painting, the work is remarkable, in the modern school, for its absence of affectation ; there is no insolently indulged indolence, nor vulgarly asserted dexterity—the painting is good throughout, and unobtrusively powerful.

It becomes a question of extreme interest with me, as I examine this remarkable picture, how far the intensely subtle

observation of physical character and expression which rendered the painting of it possible, necessitates the isolation of the artist's thoughts from subjects of intellectual interest, or moral beauty. Certainly, the best expressional works of the higher schools present nothing analogous to the anatomical precision with which the painter has here gradated the feature and expression of the twelve waiting girls, from great physical beauty to absolute ugliness; and from the serene insolence and power of accomplished fleshly womanhood, to the restless audacity, and crushed resignation, of its despised states of personal inferiority, unconsolated by moral strength, or family affection. As a piece of anthropology, it is the natural and very wonderful product of a century occupied in carnal and mechanical science. In the total paralysis of conception—without attempt to disguise the palsy—as to the existence of any higher element in a woman's mind than vanity and spite, or in a man's than avarice and animal passion, it is also a specific piece of the natural history of our own century; but only a partial one, either of it, or of the Assyrian, who was once as "the cedars in the garden of God."

The painter has in the first instance misread his story, or been misled by his translation. This custom, called wise by Herodotus, is so called only as practised in country districts with respect to the fortuneless girls of the lower laboring population; daughters of an Assyrian noble, however plain-featured, would certainly not be exposed in the market to receive dowry from the dispute for their fairer sisters.\* But there is matter of deeper interest in the custom, as it is compared to our modern life. However little the English educated classes now read their Bibles, they cannot but, in the present state of literary science, be aware that there is a book,

---

\* The passage in Strabo which gives some countenance to the idea of universality in the practice, gives a somewhat different color to it by the statement that over each of the three great Assyrian provinces a "temperately wise" person was set to conduct the ordinances of marriage.

once asserted to have been written by St. John, in which a spiritual Babylon is described as the mother of harlots and abominations of the earth, and her ruin represented as lamentable, especially to the *merchants*, who trafficked with her in many beautiful and desirable articles, but above all in "souls of men."

Also, the educated reader cannot but be aware that the animosity of Christian sects—which we have seen the subject of another important national-historical picture in this Academy—has for the last three hundred years wasted much of their energy in endeavors to find Scriptural reason for calling each other Babylonians, and whatever else that term may be understood to imply.

There is, however, no authority to be found in honestly read Scripture for these well-meaning, but ignorant, incivilities. Read in their entirety, the books of the Bible represent to us a literal and material deliverance of a visibly separated people, from a literal bondage; their establishment in a literally fruitful and peaceful land, and their being led away out of that land, in consequence of their refusal to obey the laws of its Lord, into a literal captivity in a small, material Babylon. The same Scriptures represent to us a spiritual deliverance of an invisibly separated people, from spiritual bondage; their establishment in the spiritual land of Christian joy and peace; and their being led away out of this land into a spiritual captivity in a great spiritual Babylon, the mother of abominations, and in all active transactions especially delightful to "merchants"—persons engaged, that is to say, in obtaining profits by exchange instead of labor.

And whatever was literally done, whether apparently wise or not, in the minor fleshly Babylon, will, therefore, be found spiritually fulfilled in the major ghostly one; and, for instance, as the most beautiful and marvellous maidens were announced for literal sale by auction in Assyria, are not also the souls of our most beautiful and marvellous maidens announced annually for sale by auction in Paris and London, in a spiritual manner, for the spiritual advantages of position in society.

## BIOGRAPHY.

UNDER this head I include Drama, Domestic Incident, and Portrait : this last being, if good, the sum of what drama and domestic chances have been wrought by, and befallen to, the person portrayed.

Not to begin with too high matters, and collapse subsequently, suppose we first contemplate the pretty little scene,

## 408. Domestic Troubles. (J. Burr.)

The boy peeping in fearfully at the door, has evidently, under the inspiration of modern scientific zeal, dissected the bellows ; and whether they will ever help the pot to boil again is doubtful to grandpapa. The figure of the younger child, mute with awe and anxiety, yet not wholly guiltless of his naughty brother's curiosity, is very delightful. Avenging Fate, at the chimney-piece, is too severe.

I have marked, close by it, two other pictures, 403, 405, which interested me for reasons scarcely worth printing. The cloister of Assisi has been carefully and literally studied, in all but what is singular or beautiful in it ; namely, the flattened dome over its cistern, and the central mossy well above. But there is more conscientious treatment of the rest of the building, and greater quietness of natural light than in most picture backgrounds of these days. Ponte della Paglia, 405, may be useful to travellers in at least clearly, if not quite accurately, showing the decorative use of the angle sculpture of the drunkenness of Noah on the Ducal Palace ; and the Bridge of Sighs is better painted than usual.

## 242. A Merrie Jest. (H. S. Marks, A.)

Very characteristic of the painter's special gift. The difficulty of so subtle a rendering as this of the half-checked, yet extreme mirth, of persons naturally humorous, can only be judged of by considering how often aspects of laughter are attempted in pictures, and how rarely we feel ourselves in-

clined to join in the merriment. The piece of accessory and-scape is very unaffected and good, and the painting, throughout, here, as well as in the equally humorous, and useless, picture of bygone days, 166, of good standard modern quality.

107. The Barber's Prodigy. (J. B. Burgess.)

A close and careful study of modern domestic drama, deserving notice, however, chiefly for its unaffected manner of work, and moderately pleasant incident, as opposed to over-labored pictures of what is merely ugly, or meanly faultful, 141, 241—wastes of attention, skill, and time. "Too Good to be True," 153, another clever bit of minor drama, is yet scarcely good enough to be paused at; "Private and Confidential," 375, deserves a few moments more. 879 (A. Lüben) is much surer and finer in touch than anything English that I can find in this sort. The Düsseldorf Germans, and the Neuchatel Swiss have been doing splendid domestic work lately; but, I suppose, are too proud to exhibit here.

75. Sophia Western. (W. P. Frith, R. A.)

The painter seems not to have understood, nor are the public likely to understand, that Fielding means, in the passage quoted, to say that Miss Western's hands were white, soft, translucent, and at the moment, snow-cold. In the picture they cannot be shown to be cold—are certainly not white; do not look soft; and scarcely show the light of the fire on them, much less through them. But what is the use of painting from Fielding at all? Of all our classic authors, it is he who demands the reader's attention most strictly; and what modern reader ever attends to anything?

88. Loot: 1797. (A. C. Gore.)

An entirely fine picture of its class, representing an ordinary fact of war as it must occur, without any forced sentiment or vulgar accent. Highly skilful throughout, keenly seen, well painted, and deserving a better place than the slow cart-horses and solid waterfalls on the line have left for it.

## 89. War Time. (B. Rivière.)

Compare 626, at once ; the first is a true piece of feeling—almost Wordsworthian ; the second, disgraceful to it, both in the low pitch of its vulgar horror, and in its loss of power, by retreat to picturesque tradition, instead of dealing, like the other, with the facts of our own day.

If Mr. Rivière really feels as I think he feels, and means to do good, he must not hope to do anything with people who would endure the sight of a subject such as this. He may judge what they are worth by a sentence I heard as I stood before it. “Last of the garrison—ha! they’re all finished off, you see—isn’t that well done?” At all events, if he means to touch them, he must paint the cooking of a French pet-poodle ; not the stabbing of a bloodhound.

## 214. The Crown of Love. (J. E. Millais.)

Much of the painter’s old power remains in this sketch (it cannot be called a painting) ; and it is of course the leading one of the year in dramatic sentiment. This, then, it appears, is the best that English art can, at the moment, say in praise of the virtue, and promise of the reward, of Love ; this, the subject of sentimental contemplation likely to be most pleasing to the present British public ; torture, namely, carried to crisis of death, in the soul of one creature, and flesh of another. The British public are welcome to their feast ; but, as purchasers, they ought to be warned that, compared with the earlier dual pictures of the school (Huguenot, Claudio and Isabella, April love, and the like), this composition balances its excess of sentiment by defect of industry ; and that it is not a precedent advantageous to them, in the arrangement of pictures of lovers, that one should have a body without a face, and the other a face without a body.

## 47. Hearts of Oak. (J. C. Hook, R.A.)

Beautiful, but incomplete ; the painter wants more heart of oak himself. If he had let all his other canvases alone, and finished this, the year’s work would have been a treasure for all the centuries ; while now, it is only “the Hook of the season.”

It looks right and harmonious in its subdued sunshine. But it isn't. Why should mussel-shells cast a shadow, but boats and hats none? Why should toy-carts and small stones have light and dark sides, and tall rocks none? I fancy all the pictures this year must have been painted in the sunless east wind; and only a bit of sunshine put in here and there out of the painter's head, where he thought it would do nobody any harm.

112. A November Morning, etc. (H. T. Wells, R.A.)

Fishermen's hearts being of oak, what are huntsmen's hearts made of?

They will have to ascertain, and prove, soon; there being question nowadays, among the lower orders, whether they have got any, to speak of.

A pleasant aristocratic picture—creditable to Mr. Wells, and the nobility. Not a Vandyck, neither.

430. Sunday Afternoon. (R. Collinson.)

This picture, though of no eminent power in any respect, is extremely delightful to myself; and ought, I think, to be so to most unsophisticated persons, who care for English rural life; representing, as it does, a pleasant and virtuous phase of such life, whether on Sunday or Saturday afternoon.

Why, by the way, *must* we accept it for Sunday? Have our nice old women no rest on any other day? Do they never put on a clean muslin kerchief on any other day? Do they never read their Bible (of course, it would be improper to suppose any other book readable by them) on any other day? Whatever day it be—here, at all events, are peace, light, cleanliness, and content.

Luxury even, of a kind; the air coming in at that door must be delicious; and the leaves, outside of it, look like a bit of the kitchen-garden side of Paradise. They please me all the better because, since scientific people were good enough to tell us that leaves were made green by "green-leaf," I haven't seen a leaf painted green, by anybody. But this peep through the door is like old times, when we were neither plagued with soot, nor science.

Note, for a little piece of technical study in composition, that the painter would not have been able to venture on so pure color outside of the door, had he not painted the door green as well, only of a modified tint, and so led the subdued color forward into the red interior, taken up again by the shadows of the plants in the window. The management of the luminous shadow throughout is singularly skilful—all the more so because it attracts so little attention. *This* is true chiaroscuro; not spread treacle or splashed mud, speckled with white spots—as a Rembrandt amateur thinks.

Mr. Pettie, for instance, a man of real feeling and great dramatic power, is ruining himself by these shallow notions of chiaroscuro. If he had not been mimicking Rembrandt, as well as the “costume of the sixteenth century,” in 318, he never would have thought of representing Scott’s entirely heroic and tender-hearted Harry of Perth (223), merely by the muscular back and legs of him (the legs, by the way, were slightly bandy—if one holds to accuracy in anatomical respects); nor vulgarized the real pathos and most subtle expression of his Jacobites (1217) by the slovenly dark background, corresponding, virtually, to the slouched hat of a theatrical conspirator. I have been examining the painting of the chief Jacobite’s face very closely. It is nearly as good as a piece of old William Hunt; but Hunt never loaded his paint, except in sticks, and moss, and such like. Now there’s a wrinkle quite essential to the expression, under the Jacobite’s eye, got by a projecting ridge of paint, instead of a proper dark line. Rembrandt’s bad bricklayer’s work, with all the mortar sticking out at the edges, may be pardonable in a Dutchman sure of his colors; but it is always licentious; and in these days, when the first object of manufacture is to produce articles that won’t last, if the mortar cracks, where are we?

To return to the question of chiaroscuro. The present Academicians—most of whom I have had anxious talk of, with their fathers or friends, when they were promising boys—have since been, with the best part of their minds, amusing themselves in London drawing-rooms, or Eastern deserts, instead of learning their business; with the necessary result

that they have, as a body, qualified themselves rather to be Masters of Ceremonies than of Studies; and guides rather of Caravans than Schools; and have not got an inkling of any principle of their art to bless themselves—or other people, with. So that they have not only filled their large railroad station and stalls (attached refreshment-room completing the nature of the thing) with a mass of heterogeneous pictures, of which at least two-thirds are beneath the level of acceptance in any well-established dealer's shop;\* but they have encouraged, by favor of position, quite the worst abuses of the cheap art of the day; of which these tricks of rubbing half the canvas over with black or brown, that the rest may come out handsomer, or that the spectator may be properly, but at the same time economically, prepared for its melancholy or sublime tenor, are among the least creditable either to our English wits or honesty. The portrait, No. 437, for instance, is a very respectable piece of painting, and would have taken its place well in the year's show of work, if the inkstand had not been as evanescent as the vision of Ezekiel, and the library shelves so lost in the gloom of art, as to suggest, symbolically, what our bishops at home seem so much afraid of—indistinctness in colonial divinity. And the two highly moral pictures, 101 and 335, which are meant to enforce on the public mind the touching theories that, for the laboring poor, grass is not green, nor geese white; and that on the pastoral poor, the snow falls dirty; might have delivered their solemn message just as convincingly from a more elevated stage of the wall-pulpit, without leaving on the minds of any profane spectator like myself, the impression of their having been executed by a converted crossing-sweeper, with his broom, after it was worn stumpy.

If the reader is interested in the abstract qualities of art, he will find it useful at once to compare with these more or less feeble or parsimonious performances, two pictures—

---

\* I permit myself to name, for instance, not as worse than others, but as peculiarly disagreeable to myself, because I love monks, herons, and sea—450, 291, and 837.

which, if not high in attainment, are at least, the one strong, and the other generous. 184. "Peasantry of Esthonia going to Market" (G. Bochman) is masterly work, by a man practised in his business; but who has been taught it in a bad school. It is a true artistic abstraction of gray and angular natural facts; it indeed omits too much—for even in Esthonia there must be grass somewhere, or what could the horses eat?—and it omits the best things and keeps the worst; but it is done with method, skill, and a conscientious notion that to be gray and angular is to be right. And it deserves a place in an Academy exhibition.

On the other hand, 263, "Getting Better" (C. Calthrop), is an intensely laborious, honest, and intentionally difficult study of chiaroscuro in two lights, on varied color; and in all other respects it is well meant, and generously, according to the painter's power, completed. I won't say more of it, because at the height it hangs I can see no more; nor must the reader suppose that what I *have* said implies anything beyond what is stated. All that I certify is, that as a study of chiaroscuro it deserves close attention, much praise, and a better place than it at present occupies.

336. The Mayor of Newcastle. (W. W. Oules.)

An agreeable and vigorous portrait, highly creditable to the painter, and honorable to its subject and its possessors. Mr. Oules has adopted from Mr. Millais what was deserving of imitation; and used the skill he has learned to better ends. All his portraits here are vigorous and interesting.

221. John Stuart Blackie. (J. Archer.)

An entirely well-meant, and I should conjecture successful, portrait of a man much deserving portraiture. The background has true meaning, and is satisfactorily complete; very notable, in that character, among the portrait backgrounds of the year. The whole is right and good.

718. The Countess of Pembroke. (E. Clifford.)

Mr. Clifford evidently means well, and is studying in the

elder schools ; and painting persons who will permit him to do his best in his own way.

There is much of interesting in his work, but he has yet to pass through the Valley of Humiliation before he can reach the Celestial Mountains. He must become perfectly simple before he can be sublime ; above all, he must not hope to be great by effort. This portrait is over-labored ; and, toward the finishing, he has not well seen what he was doing, and has not rightly balanced his front light against that of the sky. But his drawings always deserve careful notice.

317. Miss M. Stuart Wortley. (A. Stuart Wortley.)

The rightest and most dignified female portrait here—as Lady Coleridge's drawing of Mr. Newman, 1069, is the most subtle among those of the members of learned professions (though Mr. Laurence's two beautiful drawings, 1054, 1062, only fall short of it by exhibiting too frankly the practised skill of their execution). 1052 is also excellent ; and, on the whole—thinking over these, and other more irregular and skirmishing, but always well-meant, volunteer work, sprinkled about the rooms—I think the amateurs had better have an Academy of their own next year, in which indulgently, when they had room to spare, they might admit the promising effort of an artist.

I have scarcely been able to glance round at the portrait sculpture ; and am always iniquitously influenced, in judging of marble, by my humor for praise or dispraise of the model, rather than artist. Guarding myself, as well as I may, from such faultful bias, I yet venture to name 1342 as an exemplary piece of chiselling ; carefully and tenderly composed in every touch. If the hair on the forehead were completely finished, this would be a nearly perfect bust. I cannot understand why the sculptor should have completed the little tress that falls on the cheek so carefully ; and yet left so many unmodified contours in the more important masses.

1301. Thomas Carlyle. (J. E. Boehm.)

For this noble piece of portraiture I cannot trust myself to

express my personal gratitude ; nor does either the time I can give to these notes, or their limited intention, permit me—if even otherwise I could think it permissible—to speak at all of the high and harmonious measure in which it seems to me to express the mind and features of my dear Master.

This only it is within the compass of my present purpose to affirm—that here is a piece of vital and essential sculpture ; the result of sincere skill spent carefully on an object worthy its care : motive and method alike right ; no pains spared ; and none wasted. And any spectator of sensitiveness will find that, broadly speaking, all the sculpture round seems dead and heavy in comparison, after he has looked long at this.

There must always be, indeed, some difference in the immediate effect on our minds between the picturesque treatment proper in portrait sculpture, and that belonging, by its grace of reserve, to classical design. But it is generally a note of weakness in an Englishman when he thinks he can conceive like a Greek ; so that the plurality of modern Hellenic Academy sculpture consists merely of imperfect anatomical models peeped at through bath-towels ; and is in the essence of it quite as dull as it appears to be. Let us go back to less dignified work.

196. School Revisited. (G. D. Leslie, A.)

I came upon this picture early, in my first walk through the rooms, and was so delighted with it that it made me like everything else I saw, that morning ; it is altogether exquisite in rendering some of the sweet qualities of English girlhood ; and, on the whole, the most easy and graceful composition in the rooms. I had written first, “masterly” composition ; but no composition is quite masterly which modifies or subdues any of the natural facts so as to force certain relations between them. Mr. Leslie at present subdues all greens, refuses all but local darks, and scarcely permits himself, even in flesh, color enough for life. Young ladies at a happy country boarding-school, like this, would be as bright as by the seaside ; and there is no reason why a

knowledge-gatherer, well cared for, should be less rosy than a samphire-gatherer.

Rich color may be in good taste, as well as the poorest; and the quaintness, politeness, and grace of Leslie might yet glow with the strength and freshness of Hook. It may perhaps be more difficult than I suppose to get the delicate lines and gradations on which the expression of these girls mainly depends in deeper color. But, at all events, the whole should be more in harmony, and more consistently precious. English girls are, perhaps, not all of them, St. Dorothys; but at least they are good enough to deserve to have their rose-leaves painted about them thoroughly.

The little thing on the extreme left, with the hoop, is as pleasant a shadow of nature as can be conceived in this kind: and I have no words to say how pretty she is.

But Mr. Leslie is in the very crisis of his artist life. His earlier pictures were finer in color—and color is the soul of painting. If he could resolve to paint thoroughly, and give the colors of Nature as they are, he might be a really great painter, and almost hold, to Bonifazio, the position that Reynolds held to Titian. But if he subdues his color for the sake of black ribands, white dresses, or faintly idealized faces, he will become merely an Academic leaf of the “Magazin des Modes.”

For the present, however, this picture, and the clay portrait of Carlyle, are, as far as my review reaches, the only two works of essential value in the Exhibition of this year—that is to say, the only works of quietly capable art, representing what deserved representation.

English girls, by an English painter. Whether you call them Madonnas, or saints—or what not—it is the law of art-life; your own people, as they live, are the only ones you can understand. Only living Venice, done by Venetian—living Greece by Greek—living Scotland, perhaps, which has much loved Germany, by living Germany, which has much revered Scotland: such expansion of law may be granted; nay, the strangeness of a foreign country, making an artist's sight of it shrewd and selective, may produce a sweet secondary

form of beautiful art ; your Spanish Lewis—your French Prout—your Italian Wilson—and their like—second-rate nevertheless, always. Not Lewis, but only Velasquez, can paint a perfect Spaniard ; not Wilson, nor Turner, but only Carpaccio, can paint an Italian landscape ; and, too fatally, the effort is destructive to the painters, beyond all resistance ; and Lewis loses his animal power among the arabesques of Cairo ; Turner, his Yorkshire honesty at Rome ; and Holman Hunt—painting the Light of the World in an English orchard—paints the gaslight of Bond Street in the Holy Land.

English maids, I repeat, by an English painter : that is all that an English Academy can produce of loveliest. There's another beautiful little one, by Mr. Leighton, with a purple drapery thrown over her, that she may be called Fatima (215, and 345), who would have been quite infinitely daintier in a print frock, and called Patty. And I fear there are no more, to speak of, by artists,\* this year ; the two vivid sketches, 222, 262, being virtually put out of court by their coarse work. (Look close at the painting of the neck, in the one, and of the left hand, in the other.) Of English men, there is the Mayor, and the Chemist ; a vigorous squire or two, and the group of grand old soldiers at Greenwich—a most notable, true, pathetic study ; but scarcely artistic enough to be reckoned as of much more value than a good illustrative woodcut. Mr. Watts' portraits are all conscientious and subtle, and of great present interest, yet not realistic enough to last. Exclusively I return to my Carlyle and the school-girls, as, the one, sure to abide against the beating of the time stream ; and the other, possibly floating on it, discernible as a flower in foam.

---

\* But see note on 317, p. 191.

## NATURAL HISTORY.

THERE ought to be a separate room in our Academy for the exhibition of the magnificent work in scientific drawing and engraving, done, at present, almost without public notice, for the illustrations of great European works on Palæontology, Zoölogy, and Botany. The feeling, on the part of our artists, that an idle landscape sketch, or a clever caricature, may be admitted into their rooms as “artistic ;” and that work which the entire energy of early life must be given to learn, and of late life to execute—is to be excluded, merely because it is thoroughly true and useful—is I hope likely to yield, some day, to the scientific enthusiasm which has prevailed often where it should have been resisted, and may surely therefore conquer, in time, where it has honorable claims.

There is nothing of the kind, however, to be seen here, hitherto ; but I may direct attention under this head, rather than that of landscape, to the exquisite skill of delineation with which Mr. Cooke has finished the group of palm-trees in his wonderful study of *Sunset at Denderah*. (443.) The sacrifice of color in shadow for the sake of brilliancy in light, essentially a principle of Holland as opposed to Venice, is in great degree redeemed in this picture by the extreme care with which the relations of light are observed on the terms conceded : but surely, from so low sunset, the eastern slopes of the mountains on the left could not have been reached by so many rays ?

To this division of our subject also must be referred Mr. Brett's “*Spires and Steeples of the Channel Islands*” (497), but with less praise, for since the days when I first endeavored to direct the attention of a careless public to his conscientious painting of the *Stonebreaker and Woodcutter*, he has gained nothing—rather, I fear, lost, in subtlety of execution, and necessitates the decline of his future power by persistently covering too large canvas. There is no occasion that a geological study should also be a geological map ; and even

his earlier picture, which I am honored in possessing, of the Val d'Aosta, would have been more precious to me if it had been only of half the Val d'Aosta.

The extreme distance here, however, beyond the promontory, is without any question the best bit of sea and atmosphere in the rooms. The paint on the water surface in the bay is too loaded ; but laid with extreme science in alternations of color.

At a still lower level, though deserving some position in the Natural History class for its essential, though rude, and apparently motiveless, veracity, must be placed "The Fringe of the Moor." (74.)

But why one should paint the fringe of the moor, rather than the breadth of it, merely for the privilege of carrying an ugly wooden fence all across the foreground, I must leave modern sentimentalists and naturalists to explain. Vestiges of the painter's former power of seeing true color remain in the iridescent distance, but now only disgrace the gentle hillsides with their coarseness of harlequinade ; and the daubed sky—daubed without patience even to give unity of direction to the bristle marks—seems to have been wrought in obtrusive directness of insult to every master, principle, and feeling revered, or experienced, in the schools of noble art, from its nativity to this hour.

And, closing the equivocal group of works in which Naturalism prevails unjustly over art, I am obliged to rank Mr. Leighton's interesting study of man in his Oriental function of scarecrow (symmetrically antithetic to his British one of game-preserved) 398. It is, I do not doubt, anatomically correct ; and, with the addition of the corn, the poppies, and the moon, becomes semi-artistic ; so that I feel much compunction in depressing it into the Natural History class ; and the more, because it partly forfeits its claim even to such position, by obscuring in twilight its really valuable delineation of the body, and disturbing our minds, in the process of scientific investigation, by sensational effects of afterglow, and lunar effulgence, which are disadvantageous, not to the scientific observer only, but to less learned spectators ; for when

simple and superstitious persons like myself, greatly susceptible to the influence of low stage lamps and pink side-lights, first catch sight of the striding figure from the other side of the room, and take it, perhaps, for the angel with his right foot on the sea and his left foot on the earth, swearing there shall be Time no longer ; or for Achilles alighting from one of his lance-cast-long leaps on the shore of Scamander ; and find, on near approach, that all this grand straddling, and turning down of the gas, mean, practically, only a lad shying stones at sparrows, we are but too likely to pass on petulantly, without taking note of what is really interesting in this Eastern custom and skill—skill which I would recommend with all my heart to the imitation of the British game-preserve aforesaid, when the glorious end of Preservation is to be accomplished in Battue. Good slinging would involve more healthy and graceful muscular action than even the finest shooting ; and might, if we fully followed the Eastern example, be most usefully practised in other periods of the year, and districts of England, than those now consecrated to the sports of our aristocracy. I cannot imagine a more edifying spectacle than a British landlord in the middle of his farmer's cornfield, occupied in this entirely patriotic method of Protection.

The remainder of the pictures which I have to notice as belonging to the domain of Natural History, are of indubitable, though unpretending, merit : they represent indeed pure Zoology in its highest function of Animal Biography, which scientific persons will one day find requires much more learned investigation of its laws than the Thanatography which is at present their exclusive occupation and entertainment.

#### 414. A Fascinating Tail. (H. H. Couldery.)

Quite the most skilful piece of minute and Dureresque painting in the exhibition—(it cannot be rightly seen without a lens) ; and in its sympathy with kitten nature, down to the most appalling depths thereof, and its tact and sensitiveness to the finest gradations of kittenly meditation and motion,—unsurpassable. It seems hard to require of a painter who has toiled so much, that, for this very reason, he should toil the

more. But "The Little Epicure" (169) cannot be considered a picture till the cabbage leaves are as perfect as the fish.

1234. The First Taste. (S. Carter.)

Altogether enjoyable to me ; and I am prepared to maintain (as a true lover of dogs, young and old), against all my heroic and tragically-minded friends, that this picture is exemplary in its choice of a moment of supreme puppy felicity, as properest time for puppy portraiture. And I thankfully—and with some shame for my generally too great distrust of modern sentiment—acknowledge, before it, that there is a real element of fine benevolence toward animals, in us, advanced quite infinitely, and into another world of feeling, from the days of Snyders and Rubens. "The Little Wanderers" (1173), by this same painter, are a most pathetic and touching group of children in the wood. You may see, if you will take your opera-glass to it, that the robin is even promising to cover them with leaves, if indeed things are to end, as seems too probable. And compare, by the way, the still more meek and tender human destitution, "To be Left till Called for," 83, which I am ashamed of myself for forgetting, as one of the pretty things that first encouraged me to write these notes. "Nobody's Dog" may console us with his more cynical view of his position in the wide world ; and finally, Miss Acland's Platonic puppy (737) shows us how events of the most unexpected, and even astounding, character may be regarded, by a dog of sense, with entire moral tranquillity, and consequently with undisturbed powers of reflection and penetration.

How strange that I cannot add to my too short list of animal studies—any, however unimportant, of Birds ! (I do not count as deserving notice at all, dramatic effects of vulture, raven, etc.) Not a nest—not a plume ! English society now caring only for kingfishers' skins on its hat, and plovers' eggs on its plate.

## LANDSCAPE.

THE distinction between Natural Historic painting of scenery and true Landscape, is that the one represents objects as a Government Surveyor does, for the sake of a good account of the things themselves, without emotion, or definite purpose of expression. Landscape painting shows the relation between nature and man ; and, in fine work, a particular tone of thought in the painter's mind respecting what he represents.

I endeavored, thirty years ago, in "Modern Painters," to explain this difference briefly, by saying that, in Natural History painting, the artist was only the spectator's horse ; but in Landscape painting, his friend.

The worst of such friendliness, however, is that a conceited painter may at last leave Nature out of the question altogether, and talk of himself only ; and then there is nothing for it but to go back to the Government Surveyor. Mr. Brett, in his coast scene above noticed, gives us things, without thoughts ; and the fuliginous moralists above noticed, thoughts—such as they are—without things : by all means let us rather have the geographical synopsis.

## 415. Hoppers on the Road. (W. Linnell.)

This is a landscape, however ; and, if it were more lightly painted, we might be very happy with it. Mr. Linnell cares no more than his father for brush-dexterity ; but he does no worse now, in that part of the business, than everyone else. And what a relief it is, for any wholesome human sight, after sickening itself among the blank horrors of dirt, ditch-water, and malaria, which the imitators of the French schools have begrimed our various exhibition walls with, to find once more a bit of blue in the sky, and a glow of brown in the coppice, and to see that Hoppers in Kent can enjoy their scarlet and purple—like empresses and emperors !

1199. *Summer Days for Me.* (A. W. Hunt.)

I am at some pause in expressing my pleasure in the realization of this beautiful scene, because I have personal interest in it, my own favorite summer walk being through this very field. As, however, I was far away at Assisi when the artist painted it, and had nothing whatever to do with either the choice or treatment of his subject, it is not indecorous for me to praise a work in which I am able so securely to attest a fidelity of portraiture, happily persisted in without losing the grace of imagination.

It is the only picture of the year which I saw in the studio; and that by chance; for it is one of my fixed laws not to look at pictures before they take their fair trial in the Academy. But I ventured to find fault with the sky. The sky was courteously changed to please me; but I am encroaching enough to want it changed more. "Summer days are" *not* "for me" unless the sky is blue in them, and especially unless it looks—what simple mortals too often make it in reality,—a great way off. I want this sky to look bluer at the top, and farther away at the bottom. The brook on the right is one of the very few pieces of stream which, this year, have been studied for their beauty, not their rage.

256. *Wise Saws.* (J. C. Hook, R.A.)

I suspect that many, even of the painter's admirers, pass this pretty sketch without noticing the humor with which he has expressed the gradations of feminine curiosity, scientific attention, and conscientious sense of responsibility, in the faces of the troop of cows who approach to investigate the nature of the noisy phenomenon upon the palings. It is a charming summer sketch, but scarcely worth sending to the Academy; and time was wasted by the good painter in carrying so far, what he felt his skill would be misapplied in carrying farther.

I am sure that Mr. Hook cannot lately have been reading his *Richard II.*; but, whether the line quoted for his motto chanced idly to occur to his memory, or was suggested to him by some acquaintance, he will, I trust, find a more decorous,

as he easily may a more amusing, motto for his pretty cattle piece, before it becomes known in the picture market as the parody of one of the most pathetic utterances in all Shakespearian tragedy.

123. On the River Mole. (Birket Foster.)

In doubt whether the spectator, without assistance, would see all the metaphysical distinctions between the cows in Mr. Hook's landscape, I need a more keen-sighted spectator's assistance to tell me, in Mr. Foster's, whether those animals on the opposite bank of the Mole are cows at all. If so, the trunks of the trees in the hedge beyond are about twenty yards in girth. What do our good water-color painters mean by wasting their time in things like this (and I could name one or two who have done worse), for the sake of getting their names into the Academy catalogue?

69, 81. The Horse-dealer. Crossing the Moor.

I have not looked long enough at these to justify me in saying more of them than that they should not be here on the line. That much I *must* say; and emphatically.

265. (I venture to supply a title, the painter seeming to have been at a loss.) A Wild Rose, remarkable in being left on its stalk, demonstrates to the poet Campbell that there has been a garden in this locality.

Little thought I, when I wrote the first line of "Modern Painters," that a day would come when I should have to say of a modern picture what I must say of this. When I began my book, Wilkie was yet living; and though spoiled by his Spanish ambition, the master's hand was yet unpalsied, nor had lost its skill of practice in its pride. Turner was in his main color-strength, and the dark room of the Academy had, every year, its four or five painted windows, bright as the jewel casements of Aladdin's palace, and soft as a kingfisher's wings. Mulready was at the crowning summit of his laborious skill; and the "Burchell and Sophia in the Hayfield," and the "Choosing of the Wedding Dress," remain in my mind as

standards of English effort in rivalry with the best masters of Holland. Constable's clumsy hand was honest, and his flickering sunshine fair. Stanfield, sea-bred, knew what a ship was, and loved it; knew what rocks and waves were, and wrought out their strength and sway with steadiest will. David Roberts, though utterly destitute of imagination, and incapable of color, was at least a practised draughtsman in his own field of architectural decoration; loved his Burgos or Seville cathedral fronts as a woman loves lace; and drew the details of Egyptian hieroglyph with dutiful patience, not to show his own skill, but to keep witness of the antiquity he had the wisdom to reverence; while, not a hundred yards from the Academy portico, in the room of the old water-color, Lewis was doing work which surpassed, in execution, everything extant since Carpaccio; and Copley-Fielding, Robson, Cox, and Prout were everyone of them, according to their strength, doing true things with loving minds.

The like of these last-named men, in simplicity and tenderness of natural feeling, expressing itself with disciplined (though often narrow) skill, does not, so far as I can see, now exist in the ranks of art-laborers; and even of men doing their absolute best according to their knowledge, it would be difficult to find many among the most renowned exhibitors of London and Paris; while here, full on the line, with highest Academic name, and hailed by explosive applause from the whole nation, here is—I cannot use strength of words enough to tell you what it is, unless you will first ascertain for yourselves what it is *not*.

Get what good you can of it, or anything else in the rooms to-day; but to-morrow, or when next you mean to come to the Academy, go first for half an hour into the National Gallery, and look closely and thoroughly at the painting of the soldier's helmet, and crimson plume in John Bellini's Peter Martyr; at the horse-bridle in the large, nameless Venetian picture of the Madonna and kneeling Knight; at the herbage in the foreground of Mantegna's Madonna; and at Titian's columbines and vine in the Bacchus and Ariadne. All these are examples of true painter's work in minor detail; unsurpassable, but not,

by patience and modesty, inimitable. There was once a day when the painter of this (soi-disant) landscape promised to do work as good. If, coming straight from that to this, you like this best, be properly thankful for the blessings of modern science and art, and for all the good guidance of Kensington and Messrs. Agnew. But if you think that the four-petalled rose, the sprinkle of hips looking like ill-drawn heather, the sundial looking like an ill-drawn fountain, the dirty birch-tree, and the rest—whatever it is meant for—of the inarticulate brown scabble, are not likely to efface in the eyes of future generations the fame of Venice and Etruria, you have always the heroic consolation given you in the exclamation of the *Spectator*—“If we must choose between a Titian and a Lancashire cotton mill—give us the cotton mill.”

Literally, here you have your cotton mill employed in its own special Art-produce. Here you have, what was once the bone and sinew of a great painter, ground and carded down into black-podded broom-twigs. That is what has come to pass upon him ; that, *his* finding on his “ruinous walk” over the diabolic Tom Tidler’s ground of Manchester and Salford. Threshed under the mammon flail into threads and dust, and shoddy-fodder for fools ; making manifest yet, with what ragged remnant of painter’s life is in him, the results of mechanical English labor on English land. Not here the garden of the sluggard, green with frank weeds ; not here the garden of the Deserted Village, overgrown with ungathered balm ; not here the noble secrecy of a virgin country, where the falcon floats and the wild goat plays ; but here the withering pleasure of a fallen race, who have sold their hearths for money, and their glory for a morsel of bread.

### 231. The Quarries of Holmeground. (J. S. Raven.)

The painter has real feeling of the sublimity of hill forms, and has made the most of his Langdale pikes. But it is very wonderful that in all this Academy, so far as I have yet seen, there is not a single patient study of a mossy rock. Now the beauty of foreground stone is to be mossy, as the beauty of a beast is to be furry ; and a quarried rock is to a natural one

what a skinned leopard is to a live one. Even if, as a simple painter, and no huntsman, one liked one's leopard or tiger better dead than alive, at least let us have him dead in his integrity; or—if so much as that cannot be,—for pictorial purpose it is better to have, as in No. 697, the skin without the tiger, than, as here, the tiger without the skin. (No. 697, by the way, should have been named in the Natural History class, for a good study as far as it reaches, and there may be more substantial drawing in it than I can see at the height where it is hung.)

Another sorrowful character in the mountain-painting of this year, is the almost total absence of any attempt to render calm and full sunshine. 564 and 368 are, I think, the only exceptions, though scarcely worth noticing except as such; unless the latter, for the extreme and singular beauty of the natural scene it represents. The "Mountain Twilight," 759, W. C. Eddington, is evidently a pure and careful study of evening air among noble hills. What an incomparably ridiculous mob this London mob is!—to let some square leagues of room lie about its metropolis in waste brick-field, and occupy immeasurable space of wall with advertisements of pills and pictures of newly-opened shops; and lift a lovely little drawing like this simply—out of its way.

237. Richmond Hill. (Vicat Cole, A.)

The passages on the left, under the trees, of distant and subdued light, in their well-studied perfection, are about the most masterly things in landscape work in this exhibition; but has the painter never in his life seen the view from Richmond Hill on a clear day? Such a thing is still possible; and when it happens, is the time to paint that distance, or at least (for the passages on the left imply mist), when the indistinctness of it may be in golden mist, not gas fume. The last line quoted from Thomson seems to have been written prophetically, to describe the England of our own day. But Thomson was never thinking of real smoke when he wrote it. He was as far from imagining that English landscape would ever be stifled in floating filth, as that the seasons should

stop rolling, or April not know itself from November. He means merely the warm mist of an extreme horizon ; and has at least given us something to look at before we come to it. What has Mr. Vicat Cole done with all those hills, and dales, and woods, and lawns, and spires, which he leads us to expect ?

I think I never saw a large picture so much injured by a little fault, as this is by the white wake of the farthest boat on the river. As a fact, it is impossible ; as a white line, it cuts all to pieces.

651. The Head of a Highland Glen. (F. C. Newcome.)

The best study of torrent, including distant and near water, that I find in the rooms : 1075 has been most carefully and admirably studied from nature by Mr. Raven : only what is the use of trying to draw water with charcoal ? and what makes nearly all the painters this year choose to paint their streams in a rage, and foul with flood, instead of in their beauty, and constant beneficence ? Our manufacturers have still left, in some parts of England and Scotland, streams of what may be advertised in the bills of Natural Scenery as “ real water ; ” and I myself know several so free from pollution that one can sit near them with perfect safety, even when they are not in flood.

The rest of this mountain scene by Mr. Newcome is also carefully studied, and very right and good.

756. The Llugwy at Capel Curig. (I. J. Curnock.)

I find this to be the most attentive and refined landscape of all here ; too subdued in its tone for my own pleasure, but skilful and affectionate in a high degree ; and one of the few exceptions to my general statement above made ; for here is a calm stream patiently studied. The distant woods and hills are all very tender and beautiful.

636 is also a singularly careful and unassumingly true drawing ;—but are the town and rail not disquieted enough,—that we should get no rest in a village ?

## POLICY.

WE finally inquire what our British artists have to say to us on the subject of good Government, and its necessary results ;—what triumph they express in the British Constitution and its present achievements.

In old times, all great artistic nations were pictorially talkative, chiefly, next to religion, on the subject of Government. Venice, Florence, and Siena did little else than expound, in figures and mythic types, the nature of civic dignity, statesmanly duty, and senatorial or soldierly honor ; and record, year by year, the events conducive to their fame.

I have not exhaustively overlooked the Academy ; but, except Miss Thomson's study of a battle fought just "sixty years since,"—I find no English record of any important military or naval achievement ; and the only exhibition of the mode in which Britannia. at present rules the waves, is Mr. Cooke's "Devastation" being reviewed ; somewhat sable and lugubrious as a national spectacle, dubious as a national triumph, and to myself, neither in color nor sentiment enjoyable, as the pictures of Victories and Temeraires one used to see in days of simpler warfare. And of political achievement there seems still less consciousness or regard in the British artist ; so that future generations will ask in vain for any aid to their imagination of the introduction of Dr. Kenealy to the Speaker, or any other recent triumph of the British Constitution.

The verdict of existing British Art on existing British Policy is, therefore, if I understand it rightly, that we have none ; but, in the battle of life, have arrived at declaration of an universal *Sauve qui peut* ;—or explicitly, to all men, Do as you like, and get what you can. Something other than this may however be gathered, it seems to me, from the two records given us of the war,—so unwise, and yet so loyal,—of sixty years ago.

613. La Charge des Cuirassiers Français à Waterloo. (Philippoteau.)

This carefully studied and most skilful battle piece is but too likely to be overlooked in the confused rush to Miss Thomson's more attractive composition. And of all in the Academy, this is the picture which an Englishman, of right feeling, would least wish to overlook. I remember no so impartial and faithful representation of an historical battle. I know no war-painting by the artists of any great race, however modest, in which the object has not hitherto been definitely—self-laudation. But here is a piece of true war-history, of which it is not possible to say, by observance of any traceable bias, whether a Frenchman or Englishman painted it. Such a picture is more honorable to France than the taking of the Malakoff.

I never approached a picture with more iniquitous prejudice against it, than I did Miss Thomson's; partly because I have always said that no woman could paint; and secondly, because I thought what the public made such a fuss about, *must* be good for nothing.

But it is Amazon's work, this; no doubt of it, and the first fine pre-Raphaelite\* picture of battle we have had;—profoundly interesting; and showing all manner of illustrative and realistic faculty. Of course, all that need be said of it, on this side, must have been said twenty times over in the journals; and it remains only for me to make my tardy genuflection, on the trampled corn, before this Pallas of Pall Mall;—and to murmur my poor words of warning to her, that she remember, in her day of triumph, how it came to pass that Atlanta was stayed and Camilla slain.

Camilla-like the work is—chiefly in its refinement, a quality

---

\* Miss Thomson may perhaps not in the least know herself for a sister of the school. But the entire power of her picture, as of her own mind, depends first on her resolution to paint things as they really are, or were; and not as they might be poetically fancied to be. See above, the note on 218, p. 176.

I had not in the least expected, for the cleverest women almost always show their weakness in endeavors to be dashing. But actually, here, what I suppose few people would think of looking at, the sky, is the most tenderly painted, and with the truest outlines of cloud, of all in the exhibition;—and the terrific piece of gallant wrath and ruin on the extreme right, where the cuirassier is catching round the neck of his horse as he falls, and the convulsed fallen horse just seen through the smoke below—is wrought, through all the truth of its frantic passion, with gradations of color and shade which I have not seen the like of since Turner's death.

I place these two paintings under the head of "Policy," because it seems to me that, especially before the Quatrebras, one might wisely consider with Mr. Carlyle, and with one's self, what was the "net upshot" and meaning of our modern form of the industry of war. Why should these wild and well-meaning young Irish lads have been brought, at great expense, all the way to Four Arms, merely to knock equally wild and well-meaning young French lads out of their saddles into their graves; and take delight in doing so? And why should the English and French squires at the head of their regiments, have, practically, no other object in life than deceiving these poor boys, and an infinite mob besides of such others, to their destruction?

Think of it. Suppose this picture, as well as the one I was so happy in praising of Mr. Collinson's, had been called—as it also, quite properly, might have been—"Sunday Afternoon" (only dating "June 18th, 1815"). Suppose the two had been hung side by side. And, to complete our materials for meditation, suppose Mr. Nicol's "The Sabbath Day" (1159)—which I observed the *Daily Telegraph* called an exquisitely comic picture, but which I imagine Mr. Nicol meant for a serious one—representing the conscientious Scottish mountain-matron setting out for the place where she may receive her cake of spiritual oatmeal, baken on the coals of Presbyterian zeal; suppose, I say, this ideal of Scottish Sabbath occupation placed beside M. Philippoteau's admirable painting of the Highland regiment at evening missionary service, in that

sweet and fruitful foreign land ; while Miss Thomson enables us also, thus meditating in our fields at eventide, to consider, if not the Lilies, at least the Poppies of them ; and to understand how in *this* manner of friction of ears of corn—by his bent knees instead of his fingers—the modern Christian shows that the Sabbath was made for man, and not man for the Sabbath ?

“ Well—and if this were so done,—should we not feel that the peace of the cottage, and the honor of the mountain-side, were guarded and won for them by that mighty Evening Service, with the thunder of its funeral march rolled deep among the purple clouds ? ”

No ! my soldier friends ; no : do not think it. They were, and are, guarded and won by silent virtues of the hearth and the rock, which must endure until the time when the prayer we pray in our every Sabbath Litany, to be delivered from battle, murder, and sudden death—shall have been offered with sincere hearts, fervently ; and so found its way at last to the audience of Heaven.

---

#### NOTE TO PICTURE 518.

“ The rarity and grandeur of his character being that he was a Greek in ideas and a Roman in action ; who really did, and abstained, strictly to ideal, in a time when everybody else was sadly fallen from his ideal.

“ In 353 he is made Cæsar (Constantius having no sons, and he being last of his race) ; and from that to Constantius' death in 361 he has to fight the Franks and Alemanni. During the last few years of this time I find he lived mostly at Paris—that he fortified the ancient Lutetia (l'Île de la Cité), built the Thermæ Juliani, the remains of which, (Thermes de Julien) are still visible in the Rue de la Harpe, between Palais de Cluny and Ecole de Médecine. Also, in a scarcity of corn from inroads of the Germans, he got a great supply of corn from England (calculated at 120,000 quarters *at once*)—and fed people all along the Rhine from Bingen to Cologne. He says (Epist. ii.) he was a Christian up to his twentieth year, 351 ; and he said nothing about his change (in public) till 361. Then he felt himself the successor of M. Aurelius, and seems to have gone to work in his determined, clear-sighted way. But the Pagans seem to have been surprised at his faith as much as the Christians at his apostasy.”—REV. R. ST. J. TYRWHITT.

NOTES BY MR. RUSKIN

ON

SAMUEL PROUT

AND

WILLIAM HUNT,

ILLUSTRATED BY

A LOAN COLLECTION OF DRAWINGS

EXHIBITED AT

*THE FINE ART SOCIETY'S GALLERIES,*

148 NEW BOND STREET.

1879-80.

## NOTE.

I HAVE to thank the kind friends who have contributed drawings. I regret that very many of them have had to be returned, simply because I had already to my hand examples which sufficiently illustrated the lessons I wished to teach in putting together these notes.

J. RUSKIN.

## PREFACE.

---

It has been only in compliance with the often and earnestly urged request of my friend Mr. Marcus Huish, that I have thrown the following notes together, on the works of two artists belonging to a time with which nearly all associations are now ended in the mind of general society; and of which my own memories, it seemed to me, could give little pleasure (even if I succeeded in rendering them intelligible) to a public indulged with far more curious arts, and eager for otherwise poignant interests than those which seemed admirable,—though not pretending to greatness, and were felt to be delightful,—though not provoking enthusiasm, in the quiet and little diverted lives of the English middle classes, “sixty years since.”

It is especially to be remembered that drawings of this simple character were made for the same middle classes, exclusively: and even for the second order of the middle classes, more accurately expressed by the term “bourgeoisie.” The great people always bought Canaletto, not Prout, and Van Huysum, not Hunt. There was indeed no quality in the bright little water-colors, which could look other than pert in ghostly corridors, and petty in halls of state; but they gave an unquestionable tone of liberal-mindedness to a suburban villa, and were the cheerfullest possible decorations for a moderate-sized breakfast parlor, opening on a nicely mown lawn. Their liveliness even rose, on occasion, to the charity of beautifying the narrow chambers of those whom business or fixed habit still retained in the obscurity of London itself; and I remember with peculiar respect the pride of a benevolent physician, who never would exchange his neighborhood

to the poor of St. Giles's for the lucrative lustre of a West End Square, in wreathing his tiny little front drawing-room with Hunt's loveliest apple-blossom, and taking the patients for whom he had prescribed fresh air, the next instant on a little visit to the country.

Nor was this adaptation to the tastes and circumstances of the London citizen, a constrained or obsequious compliance on the part of the kindly artists. They were themselves, in mind, as in habits of life, completely a part of the characteristic metropolitan population whom an occasional visit to the Continent always thrilled with surprise on finding themselves again among persons who familiarly spoke French; and whose summer holidays, though more customary, amused them nevertheless with the adventure, and beguiled them with the pastoral charm, of an uninterrupted picnic. Mr. Prout lived at Brixton, just at the rural extremity of Cold Harbor Lane, where the spire of Brixton church, the principal architectural ornament of the neighborhood, could not but greatly exalt, by comparison, the impressions received from that of Strasburg Cathedral, or the Hôtel de Ville of Bruxelles; and Mr. Hunt, though often in the spring and summer luxuriating in country lodgings, was only properly at home in the Hampstead road,\* and never painted a cluster of nuts without some expression, visible enough by the manner of their presentation, of the pleasure it was to him to see them in the shell, instead of in a bag at the greengrocer's.

The lightly rippled level of this civic life lay, as will be easily imagined, far beneath the distractions, while it maintained itself meekly, yet severely, independent of the advantages held out by the social system of what is most reverently called "Town." Neither the disposition, the health, nor the means of either artist admitted of their spending their evenings, in general, elsewhere than by their own firesides; nor could a spring levée of English peeresses and foreign ambassadors be invited by the modest painter whose only studio was his little back-parlor, commanding a partial view of the

---

\* See his own inscription, with LONDON in capitals, under No.

scullery steps and the water-butt. The fluctuations of moral and æsthetic sentiment in the public mind were of small moment to the humble colorist, who depended only on the consistency of its views on the subject of early strawberries; and the thrilling subjects presented by the events or politics of the day were equally indifferent to the designer who invited interest to nothing later than the architecture of the 15th century. Even the treasures of scientific instruction, and marvels of physical discovery, were without material influence on the tranquillity of the two native painters' uneducated skill. Prout drew every lovely street in Europe without troubling himself to learn a single rule of perspective; while Hunt painted mossy banks for five-and-twenty years without ever caring to know a Sphagnum from a Polypody, and embossed or embowered his birds' eggs to a perfection, which Greek connoisseurs would have assured us the mother had unsuspectingly sate on—without enlarging his range of ornithological experience beyond the rarities of tomtit and hedge-sparrow.

This uncomplaining resignation of patronage, and unblushing blindness to instruction, were allied, in both painters, with a steady consistency in technical practice, which, from the first, and to the last, precluded both from all hope of promotion to the honors, as it withheld them from the peril of entanglement in the rivalries, connected with the system of exhibition in the Royal Academy. Mr. Prout's method of work was entirely founded on the quite elementary qualities of white paper and black Cumberland lead; and expressly terminated within the narrow range of prismatic effects producible by a brown or blue outline, with a wash of ochre or cobalt. Mr. Hunt's early drawings depended for their peculiar charm on the most open and simple management of transparent color; and his later ones, for their highest attainments, on the flexibility of a pigment which yielded to the slightest touch and softest motion of a hand always more sensitive than firm. The skill which unceasing practice, within limits thus modestly unrelaxed, and with facilities of instrument thus openly confessed, enabled each draughtsman in his

special path to attain, was exerted with a vividness of instinct somewhat resembling that of animals, only in the slightest degree conscious of praiseworthiness, but animated by a healthy complacency, as little anxious for external sympathy as the self-content of a bee in the translucent symmetry of its cell, or of a chaffinch in the silvery tracery of her nest—and uniting, through the course of their uneventful and active lives, the frankness of the bird with the industry of the insect.

In all these points of view the drawings to which I venture, not without hesitation, to call the passing attention of the public, can claim regard only as examples of genius both narrowed and depressed; yet healthy enough to become more elastic under depression; and scintillant enough to be made more vivid by contraction. But there are other respects in which these seemingly unimportant works challenge graver study; and illustrate phases of our own national mind—I might perhaps say, even of national civilization—which coincide with many curious changes in social feelings; and may lead to results not easily calculable in social happiness.

If the reader has any familiarity with the galleries of painting in the great cities of Europe, he cannot but retain a clear, though somewhat monotonously calm, impression of the character of those polished flower-pieces, or still-life pieces, which occupy subordinate corners in their smaller rooms; and invite to moments of repose, or frivolity, the attention and imagination which have been wearied in admiring the attitudes of heroism, and sympathizing with the sentiments of piety. Recalling to his memory the brightest examples of these which his experience can supply, he will find that all the older ones agree—if flower-pieces—in a certain courtliness and formality of arrangement, implying that the highest honors which flowers can attain are in being wreathed into grace of garlands, or assembled in variegation of bouquets, for the decoration of beauty, or flattery of noblesse. If fruit or still-life pieces, they agree no less distinctly in directness of reference to the supreme hour when the destiny of dignified fruit is to be accomplished in a royal dessert; and the

furred and feathered life of hill and forest may bear witness to the Wisdom of Providence by its extinction for the kitchen dresser.

Irrespectively of these ornamental virtues, and culinary utilities, the painter never seems to perceive any conditions of beauty in the things themselves, which would make them worth regard for their own sake: nor, even in these appointed functions, are they ever supposed to be worth painting, unless the pleasures they procure be distinguished as those of the most exalted society. No artists of the old school would ever think of constructing a subject out of the herbs of a cottage garden, or viands of a rural feast. Whatever interest was then taken in the life of the lower orders involved always some reference to their rudenesses or vices; and rarely exhibits itself in any other expression than that of contempt for their employments, and reproach to their recreation.

In all such particulars the feelings shown in the works of Hunt, and of the school with which he was associated, directly reverse those of the preceding age. So far from being garlanded into any polite symmetry, his primroses fresh from the bank, and hawthorns white from the hedge, confess at once their artless origin in the village lane—have evidently been gathered only at the choice, and thrown down at the caprice, of the farmer's children, and cheerfully disclaim all hope of ever contributing to the splendors or felicities of the great. The bloom with which he bedews the grape, the frosted gold with which he frets the pine, are spent chiefly to show what a visible grace there is in the fruits of the earth, which we may sometimes feel that it is rude to touch, and swinish to taste; and the tenderness of hand and thought that soothe the rose-gray breast of the fallen dove, and weave the couch of moss for its quiet wings, propose no congratulation to the spectator on the future flavor of the bird in a pie.

It is a matter of extreme difficulty, but of no less interest, to distinguish, in this order of painting, what part of it has its origin in a plebeian—not to say vulgar—simplicity, which education would have invested with a severer charm; and

what part is grounded on a real sense of natural beauty, more pure and tender than could be discerned amid the luxury of courts, or stooped to by the pride of nobles.

For an especial instance, the drawing of the interior, No. 174, may be taken as a final example of the confidence which the painter felt in his power of giving some kind of interest to the most homely objects, and rendering the transitions of ordinary light and shade impressive, though he had nothing more sacred to illuminate than a lettuce, and nothing more terrible to hide than a reaping-hook. The dim light from the flint-glass window, and the general disposition and scale of the objects it falls on, remind me sometimes, however unreasonably, of the little oratory into which the deeply-worn steps ascend from the Beauchamp Chapel at Warwick. But I know perfectly well, and partly acknowledge the rightness of his judgment, though I cannot analyze it, that Hunt would no more have painted that knightly interior instead of this, with helmets lying about instead of saucepans, and glowing heraldries staying the light instead of that sea-green lattice, than he would have gone for a walk round his farm in a court dress.

“Plebeian—not to say vulgar”—choice; but I fear that even “vulgar,” with full emphasis, must be said sometimes in the end. Not that a pipkin of cream in Devonshire is to be thought of less reverently than a vase of oil or canister of bread in Attica; but that the English dairy-maid in her way can hold her own with the Attic Canephora, and the peasant children of all countries where leaves are green and waters clear, possess a grace of their own no less divine than that of branch and wave. And it is to be sorrowfully confessed that the good old peach and apple painter was curiously insensible to this brighter human beauty, and though he could scarcely pass a cottage door around his Berkshire home without seeing groups of which Correggio would have made Cupids, and Luini cherubs, turned away from them all, to watch the rough plough-boy at his dinner, or enliven a study of his parlor-maid at her glass (158), with the elegance of a red and green pincushion.

And yet, for all this, the subtle sense of beauty above referred to was always in his mind, and may be proved, and partly illustrated, by notice of two very minute, but very constant, differences between his groups of still life and those of the Dutch painters. In every flower-piece of pretension, by the masters of that old school, two accessory points of decoration are never absent. The first of these is the dew-drop, or rain-drop—it may be two or three drops, of either size, on one of the smoothest petals of the central flower. This is always, and quite openly, done to show how well the painter can do it—not in the least with any enjoyment of wetness in the flower. The Dutchman never got a wet flower to paint from. He had his exquisite and exemplary poppy or tulip brought in from the market as he had occasion, and put on its dew-drops for it as a lady's dressing-maid puts on her diamonds, merely for state. But Hunt saw the flowers in his little garden really bright in the baptismal dawn, or drenched with the rain of noontide, and knew that no mortal could paint any real likeness of that heaven-shed light—and never once attempted it; you will find nothing in any of his pictures merely put on that you may try to wipe it off.

But there was a further *tour-de-force* demanded of the Dutch workman, without which all his happiest preceding achievements would have been unacknowledged. Not only a dew-drop, but, in some depth of bell, or cranny of leaf, a bee, or a fly, was needful for the complete satisfaction of the connoisseur. In the articulation of the fly's legs, or neurography of the bee's wings, the Genius of painting was supposed to signify her accepted disciples; and their work went forth to the European world, thenceforward, without question, as worthy of its age and country. But, without recognizing in myself, or desiring to encourage in my scholars, any unreasonable dislike or dread of the lower orders of living creatures, I trust that the reader will feel with me that none of Mr. Hunt's peaches or plums would be made daintier by the detection on them of even the most cunningly latent wasp, or cautiously rampant caterpillar; and will accept,

without so much opposition as it met with forty years ago, my then first promulgated, but steadily since repeated assertion, that the "modern painter" had in these matters less vanity than the ancient one, and better taste.

Another interesting evidence of Hunt's feeling for beauty is to be found in the unequal distribution of his pains to different parts of his subject. This is indeed, one of the peculiar characteristics of our modern manner, and in the abstract, not a laudable one. All the old masters, without exception, complete their pictures from corner to corner with a strictly driven level of deliberation; and whether it be a fold of drapery, a blade of grass, or a wreath of cloud, on which they are subordinately occupied, the pencil moves at the same tranquil pace, and the qualities of the object are rendered with the same fixed attention. In this habitual virtue, the dull and the brilliant, the weak and the mighty, concur without exception; holding it for their first point of honor to be thorough craftsmen; and to carry on the solicitude of their skill throughout the piece, as an armorer would hammer a corslet, or a housewife knit a stocking, leaving no edge untempered, and no thread unfastened. Modern petulance and incompetence lead, on the contrary, to the flaunting of dexterity in one place, and the pretence of ease in another—complete some portions of the subject with hypocritical affection, and abandon others in ostentatious contempt. In some few cases, the manner arises from a true eagerness of imagination, or kindly and natural desire for sympathy in particular likings; but in the plurality of instances, the habit allies itself with mistaken principles of art, and protects impatience and want of skill under the shield of philosophy.

Few modern pieces of oil-painting are more accomplished or deliberate than those of Meissonier: and in the example placed on the table in the centre of the room, his subject was one which he certainly would not have treated, consciously, with prosaic indignity of manner, or injurious economy of toil. Yet the inequality of workmanship has depressed what might have been a most sublime picture almost to the level of

a scenic effect. The dress of the Emperor and housings of his steed are wrought with the master's utmost care : but the landscape is nearly unintelligible, and the ground a mere conventional diaper of feeble green and gray.

It is difficult to describe the height to which the picture would have risen above its present power, if a ruined French village had been represented with Flemish precision amidst the autumnal twilight of the woods ; and the ground over which the wearied horse bears his dreaming rider, made lovely with its native wild-flowers.

In all such instances, the hold which a true sense of beauty has over the painter's mind may be at once ascertained by observing the nature of the objects to which his pains have been devoted. No master with a fine instinct for color would spend his time with deliberate preference on the straps and buckles of modern horse-furniture, rather than on the surrounding landscape or foreground flowers, though in a subject like this he would have felt it right to finish both, to the spectator's content, if not to his amazement. And among the numerous rustic scenes by Hunt which adorn these walls, though all are painted with force and spirit, none are recommended to our curiosity by an elaborate finish given to ungraceful objects. His final powers are only employed on motives like the dead doves in Nos. 139 and 145, accompanied by incidents more or less beautiful and seemly.

I must even further guard my last sentence, by the admission that the means by which his utmost intentions of finish are accomplished, can never, in the most accurate sense, be termed "elaborate." When the thing to be represented is minute, the touches which express it are necessarily minute also ; they cannot be bold on the edge of a nutshell, nor free within the sphere of a bird's nest ; but they are always frank and clear, to a degree which may seem not only imperfect, but even harsh or offensive, to eyes trained in more tender or more formal schools. This broken execution by detached and sharply defined touches became indeed, in process of years, a manner in which the painter somewhat too visibly indulged, or prided himself ; but it had its origin and author-

ity in the care with which he followed the varieties of color in the shadow, no less than in the lights, of even the smallest objects. It is easy to obtain smoothness and unity of gradation when working with a single tint, but if all accidents of local color and all differences of hue between direct and reflected light are to be rendered with absolute purity, some breaking of the texture becomes inevitable. In many cases, also, of the most desirable colors, no pigments mixed on the palette, but only interlaced touches of pure tints on the paper, will attain the required effect. The indefinable primrose color, for instance, of the glazed porringer in the foreground of No. 174 could not possibly have been given with a mixed tint. The breaking of gray through gold by which it has been reached is one of the prettiest pieces of work to be seen in these rooms; it exhibits the utmost skill of the artist, and is an adequate justification of his usual manner.

Among the earliest statements of principles of art made in the "Stones of Venice," one of those chiefly fortunate in obtaining credit with my readers was the course of argument urging frankness in the confession of the special means by which any artistic result has been obtained, and of the limitations which these appointed instruments, and the laws proper to the use of them, set to its scope. Thus the threads in tapestry, the tesseræ in mosaic, the joints of the stones in masonry, and the movements of the pencil in painting, are shown without hesitation by the greatest masters in those arts, and often enforced and accented by the most ingenious; while endeavors to conceal them—as to make needlework look like pencilling, or efface, in painting, the rugged freedom or joyful lightness of its handiwork into the deceptive image of a natural surface, are, without any exception, signs of declining intelligence, and benumbed or misguided feelings.

I therefore esteem Hunt's work all the more exemplary in acknowledging without disguise the restrictions imposed on the use of water-color as a medium for vigorously realistic effects: and I have placed pieces of it in my Oxford school as standards of imitative (as distinguished from decorative) color, in the rightness and usefulness of which I have every

day more confirmed trust. I am aware of no other pieces of art, in modern days, at once so sincere and so accomplished : only let it be noted that I use the term "sincere" in this case, not as imputing culpable fallacy to pictures of more imaginative power, but only as implying the unbiassed directness of aim at the realization of very simple facts, which is often impossible to the passions, or inconsistent with the plans, of greater designers.

In more cautiously guarded terms of praise, and with far less general proposal of their peculiar qualities for imitation, I have yet, both in my earlier books, and in recent lectures at Oxford, spoken of the pencil sketches of Prout with a reverence and enthusiasm which it is my chief personal object in the present exhibition to justify, or at least to explain ; so that future readers may not be offended, as I have known some former ones to be, by expressions which seemed to them incompatible with the general tenor of my teaching.

It is quite true that my feelings toward this painter are much founded on, or at least colored by, early associations ; but I have never found the memories of my childhood beguile me into any undue admiration of the architecture in Billiter Street or Brunswick Square ; and I believe the characters which first delighted me in the drawings of this—in his path unrivalled—artist, deserve the best attention and illustration of which in my advanced years I am capable.

The little drawing, No. 95, bought, I believe, by my grandfather, hung in the corner of our little dining parlor at Herne Hill as early as I can remember ; and had a most fateful and continual power over my childish mind. Men are made what they finally become, only by the external accidents which are in harmony with their inner nature. I was not made a student of Gothic merely because this little drawing of Prout's was the first I knew ; but the hereditary love of antiquity, and thirst for country life, which were as natural to me as a little jackdaw's taste for steeples, or dabchick's for reeds, were directed and tempered in a very definite way by the qualities of this single and simple drawing.

In the first place, it taught me generally to like ruggedness ;

and the conditions of joint in moulding, and fitting of stones in walls which were most weather-worn, and like the gray dykes of a Cumberland hill-side. This predilection—passion, I might more truly call it—holds me yet so strongly, that I can never quite justly conceive the satisfaction of the original builders, even of the most delicate edifice, in seeing its comely stones well set together. Giotto's tower, and the subtly Cyclopean walls of early Verona, have indeed chastised the prejudice out of me, so far as regards work in marble enriched with mosaic and pure sculpture ; but I had almost rather see Furness or Fountains Abbey strewed in grass-grown heaps by their brooksides, than in the first glow and close setting of their fresh-hewn sandstone. Whatever is rationally justifiable in this feeling, so far as it is dependent on just reverence for the signs of antiquity, and may therefore be trusted to, as existing generally in the minds of persons of thoughtful temperament, was enough explained, long ago, in the passages of the "Seven Lamps of Architecture," which, the book not being now generally accessible, I reprint in Appendix I. ; but openness of joints and roughness of masonry are not exclusively signs of age or decay in buildings : and I did not at that time enough insist on the propriety, and even the grace, of such forms of literal "rustication" \* as are compelled by coarseness of materials, and plainness of builders, when proper regard is had to economy, and just honor rendered to provincial custom and local handicraft. These are now so little considered that the chief difficulties I have had in the minute architectural efforts possible at Brantwood have been to persuade my Coniston builder into satisfaction with Coniston slate ; and retention of Coniston manners in dressing—or rather, leaving undressed—its primitively fractured edges. If I ever left him alone for a day, some corner stone was sure to be sent for from Bath or Portland, and the ledges I had left

---

\* All the forms of massive foundation, of which the aspect, in buildings of pretension, has been described by this word, took their origin from the palaces in Florence, whose foundations were laid with unchiselled blocks of the gray gritstone of Fésòle, and looked like a piece of its crags.

to invite stonecrop and swallows, trimmed away in the advanced style of the railway station at Carnforth.

There is more, however, to be noted in this little old-fashioned painting, than mere delight in weedy eaves and mortarless walls. Pre-eminently its repose in such placid subjects of thought as the cottage, and its neighboring wood, contain for an easily-pleased observer, without the least recommendation of them by graceful incident, or plausible story. If we can be content with sunshine on our old brown roof, and the sober green of a commonplace English wood, protected by a still more commonplace tarred paling, and allowing the fancy therefore not to expatiate even so far as the hope of a walk in it—it is well ;—and if not,—poor Prout has no more to offer us, and will not even concede the hope that one of those diagonally-dressed children may be the least pretty, or provoke us, by the gleam of a ribbon, or quaintness of a toy, into asking so much as what the itinerant pedler has in his basket.

I was waiting for a train the other day at Dover, and in an old-fashioned print-shop on the hill up to the Priory station, saw a piece of as old-fashioned picture-making, elaborately engraved, and of curious interest to me, at the moment, with reference to my present essay. It belonged to the dull British school which was founded on conscientious following of the miniature methods and crowded incidents of Dutch painting ; and always dutifully proposed to give the spectator as much entertainment as could be collected into the given space of canvas. There was an ideal village street to begin with, the first cottage gable at the corner having more painting (and very good and pretty painting) spent on the mere thatch of it, than there is in the entire Prout drawing under our notice. Beyond the laborious gable came some delicately-branched trees ; and then the village street, in and out, half-a-mile long, with shops, and signs, and what not ; and then the orthodox church-steeple, and then more trees, and then a sky with rolling white clouds after Wouvermans ;—but all this, though the collected quantity of it would have made half-a-dozen country villages, if well pulled out, was only the beginning of the subject. Gable, street, church, rookery, and sky, were all, in the paint-

er's mind, too thin and spare entertainment. So out of the gable-window looked a frightened old woman—out of the cottage-door rushed an angry old man ; over the garden palings tumbled two evil-minded boys,—after the evil-minded boys rushed an indignantly-minded dog ; and in the centre of the foreground, cynosure of the composition, were, a couple of fighting-cocks,—one fallen, the other crowing for conquest ;—highly finished, both, from wattle to spur. And the absolute pictorial value of the whole,—church and sky—village and startled inhabitants—vagabond boys—vindictive dog—and victorious bird (the title of the picture being “The Moment of Victory”)—the intrinsic value of the whole, I say, being—not the twentieth part of a Hunt's five-minute sketch of one cock's feather.

And yet it was all prettily painted,—as I said ; and possessed every conceivable quality that can be taught in a school, or bought for money : and the artist who did it had probably in private life, a fair average quantity of sense and feeling, but had left both out of his picture, in order to imitate what he had been taught was fine, and produce what he expected would pay.

Take another instance, more curious, and nearer to matters in hand. The little photograph, No. 117, was made in 1858 (by my own setting of the camera), in the court-yard of one of the prettiest yet remaining fragments of 15th century domestic buildings in Abbeville. The natural vine-leaves consent in grace and glow with the life of the old wood carving ; and though the modern white porcelain image ill replaces the revolution-deposed Madonna, and only pedestals of saints, and canopies, are left on the propping beams of the gateway ; and though the cask, and cooper's tools, and gardener's spade and ladder are little in accord with what was once stately in the gate, and graceful in the winding stair,—the declining shadows of the past mingle with the hardship of the present day in no unkindly sadness ; and the little angle of courtyard, if tenderly painted in the depression of its fate, has enough still to occupy as much of our best thought as may be modestly claimed for his picture by any master not of the highest order.

But these motives of wise and gentle feeling would not appeal to the public mind in competitive exhibition. Such efforts as are made by our own landscapists to keep record of any fast vanishing scenes of the kind, are scarcely with goodwill accepted even in our minor art galleries : and leave to share in the lustre of the Parisian "Salon de 1873" could only be hoped for by the author of the composition from which the photograph, No. 118, is taken, on condition of his giving pungency to the feeble savor of architectural study by a condiment of love, assassination, and despair.

It will not, I trust, be supposed that in anything I have said, or may presently further say, I have the smallest intention of diminishing the praise of nobly dramatic or pathetic pictures. The best years of my life have been spent in the endeavor to illustrate the neglected greatest of these, in Venice, Milan, and Rome : while my last and most deliberate writings have lost much of their influence with the public by disagreeably insisting that the duty of a great painter was rather to improve them, than amuse. But it remains always a sure elementary principle that interest in the story of pictures does not in the least signify a relative interest in the art of painting, or in the continual beauty and calm virtue of nature : and that the wholesomest manner in which the intelligence of young people can be developed (I may say, even, the intelligence of modest old people cultivated), in matters of this kind, is by inducing them accurately to understand what painting is as mere painting, and music as mere music, before they are led into further question of the uses of either, in policy, morals, or religion.

And I cannot but recollect with feelings of considerable refreshment, in these days of the deep, the lofty, and the mysterious, what a simple company of connoisseurs we were, who crowded into happy meeting, on the first Mondays in Mays of long ago, in the bright large room of the old Water-color Society ; and discussed, with holiday gayety, the unimposing merits of the favorites, from whose pencils we knew precisely what to expect, and by whom we were never either disappointed or surprised. Copley Fielding used to paint fishing-

boats for us, in a fresh breeze, "Off Dover," "Off Ramsgate," "Off the Needles,"—off everywhere on the south coast where anybody had been last autumn ; but we were always kept pleasantly in sight of land, and never saw so much as a gun fired in distress. Mr. Robson would occasionally paint a Bard, on a heathery crag in Wales ; or—it might be—a Lady of the Lake on a similar piece of Scottish foreground,—“ Benvenue in the distance.” A little fighting, in the time of Charles the First, was permitted to Mr. Cattermole ; and Mr. Crisall would sometimes invite virtuous sympathy to attend the meeting of two lovers at a Wishing gate or a Holy well. But the furthest flights even of these poetical members of the Society were seldom beyond the confines of the British Islands ; the vague dominions of the air, and vasty ones of the deep, were held to be practically unvoyageable by our un-Dædal pinions, and on the safe level of our native soil, the sturdy statistics of Mr. De Wint, and blunt pastorals of Mr. Cox, restrained within the limits of probability and sobriety, alike the fancy of the idle, and the ambition of the vain.

It became, however, by common and tacit consent, Mr. Prout's privilege, and it remained his privilege exclusively, to introduce foreign elements of romance and amazement into this—perhaps slightly fenny—atmosphere, of English common sense. In contrast with our Midland locks and barges, his "On the Grand Canal, Venice," was an Arabian enchantment ; among the mildly elegiac country churchyards of Llangollen or Stoke Pogis, his "Sepulchral Monuments at Verona" were Shakespearian tragedy ; and to us who had just come into the room out of Finsbury or Mincing Lane, his "Street in Nuremberg" was a German fairy tale. But we none of us recognized, then (and I know not how far any of us recognize yet), that these feelings of ours were dependent on the mediation of a genius as earnest as it was humble, doing work not in its essence romantic at all ; but, on the contrary, the only quite useful, faithful, and evermore serviceable work that the Society—by hand of any of its members—had ever done, or could ever, in that phase of its existence, do : containing, moreover, a statement of certain social facts only to be gathered, and image

of certain pathetic beauties only to be seen, at that particular moment in the history of (what we are pleased to call) civilization.

“As earnest,” I repeat,—“as it was humble.” The drawings actually shown on the Exhibition walls gave no sufficient clue to Prout’s real character, and no intimation whatever of his pauseless industry. He differed, in these unguessed methods of toil, wholly from the other members of the Society. De Wint’s morning and afternoon sketches from nature, with a few solidifying touches, were at once ready for their frames. Fielding’s misty downs and dancing seas were softened into their distances of azure, and swept into their hollows of foam, at his ease, in his study, with conventional ability, and lightly burdened memory. Hunt’s models lay on the little table at his side all day; or stood as long as he liked by the barn-door, for a penny. But Prout’s had to be far sought, and with difficulty detailed and secured: the figures gliding on the causeway or mingling in the market-place, stayed not his leisure; and his drawings prepared for the Water-color room were usually no more than mechanical abstracts, made absolutely for support of his household, from the really vivid sketches which, with the whole instinct and joy of his nature, he made all through the cities of ancient Christendom, without an instant of flagging energy, and without a thought of money payment. They became to him afterward a precious library, of which he never parted with a single volume as long as he lived. But it was the necessary consequence of the devotion of his main strength to the obtaining of these studies, that at his death they remained a principal part of the provision left for his family, and were therefore necessarily scattered. I cannot conceive any object more directly tending to the best interests of our students, both in art and history, than the reassembling a chosen series of them for the nation, as opportunity may be given.

Let me, however, before entering on any special notice of those which Mr. Huish has been able at this time (and I myself, by the good help of the painter’s son, Mr. Gillespie Prout), to obtain for exhibition, state in all clearness the terms under

which they should be judged, and may be enjoyed. For just as we ought not to match a wood-block of Bewick's against a fresco by Correggio, we must not compare a pencil outline of Prout's with any such ideals of finished street effect as Flemish painting once produced. Prout is not a colorist, nor, in any extended or complete sense of the word, a painter. He is essentially a draughtsman with the lead-pencil, as Durer was essentially a draughtsman with the burin, and Bewick on the wood-block. And the chief art-virtue of the pieces here exhibited is the intellectual abstraction which represents many features of things with few lines.

Take the little view in Amiens, No. 7, showing the west front of the cathedral in the distance. That front is enriched with complex ranks of arcade and pinnacle, which it would take days to outline perfectly, and which, seen at the distance assumed in this drawing, gather into a mystery which no fineness of hand could imitatively follow. But all this has been abstracted into a few steady lines, with an intelligence of choice and precision of notation which build the cathedral as if it stood there, and in such accurate likeness that it could be recognized at a glance from every other mass of Gothic in Europe.

That drawing dependent on abstraction of this kind, in which forms are expressed rather as a mineralogist would draw a crystal than with any investing mystery of shade or effect, cannot be carried beyond the point assigned, nor convey any sense of extreme beauty or majesty, when these really exist in its subject, must be conceded at once, and in full. But there is a great deal of scenery in this Europe of ours, not lovely; and a great deal of habitation in this Europe of ours not sublime, yet both extremely worthy of being recorded in a briefly crystalline manner. And with scenes only, and dwellings only, of this ruder nature, Prout is concerned.

Take for instance the general facts respecting the valley of the Somme, collected in this little sketch of Amiens. That river, and the Oise, with other neighboring minor streams, flow through a chalk district intersected by very ancient val-

leys, filled mostly with peat up to sea-level, but carrying off a large portion of the rainfall over the whole surface of the upper plains, which, open and arable, retain scarcely any moisture in morasses, pools, or deep grass. The rivers, therefore, though with little fall, run always fast and brimful, divided into many serviceable branches and runlets; while the older villages and cities on their banks are built of timber and brick, or in the poorer cottages, timber and clay; but their churches of an adhesive and durable chalk rock, yielding itself with the utmost ease to dexterities of deep incision, and relieving, at first with lace-like whiteness, and always with a pleasant pearly gray, the shadows so obtained. No sensual arts or wealthy insolences have ever defiled or distorted the quiet temper of the northern French race, and in this busy little water-street of Amiens (you see that Prout has carefully indicated its rapid current—a navigable and baptismal brook, past step and door—water that one can float with and wash with, not a viscous vomit of black poison, like an English river) you have clearly pictured to you a state of peasant life assembled in the fellowship of a city, yet with as little pride as if still in the glades of Arden, and united chiefly for the sake of mere neighborliness; and the sense of benediction and guardianship in the everywhere visible pinnacles of the temple built by their Fathers, nor yet forsaken by their Fathers' God.

All this can be enough told in a few rightly laid pencil lines, and more, it is needless to tell of so lowly provincial life.

Needless, at least, for the general public. For the closer student of architecture, finer drawing may be needed; but even for such keener requirement Prout will not, for a time, fail us.

Five-and-twenty miles down the Somme lies the little ramparted town of Abbeville; rampart only of the Grand Monarque's time, but the walls of might long ago, in the days of Crécy; and few French provincial bourgs had then more numerous or beautiful monasteries, hospitals, chapels, and churches. Of the central St. Wulfran, never completed, there remain only the colossal nave, the ruined transept walls, and

the lordly towers and porches of the west front. The drawing No. 5, quite one of the best examples of Prout's central time in the room, most faithfully represents this western pile of tracery and fretwork, with the filial richness of the timber houses that once stood round it.

None of the beautiful ones here seen are now left ; and one day, perhaps, even France herself will be grateful to the wandering Londoner, who drew them as they once were, and copied, without quite understanding, every sign and word on them.

And as one of the few remaining true records of fifteenth-century France—such as her vestiges remained after all the wreck of revolution and recoil of war had passed over them, this pencil drawing, slight as it seems, may well take rank beside any pen-sketch by Holbein in Augsburg, or Gentil Bellini in Venice. As a piece of composition and general treatment, it might be reasoned on for days ; for the cunning choices of omission, the delicate little dexterities of adjustment—the accents without vulgarity, and reticences without affectation—the exactly enough everywhere, to secure an impression of reality, and the instant pause at the moment when another touch would have been tiresome—are, in the soberest truth, more wonderful than most of the disciplined compositions of the greater masters, for no scruple checks *them* for an instant in changing or introducing what they chose ; but Prout gives literal, and all but servile, portrait, only managing somehow to get the chequers of woodwork to carry down the richness of the towers into the houses ; then to get the broad white wall of the nearer houses to contrast with both, and then sets the transept turret to peep over the roof just enough to etherialize its practicality, and the black figure to come in front of it to give lustre to its whiteness ; and so on throughout, down to the last and minutest touches :—the incomprehensiblest classical sonata is not more artificial—the sparklingest painted window not more vivid, and the sharpest photograph not half so natural.

In sequence of this drawing, I may point out seven others of like value, equally estimable and unreplaceable,

• both in matters of Art, and—I use the word, as will be seen presently, in its full force—of History, namely

- No. 9. EVREUX.
- No. 10. STRASBURG.
- No. 19. ANTWERP.
- No. 47. DOMO D'OSSOLA.
- No. 48. COMO.
- No. 65. BOLOGNA.
- No. 71. THE COLISEUM.

I choose these eight drawings (counting the Abbeville), four belonging to North France and Germany, four to Italy, of which the Northern ones do indeed utterly represent the spirit of the architecture chosen ; but the Southern subjects are much more restricted in expression, for Prout was quite unable to draw the buildings of the highest Italian school : yet he has given the vital look of Italy in his day more truly than any other landscapist, be he who he may ; and not excepting even Turner, for *his* ideal is always distinctly Turnerian, and not the mere blunt and sorrowful fact.

You might perhaps, and very easily, think at first that these Prout subjects were as much “Proutized” (Copley Fielding first used that word to me) as Turner’s were Turnerized. They are not so, by any manner of means, or rather, they are so by manner and means only, not by sight or heart. Turner saw things as Shelley or Keats did ; and with perfectly comprehensive power, gave all that such eyes can summon, to gild, or veil, the fatalities of material truth. But Prout saw only what all the world sees, what is substantially and demonstrably there ; and drew that reality, in his much arrested and humble manner indeed, but with perfectly apostolic faithfulness. He reflected the scene like some rough old Etruscan mirror—jagged, broken, blurred, if you will, but *It*, the thing itself still ; while Turner gives *it*, and himself too, and ever so much of fairyland besides. His Florence or Nemi compels me to think, as a scholar, or (for so much of one as may be in me) a poet ; but Prout’s harbor of

old Como is utterly and positively the very harbor I landed in when I was a boy of fourteen, after a day's rowing from Cadenabbia, and it makes me young again, and hot, and happy, to look at it. And that Bologna! Well, the tower *does* lean a little too far over, certainly; but what blessedness to be actually there, and to think we shall be in Venice to-morrow!

But note that the first condition of all these really great drawings (as indeed for all kinds of other good), is unaffectedness. If ever Prout strains a nerve, or begins to think what other people will say or feel;—nay, if he ever allows his own real faculty of chiaroscuro to pronounce itself consciously, he falls into fourth- and fifth-rate work directly; and the entire force of him can be found only where it has been called into cheerful exertion by subjects moderately, yet throughout delightful to him; which present no difficulties to be conquered, no discords to be reconciled, and have just enough of clarion in them to rouse him to his paces, without provoking him to prance or capriole.

I should thus rank the drawing of Como (48) as quite of the first class, and in the front rank of that class. Unattractive at first, its interest will increase every moment that you stay by it, and every little piece of it is a separate picture, all the better in itself for its subjection to the whole.

You may at first think the glassless windows too black. But nothing can be too black for an open window in a sunny Italian wall, at so short a distance. You may think the hills too light, but nothing can be too light for olive hills in mid-day summer. "They would have come dark against the sky?" Yes, certainly; but we don't pretend to draw Italian skies—only the ruined port of Como, which is verily here before us—(alas! at Como no more, having long since been filled up, levelled, and gravelled, and made an "esplanade" for modern Italy to spit over in its idle afternoons). But take the lens to the old group of houses;—they will become as interesting as a missal illumination if you only look carefully enough to see how Prout varied those twenty-seven black holes, so that literally not one of them shall be like another.

The grand old Comasque builder of the twelfth century arches below (the whole school of Lombardic masonry being originally Comasque) varied them to his hand enough in height and width—but he invents a new tiny picture in chiar-oscuro to put under every arch, and then knits all together with the central boats;—literally knits, for you see the mast of one of them catches up the cross-stick—stitch we might call it—that the clothes hung on between the balconies; and then the little figures on the left catch up the pillars like meshes in basket-work, and then the white awning of the boat on the left repeats the mass of wall, taking the stiffness out of it, while the reflections of arches, with the other figures, and the near black freights, carry all the best of it, broken and rippling, to the bitter shore.

But the drawing of the Coliseum at Rome, No. 71, has still higher claim to our consideration; in it were reserved, and in all points, rarer powers of expressing magnitude and solitude. It is so majestic in manner that it would quite have borne being set beside the photograph of Turner's drawing at Farnley; had it been fair to match mere outline against a finished composition. For Prout was, and he remains, the only one of our artists who entirely shared Turner's sense of magnitude, as the sign of past human effort, or of natural force; and I must be so far tedious as to explain this metaphysical point at some length. Of all forms of artistic susceptibility, reverent perception of true\* magnitude is the rarest. No general conclusion has become more clear to my experience than this—strange as it may seem at first statement, that a painter's mind, *typically*, recognizes no charm in physical vastness: and will, if it must choose between two evils, by preference work on a reduced, rather than an enlarged, scale; and for subject, paint miniature rather than mass. Human form is always given by the great

---

\* Reckless accumulation of *false* magnitude—as by John Martin, is merely a vulgar weakness of brain, allied to nightmare; so also the colossal works of decadent states in sculpture and architecture, which are always insolent; not reverent.

masters either of the natural size, or somewhat less (unless under fixed conditions of distance which require perspective enlargement),—and no sort or shadow of pleasure is ever taken by the strongest designers in bulk of matter. Veronese never paints shafts of pillars more than two feet in diameter, or thereabouts, and only from fifteen to twenty feet in height. Titian's beech-trunks in the Peter Martyr were not a foot across at the thickest, while his mountains are merely blue spaces of graceful shape, and are never accurately enough drawn to give even a suggestion of scale. And in the entire range of Venetian marine painting there is not one large wave.

Among our own recent landscape painters, while occasionally great feeling is shown for space, or mystery, there is none for essential magnitude. Stanfield was just as happy in drawing the East cliff at Hastings as the Rock of Ischia; and painted the little sandy jut of crag far better than the coned volcano. Fielding asked for no more stupendous summits than those of Saddleback or Wrynose—and never attempted the grandeur even of Yorkshire scars, finding their articulated geology troublesome. Sometimes David Roberts made a praiseworthy effort to explain the size of a pillar at Thebes, or a tower in the Alhambra; but only in cases where the character of largeness had been forced upon his attention, as the quality to be observed by himself, and recommended to the observation of others. He never felt, or would have tried to make anyone else feel—the weight of an ordinary boulder stone, or the hollow of an old chestnut stem, or the height of a gathering thunder-cloud. In the real apprehension of measurable magnitude, magnitude in things clearly seen—stones, trees, clouds, or towers—Turner and Prout stand—they two—absolutely side by side—otherwise companionless.

*Measurable* magnitude, observe :—and therefore wonderful. If you can't see the difference between the domes of the National Gallery and of St. Paul's :—much more if you can't see the difference between Shanklin Chine and the Via Mala (and most people can't!)—you will never care either for Turner or

Prout ;—nor can you care rightly for them unless you have an intellectual pleasure in construction, and know and feel that it is more difficult to build a tower securely four hundred feet high, than forty—and that the pillar of cloud above the crater of Etna, standing two thousand feet forth from the lips of it, means a natural force greater than the puff of a railway boiler. The quiet and calm feeling of reverence for this kind of power, and the accurate habit of rendering it (see notes on the Sketches of Strasburg, No. 10, and Drachenfels, No. 28)—are always connected, so far as I have observed, with some parallel justice in the estimate of spiritual order and power in human life and its laws ;—nor is there any faculty of my own mind—among those to which I owe whatever useful results it may have reached—of which I am so gratefully conscious.

There is one further point—and if my preface has hitherto been too garrulous, it must be grave in notice of this at the close,—in which Turner, Bewick, Hunt, and Prout, all four agree—that they can draw the poor, but not the rich. They acknowledge with affection, whether for principal or accessory subjects of their art, the British farmer; the British sailor,\* the British marketwoman, and the British workman. They agree unanimously in ignoring the British gentleman. Let the British gentleman lay it to heart, and ask himself why.

The general answer is long, and manifold. But, with respect to the separate work of Prout, there is a very precious

---

\* Including, of course, the British soldier ; but for Turner, a ship of the line was pictorially better material than a field battery ; else he would just as gladly have painted Albuera as Trafalgar. I am intensely anxious, by the way, to find out where a small picture of his greatest time may now be dwelling,—a stranded English frigate engaging the batteries on the French coast at sunset (she got off at the flood-tide in the morning) ; I want to get it, if possible, for the St. George's Museum at Sheffield. For the rest, I think the British gentleman may partly see his way to the answer of the above question if he will faithfully consider with himself how it comes to pass that, always fearless in the field, he is cowardly in the House,—and always generous in the field,—is yet meanly cunning, and—too often—malignant, in the House.

piece of instruction in it, respecting national prosperity and policy, which may be gathered with a few glances.

You see how all his best pieces depend on figures either crowded in market-places, or pausing (lounging, it may be) in quiet streets—you will not find in the entire series of subjects here assembled from his hand—a single figure in a hurry! He ignores, you see—not only the British Gentleman;—but every necessary condition, nowadays, of British Business!

Look again, and see if you can find a single figure exerting all its strength. A couple of men rolling a single cask, perhaps; here and there a woman with rather a large bundle on her head—any more athletic display than these, you seek in vain.

He ignores even the British Boat-race—and British muscular divinity, and British Muscular Art.

His figures are all as quiet as the Cathedral of Chartres! “Because he could not make them move”—think you? Nay, not so. Some of them—(that figure on the sands in the Calais, for instance), you can scarcely think are standing still—but they all move quietly. The real reason is that *he* understood—and *we* do not—the meaning of the word—“quiet.”

He understood it, personally, and for himself: practically and for others. Take this one fact—of his quiet dealings with men, and think over it. In his early days he had established a useful and steady connection with the country dealers,—that is to say, with the leading printsellers in the county towns and principal watering-places. He supplied them with pretty drawings of understood size and price, which were nearly always in tranquil demand by the better class of customers. The understood size was about 10 inches by 14 or 15, and the fixed price, six guineas. The dealer charged from seven to ten, according to the pleasantness of the drawing. I bought the “Venice,” for instance, No. 55, from Mr. Hewitt, of Leamington, for eight guineas.

The modern fashionable interest in—what we suppose to be art—had just begun to show itself a few years before Prout’s death; and he was frequently advised to raise his prices. But

he never raised them a shilling to his old customers.\* They were supplied with all the drawings they wanted, at six guineas each, to the end. A very peaceful method of dealing, and under the true ancient laws ordained by Athena of the Agora, and St. James of the Rialto.

Athena, observe, of the Agora, or Market *Place*. And St. James of the Deep Stream, or Market *River*. The Angels of Honest Sale and Honest Portorage ; such honest portorage being the true grandeur of the Grand Canal, and of all other canals, rivers, sounds, and seas that ever moved in wavering morris under the night. And the eternally electric light of the embankment of that Rialto stream was shed upon it by the Cross—know you that for certain, you dwellers by high-embanked and steamer-burdened Thames.

And learn from your poor wandering painter this lesson—for sum of the best he had to give you (it is the Alpha of the Laws of true human life)—that no city is prosperous in the sight of heaven, unless the peasant sells in its market—adding this lesson of Gentile Bellini's for the Omega, that no city is ever righteous in the Sight of Heaven, unless the noble walks in its street. .

---

\* Nor greatly to his new ones. The drawings made for the Water-color room were usually more elaborate, and, justly, a little higher in price ; but my father bought the Lisieux, No. 13, off its walls, for eighteen guineas.

The first part of the history is devoted to a description of the country and its inhabitants. The author describes the various tribes and their customs, and the different parts of the country. He also mentions the various wars and battles which have taken place in the country. The second part of the history is devoted to a description of the government and the laws of the country. The author describes the different forms of government which have been used in the country, and the various laws which have been enacted. The third part of the history is devoted to a description of the commerce and industry of the country. The author describes the different kinds of trade which are carried on in the country, and the various industries which are pursued. The fourth part of the history is devoted to a description of the religion and superstitions of the country. The author describes the different religions which are practiced in the country, and the various superstitions which are believed in. The fifth part of the history is devoted to a description of the arts and sciences of the country. The author describes the different kinds of art which are practiced in the country, and the various sciences which are taught. The sixth part of the history is devoted to a description of the military and naval forces of the country. The author describes the different kinds of troops which are raised in the country, and the various ships which are built. The seventh part of the history is devoted to a description of the foreign relations of the country. The author describes the different treaties and alliances which have been made by the country, and the various wars which have been fought with foreign powers. The eighth part of the history is devoted to a description of the present state of the country. The author describes the different parts of the country, and the various improvements which have been made. The ninth part of the history is devoted to a description of the future prospects of the country. The author describes the different plans which have been proposed for the improvement of the country, and the various hopes which are entertained for the future. The tenth part of the history is devoted to a description of the conclusion of the history. The author describes the different events which have taken place since the beginning of the history, and the various lessons which are to be learned from them.

## I.—PROUT.

---

THE reader will find, ending this pamphlet, a continuous index to the whole collection of drawings, with references to the pages in which special notice has been taken of them. So that in this descriptive text, I allow myself to pause in explanatory, or wander in discursive, statement, just as may seem to me most helpful to the student, or most likely to interest the general visitor.

I begin with the series of pencil drawings by Prout, which were my principal object in promoting this exhibition. Of these I have chosen seventy, all of high quality, and arranged so as to illustrate the outgoing course of an old-fashioned Continental tour, beginning at Calais, and ending at Rome. Following the order of these with attention, an intellectual observer may learn many things—not to his hurt.

Their dates, it will be noticed, are never given by the artist himself—except in the day; never the year—nor is there anything in the progress of Prout's skill, or in his changes of manner, the account of which need detain us long. From earliest boyhood to the day of his death, he drew firmly, and never scabbled or blurred. Not a single line or dot is ever laid without positive intention,\* and the care needful to fulfil that intention. This is already a consummate virtue. But the magnificent certainty and ease, united, which it enabled him to obtain, are only seen to the full in drawings of

---

\* See the exception proving the rule, in a single line, in No. 12, there noted.

his middle time. Not in decrepitude, but in mistaken effort, for which, to my sorrow, I was partly myself answerable, he endeavored in later journeys to make his sketches more accurate in detail of tracery and sculpture; and they lost in feeling what they gained in technical exactness and elaboration. Of these later drawings only three are included in this series, 4, 8, and 17; their peculiar character will, however, be at once discernible.

His incipient work was distinguished by two specialties—the use of a gray washed tint with the pencil, a practice entirely abandoned in his great time (though he will always make notes of *color* frankly); and the insisting on minor pieces of broken texture, in small stones, bricks, grass, or any little picturesque incidents, with loss of largeness and repose. The little study of the apse of Worms Cathedral (32), a most careful early drawing, shows these faults characteristically; the Prague (23) is as definite an example of his great central manner, and even Turner's outline is not more faultless, though more complete. For the rest, Turner himself shared in the earlier weakness of more sharply dotted and sprinkled black touches, and practised, coterminously, the wash of gray tint with the pencil. The chief use of the method to the young student is in its compelling him to divide his masses clearly; and I used it much myself in early sketches, such as that of the Aventine, No. 104a, for mere cleanliness and comfort in security of shadow—rather than the always rubbing and vanishing blacklead. But it is an entirely restricted method, and must be abandoned in all advanced study, and the pencil used alone both for shade and line, until the finer gradations of shadow are understood. *Then* color may be used with the pencil for notation, and every power at once is in the workman's hands. The two first studies in our series are perfect instances of this conclusive method.\*

There were more reasons, and better ones, than the students

---

\* For further notes on the methods of shape proper to the great masters, the reader may consult the third and fourth numbers of my *Laws of Fésolé*.

of to-day would suppose, for his not adopting it oftener. The subjects in Cornwall and Derbyshire, by which his mind was first formed, were most of them wholly discouraging in color, if not gloomy or offensive. Gray blocks of whinstone, black timbers, and broken walls of clay, needed no iridescent illustration; the heath and stonecrop were beyond his skill; and, had he painted them with the staunchest efforts, would not have been translatable into the coarse lithographs for Ackermann's drawing-books, the publication of which was at that time a principal source of income to him. His richer Continental subjects of later times were often quite as independent of color, and in nearly every case taken under circumstances rendering its imitation impossible. He might be permitted by indulgent police to stop a thoroughfare for an hour or two with a crowd of admirers, but by no means to settle himself in a comfortable tent upon the pavement for a couple of months, or set up a gypsy encampment of pots and easel in the middle of the market-place. Also, his constitution, as delicate as it was sanguine, admitted indeed of his sitting without harm for half an hour in a shady lane, or basking for part of the forenoon in a sunny piazza, but would have broken down at once under the continuous strain necessary to paint a picture in the open air. And under these conditions the wonder is only how he did so much that was attentive and true, and that even his most conventional water-colors are so refined in light and shade that even the slightest become almost majestic when engraved.

#### 1. CALAIS.

Sketch on the spot, of the best time and highest quality—the clouds put in as they stood—the brig as she lay—the figures where they measure the space of sand, and give the look of busy desolateness, which poor Calais—crown jewel of England—had fallen to in our day—Prout's and mine. You see the size of the steam-packet of the period; you may trust Prout's measure of its magnitude, as aforesaid. So also of belfry, lighthouse, and church—very dear all to the old painter, as to me. I

gave my own drawing of the lighthouse and belfry, No. 104, to the author of *Rab and his Friends*, who may perhaps lend it me for comparison.\* My drawing of the church spire is lost to me, but somewhere about in the world, I hope, and perhaps may be yet got hold of, and kept with this drawing, for memory of old Calais, and illustration of what was meant by the opening passage of the fourth volume of "Modern Painters." (Appendix II.)

Take the lens † to the gate of the tower (above the steamer) and see how, in such a little bit, the architecture is truly told. Compare Hogarth's Gate of Calais.

## 2. CALAIS OLD PIER.

Turner's great subject. But Turner's being earlier taken, while the English packet was still only a fast-sailing cutter—(steam unthought of!) A perfect gem of masterful study, and quiet feeling of the facts of eternal sea and shore.

The solemnly rendered mystery of the deep and far sea; the sway of the great waves entering over the bar at the harbor's mouth; the ebbing away of the sand at the angle of the pier; the heaping of it in hills against its nearer side, ‡ and the way in which all is made huge, bleak, and wild by the deeper tone of the dark sail and figure, are all efforts of the highest art faculty, which we cannot too much honor and thank.

## 3. STUDIES OF FRENCH AND NETHERLAND FIGURES AND DILIGENCES.

Exemplary in the manner of abstract, and perfect in figure drawing, for *his* purposes. They are poor persons,

---

\* It was exhibited last year, but if it comes from Scotland, will be shown again for proof of Prout's fidelity in distant form.

† For proper study of any good work in painting and drawing, the student should always have in his hand a magnifying glass of moderate power, from two to three inches in diameter.

‡ Compare the sentence respecting this same place, Appendix II., "surfy sand, and hillocked shore."

you see—all of them. Not quite equal to Miss Kate Greenaway's in grace, nor to Mrs. Allingham's in face (they, therefore, you observe, have mostly their backs to us). But both Miss Kate and Mrs. Allingham might do better duty to their day, and better honor to their art, if they would paint, as verily, some of these poor country people in far-away places, rather than the high-bred prettinesses or fond imaginations, which are the best they have given us yet for antidote to the misery of London.

4. ABBEVILLE. CHURCH OF ST. WULFRAN.

Seen from the west, over old houses (since destroyed). Of the artist's best time and manner. See Preface, page 233.

5. ABBEVILLE. CHURCH OF ST. WULFRAN—THE NORTHWESTERN TOWER, WITH OLD HOUSES.

Elaborate. Of the late time, but not in the highest degree good. The chiaroscuro of the pinnacles evidently caught on the spot, but not carried through the drawing rightly, and the whole much mannered. Precious, however, for all that.

6. PHOTOGRAPH OF THE PORCHES OF ST. WULFRAN, ABBEVILLE.

7. AMIENS.

One of the best of the best time. See Preface, page 232, and compare the extract from "Modern Painters," given in Appendix III.

8. CHAPEL OF THE HOLY SEPULCHRE IN ST. JAQUES, DIEPPE.

One of the best studies of the last period. See further notes on it under the number 17.

9. EVREUX.

Perfect sketch of the best time, and most notable for the exquisite grace of proportion in its wooden belfry. No architect, however accurate in his measurements—no artist, however sensitive in his admiration—ever gave the

proportion and grace of Gothic spires and towers with the loving fidelity that Prout did. This is much to say; and therefore I say it again deliberately: there are no existing true records of the real effect of Gothic towers and spires—except only Prout's. And now I must be tedious a while, and explain what I mean in saying this—being much—and show it to be true. Observe first—everything in grace of form depends on truth of scale. You don't show how graceful a thing is, till you show how large it is; for all grace means ultimately the use of strength in the right way, moral and physical, against a given force. A swan, no bigger than a butterfly, would not be graceful—its grace is in its proportion to the waves and power over them. A butterfly as large as a swan would not be graceful—its beauty is in being so small that the winds play with it, but do not vex it. A hollow traceried spire fifteen feet high would be effeminate and frivolous, for it would be stronger solid—a hollow traceried spire five hundred feet high, is beautiful; for it is safer so, and the burden of the builder's toil spared. All wisdom—economy—beauty, and holiness, are one; harmonious throughout—in all places, times, and things: understand any one of their orders, and do it—it will lead you to another—to all others, in time.

Now, therefore, think why this spire of Evreux is graceful. If it were only silver filigree over a salt-cellar, it would still be pretty (for it is beautifully varied and arranged). But not "graceful" (or full of grace). The reason is that it is built, not with silver, but with aspen logs, and because there has been brought a strange refinement and melody, as of chiming in tune, and virtue of uprightness—and precision of pointedness, into the aspen logs, which nobody could ever have believed it *was* in a log to receive. And it is graceful also, because it is evidently playful and bright in temper. There are no laboring logs visible—no propping, or thrusting, or bearing logs—no mass of enduring and afflicted timber—only imaginative timber, aspiring just high enough for praise,

not for ambition. Twice as high as it ever could have stood in a tree—by honor of men done to it ; but not so high as to strain its strength, and make it weak among the winds, or perilous to the people.

#### 10. STRASBURG—THE CATHEDRAL SPIRE.

I have put this drawing—quite one of the noblest in all the series—out of its geographical place, and beside the Evreux, that you may compare the qualities of grace in wooden and stone buildings ; and follow out our begun reasoning further.

Examine first how the height is told. Conscientiously, to begin with. He had not room enough on his paper (perhaps), and put the top at the side rather than blunt or diminish the least bit. I say “perhaps,” because, with most people, that would have been the way of it ; but my own private opinion is, that *he* never meant to have room on his paper for it—that he felt instinctively that it was grander to have it going up nobody knew where—only that he could not draw it so for the public, and must have the top handy to put on afterward.

Conscientiously, first, the height is told ; next, artfully. He chooses his place just where you can see the principal porch at the end of the street—takes care, by every artifice of perspective and a little exaggeration of aerial tone, to make you feel how far off it is ; then carries it up into the clearer air. Of course, if you don't notice the distant porch, or are not in the habit of measuring the size of one part of a thing by another, you will not feel it here—but neither would you have felt it there, at Strasburg itself.

Next for composition. If you ever read my last year's notes on Turner, you must remember how often I had to dwell on his way of conquering any objectionable character in his main subject by putting more of the same character in something else, where it was *not* objectionable. Now it happens to be one of the chief faults of Strasburg Spire (and it has many, for all the reputation of it), to be far too much constituted of meagre upright lines (see the

angle staircases, and process of their receding at the top, and the vertical shafts across the window at its base). Prout instantly felt, as he drew the tower, that, left to itself it would be too ironlike and stiff. He does not disguise this character in the least, but conquers it utterly by insisting with all his might on the flutings of the pilasters of the near well. "How ill drawn these!" you say. Yes, but he hates these in themselves, and does not care how badly he draws them, so only that by their ugly help he can save the Cathedral. Which they completely do; taking all the stiffness out of it, and leaving it majestic. Next—he uses contrast to foil its beauty, as he has used repetition to mask its faults. In the Abbeville, No. 4, he had a beautiful bit of rustic white wall to set off his towers with. Here, in Strasburg, half modernized, alas! even in his time, he finds nothing better than the great ugly white house behind the lamp. In old times, remember, a series of gables like that of the last house would have gone all down the street. (Compare the effect in Antwerp, No. 19, all contemporary.) Prout will not do any "restoration"—he knows better; but he could easily have disguised this white house with cast shadows across the street and some blinds and carpets at the windows. But the white, vulgar mass shall not be so hidden, and the richness of all the old work shall gain fulness out of the modern emptiness, and modesty out of the modern impudence.

Pre-eminently the gain is to the dear old gabled house on the right, which is the real subject of the drawing, being a true Strasburg dwelling-house of the great times. But before speaking more of this, I must ask you to look at the next subject.

## 12. LISIEUX, OLD STREET IN.

This, though it contains so much work, is a hurried and fatigued drawing—fatigued itself in a sense, as having more touches put on it than were good for it; and the sign of fatigue in the master, or perhaps rather of passing

illness, for he seems never to have been tired in the ordinary way. The unusually confused and inarticulate figures, the more or less wriggled and ill-drawn draperies, and the unfinished foundation of the house on the right, where actually there is a line crossing another unintentionally! are all most singular with him; and I fancy he must have come on this subject at the end of a sickly-minded day, and yet felt that he must do all he could for it, and then broken down.

He has resolved to do it justice, at least in the drawing No. , one of the best in the room; but there are characters in the subject itself which, without his quite knowing why, cramped him, and kept several of his finer powers from coming into play.

Note first, essentially, he is a draughtsman of stone, not wood, and a tree-trunk is always wholly beyond his faculty; so that, when everything is wooden, as here, he has to translate his stony manner for it all through, and is as if speaking a foreign language. In the finished drawing, one scarcely knows whether the near doorway is stone or wood.

And there was one character, I repeat, in this subject that specially strained this weak part of him. When a wooden house is in properly wooden style—he can always do it, as at Abbeville and Strasburg. But this street at Lisieux is a wooden street in stone style. I feel even tempted to write fine scientific modern English about it, and say it is objectively lignologic and subjectively petrologic. The crossing beams of the wall-courses, and king-posts of the gables in dormer windows are indeed properly expressive of timber structure; but all the sculpture is imitative of the forms developed in the stone traceries of the same period—seen perfectly in the elaborate drawing, No. 8.

Those traceries were themselves reciprocally corrupted, as we shall see presently, by the woodwork practised all round them; but both the Burgundian and Norman later Gothic was corrupted by its own luxurious

laziness, before it took any infection from the forest. Instead of building a real pointed arch—they merely put a cross lintel with a nick in it\* (*a*), then softened the nick-edges and ran a line of moulding round it (*b*), and

then ran up a flourish above to show what a clever thing they had done (*c*)—and there you are. But there is much more curious interest in this form of wooden imitative architecture than any mere matter of structural propriety.

Please compare the Lisieux houses in No. 11, with the house on the right at Strasburg in No. 10. You see there are no pinnacles nor crockets imitated there. All is sternly square—upright timber and cross timber—cut into what ornamental current mouldings the workman knew.

And yet you see the Cathedral at the side is eminently gabled and pinnacular! Run your eye from the square window of the second story of the house (third from ground), along to the cathedral gabled tracery. Could any two styles be more adverse? While on the contrary, the Lisieux street is merely a “changing the willow wreaths to stone”—in imitation of the chapel of St. Jaques? It is true, the Lisieux street is contemporary with St. Jaques, and the Strasburg house a century or so later than the Cathedral; but that is not the reason of the opposition. Had they been either pure French

---

\* Without the nick, mind you, it would have been a grand building—pure Greek or pure Tuscan, and capable of boundless good. It is the Nicolaitane nick that's the devil.

or pure German, the two would have declined together and have died together. But in France of the fifteenth century, church, noblesse, and people, were one body, and the people in Lisieux loved and delighted in their clergy and nobles, as the Venetians did—

“Pontifices, clerus, populus, dux mente serenus.”

But Strasbourg is on the edge—nay, on the Pole—of all divisions. Virtually, from west to east, between Dijon and Berne; virtually, from north to south, between Cologne and Basle; virtually, if you have eyes the Diet of Worms is in it; the Council of Constance is in it; the Battle of Sempach is there, and the rout of Granson.

That is a Swiss cottage, with all ecclesiastical and feudal powers flaming up into the sky at the side of it, and the iron lances and lines of them are as lace round the “Commerce de Jean Dichl.” “Commerce,” a grand word, which we suppose ourselves here to understand, an entirely vile one, if misunderstood. Human commerce, a business for men and angels; but inhuman, for apes and spectres. We must look at a few more street-scenes in order to find out which sort Jean Dichl’s belongs to.

#### 14. BAYEUX.

A small sketch, but first-rate, and with half a mile of street in it. Pure and plain woodwork this, with prop and buttress of stumpy stone—healthy all, and sound; note especially the strong look of foundation, as opposed to the modern style of house-front in most commercial quarters—five stories of brick wall standing on the edge of a pane of plate-glass.

#### 15. TOURS.

The saints presiding over an old-clothes shop, apparently—but it may be the fashionable drapers of the quarter. I merely give it as an example of the developed form of bracket, the end of the cross timber becoming

a niche, and the prop, a saint—not without meaning. Much more strength than is really wanted allowed in the backing, so that these corrugated saints do not by their recessed niches really weaken the structure. Compare photograph, No. 117.

16. ROUEN. THE BUTTER-TOWER.

Built with the octroi on butter—not a right way—be it spoken, in passing. All taxes on food of any sort, or drink of any sort, are wrong, whether to build a pious tower, or support an impious government.

A tired sketch—the house on the left, one of the most beautiful in France, hurried and ill done.

17. ROUEN. STAIRCASE IN St. MACLOU.

Almost unique in the elaboration of the texture in marble pillar, and effect of distant light, showing what he was capable of in this kind ; compare St. Jaques, No. 8, where he gets flickering sunlight through painted glass. There, the effect is pathetic and expressive ; but both texture and effect of light were mistakes, in St. Maclou ; it does not in the least matter to the staircase whether the pillar is smooth, or the window bright. In earlier times he would have merely indicated the forms of both, and given his time to gather groups of figures following the circular sweep of the staircase.

18. GHENT.

Having run south now as far as I care, we will turn back, please, to go through the Netherlands into Germany. Pretty nearly *all* the Netherlands are in this and the following drawing. Boats, beside houses ; the boats heavily practical : the houses heavily fanciful ; but both accurate and perfect in their way ; work of a great, though fenwitted, people. The Ghent scene is the very cream of Prout—all that he could best do in his happiest times—his Cornish and Hastings boat-study standing him in thorough stead *here*, though it will fail him at Venice, as we shall sadly see.

## 19. ANTWERP.

Altogether magnificent : the noble street-scene, requiring no effort to exalt, no artifice to conceal a single feature in it. Pure fact—the stately houses and the simple market, and the divine tower. You would like advertisements all along the house-fronts, instead, wouldn't you? and notices of sale—at a ruinous sacrifice—in the shop-windows, wouldn't you? and a tramway up the street, and a railway under it, and a gasometer at the end of it, instead of a cathedral—now, wouldn't you?

## 21. BRUNSWICK.

Dainty still ; a most lovely drawing. I didn't find anything so good in the town myself, but was not there until 1859, when, I suppose, all the best of it had been knocked down. The Stadthaus (see lithograph, No. 93) is unique in the support of its traceries on light transverse arches, but this innovation, like nearly all German specialities in Gothic, is grotesque, and affected without being ingenious.

## 22. DRESDEN.

An exquisite drawing ; and most curious in the entire conquest and calming down of Prout's usual broken touch into Renaissance smoothness. It is the best existing representation of the old town, and readers of Friedrich may care to know what it was like.

## 23. PRAGUE.—ENTRANCE OVER THE BRIDGE.

A drawing already noticed, of the highest quality. The lithograph, No. 91, of the other side of the tower on the right, enables us to walk back the other way ; it is quite one of the best drawings in the book.

## 24. PRAGUE.—THE STADTHAUS.

Both lovely, and essentially Proutesque, as a drawing. Architecturally, one of the prettiest possible examples of fourteenth century Gothic. The town was all, more or less, like that, once—the houses beyond have, I suppose, been built even since the siege.

## 25. BAMBERG.

I include this drawing in our series, first for its lovely crowd of figures ; and secondly, to show that Prout never attempts to make anything picturesque that naturally isn't. Domo d'Ossola and Bologna (47 and 64) are picturesque—in the drawings, because they are so in reality—and heavy Bamberg remains as dull as it pleases to be. This strict honesty of Prout's has never been rightly understood, because he didn't often draw dull things, and gleaned the picturesque ones out of every hole and corner ; so that everybody used to think it was he who had made them picturesque. But, as aforesaid, he is really as true as a mirror.

## 26. NUREMBERG, CHURCH OF ST. , AT.

Of the best time, and certainly the fullest expression ever given of the character of the church. But the composition puzzled him, the house corner on left coming in too abruptly, and the sketch falls short of his best qualities ; he gets fatigued with the richness in excess over so large a mass, and feels that nothing of foreground will carry it out in harmony.

## 28. THE DRACHENFELS.

When I said that Turner and Prout stood by themselves in power of rendering magnitude, I don't mean on the same level, of course, but in perfect sympathy ; and Turner himself would have looked with more than admiration—with real respect—at this quiet little study. I have never seen any other picture or drawing which gave so intensely the main truths of the breadth and prolonged distances of the great river, and the scale and standing of the rock, as compared with the buildings and woods at its feet.

The "standing" of the rock, I say especially ; for it is in great part by the perfect sculpture and build of its buttresses—the "articulation" which, I have just said, Fielding shunned as too troublesome) that the effect, or rather information, of magnitude is given.

And next to this rock drawing, the clear houses and trees, and exquisite little boat—examined well—complete the story of mountain power by their intense reality. Take the lens to them—there is no true enjoyment to be had without attention, either from pictures, or the truth itself.

### 29. ISLANDS ON THE RHINE.

First, the power of the Dragon rock—then of the noble river. It seems to have been an especially interesting scene this, to good painters. One of the most elaborate pieces of drawing ever executed by Turner was from this spot.

### 30. THE PFALZ.

Hurried a little, and too black in distance—but I include it in the series for a most interesting bit of composition in it. The building, from this point of view, had a disagreeable look of a church-tower surrounded by pepper-boxes. He brings it into a mass, and makes a fortress of it, by the shadow on the mountain to the right of the tower, almost as dark as a bit of roof.

### 32. WORMS.

An early drawing—the only one included in this series—is to be compared with the careful water-color, No. 31.

### 35. ULM.

A beautiful drawing of one of the most interesting street fountains in Germany. It is given in this sketch, as usual, with entire care and feeling of its proportion. The water-color drawing, No. 36, shows the little interest he took in copying for the Exhibition, knowing that the British mind was not to be impressed by proportion, and only cared for getting things into their frames. The lithograph, No. 90, is, on the contrary, one of his most careful works, and quite true to the place, when I saw it in 1835. I suppose it is all pulled down, and

made an "esplanade" of by this time. (See "Seven Lamps," p. 182, in Appendix I.)

37 and 33. SWISS AND GERMAN COSTUMES.

I never can understand how these groups are ever designed or caught, and how they are built up, one by one. No painter who can do it ever tells us how.

39. CHILLON.

The only drawing I ever saw which gave the real relation of the castle to the size of the mountain behind it.

40. THE DUNGEON OF CHILLON.

I must leave the reader now to make what he may of this and the following drawings as far as 47: all of them, to people who know the old look of the places, will be interesting; but I have no time to enlarge on them.

41. MONTREUX.

42. WATERFALL UNDER THE DENT DU MIDI, IN THE RHONE VALLEY.

43. VILLAGE OF MARTIGNY.

46. BRIEG.

47. DOMO D'OSSOLA.

One of the most exemplary in the room, for intense fidelity to the place, and lovely composition of living groups. Note the value of the upright figure in the balcony on the left, in breaking up and enriching the mass, and joining it with the rest.

48. COMO.

Enough dwelt on in the preface.

49. THE MONUMENT OF CAN SIGNORIO DELLA SCALA, AT VERONA.

Note that the low sarcophagus on the left, of much finer time than the richer tomb, has on its side a bas-

relief representing the Madonna enthroned between two angels, a third angel presents to her the dead knight's soul, kneeling.

50. The large drawing of the subject, No. 50, has lost all these particulars. Was it all Prout's fault, shall we say? Was there anyone, in his time, of English travellers, who would have thanked him for a madonna and a dead old Scaliger, done ever so clearly?
56. VENICE. DUCAL PALACE FROM THE WEST.
57. VENICE. DUCAL PALACE FROM THE EAST.
58. ST. MICHAEL'S MOUNT, NORMANDY.

I have put No. 58 in this eccentric manner, after the Ducal Palace, that the reader may feel, for good and all, Prout's intense appreciation of local character—his gayety with the gay, and his strength with the strong. Cornish-bred, his own heart is indeed in the rocks, and towers, and sands of the fraternal Norman shore—and it fails him in Venice, where the conditions alike of her masquing and her majesty were utterly strange to him. Still, the sense of light, and motion, and splendor above the Riva dei Schiavoni; and of gloom, and iron-fastness, and poverty, midst the silent sands of Avranches, are rendered by the mirror of him, as if you had but turned its face from sun to shade.

The St. Michael's is an entirely grand drawing. The St. Raphael's—for that is indeed the other name of the Ducal Palace\*—on this side, has many faults; but is yet, out and out, the best Ducal Palace that has as yet been done. It is not an architectural drawing—does not

---

\* The angel Michael is the angle statue on the southwest (seen in No. 56), with the inscription, "With my sword I guard the good, and cleanse the evil." The angel Raphael holds in his hands the nations' prayer to him, "Raphael, the dreadful ("reverende"), make thou the deep quiet, we beseech thee."

in the least pretend to be. No one had ever drawn the traceries of the Ducal Palace till I did myself. Canaletto, in his way, is just as false as Prout—Turner no better. Not one of them painted anything but their general impressions; and not a soul in England knew that there was a system in Venetian architecture at all, until I made the measured (to half and quarter inches) elevation of it (No. 105), and gave the analysis of its tracery mouldings and their development, from those of the Franciscans at the Frari ("Stones of Venice," vol. ii.). This study of Prout's, then, I repeat, does not pretend to architectural accuracy; and it has even one very considerable fault. Prout's mind had been so formed among buildings solid at the base, and aerial at the top, that he not only could not enjoy, he could not even see, the national audacity of the great builder of the Ducal Palace, in supporting its wall on, virtually, two rows of marble piles; and, at the further end, just where the shafts at the angle let the winds blow through them as frankly as the timbers of Calais pier,\* he blackens them all up inside, as if the backing wall were solid and the arches were only niches.

---

\* The real and marvellous structure of the angle is admirably shown in the photograph, No. 106*a*, though the quantity of light penetrating the shafts is a little exaggerated in effect by uniting with the light sides of the shafts. Taking the lens to the photograph, you will see this line is destroyed by the modern gas-lamp stuck across the Italian sculpture, and you may admire at leisure the other improvements made by the art of the nineteenth century on the effect of the piazzetta. The combination of the fore and mizzen masts of the huge steamer whose hull, with its boat, blocks out the whole lagoon; and of the upright *near* gas-lamp, with the pillar of St. Mark—the introduction of the steamer's painted funnel to form a foundation for the tower of San Giorgio—the bathing establishment anchored beyond the pillars, just where the Bucentaur used to lie close to the quay to receive the Doge; and, finally, the bills pasted on the sheds at the base of St. Mark's column, advising us of improving works of a liberal tone, such as the "Storia della Natura," and the "Misteri della Inquisizione di Spagna." In this same Loggia of Sansovino's, against

For all that, there never was anything so true to the general splendor and life of the palace done before, nor ever will be again.\*

There are two points—technical both and spiritual both—which the reader must note in this drawing.

The first, how thankful Prout is for the clusters of doves along the upper line of the cornice. “They might as well be jackdaws,” you think? Well, as aforesaid, Prout is not a colorist, else he would have made his boats black and his doves gray; but then he would have been Carpaccio, and not Prout. This is really all you can expect him to do for a dove, with his poor Cumberland plumbago; and, after all, the glory of the creatures is not in being pigeons, but in being Venetians. Swallow or sparrow, daw or dove, sea-gull by Achilles’ isle or chough by Cornish cliff—that they are living with us by shore and altar, under cottage eaves and around palace council chambers, that is their glory—and, if we knew it, our peace.

The other point is more definitely technical, yet has its lesson in other directions also. I have already again and again insisted on Prout’s way of taking up his stitches, and carrying one part of his work into another. Look back to what is said of the *Como* in preface. He is no more content with his Ducal Palace till he has got it well into fugue with its crowd than he was with these old houses by the harbor. He won’t break the corner of its

which these sheds are built, the “Misteri” of the Government Lottery are also revealed weekly to the popular mind.

\* And in the great drawing (No. 60) lent by Lord Coleridge the upper story is singularly and gracefully accurate in the pinnacled Gothic of its central window, and in the various elevations and magnitudes of the rest. The two upper windows in the shade at the nearest angle are the oldest portion of the Palace visible, and Prout has carefully noted their different curve. The bright and busy figures are true to old times only, for the building is now being restored, and no man with a heart will ever draw the patched skeleton of it more.

arcade, but just flutes, as it were, a single pillar with the mast of a boat, and then carries the mast down—stopping the arch-mouldings for it, observe, as he draws them, so deliberate is he, and, getting well down so to his figures, rivets the rent of the canal across with the standing one, just under Michael Steno's central window, and then carries all away to the right, with the sitting figures and levelled sails in harmony with the courses of the palace, and to the left, with the boats. Hide one of these foundational forms with your hand, and see how the palace goes to pieces! There are many compositions in the room more felicitous; but there is no other in which the opposite influence to the "little rift within the lute"—the stitch in time that saves nine—is so delicately and so intensely illustrated as by the service of this single boat-spar to every shaft of the whole Ducal Palace.

With respect to these Venice drawings there are two metaphysical problems—in my own mind, of extreme insolubility—and on which I therefore do not enlarge, namely, why Prout, practical among all manner of Cornish and Kentish boats, could not for the life of him draw a gondola; and the second, why, not being able to draw a gondola, he yet never gave the grand Adriatic fishing-boat, with its colored sail, instead. These, and other relative questions still more abstruse—as, for instance, why he could draw the domes of Dresden rightly, and yet made the Madonna della Salute look like the National Gallery or Bethlehem Hospital—I must for the present leave for the reader's own debate, and only at speed give some account of the points to be illustrated by the supplementary drawings.

People often ask me—and people who have been long at Venice too—of the subject No. 55, *where* those square pillars are, and what they are. The corner of the Piazzetta from which this view is taken was once the sweetest of all sacred niches in that great marble withdrawing-room of the Piazzetta of St. Mark's. My old sketch, No. 107, shows approximately the color of the marble walls

and pavement of it, and the way the white flowers of the Greek pillars—purest Byzantine—shone through the dark spots of lichen. The Daguerreotype, No. 114, taken under my own direction, gives the light and shade of them, chosen just where the western sunlight catches the edge of the cross at the base of the nearer one; and my study, No. 108, shows more fully the character of the Byzantine chiselling—entirely freehand, flinging the marble acanthus-leaves here and there as they would actually grow. It is *through* work of this kind that the divine Greek power of the days of Hesiod came down to animate the mosaic workers in St. Mark's, in the eleventh century.

They worked under a Greek princess, of whom the reader will find some legend (though yet I have not been able to do more than begin her story) in the second number of "St. Mark's Rest."\* In the third I have given some account of the entire series of mosaics which were completed by her husband under the influence of his Greek queen (true *queen*, mind you, at that time, the Duke of Venice then wearing the king's diadem, not the republican cap); and I besought my readers at Venice and elsewhere to help me to get some faithful record of these mosaics before they perished by modern restoration. I have never made a more earnest appeal for anything—and indeed I believe, had it been for a personal gift—another Splügen drawing, or the like—I should have got it by this time easily enough. But there are always twenty people who will do what they feel to be kind, for one who will take my advice about an important public object. And—if they only knew it—the one real kind-

---

\* My readers continually complain that they can't get my presently issuing books. There is not a bookseller in London, however, who is not perfectly well aware that the said books are always to be had by a post-card sent to my publisher, Mr. G. Allen, Sunnyside, Orpington, Kent, to whom subscriptions for the object stated in the text are to be sent (or the books may be had of the Fine Art Society).

ness they *can* show to me is in listening to me—understanding, in the first place, that I know my business better at sixty than I did at five-and-twenty; and in the second, that my happiness, such as yet remains to me, does not at all consist in the things about me in my own parlor, but in the thought that the principles I have taught are being acted upon, and the great buildings and great scenes I have tried to describe saved, so far as may yet be possible, from destruction and desecration. At this very hour, the committees of Venetian builders are meeting to plot the total destruction, and re-erection according to their own notions, and for their own emolument, of the entire west front of St. Mark's—that which Barbarossa knelt under, and before which Dandolo took his vow for Palestine! And in the meantime the Christian populace of all Europe is quarrelling about their little parish reredoses and wax-candles!\*

And so it comes to pass, that the floor of St. Mark's is already destroyed, together with the north and south sides; only the west front and roof mosaics are yet left, and these are instantly threatened. I have got an absolutely faithful and able artist, trained by Mr. Burne Jones, to undertake the copying of the whole series of mosaics yet uninjured. He is doing this for love and mere journeyman's wages—how carefully and thoroughly the three examples in this room (114, 115, 116) will enough show; but he has been six months at work alone, unable to employ assistants, and all that I have yet got for him by the eagerest appeals I could make at Venice and here is—some hundred and seventy pounds, and half of that from a single personal friend! †

---

\* It may perhaps not be quite too late to contradict a report that appeared in some Irish paper, that I had been lately in Dublin, giving some opinion or other about reredoses. I have not been in Ireland these ten years—never shall be in Ireland more—and care no more about any modern churches or church furniture than about the drop-scene at Drury Lane—not so much indeed, if the truth were all told.

† £ s. d., by report from Mr. Allen, of 12th November.

I will have a little circular drawn up, stating these and other relative facts clearly, before the close of the present exhibition. Before its opening, I can allow myself now little more than the mere explanation of what it contains.

And now I really haven't time to talk any more, and yet I've ever so much to say, if I could, of the following drawings at Arqua and Nuremberg, 77 and 70. I must at least say at once why these, like Venice and St. Michael's Mount, go side by side.

In the first place, I believe that the so-called Petrarch's house at Arqua (67) can only be built on the site of the real one—it can't be of Petrarch's time; but the tomb is true, and just looking from that, to the building of Dürer's house (70)—which is assuredly authentic—and of Rubens's, No. 81, what a quantity of the lives of the men we are told by these three slight sketches! One of the things I hope to do at Sheffield is to get a connected and systematic series of drawings of the houses and the tombs of great men. The tombs, of course, generally tell more of their successors than of themselves; but the two together will be historical more than many volumes. Their houses, I say; yes, and the things they saw from their houses—quite the chief point with many of the best men and women. Casa Guidi windows, often of much more import than Casa Guidi; and in this house of Albert's, its own cross-timbers are little matter, but those Nuremberg walls around it are everything.

### 73. KELSO.

I now gather together, as I best may, the supplementary drawings which have come in since I arranged my series, and one or two others which did not properly belong to it. This one of Kelso is chiefly valuable as showing his mode of elementary study with washes of two tints—one warm, the other a little cooler. The system was afterward expanded into his color practice.

## 74. ENTRANCE TO NORTH TRANSEPT OF ROUEN.

Unfinished, and extremely interesting, as showing his *method* of rubbing in the tint with the stump or his finger, before adding the pencil lines.

## 75. STUDY OF DUTCH BOATS.

These boat sketches might be multiplied countlessly—and I would fain have given many and talked much of them, but have neither room nor time. Note in this the careful warping of the mast by the strain of the heavy sail.

## 76. NEUDERSDORF. }

## 77. GUTENFELS. }

Two lovely Rhine realities ; when the river was something better than a steam-tramway.

## 78. AN OLD RHINE BRIDGE, AT RHEINFELDEN.

A favorite Turner subject, and drawn and engraved with great care in "Modern Painters." As a Prout, it is inferior—small in manner and forced, but, as usual, wholly true to the place.

## 79. MUNICH.

Notable chiefly for the effort made to draw the attention away from the ugly arcade under the houses by the crowd of near figures. Compare the insistence on beautiful arcades in the Como and Domo d'Ossola.

## 80. YPRÈS.

Wholly lovely, and to be classed with the Abbeville and Evreux as one of the most precious records of former domestic architecture.

## 81. RUBENS'S HOUSE, ANTWERP.

The kind of domestic architecture that destroyed all reverence for what preceded it, and brought us down to—what we are.

Note the beginning of modern anatomies and sciences and pseudo-classicalisms in the monstrous skulls of beasts.

82. CAEN. }  
83. FALAISE. }

Two of the most careful and finished pieces of his later work, but rather architectural studies than pictures, and alas! the architecture of the worst school. So little can the taste be really formed without study of sculpture as the queen of edifying law. See notes on Supplementary Sketches.

86. PORTICO DI OTTAVIA, ROME.

All the life and death of Rome is in this quite invaluable drawing; but I have no time to talk of the life and death of Rome, and perhaps the enlightened modern student would only care for a view of the new tobacco manufactory under the Palatine.

87. WELL AT STRASBURG.

We don't want wells neither, in these days of wisdom, having Thirlmere turned on for us, or Loch Katrine, at our pleasure. But—from the days of Jacob's well till—thirty years ago, such things were pleasant in human eyes.

88. WELL AT STRASBURG.

I close our Prout pencilling with seven examples of his superb work on stone; all by his own hand, and as literally and thoroughly his, touch for touch, as the pencil sketches themselves, and even more wonderful in their easy mastery of the more difficult material.

What a disgrace it is to modern landscape painters that this book of Prout's, "Sketches in Flanders and Germany," should remain, to this day, the *only work* of true artistic value produced, that is to say, by the artist's own hand, purchasable by the public of Europe, in illustration of their national architecture!

## 89. WELL AT NUREMBERG.

This study is one of the most beautiful, but also one of the most imaginative, that ever Prout made—highly exceptional and curious.

The speciality of Nuremberg is, that its walls are of stone, but its windows, especially those in the roof, for craning up merchandise—are of wood. All the projecting windows and all the dormers in this square are of wood. But Prout could not stand the inconsistency, and deliberately petrifies all the wood. Very naughty of him ! I have nothing to say in extenuation of this offence ; and, alas ! secondly, the houses have, in reality, only three stories, and he has put a fourth on, out of his inner consciousness !

I never knew him do such a thing before or since ; but the end of it is, that this drawing of Nuremberg is immensely more Nuremberg than the town itself, and a quite glorious piece of mediæval character.

## 90. ULM.

## 91. PRAGUE.—TOWER OF THE GATE.

## 92. PRAGUE.—STADTHAUS.—The realization of sketch No.

## 93. BRUNSWICK.—RATHHAUS.

## 94. COBLENTZ.

I have always held this lithograph to show all Prout's qualities in supreme perfection, and proudly finish our series of pencil and chalk work with it.

We now come to a large series of early color studies, promising better things than ever came of them ; and then the examples of Prout, for which we are simply to blame the public taste he had to meet, and not him. There were no pre-Raphaelites in those days. On the walls at the Scala Palace, in that sketch of Verona, No. 49, Prout has written, conscientiously, "brick ;" but do you think if he

had painted it of brick, anybody would have bought the drawing? Since those days, all the work of Walker, of Boyce, of Alfred Hunt, of Albert Goodwin, of John Brett (the whole school of them, mind you, founded first on the strong pre-Raphaelite veracities which were all but shrieked down at the first seeing of them, and which I had to stand up alone for, against a whole national clamor of critical vituperation), all that affectionate and laborious painting from nature has familiarized you, now, with birds, and ivy, and blossoms, and berries, and mosses, and rushes, and ripples, and trickles, and wrinkles, and twinkles; and, of course, poor old Prout's conventional blue wash won't look its best afterward. Be thankful to *them* (and somewhat also—I say it not in pride, but as a part of the facts—to “Modern Painters” and me), and indulgent to the old workman, who did the best he could for his customers, and the most he could for his money.

95. THE ENGLISH COTTAGE.—See preface.

96. LAUNCESTON.

Had this drawing been brought to me as an early Turner, I should have looked twice, and thrice, at it before saying no. If Prout had only had just ever so little more pride, and some interest in British history, he would have been a painter, indeed! and no mean pencil draughtsman. But he just missed it—and a miss is as bad as a mile, or a million of miles; and I say nothing more of the series of water-colors here, except only that many a good lesson may be learned from them in *chiaroscuro*, and in flat tinting, by modest students.

## SUPPLEMENTARY DRAWINGS.

There are—or ought to be, if I get them together in time—eleven of my own, namely :

104. CALAIS.

104*a*. THE AVENTINE.

105. DUCAL PALACE AND BRIDGE OF SIGHS.

106. DUCAL PALACE, FOLIAGE OF SOUTHWEST ANGLE.

107. PILLAR OF THE PIAZZETTA.

108. CHIAROSCURO STUDY OF THE SAME PILLAR.

109. THE CASA D'ORO.

110. WINDOW ON THE GRAND CANAL.

111. ABBEVILLE CROCKET.

112. OAK-LEAF.

113. MOSS AND OXALIS.

I meant, when first this exhibition was planned, to have made it completely illustrative of the French flamboyant architecture, which Prout had chiefly studied ; but I have been too much interrupted by other duties ; and I can only now point out, once more—after thirty years of reiterating this vital fact to architects in vain—that until they are themselves absolute masters of sculptural surface, founded on natural forms, they do not know the meaning of any good work, in any school.

Sculptural *surface*, observe: They fancy they have chosen an ornament when they have got its outline; but in sculpture the *surface* is everything; the outline follows, and is compelled by it. Thus, in the piece of Ducal Palace sculpture, No. 106, the entire value of it depends on the chiaroscuro of its surfaces; and it would be as absurd to think of sketching it without shade, as a piece of rippled lagoon. And in every minutest finial and crocket of that French flamboyant, the surfaces are studied to a perfection not less subtle, though relieved by more violent shade. The fast study, No. 111, shows the action of the curved stems and flow of surfaces in one of the crockets of Abbeville. See photograph No. 6, and the study of oak-leaves, No. 112, will show how the natural forms of vegetation lend themselves to every need of such attentive design. I have painted this bit of leafage in two stages, showing—if anyone cares to know it—the way Hunt used his body color; laying it first with extreme care in form and gradation, but in pure white; and then glazing over it—never disturbing it, or mixing it in the slightest degree with his clear color. And it is only by this management of opaque color that architectural detail can be drawn at speed, with any useful result. See the bit of honeysuckle ornament, for instance, at the top of the pillar in No. 108, and fancy the time it would have taken to express the bossy roundness of it in any other way. All disputes about the use of body color, begin and end in the “to be or not to be” of accurate form.

Then there are three drawings of St. Mark's mosaics by Mr. Rooke:

114. FLORAL DECORATION.

115. MADONNA AND DAVID.

116. THE PROPHETS.

Then some variously illustrated photographs, etc.

117. ABBEVILLE.

118. PICTURE OF ABBEVILLE.

106a. VENICE, THE PIAZZETTA.

11. LITHOGRAPH OF MODERN STRASBURG.

119. (?) IMPROVEMENTS IN MODERN LONDON.

Then, in the glass case, there is a little bit of real Venetian sixteenth century silk-work—put there to show precisely what Shakespeare meant by “Valance of Venice gold in needlework” (“Taming of the Shrew”); and secondly, to show the use of minute points of color—no less than of form in decoration carried on; and finally, there is the Meissonier, above referred to, Napoleon, in 1814, on the Chaussée of Vitry, just after the battle of Arcis-sur-Aube.

“The French horsemen, though inferior to none in the world for audacity and prowess, were overmatched by their opponents and driven back to the bridge of Arcis. Napoleon, who was on the other side, instantly rode forward to the entrance of the bridge, already all but choked up with fugitives, and drawing his sword, exclaimed, ‘Let me see which of you will pass before me!’ These words arrested the flight, and the division Friant traversing the streets of Arcis, in double-quick time passed the bridge, formed on either side of its other extremity, and by their heavy fire drove back the allied horse.

\* \* \* \* \*

“Napoleon was repeatedly in imminent danger, nearly all his staff were killed or wounded. ‘Fear nothing,’ said he, to the generals who urged him to retire: ‘the bullet is not yet cast which is to kill me.’ He seemed to court rather than fear death, his air was resolute but sombre, and as long as the battle raged, by the light of the

burning houses behind and the flash of the enemies' guns in front, he continued to face the hostile batteries.

\* \* \* \* \*

“On leaving Arcis, instead of taking the road to Chalons or to Paris, he moved on the Chaussée of Vitry, direct toward the Rhine. His letter to the Empress Marie Louise was in these terms :

“ ‘My love, I have been for some days constantly on horseback ; on the 20th I took Arcis-sur-Aube. The enemy attacked me there at eight in the evening. I beat him the same evening. I took two guns and retook two. The next day the enemy's army put itself in array to protect the march of its columns on Bar-sur-Aube, and I resolved to approach the Marne and its environs. This evening I shall be at St. Dizier. Farewell, my love. Embrace my son.’ ” (See “Alison,” vol. x., pp. 396 to 406.)

It would be difficult to find a more perfect example of the French realistic school than this picture. It is, of course, conventional, and founded on photographic effect—the white horse in reality would have looked like a ghost in the twilight, and not one of the details of the housings been in the least visible—had these been so, much more should the details of the landscape have been. But in its kind it is without rivalship, and I purpose that it shall remain in St. George's schools—for a monument of War-sorrow, where War has been unjust.

## II.—HUNT.

---

### 142. THE BUTTERFLY.

Before saying anything more of the Hunt series, I want my readers once more clearly to understand what I have brought it here for ; namely, to show them what real painting is, as such, wholly without inquiry concerning its sentiment or story. The Prouts are here for an exactly opposite reason—not at all to show you what mere penciling is, as such—but what it can pencil for us of European scenery and history. Whereas this butterfly is here, not at all to teach you anything you didn't know about butterflies ; nor the peach and grapes to teach you anything you didn't know about those familiar fruits ; nor even that boy in his father's boots to teach you anything you didn't know before about boys and boots. They are here merely to show you what is meant by Painting, as distinguished from daubing, from plastering, from rough casting, from chromo-tinting, from tray-varnishing, from paper-staining, and in general from the sort of things that people in general do when you put a brush into their hands, and a pot within reach of them.

Now, that little brown-red butterfly (which Mr. Gurney is so fortunate in possessing) is a piece of real painting ; and it is as good as Titian or anybody else ever did. And if you can enjoy it you can enjoy Titian and all other good painters ; and if you can't see anything in *it*, you can't see anything in *them*, and it is all affectation and pretence to say that you care about them.

And with this butterfly, in the drawing I put first, please look at the mug and loaf in the one I have put last, of the Hunt Series, No. 171. The whole art of painting

is in that mug—as the fisherman's genius was in the bottle. If you can feel how beautiful it is, how ethereal, how heathery and heavenly, as well as to the uttermost, muggy: you have an eye for color, and can enjoy heather, heaven, and everything else below and above. If not, you must enjoy what you can, contentedly, but it won't be painting; and in mugs it will be more the beer than the crockery; and on the moors, rather grouse than heather.

Going back to No. 142, you will perhaps ask me why the poppy is so poor and the butterfly so rich? Mainly because the poppy withered and the butterfly was pinned and permanent. But there are other reasons, of which more presently.

144. HERRING AND PILCHARD.

Supreme painting again, and done with his best pains; for these two subjects, and

146. DEAD CHICKEN

Were done by the old man, in all kindness and care, at my own request, for me to give as types of work to country schools of Art. Yet no kindness or care could altogether enable him to work rightly under the direction of another mind; and the project was ultimately given up by me, the chicken finished as it is, having been one of my chief disappointments. And here anent, let me enter into some general account of the tenor of his drawings. They may be broadly divided into the following classes, into one or other of which every work of importance from his hand will distinctly fall.

CLASS 1.

Drawings illustrative of rural life in its vivacity and purity, without the slightest endeavor at idealization, and still less with any wish either to caricature, or deplore its imperfections. All the drawings belonging to this class are, virtually, faultless, and most of them very beautiful. It is, I am glad to say, thoroughly represented in

this room, which contains several examples of the highest quality, namely, 121, 168, 171, 172, 173, 175.

Besides two pieces of still life (169 and the interior, No. 174), properly belonging to the group

#### CLASS 2.

Country life, with endeavor to add interest to it by passing sentiment.

The drawings belonging to this class are almost always over-finished, and liable to many faults. There are three in this collection—120, 165, 166.

#### CLASS 3.

Country life, with some expression of its degradation, either by gluttony, cowardice, or rudeness.

The drawings of this class are usually very clever and apt to be very popular; but they are on the whole dishonorable to the artist. There are five examples here, namely, 157, 158, 161, 163, 164.

#### CLASS 4.

Flower-pieces. Fruit is often included in these; but they form a quite separate class, being necessarily less finished drawings—the flowers sooner changing their form. Including the fungi among these, there are eight fine ones in the room, 148, 150, 149, 154, 152, 147, 151, 156.

#### CLASS 5.

Fruit-pieces, on which a great part of the artist's reputation very securely rests. Five first-rate ones are here, and several of interesting, though inferior, quality.

#### CLASS 6.

Dead animals. Alas! if he could but have painted living ones, instead of those perpetual bunches of grapes. But it could not be. To a weakly, sensitive, nervous temperament, the perpetual changes of position, and perpetual suggestions of new beauty in an animal, are entirely

ruinous ; in ten minutes they put one in a fever. Only the very greatest portrait-painters—Sir Joshua and Velasquez—can draw animals rightly.

I begin with this last class and reascend to the highest.

138. DEAD HARE AND GAME.

A most notable drawing of early practice, quite wonderful in textures of fur and in work of shadows, but tentative, and in many points failing.

141. DEAD DOVE. (A.)

A pure water-color drawing, before his style was perfectly formed. Full of interest, but too conventional and slight in background.

139. DEAD DOVE. (B.)

Finished work of central time.

145. DEAD DOVE. (C.)

Replica, I suppose, of B, with completer background, and of highest quality. I must be pardoned for saying so of my own drawing ; but of course, after long and affectionate relations with the painter, it would be strange if I had not some of his best works.

143. PINE, MELON, AND GRAPES.

We were obliged to put this drawing low down, for, in spite of its dark background, it killed everything we put near it. To my mind, it is the most majestic piece of work in the room. The grapes are of the Rubens Vintage, and the shadows have the darkness of Tintoret. It is wholly free from any pettiness of manner, and evidences spring and succulence of foliage ; it is as if the strength of nature were in it, rather than of human hand. I never saw it until now, and have learned from it more than after my fifty years of labor I thought anything but a Venetian picture could have taught me.

132. "LOVE WHAT YOU STUDY, STUDY WHAT YOU LOVE."  
All modern painters in a nutshell of a sentence, and the painted nutshell perfect.—See Preface.
130. GRAPES.  
Consummate. Can't be better anywhere.
131. MR. SLBETH'S QUINCES.  
All that's best in this kind.
125. BULLACES.  
Very fine, but conventional in background.
129. GRAPES.  
Perfect work, but wasted. Why he did so many grapes, and scarcely ever sloes, or finely russet apples, or *growing* strawberries, always mystified me.
126. PLUMS.  
Finest work, but a little dull. My own favorites of his plums were such variegated ones as 133 and 135 ; but I somehow never got any. This drawing, however, was the one of which Hunt said to me innocently—seeing it again after some ten years—"It's very nice ; isn't it?"
128. PLUMS.  
The bit of oak-leaf here is very wonderful, and interesting as an example, and what Hunt meant by saying to me once, "I like to see things 'Fudged' out." It is to be remembered, however, that this was his own special liking ; and it must not be followed by the general student. The finest forms of anything cannot be "fudged" out, but must be drawn, if possible, with the first line, at least with the last one, for ever.
149. DR. DRAGE'S FUNGI.  
A perfect gem ; "Venetian red" in its best earthly splendor ; it could only be more bright in clouds.

## 147. MR. FRY'S HAWTHORN.

A little overworked, but very glorious. Soft and scented, I think, if you only wait a little, and make-believe very much.

## 155. (Mine.) HAWTHORN AND BIRDS' NESTS.

The hawthorn this time a little *underworked*, but very good ; and nests as good as can be.

## 148. LILAC. (MR. SIBETH'S.)

Fine, but curiously redundant. The upper branch by itself, or the lower with only the laburnum, or both together without the third, would have been beautiful ; but two's company, and three's none.

## 150. VASE WITH ROSE AND BASKET WITH FRUIT. }

## 151. FLOWERS AND FRUIT. }

Two resplendent ones ; everything that he could do best in this kind—absolutely right in color, absolutely in light and shade, and without any rivalry in past or present art.

## 162. THE GAMEKEEPER.

Early study. Please observe that Hunt learned his business, not in spots but in lines. Compare the entirely magnificent sketch of the river-side, No. 124, which is as powerful in lines as Rembrandt, and the St. Martin's Church, No. 123, which is like a bit of Hogarth.

## 157. THE INVALID.

Full of humor ; but there is no place for humor in true painting. So also the Wasp, No. 163. If I could have the currant-pie without the boy, I should be content.

## 161. GYPSIES.

Very powerful ; historic in its kind.

## 166. PRAYING BOY. (MR. QUILTER'S.)

Over-finished, as its companion, No. 165, an endeavor at doing what he did not understand. So also the large study of himself, No. 176, with the Mulatto, No. 122, and Wanderer, No. 120. His mode of work was entirely unfitted for full life-size.

121. MR. QUILTER'S STABLE-BOY.

MR. ORROCK'S SHY SITTER, AND THE BLESSING.

On the contrary, he is here again in his utmost strength—and in qualities of essential painting—unconquerable. In the pure faculty of painter's art—in what Correggio, and Tintoret, and Velasquez, and Rubens, and Rembrandt, meant by *painting*—that single bunch of old horse-collars is worth all Meissonier's horse-bridles—boots, breeches, epaulettes, and stars together.

The other drawings of the highest class need no commentary. There is not much in the two little candle-lights, Nos. 168, 175, but all that is, of the finest, and the three drawings with which I close our series, "The Shy Sitter," No. 172, "The Fisherman's Boy," No. 173, and "The Blessing," No. 171, things that the old painter was himself unspeakably blessed in having power to do. The strength of all lovely human life is in them; and England herself lives only, at this hour, in so much as, from all that is sunk in the luxury—sick in the penury—and polluted in the sin of her great cities, Heaven has yet hidden for her, old men and children such as these, by their fifties in her fields and on her shores, and fed them with Bread and Water.

## APPENDICES.

---

### APPENDIX I.

EVERY human action gains in honor, in grace, in all true magnificence, by its regard to things that are to come. It is the far sight, the quiet and confident patience, that, above all other attributes, separate man from man, and near him to his Maker; and there is no action nor art whose majesty we may not measure by this test. Therefore, when we build, let us think that we build for ever. Let it not be for present delight, nor for present use alone; let it be such work as our descendants will thank us for, and let us think, as we lay stone on stone, that a time is to come when those stones will be held sacred because our hands have touched them, and that men will say, as they look upon the labor and wrought substance of them, "See! this our fathers did for us." For, indeed, the greatest glory of a building is not in its stones, nor in its gold. Its glory is in its Age, and in that deep sense of voicefulness, of stern watching, of mysterious sympathy, nay, even of approval or condemnation, which we feel in walls that have long been washed by the passing waves of humanity. It is in their lasting witness against men, in their quiet contrast with the transitional character of all things, in the strength which, through the lapse of seasons and times, and the decline and birth of dynasties, and the changing of the face of the earth, and of the limits of the sea, maintains its sculptured shapeliness for a time insuperable, connects forgotten and following ages with each other, and half constitutes the identity, as it concentrates the sympathy, of nations; it is in that golden stain of time, that we are to look for the real light, and color, and preciousness of architecture; and it is not until a building has assumed this character, till it has been intrusted with the fame, and hallowed by the deeds of men, till its walls have been witnesses of suffering and its pillars rise out of the shadows of death, that its existence, more lasting as it is than that of the natural objects of the world around it, can be gifted with even so much as these possess, of language and of life.—"The Seven Lamps of Architecture," pp. 172, 173.

But so far as it can be rendered consistent with the inherent charac-

ter, the picturesque or extraneous sublimity of architecture has just this of nobler function in it than that of any other object whatsoever, that it is an exponent of age, of that in which, as has been said, the greatest glory of the building consists; and therefore, the external signs of this glory, having power and purpose greater than any belonging to their mere sensible beauty, may be considered as taking rank among pure and essential characters; so essential to my mind, that I think a building cannot be considered as in its prime until four or five centuries have passed over it; and that the entire choice and arrangement of its details should have reference to their appearance after that period, so that none should be admitted which would suffer material injury either by the weather-staining, or the mechanical degradation which the lapse of such a period would necessitate.

It is not my purpose to enter into any of the questions which the application of this principle involves. They are of too great interest and complexity to be even touched upon within my present limits, but this is broadly to be noticed, that those styles of architecture which are picturesque in the sense above explained with respect to sculpture, that is to say, whose decoration depends on the arrangement of points of shade rather than on purity of outline, do not suffer, but commonly gain in richness of effect when their details are partly worn away; hence such styles, pre-eminently that of French Gothic, should always be adopted when the materials to be employed are liable to degradation, as brick, sandstone, or soft limestone; and styles in any degree dependent on purity of line, as the Italian Gothic, must be practised altogether in hard and undecomposing materials—granite, serpentine, or crystalline marbles. There can be no doubt that the nature of the accessible materials influenced the formation of both styles; and it should still more authoritatively determine our choice of either.—*Ibid.*, pp. 179, 180.

---

## APPENDIX II.

THE essence of picturesque character has been already defined to be a sublimity not inherent in the nature of the thing, but caused by something external to it; as the ruggedness of a cottage-roof possesses something of a mountain aspect, not belonging to the cottage as such. And this sublimity may be either in mere external ruggedness, and other visible character, or it may lie deeper, in an expression of sorrow and old age, attributes which are both sublime; not a dominant expression, but one mingled with such familiar and common characters as prevent the object from becoming perfectly pathetic in its sorrow, or perfectly venerable in its age.

For instance, I cannot find words to express the intense pleasure I

have always in first finding myself, after some prolonged stay in England, at the foot of the old tower of Calais church. The large neglect, the noble unsightliness of it; the record of its years written so visibly, yet without sign of weakness or decay; its stern wasteness and gloom, eaten away by the Channel winds, and overgrown with the bitter sea grasses; its slates and tiles all shaken and rent, and yet not falling; its desert of brickwork, full of bolts, and holes, and ugly fissures, and yet strong, like a bare brown rock; its carelessness of what any one thinks or feels about it, putting forth no claim, having no beauty nor desirableness, pride nor grace; yet neither asking for pity; not as ruins are, useless and piteous, feebly or fondly garrulous of better days; but useful still, going through its own daily work,—as some old fisherman beaten gray by storm, yet drawing his daily nets: so it stands, with no complaint about its past youth, in blanched and meagre massiveness and serviceableness, gathering human souls together underneath it; the sound of its bells for prayer still rolling through its rents; and the gray peak of it seen far across the sea, principal of the three that rise above the waste of surfy sand and hillocked shore,—the lighthouse for life, and the belfry for labor, and this for patience and praise.

I cannot tell the half of the strange pleasures and thoughts that come about me at the sight of that old tower; for, in some sort, it is the epitome of all that makes the Continent of Europe interesting, as opposed to new countries; and, above all, it completely expresses that agedness in the midst of active life which binds the old and the new into harmony. We, in England, have our new street, our new inn, our green shaven lawn, and our piece of ruin emergent from it—a mere *specimen* of the middle ages put on a bit of velvet carpet to be shown, which, but for its size, might as well be on a museum shelf at once, under cover. But, on the Continent, the links are unbroken between the past and present, and in such use as they can serve for, the gray-headed wrecks are suffered to stay with men; while in unbroken line, the generations of spared buildings are seen succeeding each in its place. And thus in its largeness, in its permitted evidence of slow decline, in its poverty, in its absence of all pretence, of all show and care for outside aspect, that Calais tower has an infinite of symbolism in it, all the more striking because usually seen in contrast with English scenes expressive of feelings the exact reverse of these.—“Modern Painters,” vol. iv., pp. 2, 3.

---

### APPENDIX III.

AND, in some sort, the hunter of the picturesque is better than many other pleasure-seekers; inasmuch as he is simple-minded, and capable of unostentatious and economical delights, which, if not very helpful

to other people, are at all events utterly uninjurious, even to the victims or subjects of his picturesque fancies; while to many others his work is entertaining and useful. And, more than all this, even that delight which he *seems* to take in misery is not altogether unvirtuous. Through all his enjoyment there runs a certain undercurrent of tragical passion—a real vein of human sympathy;—it lies at the root of all those strange morbid hauntings of his; a sad excitement, such as other people feel at a tragedy, only less in degree, just enough, indeed, to give a deeper tone to his pleasure, and to make him choose for his subject the broken stones of a cottage wall rather than of a roadside bank, the picturesque beauty of form in each being supposed precisely the same; and, together with this slight tragical feeling, there is also a humble and romantic sympathy, a vague desire, in his own mind, to live in cottages rather than in palaces; a joy in humble things, a contentment and delight in makeshifts, a secret persuasion (in many respects a true one) that there is in these ruined cottages a happiness often quite as great as in kings' palaces, and a virtue and nearness to God infinitely greater and holier than can commonly be found in any other kind of place; so that the misery in which he exults is not, as he sees it, misery, but nobleness—"poor and sick in body, and beloved by the Gods." And thus, being nowise sure that these things can be mended at all, and very sure that he knows not how to mend them, and also that the strange pleasure he feels in them *must* have some good reason in the nature of things, he yields to his destiny, enjoys his dark canal without scruple, and mourns over every improvement in the town, and every movement made by its sanitary commissioners, as a miser would over a planned robbery of his chest; in all this being not only innocent, but even respectable and admirable, compared with the kind of person who has *no* pleasure in sights of this kind, but only in fair façades, trim gardens, and park palings, and who would thrust all poverty and misery out of his way, collecting it into back alleys, or sweeping it finally out of the world, so that the street might give wider play for his chariot wheels, and the breeze less offence to his nobility.—"Modern Painters," vol. iv., pp. 11, 12.

---

#### APPENDIX IV.

I DO not doubt that you are greatly startled at my saying that greater pleasure is to be received from inferior Art than from the finest. But what do you suppose makes all men look back to the time of childhood with so much regret (if their childhood has been, in any moderate degree, healthy or peaceful)? That rich charm, which the least possession had for us, was in consequence of the pooriness of our treasures.

That miraculous aspect of the nature around us was because we had seen little and knew less. Every increased possession loads us with new weariness; every piece of new knowledge diminishes the faculty of admiration; and Death is at last appointed to take us from a scene in which, if we were to stay longer, no gift could satisfy us, and no miracle surprise. . . .

In your educational series is a lithograph drawing, by Prout, of an old house in Strasbourg. The carvings of its woodwork are in a style altogether provincial, yet of which the origin is very distant. The delicate Renaissance architecture of Italy was affected, even in its finest periods, by a tendency to throw out convex masses at the bases of its pillars; the wood-carvers of the sixteenth century adopted this bulged form as their first element of ornamentation, and these windows of Strasbourg are only imitations by the German peasantry of what, in its finest type, you must seek as far away as the Duomo of Bergamo.

But the burgher, or peasant, of Alsace enjoyed his rude imitation, adapted, as it was, boldly and frankly to the size of his house and the grain of the larch logs of which he built, infinitely more than the refined Italian enjoyed the floral luxuriance of his marble; and all the treasures of a great exhibition could not have given him the tenth part of the exultation with which he saw the gable of his roof completed over its jutting fret-work; and wrote among the rude intricacies of its sculpture, in flourished black letter, that "He and his wife had built their house with God's help, and prayed Him to let them live long in it—they and their children."

But it is not only the rustic method of architecture which I wish you to note in this plate; it is the rustic method of drawing also. The manner in which these blunt timber-carvings are drawn by Prout is just as provincial as the carvings themselves. Born in a far-away district in England, and learning to draw, unhelped, with fishing-boats for his models; making his way instinctively until he had command of his pencil enough to secure a small income by lithographic drawing; and finding picturesque character in buildings from which all the finest lines of their carving had been effaced by time; possessing also an instinct in the expression of such subjects so peculiar as to win for him a satisfying popularity, and far better, to enable him to derive perpetual pleasure in the seclusion of country hamlets, and the quiet streets of deserted cities. Prout had never any motive to acquaint himself with the refinements, or contend with the difficulties of a more accomplished art. So far from this, his manner of work was, by its very imperfection, in the most perfect sympathy with the subjects he enjoyed. The broad chalk touches in which he has represented to us this house at Strasbourg are entirely sufficient to give true idea of its effect. To have drawn its ornaments with the subtlety of Leonardesque delineation would only have exposed their faults and mocked their rusticity. The

drawing would have become painful to you from the sense of the time which it had taken to represent what was not worth the labor, and to direct your attention to what could only, if closely examined, be a matter of offence. But here you have a simple and provincial draughtsman happily and adequately expressing a simple and provincial architecture; nor could builder or painter have become wiser, but to their loss.—“Works of John Ruskin,” vol. iv., “Eagle’s Nest,” pp. 76, 77, 78, 79, 80.

## PREFACE.

---

THAT in the largest, and, I suppose, richest city of the world, the most delicate and precious water-color drawings which its citizens possess should be kept in a cellar, under its National Gallery, in which two-thirds of them are practically invisible, even in the few bright days which London smoke leaves to summer; and in which all are exposed to irreparable injury by damp in winter, is a fact which I must leave the British citizen to explain: stating here only that neither Mr. Burton nor Mr. Eastlake are to be held responsible for such arrangement; but, essentially, the public's scorn of all art which does not amuse it; and, practically, the members of the Royal Academy, whose primary duty it is to see that works by men who have belonged to their body, which may be educationally useful to the nation, should be rightly and sufficiently exhibited.

I have had no heart myself, during recent illness, to finish the catalogue which, for my own poor exoneration from the shame of the matter, I began last year. But in its present form it may be of some use in the coming Christmas holidays, and relieve the kindness of Mr. Oldham from unnecessary burden.

The Trustees of the National Gallery will I trust forgive my assumption that, some day or other, they may enable their keeper to remedy the evils in the existing arrangement; if not by displacing some of the pictures of inferior interest in the great galleries, at least by adding above their marble pillars and vaulted ceilings, such a dry and skylighted garret as

any photographic establishment, opening a new branch, would provide itself with in the slack of the season. Such a room would be all that could be practically desired for the Turner drawings; and modern English indolence, if assisted in the gratification of its languid curiosity by a lift, would not, I trust, feel itself aggrieved by the otherwise salutary change.

1857

*[The following text is extremely faint and illegible, appearing to be bleed-through from the reverse side of the page. It contains several lines of text, but the characters are too light to transcribe accurately.]*

## INTRODUCTORY CLASSIFICATION.

---

THE confused succession of the drawings at present placed in the water-color room of the National Gallery was a consequence of their selection at different periods, by the gradually extended permission of the Trustees, from the mass of the inferior unexhibited sketches in the possession of the nation. I think it best, in this catalogue, to place the whole series in an order which might conveniently become permanent, should the collection be eventually transferred to rooms with sufficient light to see it by : and for the present the student will find no difficulty, nor even a delay of any consequence, in finding the title of any drawing by reference to the terminal index, in which, by the number in the existing arrangement, he is referred to that in the proposed one, followed in the text.

The collection as at present seen consists of four hundred drawings, in wooden sliding frames, contained in portable cabinets ; and of about half that number grouped in fixed frames originally intended for exhibition in the schools of Kensington, and in which the drawings were chosen therefore for their instructive and exemplary, more than their merely attractive qualities. I observed, however, that the number of these partly detracted from their utility ; and have now again chosen out of them a consecutive and perfectly magistral group, of which it may safely be recommended that every student of landscape art should copy every one in succession, as he gains the power to do so.

This first, or "Scholar's" group, consists of sixty-five drawings arranged, at present, in thirty frames : but eventually,

each of these drawings should be separately framed, and placed where it can be perfectly seen and easily copied.

The drawings originally exhibited at Kensington, out of which this narrower group is now selected, were for several years the only pencil and water-color drawings by Turner accessible to the public in the National collection. I therefore included among them many samples of series which were at that time invisible, but to which, since the entire mass of drawings is now collected, it is proper that the drawings which, by their abstraction, would break the unity of subjects, should be restored. I have therefore, in this catalogue, placed in complete order all the important local groups of sketches (in Rome, Naples, Savoy, etc.), and retained in the miscellaneous framed collection only those which could be spared without breaking the sequence of the cabinet drawings. And further, I have excluded from this framed collection some of minor importance, which it seems to me might, not only without loss, but with advantage to the concentrated power of the London examples, be spared, on loan for use in provincial Art schools.

The Kensington series of framed groups, originally numbering 153, has by these two processes of elimination been reduced in the following catalogue to one hundred, of which thirty form the above-described "Scholar's group," absolutely faultless and exemplary. The remainder, of various character and excellence (which, though often of far higher reach than that of the Scholar's group, is in those very highest examples not unaffected by the master's peculiar failings), I have in the following catalogue called the "Student's group"; meaning that it is presented to the thoughtful study of the general public, and of advanced artists; but that it is only with discrimination to be copied, and only with qualification to be praised. Whereas, in the Scholar's group, there is not one example which may not in every touch be copied with benefit, and in every quality, without reserve, admired.

After these two series follow in this catalogue, the four hundred framed drawings in the cabinets, re-arranged and completed by the restorations out of the Kensington series,

with brief prefatory explanations of the nature of each group. One or two gaps still require filling ; but there being some difficulty in choosing examples fit for the exact places, I publish the list as it stands. The present numbers are given in order in the terminal index.

For many reasons I think it best to make this hand-catalogue direct and clear, with little comment on separate drawings. I may possibly afterward issue a reprint of former criticism of the collection, with some further practical advice to scholars.

## PRIMARY SYNOPSIS.

THE following general plan of the new arrangement will facilitate reference in the separate heads of it. The marginal figures indicate the number of frames in each series.

## GROUP I.

*(First Hundred.)*

## THE SCHOLAR'S GROUP.

It consists of sixty-five drawings in thirty frames, originally chosen and arranged for exhibition at Kensington, together with upward of a hundred more (as explained in the preface), out of which this narrower series, doubly and trebly sifted, is now recommended to the learner, for constant examination, and progressive practice; the most elementary examples being first given. Their proper arrangement would be on a screen in perfect light, on a level with the eye—the three largest only above the line of the rest. When several drawings are in the same frame, they are lettered *a, b, c*, etc., either from left to right, or from above downward. The numbers on the right hand of the page are those by which they are indicated in the

existing arrangement ; the letter K standing for Kensington, to prevent confusion with the numbers of those in cabinets, which were always at the National Gallery.

- |     |       |   |           |   |     |
|-----|-------|---|-----------|---|-----|
| 1.  | a.    | Tower of St. Mary Redcliffe, Bristol,   | . . . . . | K | 3   |
|     | b.    | Transept and Tower, York Cathedral.   |           |   |     |
|     | c.    | Tower of Boston, Lincolnshire.  |           |   |     |
| 2.  | a.    | Carnarvon Castle,   | . . . . . | K | 145 |
|     | b.    | Wells Cathedral.  |           |   |     |
| 3.  |       | Malmesbury Abbey. Sketch from nature for<br>the drawing in the English series,  | . . . . . | K | 4   |
| 4.  | a.    | Study of sailing boat,  | . . . . . | K | 18  |
|     | b.    | Head of rowing boat.  |           |   |     |

## GROUP II.

*(First Hundred.)*

### THE STUDENT'S GROUP.

The Student's group is arranged so as to exhibit Turner's methods of work, from his earliest to his latest time of power. All his essential characters as an artist are shown in it; his highest attainments, with his peculiar faults—faults of inherent nature, that is to say; as distinguished from those which,

after the year 1845, were signs merely of disease. No work of his declining time is admitted into this series.

It begins (No. 31) with three examples of the earliest efforts by him existing in the National collection of his drawings. Then follow examples of his methods of study with pencil and pen, from first to last: then, examples of his work similarly progressive, in transparent color on white paper; and, finally, examples of his use of body color on gray paper—a method only adopted late in life, as one proper for none but a consummate master.

The entire series is contained in seventy frames, selected, as those of the Scholar's group are, from the collection first arranged for Kensington; and close the first hundred of the frames here permanently catalogued.

- |     |  |       |
|-----|--|-------|
| 31. | Three early sketches at Clifton, when he was twelve or thirteen years old. He went on for several years working thus in pencil and color; then saw the necessity of working in pencil outline only, and never ceased that method of work to the close of life, . . . . . | κ 1   |
| 32. | <i>a.</i> Carew Castle. Early pencil outline, after he had determined its method, . . . . .  | κ 144 |
|     | <i>b.</i> Lancaster, of later date. Both drawings realized in the England series.  |       |
| 33. | <i>a.</i> Kirkstall Abbey, . . . . .   | κ 5   |
|     | <i>b.</i> Holy Island Cathedral. Subjects realized in the Liber Studiorum.   |       |
| 34. | Sketch from nature of the Liber subject, "Source of the Arveron," . . . . .  | κ 39  |
| 35. | Sketch from nature for the drawing at Farnley, "Mont Blanc from the Valley of Chamouni," . . . . .   | κ 40  |
| 36. | Foreground studies, laurel, etc., . . . . .  | κ 51  |
| 37. | Studies of market ware at Rotterdam, . . . . .   | κ 54  |
| 38. | Study of sheep, . . . . .  | κ 52  |
| 39. | Memoranda of coast incidents, . . . . .  | κ 20  |
| 40. | Sketches at York, . . . . .  | κ 149 |
| 41. | Two Egremont subjects, . . . . .   | κ 61  |

42. Two Bridge subjects, . . . . . κ 146
43. Studies from Claude, etc., . . . . . κ 118
44. Twelve leaves from a notebook at Venice (all  
drawn as richly on the other sides), . . . κ 115
45. Four leaves of a notebook on journey to Scotland  
by sea, . . . . . κ 112
46. a. Sketches at Andernach, . . . . . κ 116  
b. Sketches on the Rhine.  
c. Sketches on Lago Maggiore.  
The leaves *a b* are out of a notebook containing  
270 such.
47. Sketches at Naples, . . . . . κ 117
48. At Dresden, . . . . . κ 119
49. Cologne Cathedral, and Rhine subject, . . . κ 147
50. Sketches in Rouen, with engraving of finished  
drawing made from one of them, . . . . κ 55

These twenty drawings (31–50) are enough to show the method of the artist's usual work from nature. He *never sketched in tinted shade but at home*, in making studies for pictures, or for engravers, as in the series of the *Liber Studiorum*. When he wanted light and shade in painting from nature, he always gave color also, for it was as easy to him to give the depth of shade he wanted in different tints, as in one; and the result was infinitely more complete and true. The series of water-color sketches and drawings which next follow, represent, therefore, his progress in color and chiaroscuro simultaneously; and I have placed under the next following numbers, examples of his water-color work from the beginning of its effective power, to the end. But these are not, as in the Scholar's group, all equally exemplary. The absolutely safe and right models are already given in the Scholar's group: here, there are instances given of methods questionable—or distinctly dangerous, as well as of the best. Thus Turner drew for several years almost exclusively in neutral tint, as in No. 51: but it is not at all certain that this practice should be enforced as academical; and again, the drawing of Folkestone is an instance of delicacy of work like

that of a miniature, applied to a large surface; this is certainly a practice liable to lead to the loss of simplicity and power:—it is one on the whole to be deprecated; and it gravely limited Turner's power of making large and manly drawings, at the time when it was most desirable for public instruction that he should have done so.

The drawings of Edinburgh, and Ivy Bridge, are types of his finest manner, unaffected by this weakness of minute execution. The drawings of Rochester and Dover show his minutest execution rightly applied, and his consummate skill in composition.

- |     |   |       |
|-----|---|-------|
| 51. | View of Tivoli. Neutral tint (one of multitudes, which had to be done before the great Tivolis could be), . . . . .                                 | K 9   |
| 52. | Ruins of the Savoy Chapel. Neutral tint, . . . . .  | K 8   |
| 53. | Early study of a cottage, . . . . .   | K 12  |
| 54. | The Castle of Aosta; in color, with the pencil study for it below: one of the series out of which Group VIII. (third hundred) was chosen, . . . . . | K 27  |
| 55. | Angry Swans, . . . . .  | K 122 |
| 56. | Study of pigs and donkeys, . . . . .  | K 53  |
| 57. | Study of ducks, . . . . .   | K 58  |
| 58. | Study of storm-clouds; with the plate afterward engraved from it by Turner himself beneath, . . . . .   | K 64  |
| 59. | Three studies at sea, . . . . .   | K 65  |
| 60. | Study of evening and night skies, . . . . .   | K 63  |
| 61. | Shields. Engraved for Ports of England, . . . . .   | K 68  |
| 62. | Rochester. Engraved for Rivers of England, . . . . .  | K 69  |
| 63. | Dover. Engraved for Ports of England, . . . . .   | K 67  |
| 64. | Folkestone. Large drawing unfinished, . . . . .   | K 44  |
| 65. | Edinburgh from the Calton Hill. Finished drawing, . . . . .   | K 35  |
| 66. | Ivy Bridge. Finished drawing, . . . . .   | K 42  |
| 67. | Battle of Fort Rock. Finished drawing, . . . . .  | K 41  |
| 68. | The Source of the Arveron. Unfinished, large, . . . . .   | K 125 |
| 69. | Grenoble. Unfinished, large, . . . . .  | K 126 |
| 70. | Grenoble. " " ; . . . . .   | K 127 |

The two last drawings are among the most exquisite fragments existing of his central manner. They are beginnings of a favorite subject, which he seems to have found beyond his power on this scale, and afterward finished on a reduced one. They may properly close the examples of his work in pure water-color. Two specimens of his sketching in oil—a rare practice with him—follow; and then, a magnificent selection from the body-color drawings of his best time, which contain the most wonderful things he ever did in his own special manner.

71. Rocks in Bolton glen, . . . . .	κ 128

Henceforward to the close of the Student's group are placed examples of his quite latest manner: in outline, more or less fatigued and hasty, though full of detail—in color, sometimes extravagant—and sometimes gloomy; but every now and then manifesting more than his old power in the treatment of subjects under aërial and translucent effect.

## SECOND HUNDRED.

(*Cabinet Drawings.*)

THE second century of the drawings, as rearranged, forms a mixed group, containing both early and late work, which I have thrown together in a cluster, in order to make the arrangement of the following three hundred drawings more consistent.

The first thirty drawings of this hundred are all early ; and of consummate value and interest. The remaining seventy were made at the time of the artist's most accomplished power ; but are for the most part slight, and intended rather to remind *himself* of what he had seen, than to convey any idea of it to others. Although, as I have stated, they are placed in this group because otherwise they would have interfered with the order of more important drawings, it cannot but be interesting to the student to see, in close sequence, the best examples of the artist's earliest and latest methods of sketching.

## GROUP III.

(*Second Hundred.*)

Fifteen pencil drawings of Scottish scenery made on his first tour in Scotland, and completed afterward in light and shade, on tinted paper touched with white. Several of his best early colored drawings were made from these studies, and are now in the great collection at Farnley.

They are all remarkable for what artists call "breadth" of effect (carried even to dulness in its serene rejection of all minor elements of the picturesque—craggy chasms, broken waterfalls, or rustic cottages); and for the labor given in careful pencil shading, to round the larger masses of mountain, and show the relation of the clouds to them. The mountain forms are always perfect, the clouds carefully modelled; when they cross the mountains they do so solidly, and there is no permission of the interferences of haze or rain. The composition is always scientific in the extreme.

I do not know the localities, nor are they of much consequence. Their order is therefore founded, at present, only on the character of subject; but I have examined this series less carefully than any of the others, and may modify its sequence in later editions of this catalogue. The grand introductory upright one is, I think, of Tummel bridge, and with the one following, 102, shows the interest which the artist felt from earliest to latest days in all rustic architecture of pontifical character.

The four following subjects, 103-106, contain materials used in the Liber composition called "Ben Arthur"; 114 is called at Farnley "Loch Fyne."

The reference numbers in the right hand column are henceforward to the cabinet frames as at present arranged, unless the prefixed K indicate an insertion of one out of the Kensington series.

## GROUP IV.

(*Second Hundred.*)

### STUDIES OF BIRDS AND FISH.

Placed immediately after the Scottish series in order to show the singularly various methods of the Master's study. These sketches are, however, at least ten years later in date. They are all executed with a view mainly to color, and, in color, to its ultimate refinements, as in the gray down of the birds, and the subdued iridescences of the fish.

There is no execution in water-color comparable to them for combined rapidity, delicacy, and precision—the artists of the world may be challenged to approach them; and I know of only one piece of Turner's own to match them—the Dove at Farnley.

GROUP V.

(*Second Hundred.*)

COLORED SKETCHES IN SWITZERLAND.

These quite stupendous memoranda were made on his first Swiss journey, 1803, and are at the maximum of his early power. Several of very high quality were made from those on the St. Gothard; a beautiful one at Farnley from 126; and the greatest of the Liber mountain subjects, from 123, 125, and 127.

121.	On the pass of St. Gothard, above Amsteg, . . . . .	324
122.	The old road, pass of St. Gothard, . . . . .	320
123.	The old Devil's Bridge, pass of St. Gothard, . . . . .	321

127.	The Mer-de-glace of Chamouni, looking down- stream, . . . . .	322
128.	Contamines, Savoy, . . . . .	κ 38

(Two subjects still wanting to this series, may, I believe, be furnished out of the reserves in tin cases.)

---

\* I may possibly afterward, with the permission of the Trustees, be able to supply this gap with a drawing of a Jay, given me by Mr. W. Kingsley, or with some purchased example—there being no more than these four in the National collection.

## GROUP VI.

(Second Hundred.)

Fifty sketches on his later Continental journeys, made in pencil outline only on the spot, and colored from memory. Of the finest quality of pure Turnerian art, which is in sum, as explained in my various university lectures over and over again, *the true abstraction of the color of Nature as a distinct subject of study*, with only so much of light and shade as may explain the condition and place of the color, without tainting its purity. In the modern French school, all the color is taken out of Nature, and only the mud left. By Turner, all the mud is taken out of Nature, and only the color left. Tones of chiaroscuro, which depend *upon* color, are however often given in full depth, as in the Nos. 138, 139, 179, and 180.

*(Second Hundred.)*

## TWENTY SKETCHES IN VENICE,

Characteristic of Turner's entirely final manner, when the languor of age made him careless, or sometimes reluctant in outline, while yet his hand had lost none of its subtlety, nor his eye of its sense for color. From the last but one (199) he painted the best of his late Academy pictures, now in the upper gallery, and 188 has itself been carried forward nearly to completion.

## THIRD HUNDRED.

THE third century of drawings consists entirely of sketches or compositions made in Italy, or illustrative of Italian scenery and history. It opens with a group of pencil sketches made in Savoy and Piedmont in 1803, showing the artist's first impressions of the Italian Alps. Then follow the vignettes made to illustrate Rogers' poem of "Italy," many of which were composed from the preceding pencil sketches; and then follow fifty sketches made on his first visit to southern Italy, divided into three groups, illustrative of Rome, Tivoli, and Naples.

---

## GROUP VIII.

(*Third Hundred.*)

## TWENTY-FIVE SKETCHES IN SAVOY AND PIEDMONT,

With very black, soft pencil, on dark tinted paper, touched with white. Of the highest value and interest. Made, I believe, in 1803; at all events on his first Continental journey: all in complete chiaroscuro, and in his grandest manner. They are absolutely true to the places; no exaggeration is admitted anywhere or in any respect, and the compositions, though in the highest degree learned, and exemplary of constructive principles in design, are obtained simply by selection, not alteration, of forms—and by the introduction either of clouds, figures, or entirely probable light and shade.

All are rapid and bold; some, slight and impetuous; but they cannot be too constantly studied, or carefully copied, by landscape students, since, whatever their haste, the conception is always entirely realized; and the subject disciplined into a complete picture, balanced and supported from corner to corner, and concluded in all its pictorial elements.

Observe also that although these sketches give some of the painter's first, strongest, and most enduring impressions of mountain scenery, and architecture of classical dignity—their especial value to the general student is that they are in no respect distinctively *Turnerian*, but could only be known by their greater strength and precision from studies such as Gainsborough or Wilson might have made at the same spots: and they are just as useful to persons incapable of coloring, in giving them the joy of rightly treated shade, as to the advanced colorist in compelling him to reconsider the foundations of effect, which he is too often beguiled into forgetting.

## GROUP IX.

(*Third Hundred.*)

The vignettes to Rogers' "Italy" are of Turner's best time, and contain some of his very best work; the more interesting because, with few exceptions, they are quickly, and even slightly, executed. Whether slight, or carried on to completion, they are in the highest degree exemplary to the student of water-color; one only excepted, the "Venice," which, whether painted during some fit of slight illness, or perhaps hurriedly by candlelight under some unexpected call from the engraver, is utterly different from the rest, and wholly unworthy of the painter. This is therefore excluded from the series, and placed among the supplementary studies. The total number of vignettes executed by Turner for Rogers' "Italy" was twenty-five; but one, the "Dead-house of St. Bernard," is irrevocably in America, and the exclusion of the "Venice" leaves the total number in these cases, twenty-three. To complete them to a symmetrical twenty-five I have placed with them, to terminate their series, the two of the later series executed for Rogers' "Poems," which have most in common with the earlier designs of the "Italy."

The twenty-three Italian ones are arranged with little variation from the order in which they are placed as the illustrations of the poems; the reasons for admitted variations will be comprehended without difficulty. The two that are added are bold compositions from materials in Italy; the last was the illustration of Rogers' line, "The shepherd on Tornaro's misty brow," beginning a description of sunrise as the type of increasing knowledge and imagination in childhood. But there is no such place known as Tornaro, and the composition, both in the color of sea and boldness of precipice, resembles only the scenery of the Sicilian Islands.

---

## GROUP X.

(*Third Hundred.*)

THIRTY SKETCHES IN PENCIL, SOMETIMES TOUCHED WITH  
COLOR, AT ROME.

This group, with the two following, exemplify the best drawings made by Turner from Nature. All his powers were at this period in perfection; none of his faults had developed themselves; and his energies were taxed to the utmost to

seize, both in immediate admiration, and for future service, the loveliest features of some of the most historically interesting scenery in the world.

There is no exaggeration in any of these drawings, nor any conventionalism but that of outline. They are, in all respects, the most true and the most beautiful ever made by the painter ; but they differ from the group first given (VII.) in being essentially Turnerian, representing those qualities of form and color in which the painter himself most delighted, and which persons of greatly inferior or essentially different faculties need not hope for benefit by attempting to copy. The quantity of detail given in their distances can only be seen, in a natural landscape, by persons possessing the strongest and finest faculties of sight : and the tones of color adopted in them can only be felt by persons of the subtlest color-temperament, and happily-trained color-disposition. To the average skill, the variously imperfect ocular power, and blunted color-feeling of most of our town-bred students, the qualities of these drawings are—not merely useless, but, in the best parts of them, literally invisible.

On the other hand, to students of fine faculty and well-trained energy, no drawings in the world are to be named with these fifty (251–300), as lessons in landscape drawing :

251.	Rome from Monte Mario (finest pencil), . . . . .	κ 101
252.	Rome from Monte Mario (partly colored), . . . . .	κ 103

299.	Monte St. Angelo and Capri. Morning, .	336
300.	Monte St. Angelo and Capri. Evening, . .	337

---

#### FOURTH HUNDRED.

THE fourth century of drawings are all of the later middle period of Turner's career, where the constant reference to the engraver or the Academy-visitor, as more or less the critic or patron of his work, had betrayed him into mannerisms and fallacies which gradually undermined the constitution of his intellect: while yet his manual skill, and often his power of imagination, increased in certain directions. Some of the loveliest, and executively the most wonderful, of his drawings belong to this period; but few of the greatest, and none of the absolutely best, while many are inexcusably faultful or false. With few exceptions, they ought not to be copied by students, for the best of them are inimitable in the modes of execution peculiar to Turner, and are little exemplary otherwise.

The initial group of this class, the thirteenth in consecutive order, contains the best of the vignettes executed in illustration of Rogers' "Pleasures of Memory," "Voyage of Colum-

bus," and other minor poems. In most cases they are far more highly finished than those of the "Italy;" but few show equal power, and none the frank sincerity. The two best of all had much in common with the Italian series, and have been placed with it; but "The Twilight" (301), "Greenwich" (306), "Bolton Abbey" (311), "Vallombré" (316), and "Departure of Columbus" (321), are among the subtlest examples of the artist's peculiar manner at this period; and all, as now arranged up to the number 325, have a pretty connection and sequence, illustrative of the painter's thought, no less than of the poet's.

They have a farther interest, as being the origin of the loveliest engravings ever produced by the pure line; and I hope in good time that proofs of the plates may be exhibited side by side with the drawings. In arranging the twenty-five excellent ones just described, I have thrown out several unworthy of Turner—which, however, since they cannot be separated from their proper group, follow it, numbering from 326 to 335; the gaps being filled up by various studies for vignettes of the "Italy" as well as the "Poems," which I extricated from the heaps of loose sketches in the tin cases.

---

### GROUP XIII.

(*Fourth Hundred.*)

301.	Twilight,	. . . . .	226
302.	Gypsies,	. . . . .	231
303.	The Native Village,	. . . . .	227
304.	Greenwich,	. . . . .	234
305.	The Water-gate of the Tower,	. . . . .	235
306.	St. Anne's Hill,	. . . . .	228
307.	St. Anne's Hill,	. . . . .	229
308.	The Old Oak in Life,	. . . . .	232
309.	The Old Oak in Death,	. . . . .	233
310.	The Boy of Egremont,	. . . . .	236

311.	Bolton Abbey, . . . . .	237
312.	St. Herbert's Isle, Derwentwater. (Ideal), . . . . .	238
313.	Lodore, . . . . .	239
314.	Loch Lomond, . . . . .	240
315.	Jacqueline's Cottage. (Ideal), . . . . .	241
316.	The Falls at Vallombré. (Ideal), . . . . .	243
317.	The Alps at Daybreak. (Ideal),* . . . . .	242
318.	The Captive. (Ideal), . . . . .	245
319.	St. Julian's Well. (Ideal), . . . . .	244
320.	Columbus at La Rabida, . . . . .	246
321.	Departure of Columbus, . . . . .	247
322.	Dawn on the last day of the Voyage, . . . . .	248
323.	Morning in America, . . . . .	249
324.	Cortez and Pizarro, . . . . .	250
325.	Datur Hora Quiet, . . . . .	397

Next follow the inferior ones; among which the pretty "Rialto" is degraded because there is no way over the bridge, and the "Ducal Palace" for its coarse black and red color. So also the "Manor-house," though Mr. Goodall made a quite lovely vignette from it; as also from the "Warrior Ghosts."

326.	The English Manor-house, . . . . .	399
327.	The English School, . . . . .	396
328.	The English Fair, . . . . .	398

330.	Venice. The Rialto, . . . . .	394
331.	The Simoom, . . . . .	393
332.	The War-spirits, . . . . .	400
333.	The Warrior Ghosts, . . . . .	395
334.	Study for the Warrior Ghosts, . . . . .	κ 87a
335.	Second study for the same vignette, . . . . .	κ 87b

---

\* And the figures absurd; but by Rogers' fault, not Turner's. See the very foolish poem.

## GROUP XIV.

*(Fourth Hundred.)*

## RIVERS OF ENGLAND.

This most valuable group consists of fifteen finished drawings, which always remained in Turner's possession, he refusing to sell separately, and the public of his time not caring to buy in mass.

They were made for publication by engraving; and were skilfully engraved; but only in mezzotint. They are of the highest quality, in so far as work done for engraving can be, and all finished with the artist's best skill. Two of the series of fifteen are placed in the Student's group, and room thus made for two of the "Ports," which are consecutive with the following group:

336.	Stangate Creek,	(on River)	Medway,	.	.	161
337.	Totness,	"	Dart,	.	.	162
338.	Dartmouth,	"	Dart,	.	.	163
339.	Dartmouth Castle,	"	Dart,	.	.	164
340.	Okehampton Castle,	"	Okement,	.	.	165
341.	Arundel Castle,	"	Arun,	.	.	166
342.	Arundel Park,	"	Arun,	.	.	167
343.	More Park,	"	Colne,	.	.	168
344.	Newcastle,	"	Tyne,	.	.	171
345.	Kirkstall Abbey,	"	Aire,	.	.	173
346.	Kirkstall Lock,	"	Aire,	.	.	172
347.	Brougham Castle,	"	Lowther,	.	.	174
348.	Norham Castle,	"	Tweed,	.	.	175
349.	Whitby,	.	.	.	.	170
350.	Scarborough,	.	.	.	.	169

## GROUP XV.

*(Fourth Hundred.)*

## PORTS OF ENGLAND.

Five finished drawings, nearly related in style to the Rivers ; but nobler, and two of them ("The Humber" and "Sheerness") among the greatest of Turner's existing works.

The "Whitby" and "Scarborough" belong nominally to this group, but in style they are like the Rivers, with which I have placed them ; of course consulting in these fillings up of series, the necessary divisions into five adopted for the sake of portability. The seven drawings were illustrated in their entirety to the best of my power in the text of the work in which they were published—the "Harbors of England."

Five finished drawings of very high quality, made for mezzotint engraving, and admirably rendered by Mr. Lupton under Turner's careful superintendence.

351.	The Humber,	.	.	.	.	.	.	378
352.	The Medway,	.	.	.	.	.	.	376
353.	Portsmouth,	.	.	.	.	.	.	379
354.	Sheerness,	.	.	.	.	.	.	380
355.	Ramsgate,	.	.	.	.	.	.	377

## GROUP XVI.

*(Fourth Hundred.)*

Twenty-five sketches, chiefly in Venice. Late time, extravagant, and showing some of the painter's worst and final faults ; but also, some of his peculiar gifts in a supreme degree.

356.	The Ducal Palace,	. . . . .	351
357.	The Custom House,	. . . . .	355
358.	The Grand Canal,	. . . . .	352
359.	Casa Grimani and Rialto,	. . . . .	354
360.	The Rialto,	. . . . .	353
361.	Grand Canal above Rialto,	. . . . .	356
362.	On the Cross-canal between Bridge of Sighs and Rialto,	. . . . .	358
363.	The same, nearer,	. . . . .	359
364.	Cross-canal near Arsenal,	. . . . .	357
365.	San Stefano,	. . . . .	360
366.	South side of St. Mark's,	. . . . .	291
367.	Ducal Palace,	. . . . .	292
368.	Boats on the Giudecca,	. . . . .	293
369.	Steamers,	. . . . .	361
370.	?	. . . . .	362
371.	Tours,	. . . . .	363
372.	?	. . . . .	364
373.	?	. . . . .	365
374.	?	. . . . .	366
375.	?	. . . . .	367
376.	?	. . . . .	368
377.	?	. . . . .	369
378.	?	. . . . .	370
379.	Arsenal, Venice,	. . . . .	371
380.	Fish Market,	. . . . .	372

---

---

 GROUP XVIII.

(*Fifth Hundred.*)

FINEST COLOR ON GRAY. (LATE.)

Twenty-five rapid studies in color on gray paper. Of his best late time, and in his finest manner, giving more conditions of solid form than have ever been expressed by means at once so subtle and rapid.

401.	Full sails on Seine,	. . . . .	101
402.	The breeze beneath the Coteau,	. . . . .	102
403.	Heavy barges in a gust,	. . . . .	103
404.	French lugger under the Héve,	. . . . .	104
405.	The steamer,	. . . . .	105
406.	Havre,	. . . . .	106
407.	Havre,	. . . . .	107
408.	Harfleur,	. . . . .	108

409.	Honfleur in distance,	. . . . .	113
410.	Honfleur? Compare Seine series,	. . . . .	110
411.	Cherbourg,	. . . . .	111
412.	Cherbourg,	. . . . .	112
413.	Street with canal,	. . . . .	109
414.	Rouen,	. . . . .	114
415.	The Gray Castle,	. . . . .	115
416.	Nantes,	. . . . .	116
417.	Nantes?	. . . . .	117
418.	Angers?	. . . . .	118
419.	Beaugency,	. . . . .	119
420.	Beaugency,	. . . . .	120
421.	Chateau de Blois,	. . . . .	121
422.	Chateau Hamelin,	. . . . .	122
423.	? . . . .	. . . . .	123
424.	? . . . .	. . . . .	124
425.	Tours? The Scarlet Sunset,	. . . . .	125

This last magnificent drawing belongs properly to the next group, which is almost exclusively formed by drawings in which the main element is color, at once deep and glowing. But the consistency of the group is in color and treatment; and in the uniform determination of the artist that every subject shall at least have a castle and a crag in it—if possible a river; or by Fortune's higher favor—blue sea, and that all trees shall be ignored, as shady and troublesome excrescences. In default of locality, I have put here and there a word of note or praise.

---

## GROUP XIX.

(*Fifth Hundred.*)

FINEST COLOR ON GRAY. (LATEST.)

426.	Rhine. (Yellow raft essential),	. . . . .	176
427.	Too red and yellow. Full of power in form,	. . . . .	177
428.	Delicate, and very lovely,	. . . . .	178

429.	Rhine? or Danube? Very grand,	. . .	179
430.	Bacharach. Wonderful, but too wild,	. . .	180
431.	Best quality—all but the white chalk,	. . .	181
432.	Heidelberg. Rosy tower, and a tree or two!		
	Lovely,	. . . . .	182
433.	Such things <i>are</i> , though you mayn't believe it,	. . .	183
434.	Dinant, Meuse. A mighty one,	. . .	184
435.	Dinant. Bronzed sunset. Firm and good,	. . .	185
436.	Luxembourg. Splendid,	. . . . .	186
437.	Luxembourg. Forced, and poor,	. . .	187
438.	Luxembourg. Highest quality,	. . . . .	188
439.	Luxembourg. Supreme of the set, except,	. . .	189
440.	Luxembourg. Probably the grandest drawing of		
	this date,	. . . . .	190
441.	Luxembourg. Too blue and red, but noble,	. . .	191
442.	Meuse. Admirable, but incomplete,	. . .	192
443.	Coast of Genoa? Good, but dull,	. . .	193
444.	Coast of Genoa? Highest quality,	. . .	194
445.	Italian lakes? Supreme of all, for color,	. . .	195
446.	Marseilles? Splendid, but harsh,	. . .	196
447.	Riviera? Fine, but a little hard and mannered,	. . .	197
448.	Sorrento coast? Sunset. Lovely,	. . .	198
449.	Vico? coast of Sorrento. The same type: poorer,		199
450.	The Vermilion Palace,	. . . . .	200

I know scarcely any of their subjects except the Luxembourgs; and have therefore left them in their first rough arrangement; although subjects probably Genovese and South Italian are mixed with others from Germany and the Rhine.

---

## GROUP XXI.

(*Fifth Hundred.*)

### THE SEINE.

In this series the best drawings are as far as possible put together—geographical order being ignored, rather than mix the second-rate ones with those of entirely satisfactory quality. But the course of subject for the most part is in ascent of the river ; and the two vignettes begin and end the whole.

466.	Chateau Gaillard. Vignette, . . . . .	151
467.	Havre. Sunset in the port, . . . . .	157
468.	Havre. Twilight outside the port, . . . . .	158

# GUIDE, ETC.

---

## PART I.

OVER the entrance gate of the Academy are three of the most precious pieces of sculpture in Venice ; her native work, dated ; and belonging to the school of severe Gothic which indicates the beginning of her Christian life in understanding of its real claims upon her.

St. Leonard on the left, St. Christopher on the right, under Gothic cusped niches. The Madonna in the centre, under a simple gable ; the bracket-cornice beneath bearing date 1345 ; the piece of sculpture itself engaged in a rectangular panel, which is the persistent sign of the Greek schools ; descending from the Metopes of the Parthenon.

You see the infant sprawls on her knee in an ungainly manner ; she herself sits with quiet maiden dignity, but in no manner of sentimental adoration.

That is Venetian naturalism ; showing their henceforward steady desire to represent things as they really (according to the workman's notions) might have existed. It begins first in this century, separating itself from the Byzantine formalism—the movement being the same which was led by Giotto in Florence fifty years earlier. These sculptures are the result of his influence, from Padua, and other such Gothic power, rousing Venice to do and think for herself, instead of letting her Greek subjects do all for her. This is one of her first performances, independently of them. She has not yet the least notion of making anybody stand rightly on their feet ; you see how St. Leonard and St. Christopher point their

toes. Clearly, until we know how to do better than this, in perspective and such matters, our painting cannot come to much. Accordingly, all the Venetian painting of any importance you are now to see in the Academy is subsequent to these sculptures. But these are, fortunately, dated—1378 and 1384. Twenty years more will bring us out of the fourteenth century. And therefore, broadly, all the painter's art of Venice begins in the fifteenth; and we may as well at once take note that it ends with the sixteenth. There are only these two hundred years of painting in Venice. Now, without much pause in the corridor, though the old well in the cortile has its notabilities if one had time—up the spiral stairs, and when you have entered the gallery and got your admission tickets—(quite a proper arrangement that you should pay for them; if I were a Venetian prefect, you should pay a good deal more for leave to come to Venice at all, that I might be sure you cared to come)—walk straight forward till you descend the steps into the first room in the arrangement of the Academy catalogue. On your right, at the bottom of the steps, you see a large picture (16) in a series of compartments, of which the central one, the Crowning of the Virgin, was painted by a Venetian vicar (vicar of St. Agnes), in 1380. A happy, faithful, cheerful vicar he must have been; and any vicar, rector, or bishop who could do such a thing now would be a blessing to his parish, and delight to his diocese. Symmetrical, orderly, gay, and in the heart of it nobly grave, this work of the old Plebanus has much in it of the future methods of Venetian composition. The two angels peeping over the arms of the throne may remind you to look at its cusped arches, for we are here in central Gothic time, thirty years after the sea-façade of the Ducal Palace had been built.

Now, on the opposite side of the room, over the door leading into the next room, you see (1) in the Academy catalogue "The work of Bartholomew Vivarini of Murano, 1464," showing you what advance had been made in eighty years. The figures still hard in outline—thin (except the Madonna's throat, which always, in Venice, is strong as a pillar), and

much marked in sinew and bone (studied from life, mind you, not by dissection); exquisitely delicate and careful in pure color; in character, portraits of holy men and women, such as then were. There is no idealism here whatever. Monks and nuns had indeed faces and mien like these saints, when they desired to have the saints painted for them.

A noble picture; not of any supreme genius, but completely containing the essence of Venetian art.

Next, going under it, through the door, you find yourself in the principal room of the Academy, which please cross quietly to the window opposite, on the left of which hangs a large picture which you will have great difficulty in seeing at all, hung as it is against the light; and which, in any of its finer qualities, you absolutely cannot see; but may yet perceive what they are, latent in that darkness, which is all the honor that the kings, nobles, and artists of Europe care to bestow on one of the greatest pictures ever painted by Christendom in her central art-power. Alone worth an entire modern exhibition-building, hired fiddlers and all; here you have it jammed on a back wall, utterly unserviceable to human kind, the little angels of it fiddling unseen, unheard by anybody's heart. It is the best John Bellini in the Academy of Venice; the third best in Venice, and probably in the world. Repainted, the right-hand angel, and somewhat elsewhere; but on the whole perfect; unspeakably good, and right in all ways. Not inspired with any high religious passion; a good man's work, not an enthusiast's. It is, in principle, merely the perfecting of Vivarini's; the saints, mere portraits of existing men and women; the Madonna, idealized only in that squareness of face and throat, not in anywise the prettier for it, otherwise a quite commonplace Venetian woman. Such, and far lovelier, you may see living to-day, if you can see—and may make manifest, if you can paint.

And now, you may look to the far end of the room, where Titian's "Assumption" has the chairs put before it; everybody being expected to sit down, and for once, without asking what o'clock it is at the railroad station, reposefully admire.

Of which, hear first what I wrote, very rightly, a quarter of a century ago.

“The traveller is generally too much struck by Titian’s great picture of ‘The Assumption’ to be able to pay proper attention to the other works in this gallery. Let him, however, ask himself candidly how much of his admiration is dependent merely on the picture’s being larger than any other in the room, and having bright masses of red and blue in it; let him be assured that the picture is in reality not one whit the better either for being large or gaudy in color, and he will then be better disposed to give the pains necessary to discover the merit of the more profound works of Bellini and Tintoret.”

I wrote this, I have said, *very* rightly, not *quite* rightly. For if a picture is good, it *is* better for being large, because it is more difficult to paint large than small; and if color is good, it *may be* better for being bright.

Nay, the fault of this picture, as I read it now, is in not being bright enough. A large piece of scarlet, two large pieces of crimson, and some very beautiful blue, occupy about a fifth part of it; but the rest is mostly fox color or dark brown: majority of the apostles under total eclipse of brown. St. John, there being nobody else handsome to look at, is therefore seen to advantage; also St. Peter and his beard; but the rest of the lower canvas is filled with little more than flourishings of arms and flingings of cloaks, in shadow and light.

However, as a piece of oil painting, and what artists call “composition,” with entire grasp and knowledge of the action of the human body, the perspectives of the human face, and the relations of shade to color in expressing form, the picture is deservedly held unsurpassable. Enjoy of it what you can; but of its place in the history of Venetian art observe these three following points:

I. The throned Madonnas of Vivarini and Bellini were to Venice what the statue of Athena in the Brazen House was to Athens. Not at all supposed to *be* Athena, or to *be* Madonnas; but symbols, by help of which they conceived the pres-

ence with them of a real Goddess. But this picture of Titian's does not profess to symbolize any Virgin here with us, but only to show how the Virgin was taken away from us a long time ago. And professing to represent this, he does not in the least believe his own representation, nor expect anybody else to believe it. He does not, in his heart, believe the Assumption ever took place at all. He is merely putting together a stage decoration of clouds, little boys, with wings stuck into them, and pantomime actors in studied positions, to amuse his Venice and himself.

II. Though desirous of nothing but amusement, he is not, at heart, half so much amused by his work as John Bellini, or one-quarter so much amused as the innocent old vicar. On the contrary, a strange gloom has been cast over him, he knows not why; but he likes all his colors dark, and puts great spaces of brown, and crimson passing into black, where the older painters would have made all lively. Painters call this "chiaroscuro." So also they may call a thunder-cloud in the sky of spring; but it means more than light and shade.

III. You see that in all the three earlier pictures everybody is quiet. Here, everybody is in a bustle. If you like to look at my pamphlet on the relation of Tintoret to Michael Angelo, you will see how this comes to pass, and what it means. And that is all I care for your noticing in the Assumption, just now.

Next, look on right and left of it, at the two dark pictures over the doors (63, 25).

Darkness visible, with flashes of lightning through it. The thunder-cloud upon us, rent with fire.

Those are Tintorets; finest possible Tintorets; best possible examples of what, in absolute power of painting, is supremest work, so far as I know, in all the world.

Nothing comes near Tintoret for colossal painter's power as such. But you need not think to get any good of these pictures; it would take you twenty years' work to understand the fineness of them as painting; and for the rest, there is little good in them to be got. Adam and Eve no more sat in that warm-weather picnic manner, helping each other politely to apples, on the occasion of their fall, than the Madonna went

up all bending about in her red and blue cloak on the occasion of her Assumption. But of the wrong and the truth, the error and the glory, of these pictures, I have no time to speak now ; nor you to hear. All that you have to notice is that painting has now become a dark instead of bright art, and in many ways a frightful and unpleasant art, or else I will add once for all, referring you for proof of it to the general examples of Venetian work at this late epoch, supplied as a luxury to foreign courts, a lascivious art.\*

Nevertheless, up to the time when Tintoret painted the Crucifixion in the Scuola di San Rocco, Venice had not in heart abjured her religion. The time when the last chord of its faith gives way cannot be discerned, to-day and hour ; but in that day and hour of which, for external sign, we may best take the death of Tintoret in 1594, the Arts of Venice are at an end.

I have therefore now shown you the complete course of their power, from 1380 at the Academy gates, to 1594—say, broadly, two centuries (her previous art being only architectural, mosaic, or decorative sculpture). We will now go through the rooms, noticing what is best worth notice in each of the epochs defined ; essentially, you observe, three. The first we may call the Vivarini epoch, bright, innocent, more or less elementary, entirely religious art—reaching from 1400 to 1480 ; the second (which for reasons presently to be shown, we will call the Carpaccian epoch), sometimes classic and mythic, as well as religious, 1480–1520 ; the third, supremely powerful art corrupted by taint of death, 1520–1600, which we will call the Tintoret epoch.

Of course the lives of the painters run in and out across

---

\* One copy of Titian's work bearing such commercial value, and showing what was briefly the Gospel preached by Missionary Venice to foreign nations in the sixteenth century, you will find presently in the narrow corridor, No. 347 : on which you will usually also find some modern copyist employed, for missionary purposes ; but never on a Vivarini. And in thus becoming dark, terrific, and sensual, Venetian art led the way to the mere naturalism and various baseness of following European art with the rubbish of which that corridor (Sala ix. Numbers 276 to 353) is mostly filled.

these limits ; yet if you fasten these firmly in your mind—80, 40, 80—you will find you have an immense advantage and easy grip of the whole history of Venetian art.

In the first epoch, however, I do not mean to detain you ; but the room you first entered, into which I will now ask you to return, is full of pictures which you will find interesting if you have time to decipher them, and care for Christianity and its expressions. One only I will ask you to look at, after Titian's Assumption ; the little Ascension by Nicolo Semitecolo, low down, on the right of the vicar's picture in Number 16. For that Ascension is painted in real belief that the Ascension *did* take place ; and its sincerity ought to be pleasant to you, after Titian's pretence.

Now, returning up the steps, and taking the corridor to your right, opposite the porter's table, enter the little room through the first door on your right ; and therein, just on your right as you go in, is Mantegna's St. George, No. 273 ; to which give ten minutes quietly, and examine it with a magnifying glass of considerable power. For in that you have a perfect type of the Italian methods of execution corresponding to the finish of the Dutch painters in the north ; but far more intellectual and skilful. You cannot see more wonderful work in minute drawing with the point of the brush ; the virtue of it being that, not only every touch is microscopically minute, but that, in this minuteness, every touch is considered, and every touch right. It is to be regarded, however, only as a piece of workmanship. It is wholly without sentiment, though the distant landscape becomes affecting through its detailed truth—the winding road under the rocks, and the towered city, being as full of little pretty things to be searched out as a natural scene would be.

And I have brought you first, in our now more complete review, to this picture, because it shows more clearly than any other through what tremendous work the Italian masters obtained their power.

Without the inherited strength won by this precision of drawing in the earlier masters, neither Titian nor Tintoret could have existed.

Return into the corridor, and walk along it to the end without wasting time ;—there is a Bonifazio, No. 326, worth a painter's while to stop at, but in general mere Dutch rubbish. Walk straight on, and go in at the last door on the left, within which you will find

456, Cima da Conegliano. An entirely sincere and noble picture of the central epoch. Not supreme in any artistic quality, but good and praiseworthy in all ; and, as a conception of its subject, the most beautiful you will find in Venice. Grudge no time upon *it* ; but look at nothing else here ; return into the corridor, and proceed by it into the great room.

Opposite you is Titian's great "Presentation of the Virgin," interesting to artists, and an unusually large specimen of Titian's rough work. To me, simply the most stupid and uninteresting picture ever painted by him : if you can find anything to enjoy in it, you are very welcome. I have nothing more to say of it, except that the color of the landscape is as false as a piece of common blue tapestry, and that the "celebrated" old woman with her basket of eggs is as dismally ugly and vulgar a filling of spare corner as was ever daubed on a side-scene in a hurry at Drury Lane.

On the other side of the room, 543, is another wide waste of canvas ; miserable example of the work subsequent to Paul Veronese ; doubly and trebly mischievous in caricaturing and defiling all that in the master himself is noble : to look long at such a thing is enough to make the truest lovers of Venetian art ashamed of Venice, and of themselves. It ought to be taken down and burned.

Turn your back to it, in the centre of the room ; and make up your mind for a long stand ; for opposite you, so standing, is a Veronese indeed, of the most instructive and noble kind (489) ; and beneath it, the best picture in the Academy of Venice, Carpaccio's "Presentation" (488).

Of the Veronese, I will say nothing but that the main instructiveness of it is in the exhibition of his acquired and inevitable faults (the infection of his *æra*), with his own quietest and best virtues. It is an artist's picture, and even only

to be rightly felt by very good artists ; the aerial perspectives in it being extremely subtle, and rare, to equal degree, in the painter's work. To the general spectator, I will only observe that he has free leave to consider the figure of the Virgin execrable ; but that I hope, if he has a good opera-glass, he will find something to please him in the little rose-bush in the glass vase on the balustrade. I would myself give all the bushes—not to say all the trees—and all the seas, of Claude and Poussin, in one bunch and one deluge—for this little rose-bush and its bottle.

488. "The Presentation in the Temple." Signed "Victor Carpaccio, 1510." From the Church of St. Job.

You have no similar leave, however, good general spectator, to find fault with anything *here!* You may measure yourself, outside and in—your religion, your taste, your knowledge of art, your knowledge of men and things—by the quantity of admiration which honestly, after due time given, you can feel for this picture.

You are not required to think the Madonna pretty, or to receive the same religious delight from the conception of the scene, which you would rightly receive from Angelico, Filippo Lippi, or Perugino. This is essentially Venetian—prosaic, matter of fact—retaining its supreme common-sense through all enthusiasm.

Nor are you required to think this a first-rate work in Venetian color. This is the best picture in the Academy precisely because it is *not* the best piece of color there ; because the great master has subdued his own main passion, and restrained his color-faculty, though the best in Venice, that you might *not* say the moment you came before the picture, as you do of the Paris Bourdone (492), "*What a piece of color!*"

To Paris, the Duke, the Senate, and the Miracle are all merely vehicles for flashes of scarlet and gold on marble and silk ; but Carpaccio, in this picture of the Presentation, does not want you to think of *his* color, but of *your* Christ.

To whom the Madonna also is subjected—to whom all is subjected ; you will not find such another Infant Christ in

Venice. (But always look carefully at Paul Veronese's, for it is one of the most singular points in the character of this usually decorative and inexpressive painter, that his Infant Christs are always beautiful.)

For the rest, I am not going to praise Carpaccio's work. Give time to it; and if you don't delight in it, the essential faculty of enjoying good art is wanting in you, and I can't give it to you by ten minutes' talk; but if you begin really to feel the picture, observe that its supreme merit is in the exactly just balance of all virtue—detail perfect, yet inconspicuous; composition intricate and severe, but concealed under apparent simplicity; and painter's faculty of the supremest, used nevertheless with entire subjection of it to intellectual purpose. Titian, compared to Carpaccio, paints as a circus-rider rides—there is nothing to be thought of in him but his riding. But Carpaccio paints as a good knight rides; his riding is the least of him; and to himself—unconscious in its ease.

When you have seen all you can of the picture as a whole, go near, and make out the little pictures on the edge of St. Simeon's robe; four quite lovely ones; the lowest admitting, to make the whole perfect, delightful grotesque of fairy angels within a heavenly castle wall, thrusting down a troop of supine devils to the deep. The other three, more beautiful in their mystery of shade; but I have not made them out yet. There is one solemn piece of charge to a spirit folding its arms in obedience; and I think the others must be myths of creation, but can't tell yet, and must now go on quickly to note merely the pictures you should look at, reserving talk of them for a second number of this Guide.

483, 500, 524, containing all you need study in Bonifazio. In 500, he is natural and does his best; in 483, he pretends to religion, which he has not; in 524, to art, which he has not. The last is a monstrous example of the apathy with which the later Italian artists, led by Raphael, used this horrible subject to exhibit their ingenuity in anatomical posture, and excite the feeble interest of vulgar spectators.

503. Quiet Tintoret ; very noble in senators, poor in Madonna.

519. Quiet Paul Veronese ; very noble in St. Jerome's robe and Lion, and in little St. John's back. Not particularly so in anybody's front, but a first-rate picture in the picture way.

507. Dashing Tintoret ; fearfully repainted, but grand yet in the lighter figures of background.

496-502. Dashing Paul Veronese—splendid in art ; in conception of Evangelists—all that Venice wanted of them, at that day. You must always, however, judge her as you would a sailor—what would be ridiculous or bombastic in others has often some honesty in it with *her*. Think of these Evangelists as a kind of figure-heads of ships.

Enter now the great room with the Veronese at the end of it, for which the painter (quite rightly) was summoned before the Inquisition of State : you will find his examination, translated by a friend to whom I owe much in my old Venetian days, in the Appendix to my second Guide ; but you must not stop now at this picture, if you are in a hurry, for you can see the like of it, and better, in Paris ; but you can see nothing in all the world, out of Venice, like certain other pictures in this room.

Glancing round it, you see it may be generally described as full of pictures of street architecture, with various more or less interesting transactions going on in the streets. Large Canalettos, in fact ; only with the figures a little more interesting than Canaletto's figures ; and the buildings, on the whole, red and white or brown and white, instead of, as with Canaletto, black and white. And on consideration, and observation, you will perceive, if you *have* any perception of color, that Venetian buildings, and most others, being really red and white or brown and white, not black and white, this is really the right manner of painting them, and these are true and sufficient representations of streets, of landscapes, and of interiors of houses, with the people, as I said, either in St. Mark's Place, 555, or

at Grand Cairo, 540, or before the Castle of St. Angelo at Rome, 546, or by the old Rialto here, 564, being themselves also more or less interesting, if you will observe them, first in their dresses, which are very curious and pretty, and afterward in many other particulars, of which for the present I must leave you to make out what you can ; for of the pictures by Carpaccio in this room I must write an entirely separate account (begun already for one of them only, the Dream of St. Ursula, 533),\* and of the Gentile Bellini you can only know the value after good study of St. Mark's itself. Observe, however, at least in this, and in 548 and 564, the perfectly true representation of what the Architecture of Venice was in her glorious time ; trim, dainty—red and white like the blossom of a carnation—touched with gold like a peacock's plumes, and frescoed, even to its chimney-pots, with fairest arabesque—its inhabitants, and it together, one harmony of work and life—all of a piece, you see them, in the wonderful palace-perspective on the left in 548, with everybody looking out of their windows. And in this picture of St. Mark's, painted by John Bellini's good brother, true as he could, hue for hue, and ray for ray, you see that all the tossing of its *now* white marble foliage against the sky, which in my old book on Venice I compared to the tossed spray of sea waves (believing then, as I do still, that the Venetians in their living and breathing days of art were always influenced in their choice of guiding lines of sculpture by their sense of the action of wind or sea), were not, at all events, meant to be like sea foam white in anger, but like light spray in morning sunshine. They were all overlaid with gold.

Not yet in vicious luxury. Those porches of St. Mark's, so please you, English friends, were not thus gilt for the wedding of Miss Kilmansegg, nor are those pictures on the vaults advertisements, like yours in your railway stations ; all the arts

---

\* Of which, with her legend, if you care to hear more, you will find more in the three numbers of "Fors Clavigera" now purchaseable of my agent in Venice (Mr. Bunney, Fondamenta San Biagio, 2143), from whom all my recent publications on Venice may be also procured.

of England bent on recommending you cheap bathing machines and painless pills. Here are purer baths and medicines told of; here have been more ingenious engineers. From the Sinai desert, from the Sion rock, from the defiles of Lebanon, met here the ghosts of ancient builders to oversee the work, of dead nations, to inspire it—Bezaleel and the maids of Israel who gave him their jewels; Hiram and his forgers in the vale of Siddim, his woodmen of the Syrian forests; David the lord of war, and his Son the Lord of Peace, and the multitudes that kept holyday when the cloud filled the house they had built for the Lord of All—these in their myriads stood by, to watch, to guide; it might have been, had Venice willed, to bless.

Literally so, mind you. The wreathen work of the lily capitals and their archivolts, the glass that keeps unfaded their color—the design of that color itself, and the stories that are told in the glow of it—all these were brought by the Jew or the Tyrian, bringing also the treasures of Persia and Egypt; and with these, laboring beside them as one brought up with them, stood the Athena of Corinth, and the Sophia of Byzantium.

Not in vicious luxury these, yet—though in Tyrian splendor glows St. Mark's: nor those quiet and trim little houses on the right, joining the Campanile. You are standing (the work is so completely done that you may soon fancy yourself so) in old St. Mark's Place, at the far end of it, before it was enlarged; you may find the stone marking the whole length of it in the pavement, just opposite the easternmost door of the Café Florian. And there were none of those pompous loggie then, where you walk up and down before the café, but these trim, dainty, happily inhabited houses, mostly in white marble and gold, with disks of porphyry; and look at the procession coming toward you underneath them—what a bed of moving flowers it is! Not Birnam Wood coming, gloomy and terrible, but a very bloom and garland of good and knightly manhood—its Doge walking in the midst of it—simple, valiant, actual, beneficent, magnificent king. Do you see better sights than this in St. Mark's Place now, in your days of progress?

Now, just to get some little notion how the figures are "put in" by these scrupulous old formalists, take the pains to look closely at the first you come upon of the procession on the extreme left—the three musicians, namely, with the harp, violin, and lute. Look at them as portraits only; you will not find more interesting ones in all the rooms. And then you will do well to consider the picture as a reality for a little while, and so leave the Academy with a vision of living Venice in your heart. We will look at no more painting to-day.

---

## PART II

If you have looked with care at the three musicians, or any other of the principal figures, in the great town or landscape views in this principal room, you will be ready now with better patience to trace the order of their subjects, and such character or story as their treatment may develop. I can only help you, however, with Carpaccio's, for I have not been able to examine, or much think of, Mansueti's, recognizing, nevertheless, much that is delightful in them.

By Carpaccio, then, in this room,\* there are in all eleven important pictures, eight from the legend of St. Ursula, and three of distinct subjects. Glance first at the series of St. Ursula subjects, in this order :

I.—539. Maurus the King of Brittany receives the English ambassadors: and has talk with his daughter touching their embassy.

II.—533. St. Ursula's Dream.

III.—537. King Maurus dismisses the English ambassadors with favorable answer from his daughter. (This is the most beautiful piece of *painting* in the rooms.)

---

\* Or at least in the Academy: the arrangement may perhaps be altered before this Guide can be published; at all events we must not count on it.

IV.—549. The King of England receives the Princess's favorable answer.

V.—542. The Prince of England sets sail for Brittany—there receives his bride, and embarks with her on pilgrimage.

VI.—546. The Prince of England and his bride, voyaging on pilgrimage with the eleven thousand maidens, arrive at Rome, and are received by the Pope, who, "with certain Cardinals," joins their pilgrimage. (The most beautiful of all the series, next to the *Dream*.)

VII.—544. The Prince, with his bride, and the Pope with his Cardinals, and the eleven thousand maids, arrive in the land of the Huns, and receive martyrdom there. In the second part of the picture is the funeral procession of St. Ursula.

VIII.—St. Ursula, with her maidens, and the pilgrim Pope, and certain Cardinals, in glory of Paradise. I have always forgotten to look for the poor bridegroom in this picture, and on looking, am by no means sure of him. But I suppose it is he who holds St. Ursula's standard. The architecture and landscape are unsurpassably fine; the rest much imperfect; but containing nobleness only to be learned by long dwelling on it.

In this series, I have omitted one picture, 544, which is of scarcely any interest—except in its curious faults and unworthiness. At all events, do not at present look at it, or think of it; but let us examine all the rest without hurry.

In the first place, then, we find this curious fact, intensely characteristic of the fifteenth as opposed to the nineteenth century—that the figures are true and natural, but the landscape false and unnatural, being by such fallacy made entirely subordinate to the figures. I have never approved of, and only a little understand, this state of things. The painter is never interested in the ground, but only in the creatures that tread on it. A castle tower is left a mere brown bit of canvas, and all his coloring kept for the trumpeters on the top of it. The fields are obscurely green; the sky imperfectly blue; and the mountains could not possibly stand on the very small foundations they are furnished with.

Here is a Religion of Humanity, and nothing else—to purpose! Nothing in the universe thought worth a look, unless it is in service or foil to some two-legged creature showing itself off to the best advantage. If a flower is in a girl's hair, it shall be painted properly; but in the fields, shall be only a spot; if a striped pattern is on a boy's jacket, we paint all the ins and outs of it, and drop not a stitch; but the striped patterns of vineyard or furrow in field, the enamelled mossy mantles of the rocks, the barred heraldry of the shield of the sky—perhaps insects and birds may take pleasure in them, not we.

To his own native lagunes and sea, the painter is yet less sensitive. His absurd rocks, and dotty black hedges round bitumen-colored fields (542), are yet painted with some grotesque humor, some modest and unworldly beauty; and sustain or engird their castellated quaintnesses in a manner pleasing to the pre-Raphaelite mind. But the sea—waveless as a deal board—and in that tranquillity, for the most part reflecting nothing at its edge—literally, such a sea justifies that uncourteous saying of earlier Venice of her Doge's bride—*“Mare sub pede pono.”*\*

Of all these deficiencies, characteristic not of this master only, but of his age, you will find various analysis in the third volume of *“Modern Painters,”* in the chapter on mediæval landscape; with begun examination of the causes which led gradually to more accurate observance of natural phenomena, until, by Turner, the method of Carpaccio's mind is precisely reversed, and the Nature in the background becomes principal; the figures in the foreground, its foil. I have a good deal more, however, to say on this subject now—so much more, indeed, that in this little Guide there is no proper room for any of it, except the simple conclusion that both the

---

\* On the scroll in the hand of the throned Venice on the Piazzetta side of the Ducal Palace, the entire inscription is,

*“Fortis, justa, trono furias, mare sub pede, pono.”*

*“Strong, and just, I put the furies beneath my throne, and the sea beneath my foot.”*

painters are wrong in whatever they either definitely misrepresent, or enfeeble by inharmonious deficiency.

In the next place, I want you to notice Carpaccio's fancy in what he does represent very beautifully—the architecture, real and ideal, of his day.

His fancy, I say ; or phantasy ; the notion he has of what architecture should be ; of which, without doubt, you see his clearest expression in the Paradise, and in the palace of the most Christian King, St. Ursula's father.

And here I must ask you to remember, or learn if you do not know, the general course of transition in the architecture of Venice—namely, that there are three epochs of good building in Venice ; the first lasting to 1300, Byzantine, in the style of St. Mark's ; the second, 1300 to 1480, Gothic, in the style of the Ducal Palace ; and the third, 1480 to 1520, in a manner which architects have yet given no entirely accepted name to, but which, from the name of its greatest designer, Brother Giocondo, of Verona,\* I mean, myself, henceforward to call "Giocondine."

Now, the dates on these pictures of Carpaccio's run from 1480 to 1485, so that you see he was painting in the youthful gush, as it were, and fullest impetus of Giocondine architecture, which all Venice, and chiefly Carpaccio, in the joy of art, thought was really at last the architecture divinely designed, and arrived at by steady progress of taste, from the Creation to 1480, and then the ne plus ultra, and real Babel-style without bewilderment—its top truly reaching to heaven—style which was never thenceforth to be bettered by human thought or skill. Of which Giocondine manner, I really think you had better at once see a substantially existent piece. It will not take long—say an hour, with lunch ; and the good door-keeper will let you come in again without paying.†

So (always supposing the day fine), go down to your boat,

\* Called "the second Founder of Venice," for his engineering work on the Brenta. His architecture is chiefly at Verona ; the style being adopted and enriched at Venice by the Lombardi.

† If you have already seen the school of St. John, or do not like the interruption, continue at page 365.

and order yourself to be taken to the church of the Frari. Landing just beyond it, your gondoliers will show you the way, up the calle beside it, to the desolate little courtyard of the School of St. John the Evangelist. It might be one of the most beautiful scenes among the cities of Italy, if only the good Catholics of Venice would employ so much of their yearly alms in the honor of St. John the Evangelist as to maintain any old gondolier, past rowing, in this courtyard by way of a Patmos, on condition that he should suffer no wildly neglected children to throw stones at the sculptures, nor grown-up creatures to defile them ; but with occasional ablution by sprinkling from garden water-engine, suffer the weeds of Venice to inhabit among the marbles where they listed.

How beautiful the place might be, I need not tell you. Beautiful it is, even in its squalid misery ; but too probably, some modern designer of railroad stations will do it up with new gilding and scrapings of its gray stone. The gods forbid ; understand, at all events, that if this happens to it, you are no more to think of it as an example of Giocondine art. But, as long as it is let alone there, in the shafts and capitals you will see, on the whole, the most characteristic example in Venice of the architecture that Carpaccio, Cima, and John Bellini loved.

As a rule, observe, square-piered, not round-pillared ; the square piers either sculptured all up with floral tracery, or, if plain, decorated half-way up, by a round panel of dark-colored marble or else a bas-relief, usually a classic profile ; the capitals, of light leafage, playing or springing into joyful spirals at the angles ; the mouldings and cornices on the whole very flat or square cut—no solid round mouldings anywhere, but all precise, rectangular, and shallow. The windows and doors either square-headed or round—never pointed ; but, if square-headed, having often a Greek gable or pediment above, as here on the outer wall ; and, if round-headed, often composed of two semicircles side by side, with a circle between ;\*

---

\* In returning to your boat, just walk round to the back of the church of the Frari, and look at the windows of the Scuola di San Rocco, which

the wall decoration being either of round inlaid marbles, among floral sculpture, or of fresco. Little to be conceived from words; but if you will look well inside and outside of the cortile of the Evangelist, you will come away with a very definite primary notion of Giocondine work.

Then back, with straight speed to the Academy; and before landing there, since you can see the little square in front of it, from your boat, read on.

The little square has its name written up at the corner, you see—"Field of Charity," or rather of *the* Charity, meaning the Madonna of Charity, and church dedicated to her. Of which you see the mere walls, variously defaced, remaining yet in their original form, traces of the great circular window in the front yet left, also of the pointed windows at the sides—filled up, many a year ago, and the square holes below cut for modern convenience; there being no space in the length and breadth of Italy to build new square-holed houses on, the Church of Charity must be used for makeshift.

Have you charity of imagination enough to cover this little field with fresh grass—to tear down the iron bridge which some accursed Englishman, I suppose, greedy for filthy job, persuaded the poor Venetians to spoil their Grand Canal with, at its noblest bend—and to fill the pointed lateral windows with light tracery of quatrefoiled stone? So stood, so bloomed, the church and its field, in early fourteenth century—dismal time! the church in its fresh beauty then, built toward the close of the thirteenth century, on the site of a much more ancient one, first built of wood; and, in 1119, of stone; but still very small, its attached monastery receiving Alexander III. in 1177; here on the little flowery field landed the Pontiff Exile, whose foot was to tread so soon on the Lion and the Adder.

And some hundred years later, putting away, one finds not

will fix the form in your mind. It is an entirely bad one; but took the fancy of men, for a time, and of strong ones, too. But don't stop long just now to look at this later building; keep the St. John's cortile for your type of Giocondine work, pure.

why, her little Byzantine church, more gravely meditative Venice, visited much by Dominican and Franciscan friars, and more or less in cowled temper herself, built this graver and simpler pile; which, if any of my readers care for either Turner or me, they should look at with some moments' pause; for I have given Turner's lovely sketch of it to Oxford, painted as he saw it fifty years ago, with bright golden sails grouped in front of it where now is the ghastly iron bridge.\*

Most probably (I cannot yet find any direct document of it), the real occasion of the building of the church whose walls yet stand, was the founding of the *Confraternita di S. Maria della Carita*, on St. Leonard's day, 6th November, 1260, † which brotherhood, in 1310, fought side by side with the school of the Painters in St. Luke's field, against one body of the conspirators for Bajamonte, and drove them back, achieving the right thenceforward of planting their purple standard there, in St. Luke's field, with their stemma (all this bears on Carpaccio's pictures presently, so have patience yet a minute or two); and so increasing in number and influence, bought in 1344, from the Monks of the Church of Charity, the ground on which you are presently going to see pictures; and built on it their cloister, dedicated also to St. Mary of Charity; and over the gate of it, by which you are going to enter, put St. Mary of Charity, as they best could get her carved, next year, 1345; and so you have her there, with cowled members of the confraternity kneeling to her; happy angels fluttering about her; the dark blue of her eyes not yet utterly faded from them. Blue-eyed as Athena she—the Greek tradition yet prevailing to that extent—a perfect type, the whole piece, of

---

\* "Very convenient for the people," say you, modern man of business. Yes; very convenient to them also to pay two centesimi every time they cross—six for three persons, into the pockets of that English engineer; instead of five for three persons, to one of their own boatmen, who now take to begging, drinking, and bellowing for the wretched hordes at the tables d'hôte, whose ears have been rent by railroad whistles till they don't know a howl from a song—instead of ferrying.

† *Archivio Veneto*. (Venezia, 1876.) Tom. XII., Parte i., p. 112.

purest central fourteenth-century Gothic thought and work untouched, and indubitable of date, being inscribed below its bracket cornice,

MCCCXLV. I LO TEMPO DE MIS.

MARCHO ZULIAN FO FATO STO LAVORIER.

To wit—"1345, in the time" (of the Guardianship) "of Messer Mark Julian, was made this labored thing."

And all seemed to bid fair for Venice and her sacred schools ; Heaven surely pleased with these her endeavors, and labored things.

Yes, with these, and such other, I doubt not. But other things, it seems, had been done in Venice, with which Heaven was *not* pleased ; assuming always that there is a Heaven, for otherwise—what followed was of course only process of Darwinian development. But this *was* what followed. That Madonna, with her happy angels and humble worshippers, was carved as you see her over the Scuola cloister door—in 1345. And "on the 25th of January, 1347,\* on the day, to wit, of the conversion of St. Paul, about the hour of vespers, there came a great earthquake in Venice, and as it were in all the world ; and fell many tops of bell-towers, and houses, and chimneys, and the church of St. Basil : and there was so great fear that all the people thought to die. And the earth ceased not to tremble for about forty days ; and when it remained quiet, there came a great mortality, and the people died of various evil. And the people were in so great fear, that father would not go to visit son, nor son father. And this death lasted about six months ; and it was said commonly that there died two parts out of three, of all the people of Venice."

These words you may read (in Venetian dialect), after you have entered the gate beneath the Madonna ; they are engraved under the Gothic arch on your right hand ; with other like words, telling the various horror of that Plague ; and how the guardian of the Scuola died by it, and about ten of his officers with him, and three hundred of the brethren.

---

\* 1348, in our present calendar.

Above the inscription, two angels hold the symbol of the Scuola ; carved as you see, conspicuously also on the outer sculptures in various places ; and again on the well in the midst of the cloister. The first sign this, therefore, of all chosen by the greater schools of Venice, of which, as aforesaid, "The first was that of St. Mary of Charity, which school has its wax candles red, in sign that Charity should be glowing ; and has for its bearing a yellow" ( meaning golden \*) "cross, traversing two little circles also yellow ; with red and green quartering the parts which the cross describes—those who instituted such sign desiring to show thereby the union that Charity should have with Faith and Hope." †

The golden "anchored" cross stands for Faith, the golden outer circle for Charity, the golden inner for Hope—all on field quartered gules and vert, the colors of Charity and Hope.

Such the first symbol of Venetian Brotherhoods ‡—in reading which, I delay you, that you may be better prepared to understand the symbolism running through every sign and color in Venetian art at this time, down even to its tinting of wax candles ; art which was indeed all the more symbolic for being rude, and complicated much with the use of signals and heraldries at sea, too distant for any art in them to be visible, but serviceably intelligible in meaning.

How far the great Scuola and cloisters of the Carita, for monks and confraternity together, reached from the gate under which you are pausing, you may see in Durer's wood-cut of the year 1500 (Correr Museum), which gives the apse with attached chapels ; and the grand double cloister reaching back nearly to the Giudecca ; a water-wheel—as I suppose—out-

† In tabulam Græcam insigni sodalitis S. M. Caritatis, Venetiarum, ab amplissimo Cardinali Bessarione dono datam, Disserattio.—(St. Mark's library, 33331, page 146.)

‡ At least according to the authority above quoted ; as far as I have consulted the original documents myself, I find the school of St. Theodore primal.

side, on the (now filled up and paved) canal, moved by the tide, for molinary work in the kitchens. Of all which nothing now remains but these pillars and beams, between you and the gallery staircase ; and the well with two brothers on each side holding their *Stemma*, a fine free-hand piece of rough living work. You will not, I think, find that you have ill spent your hour of rest when you now return into the Carpaccio room, where we will look first, please, at No. IV. (549), in which many general points are better shown than in the rest.

Here is the great King of ideal England, under an octagonal temple of audience ; all the scene being meant to show the conditions of a state in perfect power and prosperity.

A state, therefore, that is at once old and young ; that has had a history for centuries past, and will have one for centuries to come.

Ideal, founded mainly on the Venice of his own day ; mingled a little with thoughts of great Rome, and of great antagonist Genoa : but, in all spirit and hope, the Venice of 1480-1500 is here living before you. And now, therefore, you can see at once what she meant by a "Campo," allowing for the conventional manner of representing grass, which of course at first you will laugh at ; but which is by no means deserving of your contempt. Any hack draughtsman of Dalziel's can sketch for you, or any member of the Water-color or Dudley Societies dab for you, in ten minutes, a field of hay that you would fancy you could mow, and make cocks of. But this green ground of Carpaccio's, with implanted flowers and tufts of grass, is traditional from the first Greek-Christian mosaics, and is an entirely systematic ornamental ground, and to be understood as such, primarily, and as grass only symbolically. Careless indeed, more than is usual with him—much spoiled and repainted also ; but quite clear enough in expression for us of the orderliness and freshness of a Venetian campo in the great times ; garden and city you see mingled inseparably, the wild strawberry growing at the steps of the king's court of justice, and their marble sharp and bright out of the turf. Clean everything, and pure—no cigars in anybody's poisoned mouth—no voiding of perpetual excrement

of saliva on the precious marble or living flowers. Perfect peace and befittingness of behavior in all men and creatures. Your very monkey in repose, perfect in his mediæval dress; the Darwinian theory in all its sacredness, breadth, divinity, and sagacity—but reposeful, not venturing to thrust itself into political council. Crowds on the bridges and quays, but untumultuous, close set as beds of flowers, richly decorative in their mass, and a beautiful mosaic of men, and of black, red, blue, and golden bonnets. Ruins, indeed, among the prosperity; but glorious ones—not shells of abandoned speculation, but remnants of mighty state long ago, now restored to nature's peace; the arches of the first bridge the city had built, broken down by storm, yet what was left of them spared for memory's sake. (So stood for a little while, a few years ago, the broken Ponte-a-Mare at Pisa; so at Rome, for ages, stood the Ponte Rotto, till the engineers and modern mob got at it, making what was in my youth the most lovely and holy scene in Rome, *now* a place where a swineherd could not stand without holding his nose, and which no woman can stop at.)

But here, the old arches are covered with sweet weeds, like native rock, and (for once!) reflected a little in the pure water under the meadowy hills. Much besides of noteworthy, if you are yourself worthy of noting it, you may find in this lovely distance. But the picture, it may be complained, seems for the most part—distance, architecture, and scattered, crowd; while of foreground objects, we have principally cloaks, and very curiously thin legs.\* Well, yes—the distance is indeed the prettiest part of this picture; and since, in modern art and drama, we have been accustomed, for anatomical and other reasons, to depend on nothing else but legs, I admit the supply of legs to be here scanty, and even of brachial, pectoral, and other admirable muscles. If you choose to look at the *faces* instead, you will find something in them; nevertheless, Carpaccio has been, on the whole, playing with himself, and with us, in his treatment of this subject. For Carpaccio, is, in the

---

\* Not in the least unnaturally thin, however, in the forms of persons of sedentary life.

most vital and conclusive sense, a man of genius, who will not at all supply you, nor can in the least supply himself, with sublimity and pathos to order ; but is sublime, or delightful, or sometimes dull, or frequently grotesque, as Heaven wills it ; or—profane persons will say—as the humor takes him. And his humor here has been dominant. For since much depends on the answer brought back from St. Ursula, besides the young Prince's happiness, one should have thought, the return of the embassy might have been represented in a loftier manner. But only two of the ambassadors are here ; the king is occupied in hearing a cause which will take long—(see how gravely his minister is reading over the documents in question) ; meantime the young prince, impatient, going down the steps of the throne, makes his own private inquiries, proudly : “ Your embassy has, I trust, been received, gentlemen, with a just understanding of our diplomatic relations ? ” “ Your Royal Highness,” the lowly and gravely bowing principal ambassador replies, “ must yourself be the only fitting judge of that matter, on fully hearing our report.” Meantime, the *chargé d'affaires* holds St. Ursula's answer—behind his back.

A piece of play, very nearly, the whole picture ; a painter living in the midst of a prosperous city, happy in his own power, entirely believing in God, and in the saints, and in eternal life ; and, at intervals, bending his whole soul to the expression of most deep and holy tragedy—such a man needs must have his times of play ; which Carpaccio takes, in his work. Another man, instead of painting this piece with its monkey, and its little fiddler, and its jesting courtiers, would have played some ape-tricks of his own—spent an hour or two among literal fiddlers, and living courtiers. Carpaccio is not heard of among such—amuses himself still with pencil in hand, and us also, pleasantly, for a little while. You shall be serious enough, soon, with him, if you will.

But I find this Guide must run into greater division, for I can't get the end of it properly done yet for some days ; during the winter the gallery was too cold for me to think quietly in, and so I am obliged, as Fate always lately obliges

me, to do this work from pen to print—at speed ; so that, quitting Carpaccio for the nonce, I will tell you a little more about the general contents of the rooms ; and so afterward take up St. Ursula's pilgrimage, undisturbed.\* Now, therefore, I will simply follow the order of the room circuit, noting the pieces worth study, if you have proper time.

From before this picture which has so long held us, go down the steps on the right of it, into the lower room.

Turning round immediately, you have good sight of two Paul Veroneses, one on each side of the steps. The upper group of the picture on your left (603), Madonna borne by angels at her knees, and encompassed by a circlet of them, is the loveliest piece of Veronese in these galleries, nor can you see a better in the world ; but, considered as a whole, the picture is a failure ; all the sub-celestial part of it being wholly dull. Nevertheless, for essential study of Veronese's faculty, you cannot find anything better in Venice than that upper group ; and the opposite picture, though confused, is worth attentive pause from all painters.

597. Le Brun. Sent from Paris, you see, in exchange for the Cena of Paul Veronese.

The Cena of Paul Veronese being worth—at moderate estimate of its eternal and intrinsic art-value—I should say, roughly, about ten good millions of sterling ducats, or twenty ironclads ; and the Le Brun, worth, if it were put to proper use, precisely what its canvas may now be worth to make a packing-case of ; but, as hung here, in negative value, and effectual mischief, in disgracing the rooms, and keeping fine pictures invisibly out of the way—a piece of vital poverty and calamity much more than equivalent to the presence of a dirty, torn rag, which the public would at once *know* to be worthless, in its place instead.

569, 570. Standard average portrait-pieces, fairly repre-

---

\* This I am now doing in a separate Guide to the works of Carpaccio in Venice ; these two parts, now published, contain all I have to say about the Academy.

sentative of Tintoret's quiet work, and of Venetian magistrates—Camerlenghi di Comune. Compare 587; very beautiful.

581, 582, 583. Spoils of the Church of the Carita, whose ruins you have seen. Venice being of all cities the only one which has sacked *herself*, not in revolution, but mere blundering beggary; suppressing every church that had blessed her, and every society that had comforted. But at all events you see the pictures here; and the Cima is a fine one; but what time you give to this painter should be spent chiefly with his John the Baptist at the Madonna dell' Orto.

586. Once a Bonifazio of very high order; sorrowfully repainted with loss of half its life. But a picture, still, deserving honor.

From this room you find access either to the modern pictures, or by the door on the left hand of the Cima, to the collection of drawings. The well-known series by Raphael and Lionardo are of the very highest historical value and artistic interest; but it is curious to find, in Venice, scarcely a scratch or blot remaining of elementary study by any great Venetian master. Her painters drew little in black and white, and must have thrown such sketches, when they made them, away for mere waste paper. For all discussion of their methods of learning to draw with color from the first, I must refer my readers to my Art lectures.

The Lionardo drawings here are the finest I know; none in the Ambrosian library equal them in execution.

The staircase leading out of this room descends into the Hall of Titian's Assumption, where I have said nothing yet of his last picture (33), nor of that called in the Guide-books an example of his first style (35).

It has always been with me an intended piece of work to trace the real method of Titian's study, and the changes of his mind. But I shall never do it now; \* and am hitherto

---

\* For reasons which any acute reader may enough discover in my lecture on Michael Angelo and Tintoret.

entirely unacquainted with his early work. If this be indeed his, and a juvenile piece, it indicates a breadth of manner, and conventionally artistic way of looking at nature, entirely peculiar to him or to his era. The picture which he left unfinished might most fittingly be called the Shadow of Death. It is full of the profoundest metaphysical interest to me; but cannot be analyzed here.

In general, Titian is ill-represented in his own Venice. The best example of him, by far, is the portrait group of the Pesaro family in the Frari. The St. Mark in the Sacristy of the Salute was, in my early days, entirely glorious; but has been daubed over into ruin. The roof of the Sacristy in the Salute, with the fresco of St. Christopher,\* and the portrait of the Doge Grimani before Faith, in the Ducal Palace, are all the remnants of him that are worth study here, since the destruction in the Peter Martyr.† The St. John the Baptist in this gallery (366), is really too stupid to be endured, and the black and white scabble of landscape in it is like a bad copy of Ruysdael.

45. The Miracle of St. Mark; a fine, but much-overrated, Tintoret. If any painter of real power wishes to study this master, let him be content with the Paradise of the Ducal Palace, and the School of St. Roch, where no harmful repainting has yet taken place. The once mighty pictures in the Madonna dell' Orto are destroyed by restoration; and those which are scattered about the other churches are scarcely worth pursuit, while the series of St. Roch remains in its purity.

In the next room to this (Sala III.) the pictures on the

---

\* An admirable account of this fresco is given by Mr. Edward Cheney, in "Original Documents Relating to Venetian Painters and their Pictures in the Eighteenth Century," pp. 60, 61.

† Of the portrait of the Doge Andrea Gritti, in my own possession at Oxford, I leave others to speak, when I can speak of it no more. But it must be named here as the only fragment left of another great picture destroyed by fire, which Tintoret had so loved and studied that he replaced it from memory.

ceiling, brought from the room of the State Inquisitors, are more essential, because more easy, Tintoret-work, than the St. Mark, and very delightful to me ; I only wish the Inquisitors were alive to enjoy them again themselves, and inquire into a few things happening in Venice, and especially into the religious principles of her "Modern Painters."

We have made the round of the rooms, all but the Pinacoteca Contarini, Sala V. and VI., and the long gallery, Sala X.-XIV., both containing many smaller pictures of interest ; but of which I have no time, nor much care, to speak—except in complaint that detestable daubs by Callot, Dujardin, and various ignoti, should be allowed to disgrace the sixth sala, and occupy some of the best of the very little good light there is in the Academy ; thrusting the lovely little Tintoret, 179—purest work of his heart and fairest of his faculty—high beyond sight of all its delicious painting ; and the excellent quiet portrait, 168, into an unregarded corner. I am always puzzled by the smaller pictures of John Bellini ; many of them here, of whose authorship there can be little doubt, being yet of very feeble merit. 94 is fine ; and the five symbolical pictures, 234-238, in the inner room, Sala VI., are interesting to myself ; but may probably be little so to others. The first is, (I believe), Domestic Love, the world in her hand becoming the color of Heaven ; the second, Fortitude quitting the effeminate Dionysus ; the third (much the poorest and least intelligible), Truth, or Prudence ; the fourth, Lust ; and the fifth, Fortune as Opportunity, in distinction from the greater and sacred Fortune appointed of Heaven.

And now, if you are yet unfatigued,\* you had better go back into the great room, and give thorough examination to the wonderful painting, as such, in the great Veronese, considering what all its shows and dexterities at last came to, and reading, before it, his examination concerning it, given in Appendix, which shows you that Venice herself felt what they were likely to come to, though in vain ; and then, for contrast with its reckless power, and for final image to be remembered

---

\* If you are, end with 179, and remember it well.

of sweet Italian art in its earnestness, return into the long gallery (through the two great rooms, turning your back on the Veronese, then out by the door opposite Titian's huge picture ; then out of the corridor by the first door on the right, and walk down the gallery), to its little Sala X., where, high on your left, 360, is the Beata Catherine Vigri's St. Ursula ; Catherine Vigri herself, it may be, kneeling to her. Truly a very much blessed Catherine, and, I should say, far more than half-way to a saint, knowing, however, of her, and her work, only this picture. Of which I will only say in closing, as I said of the Vicar's picture in beginning, that it would be well if any of us could do such things nowadays—and more especially, if our vicars and young ladies could.

## APPENDIX.

---

THE little collection of "Documents relating to Venetian" Painters already referred to (p. 370), as made with excellent judgment by Mr. Edward Cheney, is, I regret to say, "communicated" only to the author's friends, of whom I, being now one of long standing, emboldened also by repeated instances of help received from him, venture to trespass on the modest book so far as to reprint part of the translation which it gives of the questioning of Paul Veronese.

"It is well known," says Mr. Cheney in his prefatory remarks, "to the students of Venetian history, that the Roman Inquisition was allowed little influence, and still less power, in the states of the Signory; and its sittings were always attended by lay members, selected from the Senate, to regulate and report its proceedings.

"The sittings of the Holy Office were held in the chapel of St. Theodore, fronting the door leading from St. Mark's Church to the Fondamenta di Canonica."

On Saturday, the 8th July, 1573, Master Paul Caliari, of Verona, a painter, residing in the parish of St. Samuel, was brought before the Sacred Tribunal; and being asked his name and surname, answered as above; and being asked of his profession, answered:

*A.* I invent and draw figures.

*Q.* Do you know the reason why you have been summoned?

*A.* No, my lord.

*Q.* Can you imagine it?

*A.* I can imagine it.

*Q.* Tell us what you imagine.

*A.* For the reason which the Reverend Prior of SS. Giovanni and Paolo, whose name I know not, told me that he had been here, and that your illustrious lordships had given him orders that I should substitute the figure of the Magdalen for that of a dog; and I replied that I would willingly have done this, or anything else for my own credit and the advantage of the picture, but that I did not think the figure of the

Magdalen would be fitting (!)\* or would look well, for many reasons, which I will always assign whenever the opportunity is given me.

Q. What picture is that which you have named ?

A. It is the picture representing the last† supper that Jesus took with His disciples in the house of Simon.

Q. Where is this picture ?

A. In the refectory of the Friars of SS. Giovanni and Paolo.

Q. Is it painted on the wall, on panel, or on cloth ?

A. On cloth.

Q. How many feet is it in height ?

A. It is about seventeen feet.

Q. How wide ?

A. About thirty-nine feet.

Q. In this supper of our Lord have you painted any attendants ?

A. Yes, my lord.

Q. Say how many attendants, and what each is doing.

A. First, the master of the house, Simon ; besides, I have placed below him a server, who I have supposed to have come for his own amuse-

\* I must interpolate two notes of admiration. After all one has heard of the terrors of the Inquisition, it seems, nevertheless, some people ventured to differ with it in opinion, on occasion. And the Inquisition was entirely right, too. See next note.

† “Cena *ultima* che,” etc. : the last, that is to say, of the two which Veronese supposed Christ to have taken with this host ; but he had not carefully enough examined the apparently parallel passages. They are confusing enough, and perhaps the reader will be glad to refer to them in their proper order.

I. There is first, the feast given to Christ by St. Matthew after he was called ; the circumstances of it told by himself ; only saying “*the* house” instead of “*my* house” (Matt. ix. 9-13). This is the feast at which the objection is taken by the Pharisees—“Why eateth your Master with publicans and sinners ?” the event being again related by St. Luke (v. 29), giving Matthew the name of Levi. No other circumstance of interest takes place on this occasion.

II. “One of the Pharisees desired Him that He would eat with him : and He went into the Pharisee’s house, and sat down to meat” (Luke viii. 36).

To *this* feast came the Magdalen, and “stood at His feet, behind Him, weeping.” And you know the rest. The same lesson given to the Pharisees who *forbade* the feast of Matthew, here given—in how much more pathetic force—to the Pharisee at whose feast Jesus now sat. Another manner of sinner this, who stands uncalled, at the feast, weeping ; who in a little while will stand weeping—not for herself. The name of the Pharisee host is given in Christ’s grave address to him—“Simon, I have somewhat to say unto thee.”

III. The *supper* at Bethany, in the house of Simon “the Leper,” where Lazarus sat at table, where Martha served, and where her sister Mary poured the ointment on Christ’s head, “for my burial” (Mark xiv. 3 ; Matt. xxvi. 7 ; and John xii. 2, where in the following third verse doubtless some copyist, confusing her with the Magdalen, added the clause of her wiping His feet with

ment to see the arrangement of the table. There are besides several others,\* which, as there are many figures in the picture, I do not recollect.

Q. What is the meaning of those men dressed in the German fashion ? † each with a halbert in his hand ?

A. It is now necessary that I should say a few words. ‡

*The Court.* Say on.

A. We painters take the same license that is permitted to poets, and jesters (!). I have placed those two halberdiers—the one eating, the other drinking §—by the staircase, to be supposed ready to perform any duty that may be required of them ; it appearing to me quite fitting that the master of such a house, who was rich and great (as I have been told), should have such attendants.

Q. That fellow dressed like a buffoon, with the parrot on his wrist—for what purpose is *he* introduced into the canvas ?

A. For ornament, as is usually done. ¶

Q. At the table of the Lord whom have you placed ?

A. The twelve apostles.

her hair—so also, more palpably, in John xi. 2). Here the objection is made by Judas, and the lesson given—“The poor ye have always with you.”

We cannot seriously suppose Simon the Leper to be the same person as Simon the Pharisee ; still less Simon the Pharisee to be the same as Matthew the publican : but in Veronese's mind their three feasts had got confused, and he thinks of them as *two* only, and calls this which he represents here the last of the two, though there is nothing whatever to identify it as first, last, or middle. There is no Magdalen, no Mary, no Lazarus, no hospitable Levi, no supercilious Simon. Nothing but a confused meeting of very mixed company ; half of them straggling about the table without sitting down ; and the conspicuous brown dog, for whom the Inquisitors would have had him substitute the Magdalen—which, if he had done, the picture would have been right in all other particulars, the scarlet-robed figure opposite Christ then becoming Simon the Pharisee ; but he cannot be Matthew the apostle, for Veronese distinctly names the twelve apostles after “the master of the house ;” and the text written on the balustrade on the left is therefore either spurious altogether, or added by Veronese to get rid of the necessity of putting in a Magdalen to satisfy his examiners, or please the Prior of St. John and Paul.

\* Yes, there certainly are “several others”—some score of idlers about, I should say. But this longer answer of the painter's was probably little attended to, and ill reported by the secretary.

† Mylords have suspicions of leaning toward the principles—no less than the taste—of Holbein ; and of meaning some mischief.

‡ He instantly feels the drift of this last question, and that it must not be passed lightly. Asks leave to speak—(usually no license but of direct answer being given).

§ On the right. *One* has got all the eating and drinking to himself, however, as far as I can see.

¶ Alas, *everything* is for ornament—if you would own it, Master Paul !

Q. What is St. Peter doing, who is the first ? \*

A. He is cutting up a lamb, to send to the other end of the table.

Q. What is he doing, who is next to him ?

A. He is holding a plate to receive what St. Peter will give him.

Q. Tell us what he is doing, who is next to this last ?

A. He is using a fork as a toothpick. †

Q. Who do you really think were present at that supper ?

A. I believe Christ and His apostles were present ; but in the foreground of the picture I have placed figures for ornament, of my own invention.

Q. Were you commissioned by any person to paint Germans, and buffoons, and such like things in this picture ?

A. No, my lord ; my commission was to ornament the picture as I judged best, which, being large, requires many figures, as it appears to me.

Q. Are the ornaments that the painter is in the habit of introducing in his frescoes and pictures suited and fitting to the subject and to the principal persons represented, or does he really paint such as strike his own fancy without exercising his judgment or his discretion ? ‡

A. I design my pictures with all due consideration as to what is fitting, and to the best of my judgment.

Q. Does it appear to you fitting that at our Lord's last supper § you should paint buffoons, drunkards, Germans, || dwarfs, and similar indecencies ?

A. No, my lord.

Q. Why, then, have you painted them ?

A. I have done it because I supposed that these were not in the place where the supper was served.

Q. Are you not aware that in Germany, ¶ and in other places infected with heresy, they are in the habit of painting pictures full of scurrility for the purpose of ridiculing and degrading the Holy Church, and thus teaching false doctrines to the ignorant and foolish ?

A. Yes, my lord, it is bad ; but I return to what I said before ; I thought myself obliged to do as others—my predecessors—had done before me.

Q. And have your predecessors, then, done such things ?

A. Michael-Angelo, in the Papal Chapel in Rome, has painted our

\* Very curious that no question is asked as to what Christ Himself is doing. One would have greatly desired Veronese's answer.

† Scarcely seen, between the two pillars. I must needs admit that Raphael would have invented some more dignifiedly apostolic action.

‡ Admirably put, my lord.

§ Not meaning the Cena, of course ; but what Veronese also meant.

|| and ¶ The gist of the business, at last.

Lord Jesus Christ, His mother, St. John, and St. Peter, and all the Court of Heaven, from the Virgin Mary downward, all naked, and in various attitudes, with little reverence.

*Q.* Do you not know that in a painting like the Last Judgment, where drapery is not supposed, dresses are not required, and that disembodied spirits only are represented; but there are neither buffoons, nor dogs, nor armor, nor any other absurdity? And does it not appear to you that neither by this nor any other example you have done right in painting the picture in this manner, and that it can be proved right and decent?

*A.* Illustrious Lord, I do not defend it; but I thought I was doing right. I had not considered all these things, never intending to commit any impropriety; the more so as figures of buffoons are not supposed to be in the same place where our Lord is.

Which examination ended, my lords decreed that the above-named Master Paul should be bound to correct and amend the picture which had been under question, within three months, at his own expense, under penalties to be imposed by the Sacred Tribunal."

This sentence, however severe in terms, was merely a matter of form. The examiners were satisfied there was no malice prepense in their fanciful Paul: and troubled neither him nor themselves farther. He did not so much as efface the inculcated dog; and the only correction or amendment he made, so far as I can see, was the addition of the inscription, which marked the picture for the feast of Levi.

The first part of the report deals with the general situation of the country. It is noted that the population is increasing rapidly, and that the government is making every effort to improve the conditions of the people. The report also mentions the progress made in various fields, such as education and agriculture.

In the second part of the report, the author discusses the economic situation. It is stated that the country is experiencing a period of economic growth, and that the government is taking steps to promote this growth. The report also mentions the progress made in various fields, such as industry and commerce.

The third part of the report deals with the social situation. It is noted that the government is making every effort to improve the conditions of the people, and that progress has been made in various fields, such as health and welfare. The report also mentions the progress made in various fields, such as education and culture.

In the fourth part of the report, the author discusses the political situation. It is stated that the country is experiencing a period of political stability, and that the government is taking steps to promote this stability. The report also mentions the progress made in various fields, such as law and order.

The fifth part of the report deals with the international situation. It is noted that the country is making every effort to improve its relations with other countries, and that progress has been made in various fields, such as diplomacy and trade. The report also mentions the progress made in various fields, such as science and technology.

OUTLINES OF SCENES AND THOUGHTS,  
PERHAPS WORTHY OF MEMORY,  
IN MY PAST LIFE

## PREFACE.

---

I HAVE written these sketches of effort and incident in former years for my friends ; and for those of the public who have been pleased by my books.

I have written them therefore, frankly, garrulously, and at ease ; speaking of what it gives me joy to remember at any length I like—sometimes very carefully of what I think it may be useful for others to know ; and passing in total silence things which I have no pleasure in reviewing, and which the reader would find no help in the account of. My described life has thus become more amusing than I expected to myself, as I summoned its long past scenes for present scrutiny : its methods of study, and general principles of work, I feel justified in recommending to other students : and very certainly any habitual readers of my books will understand them better, for having knowledge as complete as I can give them of the personal character which, without endeavor to conceal, I yet have never taken pains to display, and even, now and then, felt some freakish pleasure in exposing to the chance of misinterpretation.

I write these few prefatory words on my father's birthday, in what was once my nursery in his old house,—to

which he brought my mother and me, sixty-two years since, I being then four years old. What would otherwise in the following pages have been little more than an old man's recreation in gathering visionary flowers in fields of youth, has taken, as I wrote, the nobler aspect of a dutiful offering at the grave of parents who trained my childhood to all the good it could attain, and whose memory makes declining life cheerful in the hope of being soon again with them.

## VOLUME I.

---

### CHAPTER I.

#### THE SPRINGS OF WANDEL.

I am, and my father was before me, a violent Tory of the old school; (Walter Scott's school, that is to say, and Homer's,) I name these two out of the numberless great Tory writers, because they were my own two masters. I had Walter Scott's novels, and the Iliad, (Pope's translation,) for my only reading when I was a child, on week-days: on Sundays their effect was tempered by Robinson Crusoe and the Pilgrim's Progress; my mother having it deeply in her heart to make an evangelical clergyman of me. Fortunately, I had an aunt more evangelical than my mother; and my aunt gave me cold mutton for Sunday's dinner, which—as I much preferred it hot—greatly diminished the influence of the Pilgrim's Progress, and the end of the matter was, that I got all the noble imaginative teaching of Defoe and Bunyan, and yet—am not an evangelical clergyman.

I had, however, still better teaching than theirs, and that compulsorily, and every day of the week.

Walter Scott and Pope's Homer were reading of my own election, but my mother forced me, by steady daily toil, to learn long chapters of the Bible by heart; as well as to read it every syllable through, aloud, hard names and all, from Genesis to the Apocalypse, about once a year: and to that discipline—patient, accurate, and resolute—I owe, not only a

knowledge of the book, which I find occasionally serviceable, but much of my general power of taking pains, and the best part of my taste in literature. From Walter Scott's novels I might easily, as I grew older, have fallen to other people's novels; and Pope might, perhaps, have led me to take Johnson's English, or Gibbon's, as types of language; but, once knowing the 32d of Deuteronomy, the 119th Psalm, the 15th of 1st Corinthians, the Sermon on the Mount, and most of the Apocalypse, every syllable by heart, and having always a way of thinking with myself what words meant, it was not possible for me, even in the foolishlest times of youth, to write entirely superficial or formal English; and the affectation of trying to write like Hooker and George Herbert was the most innocent I could have fallen into.

From my own chosen masters, then, Scott and Homer, I learned the Toryism which my best after-thought has only served to confirm.

That is to say a most sincere love of kings, and dislike of everybody who attempted to disobey them. Only, both by Homer and Scott, I was taught strange ideas about kings, which I find for the present much obsolete; for, I perceived that both the author of the Iliad and the author of Waverley made their kings, or king-loving persons, do harder work than anybody else. Tydides or Idomeneus always killed twenty Trojans to other people's one, and Redgauntlet speared more salmon than any of the Solway fishermen, and—which was particularly a subject of admiration to me—I observed that they not only did more, but in proportion to their doings, got less than other people—nay, that the best of them were even ready to govern for nothing! and let their followers divide any quantity of spoil or profit. Of late it has seemed to me that the idea of a king has become exactly the contrary of this, and that it has been supposed the duty of superior persons generally to govern less, and get more, than anybody else. So that it was, perhaps, quite as well that in those early days my contemplation of existent kingship was a very distant one.

The aunt who gave me cold mutton on Sundays was my

father's sister : she lived at Bridge-end, in the town of Perth, and had a garden full of gooseberry-bushes, sloping down to the Tay, with a door opening to the water, which ran past it, clear-brown over the pebbles three or four feet deep ; swift-eddying,—an infinite thing for a child to look down into.

My father began business as a wine-merchant, with no capital, and a considerable amount of debts bequeathed him by my grandfather. He accepted the bequest, and paid them all before he began to lay by anything for himself, for which his best friends called him a fool, and I, without expressing any opinion as to his wisdom, which I knew in such matters to be at least equal to mine, have written on the granite slab over his grave that he was "an entirely honest merchant." As days went on he was able to take a house in Hunter Street, Brunswick Square, No. 54, (the windows of it, fortunately for me, commanded a view of a marvellous iron post, out of which the water-carts were filled through beautiful little trap-doors, by pipes like boa-constrictors ; and I was never weary of contemplating that mystery, and the delicious dripping consequent) ; and as years went on, and I came to be four or five years old, he could command a postchaise and pair for two months in the summer, by help of which, with my mother and me, he went the round of his country customers (who liked to see the principal of the house his own traveller) ; so that, at a jog-trot pace, and through the panoramic opening of the four windows of a post-chaise, made more panoramic still to me because my seat was a little bracket in front, (for we used to hire the chaise regularly for the two months out of Long Acre, and so could have it bracketed and pocketed as we liked,) I saw all the high-roads, and most of the cross ones, of England and Wales, and great part of lowland Scotland, as far as Perth, where every other year we spent the whole summer ; and I used to read the Abbot at Kinross, and the Monastery in Glen Farg, which I confused with "Glendearg," and thought that the White Lady had as certainly lived by the streamlet in that glen of the Ochils, as the Queen of Scots in the island of Loch Leven.

To my farther great benefit, as I grew older, I thus saw

nearly all the noblemen's houses in England ; in reverent and healthy delight of uncovetous admiration,—perceiving, as soon as I could perceive any political truth at all, that it was probably much happier to live in a small house, and have Warwick Castle to be astonished at, than to live in Warwick Castle and have nothing to be astonished at ; but that, at all events, it would not make Brunswick Square in the least more pleasantly habitable, to pull Warwick Castle down. And, at this day, though I have kind invitations enough to visit America, I could not, even for a couple of months, live in a country so miserable as to possess no castles.

Nevertheless, having formed my notion of kinghood chiefly from the FitzJames of the Lady of the Lake, and of noblesse from the Douglas there, and the Douglas in Marmion, a painful wonder soon arose in my child-mind, why the castles should now be always empty. Tantallon was there ; but no Archibald of Angus :—Stirling, but no Knight of Snowdown. The galleries and gardens of England were beautiful to see—but his Lordship and her Ladyship were always in town, said the housekeepers and gardeners. Deep yearning took hold of me for a kind of “Restoration,” which I began slowly to feel that Charles the Second had not altogether effected, though I always wore a gilded oak-apple very piously in my button-hole on the 29th of May. It seemed to me that Charles the Second's Restoration had been, as compared with the Restoration I wanted, much as that gilded oak-apple to a real apple. And as I grew wiser, the desire for sweet pippins instead of bitter ones, and Living Kings instead of dead ones, appeared to me rational as well as romantic ; and gradually it has become the main purpose of my life to grow pippins, and its chief hope, to see Kings.\*

I have never been able to trace these prejudices to any royalty of descent : of my father's ancestors I know nothing,

---

\* The St. George's Company was founded for the promotion of agricultural instead of town life : and my only hope of prosperity for England, or any other country in whatever life they lead, is in their discovering and obeying men capable of Kinghood.

nor of my mother's more than that my maternal grandmother was the landlady of the Old King's Head in Market Street, Croydon ; and I wish she were alive again, and I could paint her Simone Memmi's King's Head, for a sign.

My maternal grandfather was, as I have said, a sailor, who used to embark, like Robinson Crusoe, at Yarmouth, and come back at rare intervals, making himself very delightful at home. I have an idea he had something to do with the herring business, but I am not clear on that point ; my mother never being much communicative concerning it. He spoiled her, and her (younger) sister, with all his heart, when he was at home ; unless there appeared any tendency to equivocation, or imaginative statements, on the part of the children, which were always unforgivable. My mother being once perceived by him to have distinctly told him a lie, he sent the servant out forthwith to buy an entire bundle of new broom twigs to whip her with. "They did not hurt me so much as one" (twig) "would have done," said my mother, "but I *thought* a good deal of it."

My grandfather was killed at two-and-thirty, by trying to ride, instead of walk, into Croydon ; he got his leg crushed by his horse against a wall ; and died of the hurt's mortifying. My mother was then seven or eight years old, and, with her sister, was sent to quite a fashionable (for Croydon) day-school, Mrs. Rice's, where my mother was taught evangelical principles, and became the pattern girl and best needlewoman in the school ; and where my aunt absolutely refused evangelical principles, and became the plague and pet of it.

My mother, being a girl of great power, with not a little pride, grew more and more exemplary in her entirely conscientious career, much laughed at, though much beloved, by her sister ; who had more wit, less pride, and no conscience. At last my mother, formed into a consummate housewife, was sent for to Scotland to take care of my paternal grandfather's house ; who was gradually ruining himself ; and who at last effectually ruined, and killed, himself. My father came up to London ; was a clerk in a merchant's house for nine years, without a holiday ; then began business on his own account ;

paid his father's debts ; and married his exemplary Croydon cousin.

Meantime my aunt had remained in Croydon, and married a baker. By the time I was four years old, and beginning to recollect things,—my father rapidly taking higher commercial position in London,—there was traceable—though to me, as a child, wholly incomprehensible—just the least possible shade of shyness on the part of Hunter Street, Brunswick Square, toward Market Street, Croydon. But whenever my father was ill,—and hard work and sorrow had already set their mark on him,—we all went down to Croydon to be petted by my homely aunt ; and walk on Duppas Hill, and on the heather of Addington.

My aunt lived in the little house still standing—or which was so four months ago—the fashionablest in Market Street, having actually two windows over the shop, in the second story ; but I never troubled myself about that superior part of the mansion, unless my father happened to be making drawings in Indian ink, when I would sit reverently by and watch ; my chosen domains being, at all other times, the shop, the bakehouse, and the stones round the spring of crystal water at the back door (long since let down into the modern sewer) ; and my chief companion, my aunt's dog, Towzer, whom she had taken pity on when he was a snappish, starved vagrant ; and made a brave and affectionate dog of : which was the kind of thing she did for every living creature that came in her way, all her life long.

Contented, by help of these occasional glimpses of the rivers of Paradise, I lived until I was more than four years old in Hunter Street, Brunswick Square, the greater part of the year ; for a few weeks in the summer breathing country air by taking lodgings in small cottages (real cottages, not villas, so-called) either about Hampstead, or at Dulwich, at "Mrs. Ridley's," the last of a row in a lane which led out into the Dulwich fields on one side, and was itself full of buttercups in spring, and blackberries in autumn. But my chief remaining impressions of those days are attached to Hunter Street. My mother's general principles of first treatment were, to

guard me with steady watchfulness from all avoidable pain or danger ; and, for the rest, to let me amuse myself as I liked, provided I was neither fretful nor troublesome. But the law was, that I should find my own amusement. No toys of any kind were at first allowed ;—and the pity of my Croydon aunt for my monastic poverty in this respect was boundless. On one of my birthdays, thinking to overcome my mother's resolution by splendor of temptation, she bought the most radiant Punch and Judy she could find in all the Soho bazaar—as big as a real Punch and Judy, all dressed in scarlet and gold, and that would dance, tied to the leg of a chair. I must have been greatly impressed, for I remember well the look of the two figures, as my aunt herself exhibited their virtues. My mother was obliged to accept them ; but afterward quietly told me it was not right that I should have them ; and I never saw them again.

Nor did I painfully wish, what I was never permitted for an instant to hope, or even imagine, the possession of such things as one saw in toy-shops. I had a bunch of keys to play with, as long as I was capable only of pleasure in what glittered and jingled ; as I grew older, I had a cart, and a ball ; and when I was five or six years old, two boxes of well-cut wooden bricks. With these modest, but, I still think, entirely sufficient possessions, and being always summarily whipped if I cried, did not do as I was bid, or tumbled on the stairs, I soon attained serene and secure methods of life and motion ; and could pass my days contentedly in tracing the squares and comparing the colors of my carpet ;—examining the knots in the wood of the floor, or counting the bricks in the opposite houses ; with rapturous intervals of excitement during the filling of the water-cart, through its leathern pipe, from the dripping iron post at the pavement edge ; or the still more admirable proceedings of the turncock, when he turned and turned till a fountain sprang up in the middle of the street. But the carpet, and what patterns I could find in bed-covers, dresses, or wall-papers to be examined, were my chief resources, and my attention to the particulars in these was soon so accurate,

I left Rome yesterday, and am on my way home; but, alas! might as well be on my way home from Cochin China, for any chance I have of speedily arriving. Meantime your letters will reach me here with speed, and will be a great comfort to me, if they don't fatigue *you*.

---

“FRONDES AGRESTES.”

PERUGIA, 12th June.

I am more and more pleased at the thought of this gathering of yours, and soon expect to tell you what the bookseller says.

Meantime I want you to think of the form the collection should take with reference to my proposed re-publication. I mean to take the botany, the geology, the Turner defence, and the general art criticism of “Modern Painters,” as four separate books, cutting out nearly all the preaching, and a good deal of the sentiment. Now what you find pleasant and helpful to you of general maxim or reflection, *must* be of some value; and I think therefore that your selection will just do for me what no other reader could have done, least of all I myself; keep together, that is to say, what may be right and true of those youthful thoughts. I should like you to add anything that specially pleases you, of whatever kind; but to keep the notion of your book being the didactic one as opposed to the other picturesque and scientific volumes, will I think help you in choosing between passages when one or other is to be rejected.

---

HOW I FELL AMONG THIEVES.

ASSISI, 17th June.

I have been having a bad time lately, and have no heart to write to you. Very difficult and melancholy work, deciphering what remains of a great painter among stains of ruin and blotches of repair, of five hundred years' gathering. It makes me sadder than idleness, which is saying much.

I was greatly flattered and petted by a saying in one of your last letters, about the difficulty I had in unpacking my

mind. That is true; one of my chief troubles at present is with the quantity of things I want to say at once. But you don't know how I find things I laid by carefully in it, all mouldy and moth-eaten when I take them out; and what a lot of mending and airing they need, and what a wearisome and bothering business it is compared to the early packing,—one used to be so proud to get things into the corners neatly!

I have been failing in my drawings, too, and I'm in a horrible inn kept by a Garibaldian bandit; and the various sorts of disgusting dishes sent up to look like a dinner, and to be charged for, are a daily increasing horror and amazement to me. They succeed in getting *everything* bad; no exertion, no invention, could produce such badness, I believe, anywhere else. The hills are covered for leagues with olive-trees, and the oil's bad; there are no such lovely cattle elsewhere in the world, and the butter's bad; half the country people are shepherds, but there's no mutton; half the old women walk about with a pig tied to their waists, but there's no pork; the vine grows wild anywhere, and the wine would make my teeth drop out of my head if I took a glass of it; there are no strawberries, no oranges, no melons, the cherries are as hard as their stones, the beans only good for horses, or Jack and the beanstalk, and this is the size of the biggest asparagus—

I live here in a narrow street ten feet wide only, winding up a hill, and it was full this morning of sheep as close as they could pack, at least a thousand, as far as the eye could reach,—tinkle tinkle, bleat bleat, for a quarter of an hour.

IN PARADISE.

ASSISI, SACRISTAN'S CELL,

25th June.

This letter is all upside down, and this first page written last; for I didn't like something I had written about myself last night when I was tired, and have torn it off.

of it, in direction to Mr. Burgess, presented some notable points of correspondence with it, I thought it well he should engrave them together, as they stood.

The noble knight like a bold and daring hero  
then entered the vale where the dra-  
gon had his abode who no sooner had sight of him but  
his sea-thern throat sent forth a sound more

Bolton Abbey

Dear Mother,

24<sup>th</sup> Jan. 75

Will you kindly peruse  
with moderate care, the above  
piece of ancient manuscript in Fol.

My mother had, as she afterward told me, solemnly "de-  
voted me to God" before I was born; in imitation of Hannah.

Very good women are remarkably apt to make away with  
their children prematurely, in this manner: the real mean-  
ing of the pious act being, that, as the sons of Zebedee are  
not (or at least they hope not), to sit on the right and left of  
Christ, in His kingdom, their own sons may perhaps, they  
think, in time be advanced to that respectable position in  
eternal life; especially if they ask Christ very humbly for it  
every day; and they always forget in the most naïve way  
that the position is not His to give!

"Devoting me to God," meant, as far as my mother knew  
herself what she meant, that she would try to send me to  
college, and make a clergyman of me: and I was accordingly  
bred for "the Church." My father, who—rest be to his soul  
—had the exceedingly bad habit of yielding to my mother in  
large things and taking his own way in little ones, allowed  
me, without saying a word, to be thus withdrawn from the  
sherry trade as an unclean thing; not without some pardon-

able participation in my mother's ultimate views for me. For, many and many a year afterward, I remember, while he was speaking to one of our artist friends, who admired Raphael, and greatly regretted my endeavors to interfere with that popular taste,—while my father and he were condoling with each other on my having been impudent enough to think I could tell the public about Turner and Raphael,—instead of contenting myself, as I ought, with explaining the way of their souls' salvation to them—and what an amiable clergyman was lost in me,—“Yes,” said my father, with tears in his eyes—(true and tender tears, as ever father shed,) “he would have been a Bishop.”

Luckily for me, my mother, under these distinct impressions of her own duty, and with such latent hopes of my future eminence, took me very early to church;—where, in spite of my quiet habits, and my mother's golden vinaigrette, always indulged to me there, and there only, with its lid unclasped that I might see the wreathed open pattern above the sponge, I found the bottom of the pew so extremely dull a place to keep quiet in, (my best story-books being also taken away from me in the morning,) that, as I have somewhere said before, the horror of Sunday used even to cast its prescient gloom as far back in the week as Friday—and all the glory of Monday, with church seven days removed again, was no equivalent for it.

Notwithstanding, I arrived at some abstract in my own mind of the Rev. Mr. Howell's sermons; and occasionally, in imitation of him, preached a sermon at home over the red sofa cushions;—this performance being always called for by my mother's dearest friends, as the great accomplishment of my childhood. The sermon was, I believe, some eleven words long;—very exemplary, it seems to me, in that respect—and I still think must have been the purest gospel, for I know it began with, “People, be good.”

We seldom had company, even on week days; and I was never allowed to come down to dessert, until much later in life—when I was able to crack nuts neatly. I was then permitted to come down to crack other people's nuts for them

—(I hope they liked the ministration)—but never to have any myself; nor anything else of dainty kind, either then or at other times. Once, at Hunter Street, I recollect my mother giving me three raisins, in the forenoon, out of the store cabinet; and I remember perfectly the first time I tasted custard, in our lodgings in Norfolk Street—where we had gone while the house was being painted, or cleaned, or something. My father was dining in the front room, and did not finish his custard; and my mother brought me the bottom of it into the back room.

But for the reader's better understanding of such further progress of my poor little life as I may trespass on his patience in describing, it is now needful that I give some account of my father's mercantile position in London.

The firm of which he was head partner may be yet remembered by some of the older city houses, as carrying on their business in a small counting-house on the first floor of narrow premises, in as narrow a thoroughfare of East London, —Billiter Street, the principal traverse from Leadenhall Street into Fenchurch Street.

The names of the three partners were given in full on their brass plate under the counting-house bell,—Ruskin, Telford, & Domecq.

Mr. Domecq's name should have been the first, by rights, for my father and Mr. Telford were only his agents. He was the sole proprietor of the estate which was the main capital of the firm,—the vineyard of Macharnudo, the most precious hillside, for growth of white wine, in the Spanish peninsula. The quality of the Macharnudo vintage essentially fixed the standard of Xeres "sack," or "dry,"—secco—sherris, or sherry, from the days of Henry the Fifth to our own;—the unalterable and unrivalled chalk-marl of it putting a strength into the grape which age can only enrich and darken,—never impair.

Mr. Peter Domecq was, I believe, Spanish born; and partly French, partly English bred; a man of strictest honor, and kindly disposition; how descended, I do not know; how he became possessor of his vineyard, I do not know; what posi-

tion he held, when young, in the firm of Gordon, Murphy, & Company, I do not know ; but in their house he watched their head clerk, my father, during his nine years of duty, and when the house broke up, asked him to be his own agent in England. My father saw that he could fully trust Mr. Domecq's honor, and feeling ;—but not so fully either his sense, or his industry ; and insisted, though taking only his agent's commission, on being both nominally, and practically, the head-partner of the firm.

Mr. Domecq lived chiefly in Paris ; rarely visiting his Spanish estate, but having perfect knowledge of the proper processes of its cultivation, and authority over its laborers almost like a chief's over his clan. He kept the wines at the highest possible standard ; and allowed my father to manage all matters concerning their sale, as he thought best. The second partner, Mr. Henry Telford, brought into the business what capital was necessary for its London branch. The premises in Billiter Street belonged to him ; and he had a pleasant country house at Widmore, near Bromley ; a quite far-away Kentish village in those days.

He was a perfect type of an English country gentleman of moderate fortune ; unmarried, living with three unmarried sisters,—who, in the refinement of their highly educated, unpretending, benevolent, and felicitous lives, remain in my memory more like the figures in a beautiful story than realities. Neither in story, nor in reality, have I ever again heard of, or seen, anything like Mr. Henry Telford ;—so gentle, so humble, so affectionate, so clear in common sense, so fond of horses,—and so entirely incapable of doing, thinking, or saying, anything that had the slightest taint in it of the race-course or the stable.

Yet I believe he never missed any great race ; passed the greater part of his life on horseback ; and hunted during the whole Leicestershire season ; but never made a bet, never had a serious fall, and never hurt a horse. Between him and my father there was absolute confidence, and the utmost friendship that could exist without community of pursuit. My father was greatly proud of Mr. Telford's standing among

the country gentlemen; and Mr. Telford was affectionately respectful to my father's steady industry and infallible commercial instinct. Mr. Telford's actual part in the conduct of the business was limited to attendance in the counting-house during two months at Midsummer, when my father took his holiday, and sometimes for a month at the beginning of the year, when he travelled for orders. At these times Mr. Telford rode into London daily from Widmore, signed what letters and bills needed signature, read the papers, and rode home again; any matters needing deliberation were referred to my father, or awaited his return. All the family at Widmore would have been limitlessly kind to my mother and me, if they had been permitted any opportunity; but my mother always felt, in cultivated society,—and was too proud to feel with patience,—the defects of her own early education; and therefore (which was the true and fatal sign of such defect) never familiarly visited any one whom she did not feel to be, in some sort, her inferior.

Nevertheless, Mr. Telford had a singularly important influence in my education. By, I believe, his sister's advice, he gave me, as soon as it was published, the illustrated edition of Rogers' "Italy." This book was the first means I had of looking carefully at Turner's work: and I might, not without some appearance of reason, attribute to the gift the entire direction of my life's energies. But it is the great error of thoughtless biographers to attribute to the accident which introduces some new phase of character, all the circumstances of character which gave the accident importance. The essential point to be noted, and accounted for, was that I could understand Turner's work when I saw it;—not by what chance, or in what year, it was first seen. Poor Mr. Telford, nevertheless, was always held by papa and mamma primarily responsible for my Turner insanities.

In a more direct, though less intended way, his help to me was important. For, before my father thought it right to hire a carriage for the above-mentioned Midsummer holiday, Mr. Telford always lent us his own travelling chariot.

Now the old English chariot is the most luxurious of travel-

ling carriages, for two persons, or even for two persons and so much of a third personage as I possessed at three years old. The one in question was hung high, so that we could see well over stone dykes and average hedges out of it; such elevation being attained by the old-fashioned folding-steps, with a lovely padded cushion fitting into the recess of the door,—steps which it was one of my chief travelling delights to see the hostlers fold up and down; though my delight was painfully alloyed by envious ambition to be allowed to do it myself:—but I never was,—lest I should pinch my fingers.

The “dickey,”—(to think that I should never till this moment have asked myself the derivation of that word, and now be unable to get at it!)—being typically, that commanding seat in her Majesty’s mail, occupied by the Guard; and classical, even in modern literature, as the scene of Mr. Bob Sawyer’s arrangements with Sam,—was thrown far back in Mr. Telford’s chariot, so as to give perfectly comfortable room for the legs (if one chose to travel outside on fine days), and to afford beneath it spacious area to the boot, a storehouse of rearward miscellaneous luggage. Over which—with all the rest of forward and superficial luggage—my nurse Anne presided, both as guard and packer; unrivalled, she, in the flatness and precision of her in-laying of dresses, as in turning of pancakes; the fine precision, observe, meaning also the easy wit and invention of her art; for, no more in packing a trunk than commanding a campaign, is precision possible without foresight.

Among the people whom one must miss out of one’s life, dead, or worse than dead, by the time one is past fifty, I can only say for my own part, that the one I practically and truly miss most, next to father and mother, (and putting losses of imaginary good out of the question,) is this Anne, my father’s nurse, and mine. She was one of our ‘many,’\* (our many being always but few,) and from her girlhood to her old age, the entire ability of her life was given to serving us. She had a natural gift and speciality for doing disagreeable things;

---

\* Formerly “Meinie,” “attendant company.”

above all, the service of a sick room ; so that she was never quite in her glory unless some of us were ill. She had also some parallel speciality for *saying* disagreeable things ; and might be relied upon to give the extremely darkest view of any subject, before proceeding to ameliorative action upon it. And she had a very creditable and republican aversion to doing immediately, or in set terms, as she was bid ; so that when my mother and she got old together, and my mother became very imperative and particular about having her teacup set on one side of her little round table, Anne would observantly and punctiliously put it always on the other ; which caused my mother to state to me, every morning after breakfast, gravely, that, if ever a woman in this world was possessed by the Devil, Anne was that woman. But in spite of these momentary and petulant aspirations to liberality and independence of character, poor Anne remained very servile in soul all her days ; and was altogether occupied, from the age of fifteen to seventy-two, in doing other people's wills instead of her own, and seeking other people's good instead of her own : nor did I ever hear on any occasion of her doing harm to a human being, except by saving two hundred and some odd pounds for her relations ; in consequence of which, some of them, after her funeral, did not speak to the rest for several months.

The dickey then aforesaid, being indispensable for our guard . Anne, was made wide enough for two, that my father might go outside also when the scenery and day were fine. The entire equipage was not a light one of its kind ; but, the luggage being carefully limited, went gayly behind good horses on the then perfectly smooth mail roads ; and posting, in those days, being universal, so that at the leading inns in every country town, the cry "Horses out !" down the yard, as one drove up, was answered, often instantly, always within five minutes, by the merry trot through the archway of the booted and bright-jacketed rider, with his caparisoned pair, —there was no driver's seat in front : and the four large, admirably fitting and sliding windows, admitting no drop of rain when they were up, and never sticking as they were let

down, formed one large moving oriel, out of which one saw the country round, to the full half of the horizon. My own prospect was more extended still, for my seat was the little box containing my clothes, strongly made, with a cushion on one end of it; set upright in front (and well forward), between my father and mother. I was thus not the least in their way, and my horizon of sight the widest possible. When no object of particular interest presented itself, I trotted, keeping time with the post-boy on my trunk cushion for a saddle, and whipped my father's legs for horses; at first theoretically only, with dexterous motion of wrist; but ultimately in a quite practical and efficient manner, my father having presented me with a silver-mounted postillion's whip.

The Midsummer holiday, for better enjoyment of which Mr. Telford provided us with these luxuries, began usually on the fifteenth of May, or thereabouts;—my father's birthday was the tenth; on that day I was always allowed to gather the gooseberries for his first gooseberry pie of the year, from the tree between the buttresses on the north wall of the Herne Hill garden; so that we could not leave before that *fiesta*. The holiday itself consisted in a tour for orders through half the English counties; and a visit (if the counties lay northward) to my aunt in Scotland.

The mode of journeying was as fixed as that of our home life. We went from forty to fifty miles a day, starting always early enough in the morning to arrive comfortably to four-o'clock dinner. Generally, therefore, getting off at six o'clock, a stage or two were done before breakfast, with the dew on the grass, and first scent from the hawthorns; if in the course of the midday drive there were any gentleman's house to be seen,—or, better still, a lord's— or, best of all, a duke's,—my father baited the horses, and took my mother and me reverently through the state rooms; always speaking a little under our breath to the housekeeper, major domo, or other authority in charge; and gleaning worshipfully what fragmentary illustrations of the history and domestic ways of the family might fall from their lips.

In analyzing above, page 16, the effect on my mind of all

this, I have perhaps a little antedated the supposed resultant impression that it was probably happier to live in a small house than a large one. But assuredly, while I never to this day pass a lattice-windowed cottage without wishing to be its cottager, I never yet saw the castle which I envied to its lord; and although in the course of these many worshipful pilgrimages I gathered curiously extensive knowledge, both of art and natural scenery, afterward infinitely useful, it is evident to me in retrospect that my own character and affections were little altered by them; and that the personal feeling and native instinct of me had been fastened, irrevocably, long before, to things modest, humble, and pure in peace, under the low red roofs of Croydon, and by the cress-set rivulets in which the sand danced and minnows darted above the Springs of Wandel.

---

## CHAPTER II.

### HERNE-HILL ALMOND BLOSSOMS.

When I was about four years old my father found himself able to buy the lease of a house on Herne Hill, a rustic eminence four miles south of the "Standard in Cornhill;" of which the leafy seclusion remains, in all essential points of character, unchanged to this day: certain Gothic splendors, lately indulged in by our wealthier neighbors, being the only serious innovations; and these are so graciously concealed by the fine trees of their grounds, that the passing viator remains unappalled by them; and I can still walk up and down the piece of road between the Fox tavern and the Herne Hill station, imagining myself four years old.

Our house was the northernmost of a group which stand accurately on the top or dome of the hill, where the ground is for a small space level, as the snows are, (I understand,) on the dome of Mont Blanc; presently failing, however, in what may be, in the London clay formation, considered a precipitous slope, to our valley of Chamouni (or of Dulwich) on the

east ; and with a softer descent into Cold Harbour Lane\* on the west : on the south, no less beautifully declining to the dale of the Effra, (doubtless shortened from Effrena, signifying the "Unbridled" river ; recently, I regret to say, bricked over for the convenience of Mr. Biffin, chemist, and others) ; while on the north, prolonged indeed with slight depression some half mile or so, and receiving, in the parish of Lambeth, the chivalric title of "Champion Hill," it plunges down at last to efface itself in the plains of Peckham, and the rural barbarism of Goose Green.

The group, of which our house was the quarter, consisted of two precisely similar partner-couples of houses, gardens and all to match ; still the two highest blocks of buildings seen from Norwood on the crest of the ridge ; so that the house itself, three-storied, with garrets above, commanded, in those comparatively smokeless days, a very notable view from its garret windows, of the Norwood hills on one side, and the winter sunrise over them ; and of the valley of the Thames on the other, with Windsor telescopically clear in the distance, and Harrow, conspicuous always in fine weather to open vision against the summer sunset. It had front and back garden in sufficient proportion to its size ; the front, richly set with old evergreens, and well-grown lilac and laburnum ; the back, seventy yards long by twenty wide, renowned over all the hill for its pears and apples, which had been chosen with extreme care by our predecessor, (shame on me to forget the name of a man to whom I owe so much!) —and possessing also a strong old mulberry tree, a tall white-heart cherry tree, a black Kentish one, and an almost unbroken hedge, all round, of alternate gooseberry and currant bush ; decked, in due season, (for the ground was wholly beneficent,) with magical splendor of abundant fruit : fresh green, soft amber, and rough-bristled crimson bending the spinous branches ; clustered pearl and pendant ruby joyfully discoverable under the large leaves that looked like vine.

---

\* Said in the History of Croydon to be a name which has long puzzled antiquaries, and nearly always found near Roman military stations.

The differences of primal importance which I observed between the nature of this garden, and that of Eden, as I had imagined it, were, that, in this one, *all* the fruit was forbidden; and there were no companionable beasts: in other respects the little domain answered every purpose of Paradise to me; and the climate, in that cycle of our years, allowed me to pass most of my life in it. My mother never gave me more to learn than she knew I could easily get learnt, if I set myself honestly to work, by twelve o'clock. She never allowed anything to disturb me when my task was set; if it was not said rightly by twelve o'clock, I was kept in till I knew it, and in general, even when Latin Grammar came to supplement the Psalms, I was my own master for at least an hour before half-past one dinner, and for the rest of the afternoon.

My mother, herself finding her chief personal pleasure in her flowers, was often planting or pruning beside me, at least if I chose to stay beside *her*. I never thought of doing anything behind her back which I would not have done before her face; and her presence was therefore no restraint to me; but, also, no particular pleasure, for, from having always been left so much alone, I had generally my own little affairs to see after; and, on the whole, by the time I was seven years old, was already getting too independent, mentally, even of my father and mother; and, having nobody else to be dependent upon, began to lead a very small, perky, contented, conceited, Cock-Robinson-Crusoe sort of life, in the central point which it appeared to me, (as it must naturally appear to geometrical animals,) that I occupied in the universe.

This was partly the fault of my father's modesty; and partly of his pride. He had so much more confidence in my mother's judgment as to such matters than in his own, that he never ventured even to help, much less to cross her, in the conduct of my education; on the other hand, in the fixed purpose of making an ecclesiastical gentleman of me, with the superfinest of manners, and access to the highest circles of fleshly and spiritual society, the visits to Croydon, where I entirely loved my aunt, and young baker-cousins, became rarer and more rare: the society of our neighbors on the hill

could not be had without breaking up our regular and sweetly selfish manner of living ; and on the whole, I had nothing animate to care for, in a childish way, but myself, some nests of ants, which the gardener would never leave undisturbed for me, and a sociable bird or two ; though I never had the sense or perseverance to make one really tame. But that was partly because, if ever I managed to bring one to be the least trustful of me, the cats got it.

Under these circumstances, what powers of imagination I possessed, either fastened themselves on inanimate things—the sky, the leaves, and pebbles, observable within the walls of Eden, or caught at any opportunity of flight into regions of romance, compatible with the objective realities of existence in the nineteenth century, within a mile and a quarter of Camberwell Green.

Herein my father, happily, though with no definite intention other than of pleasing me, when he found he could do so without infringing any of my mother's rules, became my guide. I was particularly fond of watching him shave ; and was always allowed to come into his room in the morning (under the one in which I am now writing), to be the motionless witness of that operation. Over his dressing-table hung one of his own water-color drawings, made under the teaching of the elder Nasmyth. I believe, at the High School of Edinburgh. It was done in the early manner of tinting, which, just about the time when my father was at the High School, Dr. Munro was teaching Turner ; namely, in grey under-tints of Prussian blue and British ink, washed with warm color afterward on the lights. It represented Conway Castle, with its Frith, and, in the foreground, a cottage, a fisherman, and a boat at the water's edge.\*

When my father had finished shaving, he always told me a story about this picture. The custom began without any initial purpose of his, in consequence of my troublesome curiosity whether the fisherman lived in the cottage, and where

---

\* This drawing is still over the chimney-piece of my bedroom at Brantwood.

he was going to in the boat. It being settled, for peace, sake, that he *did* live in the cottage, and was going in the boat to fish near the castle, the plot of the drama afterward gradually thickened ; and became, I believe, involved with that of the tragedy of Douglas, and of the Castle Spectre, in both of which pieces my father had performed in private theatricals, before my mother, and a select Edinburgh audience, when he was a boy of sixteen, and she, at grave twenty, a model housekeeper, and very scornful and religiously suspicious of theatricals. But she was never weary of telling me, in later years, how beautiful my father looked in his Highland dress, with the high black feathers.

In the afternoons, when my father returned (always punctually) from his business, he dined, at half-past four, in the front parlor, my mother sitting beside him to hear the events of the day, and give counsel and encouragement with respect to the same ;—chiefly the last, for my father was apt to be vexed if orders for sherry fell the least short of their due standard, even for a day or two. I was never present at this time, however, and only avouch what I relate by hearsay and probable conjecture ; for between four and six it would have been a grave misdemeanor in me if I so much as approached the parlor door. After that, in summer time, we were all in the garden as long as the day lasted ; tea under the white-heart cherry tree ; or in winter and rough weather, at six o'clock in the drawing-room,—I having my cup of milk, and slice of bread-and-butter, in a little recess, with a table in front of it, wholly sacred to me ; and in which I remained in the evenings as an Idol in a niche, while my mother knitted, and my father read to her,—and to me, so far as I chose to listen.

The series of the Waverley novels, then drawing toward its close, was still the chief source of delight in all households caring for literature ; and I can no more recollect the time when I did not know them than when I did not know the Bible ; but I have still a vivid remembrance of my father's intense expression of sorrow mixed with scorn, as he threw down "Count Robert of Paris," after reading three or four pages ; and knew that the life of Scott was ended : the scorn

being a very complex and bitter feeling in him,—partly, indeed, of the book itself, but chiefly of the wretches who were tormenting and selling the wrecked intellect, and not a little, deep down, of the subtle dishonesty which had essentially caused the ruin. My father never could forgive Scott his concealment of the Ballantyne partnership.

Such being the salutary pleasures of Herne Hill, I have next with deeper gratitude to chronicle what I owed to my mother for the resolutely consistent lessons which so exercised me in the Scriptures as to make every word of them familiar to my ear in habitual music,—yet in that familiarity revered, as transcending all thought, and ordaining all conduct.\*

This she effected, not by her own sayings or personal authority; but simply by compelling me to read the book thoroughly, for myself. As soon as I was able to read with fluency, she began a course of Bible work with me, which never ceased till I went to Oxford. She read alternate verses with me, watching, at first, every intonation of my voice, and correcting the false ones, till she made me understand the verse, if within my reach, rightly, and energetically. It might be beyond me altogether; that she did not care about; but she made sure that as soon as I got hold of it at all, I should get hold of it by the right end.

In this way she began with the first verse of Genesis, and went straight through, to the last verse of the Apocalypse; hard names, numbers, Levitical law, and all; and began again at Genesis the next day. If a name was hard, the better the exercise in pronunciation,—if a chapter was tiresome, the better lesson in patience,—if loathsome, the better lesson in faith that there was some use in its being so outspoken. After our chapters, (from two to three a day, according to their length, the first thing after breakfast, and no interruption from servants allowed,—none from visitors, who either joined in the reading or had to stay upstairs,—and none from any visitings or excursions, except real travelling,) I had to learn a few verses by heart, or repeat, to make sure I had not lost,

---

\* Compare the 52d paragraph of chapter iii. of Bible of Amiens.

something of what was already known ; and, with the chapters thus gradually possessed from the first word to the last, I had to learn the whole body of the fine old Scottish paraphrases, which are good, melodious, and forceful verse ; and to which, together with the Bible itself, I owe the first cultivation of my ear in sound.

It is strange that of all the pieces of the Bible which my mother thus taught me, that which cost me most to learn, and which was, to my child's mind, chiefly repulsive—the 119th Psalm—has now become of all the most precious to me, in its overflowing and glorious passion of love for the Law of God, in opposition to the abuse of it by modern preachers of what they imagine to be His gospel.

But it is only by deliberate effort that I recall the long morning hours of toil, as regular as sunrise,—toil on both sides equal—by which, year after year, my mother forced me to learn these paraphrases, and chapters, (the eighth of 1st Kings being one—try it, good reader, in a leisure hour !) allowing not so much as a syllable to be missed or misplaced ; while every sentence was required to be said over and over again till she was satisfied with the accent of it. I recollect a struggle between us of about three weeks, concerning the accent of the “of” in the lines

“ Shall any following spring revive  
The ashes of the urn ?”—

I insisting, partly in childish obstinacy, and partly in true instinct for rhythm, (being wholly careless on the subject both of urns and their contents,) on reciting it with an accented *of*. It was not, I say, till after three weeks' labor, that my mother got the accent lightened on the “of” and laid on the ashes, to her mind. But had it taken three years, she would have done it, having once undertaken to do it. And, assuredly, had she not done it,—well, there's no knowing what would have happened ; but I am very thankful she *did*.

I have just opened my oldest (in use) Bible,—a small, closely, and very neatly printed volume it is, printed in Edinburgh by Sir D. Hunter Blair and J. Bruce, Printers to

the King's Most Excellent Majesty, in 1816. Yellow, now, with age, and flexible, but not unclean, with much use, except that the lower corners of the pages at 8th of 1st Kings, and 32d Deuteronomy, are worn somewhat thin and dark, the learning of these two chapters having cost me much pains. My mother's list of the chapters with which, thus learned, she established my soul in life,\* has just fallen out of it. I will take what indulgence the incurious reader can give me, for printing the list thus accidentally occurrent :

Exodus	chapters	15th and 20th.
2 Samuel	"	1st, from 17th verse to the end.
1 Kings	"	8th.
Psalms	"	23d, 32d, 90th, 91st, 103d, 112th 119th, 139th.
Proverbs	"	2d, 3d, 8th, 12th.
Isaiah	"	58th.
Matthew	"	5th, 6th, 7th.
Acts	"	26th.
1 Corinthians	"	13th, 15th.
James	"	4th.
Revelation	"	5th, 6th

And truly, though I have picked up the elements of a little further knowledge—in mathematics, meteorology, and the like, in after life,—and owe not a little to the teaching of many people, this maternal installation of my mind in that property of chapters, I count very confidently the most precious, and, on the whole, the one *essential* part of all my education.

And it is perhaps already time to mark what advantage and mischief, by the chances of life up to seven years old, had been irrevocably determined for me.

---

\* This expression in Fors has naturally been supposed by some readers to mean that my mother at this time made me vitally and evangelically religious. The fact was far otherwise. I meant only that she gave me secure *ground* for all future life, practical or spiritual. See the paragraph next following.

I will first count my blessings (as a not unwise friend once recommended me to do, continually; whereas I have a bad trick of always numbering the thorns in my fingers and not the bones in them).

And for best and truest beginning of all blessings, I had been taught the perfect meaning of Peace, in thought, act, and word.

I never had heard my father's or mother's voice once raised in any question with each other; nor seen an angry, or even slightly hurt or offended, glance in the eyes of either. I had never heard a servant scolded; nor even suddenly, passionately, or in any severe manner, blamed. I had never seen a moment's trouble or disorder in any household matter; nor anything whatever either done in a hurry, or undone in due time. I had no conception of such a feeling as anxiety; my father's occasional vexation in the afternoons, when he had only got an order for twelve butts, after expecting one for fifteen, as I have just stated, was never manifested to *me*; and itself related only to the question whether his name would be a step higher or lower in the year's list of sherry exporters; for he never spent more than half his income, and therefore found himself little incommoded by occasional variations in the total of it. I had never done any wrong that I knew of—beyond occasionally delaying the commitment to heart of some improving sentence, that I might watch a wasp on the window pane, or a bird in the cherry tree; and I had never seen any grief.

Next to this quite priceless gift of Peace, I had received the perfect understanding of the natures of Obedience and Faith. I obeyed word, or lifted finger, of father or mother, simply as a ship her helm; not only without idea of resistance, but receiving the direction as a part of my own life and force, a helpful law, as necessary to me in every moral action as the law of gravity in leaping. And my practice in Faith was soon complete: nothing was ever promised me that was not given; nothing ever threatened me that was not inflicted, and nothing ever told me that was not true.

Peace, obedience, faith; these three for chief good; next

to these, the habit of fixed attention with both eyes and mind—on which I will not further enlarge at this moment, this being the main practical faculty of my life, causing Mazzini to say of me, in conversation authentically reported, a year or two before his death, that I had “the most analytic mind in Europe.” An opinion in which, so far as I am acquainted with Europe, I am myself entirely disposed to concur.

Lastly, an extreme perfection in palate and all other bodily senses, given by the utter prohibition of cake, wine, comfits, or, except in carefulest restriction, fruit; and by fine preparation of what food was given me. Such I esteem the main blessings of my childhood;—next, let me count the equally dominant calamities.

First, that I had nothing to love.

My parents were—in a sort—visible powers of nature to me, no more loved than the sun and the moon: only I should have been annoyed and puzzled if either of them had gone out; (how much, now, when both are darkened!)—still less did I love God; not that I had any quarrel with Him, or fear of Him; but simply found what people told me was His service, disagreeable; and what people told me was His book, not entertaining. I had no companions to quarrel with, neither; nobody to assist, and nobody to thank. Not a servant was ever allowed to do anything for me, but what it was their duty to do; and why should I have been grateful to the cook for cooking, or the gardener for gardening,—when the one dared not give me a baked potato without asking leave, and the other would not let my ants' nests alone, because they made the walks untidy? The evil consequence of all this was not, however, what might perhaps have been expected, that I grew up selfish or unaffectionate; but that, when affection did come, it came with violence utterly rampant and unmanageable, at least by me, who never before had anything to manage.

For (second of chief calamities) I had nothing to endure. Danger or pain of any kind I knew not: my strength was never exercised, my patience never tried, and my courage

never fortified. Not that I was ever afraid of anything,—either ghosts, thunder, or beasts; and one of the nearest approaches to insubordination which I was ever tempted into as a child, was in passionate effort to get leave to play with the lion's cubs in Wombwell's menagerie.

Thirdly. I was taught no precision nor etiquette of manners; it was enough if, in the little society we saw, I remained unobtrusive, and replied to a question without shyness: but the shyness came later, and increased as I grew conscious of the rudeness arising from the want of social discipline, and found it impossible to acquire, in advanced life, dexterity in any bodily exercise, skill in any pleasing accomplishment, or ease and tact in ordinary behavior.

Lastly, and chief of evils. My judgment of right and wrong, and powers of independent action,\* were left entirely undeveloped; because the bridle and blinkers were never taken off me. Children should have their times of being off duty, like soldiers; and when once the obedience, if required, is certain, the little creature should be very early put for periods of practice in complete command of itself; set on the barebacked horse of its own will, and left to break it by its own strength. But the ceaseless authority exercised over my youth left me, when cast out at last into the world, unable for some time to do more than drift with its vortices.

My present verdict, therefore, on the general tenor of my education at that time, must be, that it was at once too formal and too luxurious; leaving my character, at the most important moment for its construction, cramped indeed, but not disciplined; and only by protection innocent, instead of by practice virtuous. My mother saw this herself, and but too clearly, in later years; and whenever I did anything wrong, stupid, or hard-hearted,—(and I have done many things that were all three,)—always said, "It is because you were too much indulged."

Thus far, with some omissions, I have merely reprinted the

---

\**Action*, observe, I say here: in *thought* I was too independent, as I said above.

account of these times given in "Fors:" and I fear the sequel may be more trivial, because much is concentrated in the foregoing broad statement, which I have now to continue by slower steps;—and yet less amusing, because I tried always in "Fors" to say things, if I could, a little piquantly; and the rest of the things related in this book will be told as plainly as I can. But whether I succeeded in writing piquantly in Fors or not, I certainly wrote often obscurely; and the description above given of Herne Hill seems to me to need at once some reduction to plainer terms.

The actual height of the long ridge of Herne Hill, above Thames,—at least above the nearly Thames-level of its base at Camberwell Green, is, I conceive, not more than one hundred and fifty feet: but it gives the whole of this fall on both sides of it in about a quarter of a mile; forming, east and west, a succession of quite beautiful pleasure-ground and gardens, instantly dry after rain, and in which, for children, running down is pleasant play, and rolling a roller up, vigorous work. The view from the ridge on both sides was, before railroads came, entirely lovely: westward at evening, almost sublime, over softly wreathing distances of domestic wood;—Thames herself not visible, nor any fields except immediately beneath; but the tops of twenty square miles of politely inhabited groves. On the other side, east and south, the Nor-wood hills, partly rough with furze, partly wooded with birch and oak, partly in pure green bramble copse, and rather steep pasture, rose with the promise of all the rustic loveliness of Surrey and Kent in them, and with so much of space and height in their sweep, as gave them some fellowship with hills of true hill-districts. Fellowship now inconceivable, for the Crystal Palace, without ever itself attaining any true aspect of size, and possessing no more sublimity than a cucumber frame between two chimneys, yet by its stupidity of hollow bulk, dwarfs the hills at once; so that now one thinks of them no more but as three long lumps of clay, on lease for building. But then, the Nor-wood, or North wood, so called as it was seen from Croydon, in opposition to the South wood of the Surrey downs, drew itself in sweeping crescent good five miles

round Dulwich to the south, broken by lanes of ascent, Gipsy Hill, and others; and from the top, commanding views toward Dartford, and over the plain of Croydon,—in contemplation of which I one day frightened my mother out of her wits by saying “the eyes were coming out of my head!” She thought it was an attack of *coup-de-soleil*.

Central in such amphitheatre, the crowning glory of Herne Hill was accordingly, that, after walking along its ridge southward from London through a mile of chestnut, lilac, and apple trees, hanging over the wooden palings on each side—suddenly the trees stopped on the left, and out one came on the top of a field sloping down to the south into Dulwich valley—open field animate with cow and buttercup, and below, the beautiful meadows and high avenues of Dulwich; and beyond, all that crescent of the Norwood hills; a footpath, entered by a turnstile, going down to the left, always so warm that invalids could be sheltered there in March, when to walk elsewhere would have been death to them; and so quiet, that whenever I had anything difficult to compose or think of, I used to do it rather there than in our own garden. The great field was separated from the path and road only by light wooden open palings, four feet high, needful to keep the cows in. Since I last composed, or meditated there, various improvements have taken place; first the neighborhood wanted a new church, and built a meagre Gothic one with a useless spire, for the fashion of the thing, at the side of the field; then they built a parsonage behind it, the two stopping out half the view in that direction. Then the Crystal Palace came, for ever spoiling the view through all its compass, and bringing every show-day, from London, a flood of pedestrians down the footpath, who left it filthy with cigar ashes for the rest of the week: then the railroads came, and expatiating rougls by every excursion train, who knocked the palings about, roared at the cows, and tore down what branches of blossom they could reach over the palings on the enclosed side. Then the residents on the enclosed side built a brick wall to defend themselves. Then the path got to be insufferably hot as well as dirty, and was gradually abandoned to the

roughs, with a policeman on watch at the bottom. Finally, this year, a six foot high close paling has been put down the other side of it, and the processional excursionist has the liberty of obtaining what notion of the country air and prospect he may, between the wall and that, with one bad cigar before him, another behind him, and another in his mouth.

I do not mean this book to be in any avoidable way disagreeable or querulous ; but expressive generally of my native disposition—which, though I say it, is extremely amiable, when I'm not bothered : I will grumble elsewhere when I must, and only notice this injury alike to the resident and excursionist at Herne Hill, because questions of right-of-way are now of constant occurrence ; and in most cases, the mere *path* is the smallest part of the old Right, truly understood. The Right is of the cheerful view and sweet air which the path commanded.

Also, I may note in passing, that for all their talk about Magna Charta, very few Englishmen are aware that one of the main provisions of it is that Law should not be sold ;\* and it seems to me that the law of England might preserve Banstead and other downs free to the poor of England, without charging me, as it has just done, a hundred pounds for its temporary performance of that otherwise unremunerative duty.

I shall have to return over the ground of these early years, to fill gaps, after getting on a little first ; but will yet venture here the tediousness of explaining that my saying “ in Herne Hill garden all fruit was forbidden,” only meant, of course, forbidden unless under defined restriction ; which made the various gatherings of each kind in its season a sort of harvest festival ; and which had this further good in its apparent severity, that, although in the at last indulgent aeras, the peach which my mother gathered for me when she was sure it was ripe, and the cherry pie for which I had chosen the cherries red all round, were, I suppose, of more ethereal flavor to me than they could have been to children allowed

---

\* “ To no one will We sell, to no one will We deny or defer, Right or Justice.”

to pluck and eat at their will ; still, the unalloyed and long continuing pleasure given me by our fruit-tree avenue was in its blossom, not in its bearing. For the general epicurean enjoyment of existence, potatoes well browned, green peas well boiled,—broad beans of the true bitter,—and the pois of damson and currant for whose annual filling we were dependent more on the greengrocer than the garden, were a hundredfold more important to me than the dozen or two of nectarines of which perhaps I might get the halves of three,—(the other sides mouldy)—or the bushel or two of pears which went directly to the storeshelf. So that, very early indeed in my thoughts of trees, I had got at the principle given fifty years afterward in Proserpina, that the seeds and fruits of them were for the sake of the flowers, not the flowers for the fruit. The first joy of the year being in its snowdrops, the second, and cardinal one, was in the almond blossom,—every other garden and woodland gladness following from that in an unbroken order of kindling flower and shadowy leaf ; and for many and many a year to come,—until indeed, the whole of life became autumn to me,—my chief prayer for the kindness of heaven, in its flowerful seasons, was that the frost might not touch the almond blossom.

---

### CHAPTER III.

#### THE BANKS OF TAY.

The reader has, I hope, observed that in all I have hitherto said, emphasis has been laid only on the favorable conditions which surrounded the child whose history I am writing, and on the docile and impressionable quietness of its temper.

No claim has been made for it to any special power or capacity ; for, indeed, none such existed, except that patience in looking, and precision in feeling, which afterward, with due industry, formed my analytic power.

In all essential qualities of genius, except these, I was deficient ; my memory only of average power. I have literally

never known a child so incapable of acting a part, or telling a tale. On the other hand, I have never known one whose thirst for visible fact was at once so eager and so methodic.

I find also that in the foregoing accounts, modest as I meant them to be, higher literature is too boastfully spoken of as my first and exclusive study. My little Pope's "Iliad," and, in any understanding of them, my Genesis and Exodus, were certainly of little account with me till after I was ten. My calf milk of books was, on the lighter side, composed of "Dame Wiggins of Lee," "The Peacock at Home," and the like nursery rhymes; and on the graver side, of Miss Edgeworth's "Frank," and "Harry and Lucy," combined with "Joyce's Scientific Dialogues." The earliest dated efforts I can find, indicating incipient motion of brain-molecules, are six "poems" on subjects selected from those works; between the fourth and fifth of which my mother has written: "January, 1826. This book begun about September or October, 1826, finished about January, 1827." The whole of it, therefore, was written and printed in imitation of book-print, in my seventh year. The book is a little red one, ruled with blue, six inches high by four wide, containing forty-five leaves pencilled in imitation of print on both sides,—the title-page, written in the form here approximately imitated, p. 46, on the inside of the cover.

Of the promised four volumes, it appears that (according to my practice to this day) I accomplished but one and a quarter, the first volume consisting only of forty leaves, the rest of the book being occupied by the aforesaid six "poems," and the forty leaves losing ten of their pages in the "copper plates," of which the one, purporting to represent "Harry's new road," is, I believe, my first effort at mountain drawing. The passage closing the first volume of this work is, I think, for several reasons, worth preservation. I print it, therefore, with its own divisions of line, and three variations of size in imitated type. Punctuation must be left to the reader's kind conjecture. The hyphens, it is to be noticed, were put long or short, to make the print even, not that it ever succeeds in being so, but the variously spaced lines here imitate it pretty well.

HARRY AND LUCY

CONCLUDED

BEING THE LAST

PART OF

EARLY LESSONS

in four volumes

vol I

with copper

plates

PRINTED and composed by a little boy  
and also drawn.

Harry knew very well-  
what it was and went  
on with his drawing but  
Lucy soon called him aw-  
ay and bid him observe  
a great black cloud from-  
the north which seemed ra-  
ther electrical. Harry ran  
for an electrical apparatus which  
his father had given him and the-  
cloud electrified his apparatus positively  
after that another cloud came which  
electrified his apparatus negatively  
and then a long train of smaller  
ones but before this cloud came

a great cloud of dust rose from the ground and followed the positive cloud and at length seemed to come in contact with it and when the other cloud came a flash of lightning was seen to dart through the cloud of dust upon which the negative cloud spread very much and dissolved in rain which presently cleared the sky. After this phenomenon was over and also the surprise Harry began to wonder how electricity could get where there was so much water but he soon observed a rainbow and arising mist under it which his fancy soon transformed into a female form. He then remembered the witch of the waters at the Alps who was raised from them by taking some water in the-

hand and throwing it into the air pronouncing some unintelligible words. And though it was a tale it affected Harry now when he saw in the clouds some-  
 end of Harry thing  
 and Lucy like it.

The several reasons aforesaid, which induce me to reprint this piece of, too literally, "composition," are—the first, that it is a tolerable specimen of my seven years old spelling;—tolerable only, not *fair*, since it was extremely unusual with me to make a mistake at all, whereas here there are two (taking and unintelligible), which I can only account for by supposing I was in too great a hurry to finish my volume;—the second, that the adaptation of materials for my story out of "Joyce's Scientific Dialogues"\* and "Manfred," is an extremely per-

---

\*The original passage is as follows, vol. vi., edition of 1821, p. 138:—

"Dr. Franklin mentions a remarkable appearance which occurred to Mr. Wilke, a considerable electrician. On the 20th of July, 1758, at three o'clock in the afternoon, he observed a great quantity of dust rising from the ground, and covering a field, and part of the town in which he then was. There was no wind, and the dust moved gently toward the east, where there appeared a great black cloud, which electrified his apparatus positively to a very high degree. This cloud went toward the west, the dust followed it, and continued to rise higher and higher, till it composed a thick pillar, in the form of a sugar-loaf, and at length it seemed to be in contact with the cloud. At some distance from this, there came another great cloud, with a long stream of smaller ones, which electrified his apparatus negatively; and when they came near the positive cloud, a flash of lightning was seen to dart through the cloud of dust, upon which the negative clouds spread very much, and dissolved in rain, which presently cleared the atmosphere."

fect type of the interwoven temper of my mind, at the beginning of days just as much as at their end—which has always made foolish scientific readers doubt my books because there was love of beauty in them, and foolish æsthetic readers doubt my books because there was love of science in them;—the third, that the extremely reasonable method of final judgment, upon which I found my claim, to the sensible reader's respect for these dipartite writings, cannot be better illustrated than by this proof, that, even at seven years old, no tale, however seductive, could "affect" Harry, until he had seen—in the clouds, or elsewhere—"something like it."

Of the six poems which follow, the first is on the Steam-engine, beginning,

"When furious up from mines the water pours,  
And clears from rusty moisture all the ores ;"

and the last on the Rainbow, "in blank verse," as being of a didactic character, with observations on the ignorant and unreflective dispositions of certain people.

"But those that do not know about that light,  
Reflect not on it; and in all that light,  
Not one of all the colors do they know."

It was only, I think, after my seventh year had been fulfilled in these meditations, that my mother added the Latin lesson to the Bible-reading, and accurately established the daily routine which was sketched in the foregoing chapter. But it extremely surprises me, in trying, at least for my own amusement, if not the reader's, to finish the sketch into its corners, that I can't recollect now what used to happen first in the morning, except breakfasting in the nursery, and, if my Croydon cousin Bridget happened to be staying with us, quarrelling with her which should have the brownest bits of toast. That must have been later on, though, for I could not have been promoted to toast at the time I am thinking of. Nothing is well clear to me of the day's course, till, after my

father had gone to the City by the coach, and my mother's household orders being quickly given, lessons began at half-past nine, with the Bible readings above described, and the two or three verses to be learned by heart, with a verse of paraphrase;—then a Latin declension or bit of verb, and eight words of vocabulary from "Adam's Latin Grammar," (the best that ever was,) and the rest of the day was my own. Arithmetic was wholesomely remitted till much later; geography I taught myself fast enough in my own way; history was never thought of, beyond what I chose to read of Scott's "Tales of a Grandfather." Thus, as aforesaid, by noon I was in the garden on fine days, or left to my own amusements on wet ones; of which I have farther at once to note that nearly as soon as I could crawl, my toy-bricks of *lignum vitæ* had been constant companions: and I am graceless in forgetting by what extravagant friend, (I greatly suspect my Croydon aunt,) I was afterward gifted with a two-arched bridge, admirable in fittings of *voussoir* and keystone, and adjustment of the level courses of masonry with bevelled edges, into which they dovetailed, in the style of Waterloo Bridge. Well-made centrigs, and a course of inlaid steps down to the water, made this model largely, as accurately, instructive: and I was never weary of building, *unbuilding*,—(it was too strong to be thrown down, but had always to be *taken* down,)—and rebuilding it. This inconceivably passive—or rather impassive—contentment in doing, or reading, the same thing over and over again, I perceive to have been a great condition in my future power of getting thoroughly to the bottom of matters.

Some people would say that in getting these toys lay the chance that guided me to an early love of architecture; but I never saw or heard of another child so fond of its toy bricks, except Miss Edgeworth's Frank. To be sure, in this present age,—age of universal brickfield though it be,—people don't give their children toy bricks, but toy puff-puffs; and the little things are always taking tickets and arriving at stations, without ever fathoming—none of them will take pains enough to do *that*,—the principle of a puff-puff! And what good could

they get of it if they did,—unless they could learn also, that no principle of Puff-puff would ever supersede the principle of Breath?

But I not only mastered, with “Harry and Lucy,” the entire motive principle of puff-puff; but also, by help of my well-cut bricks, very utterly the laws of practical stability in towers and arches, by the time I was seven or eight years old: and these studies of structure were farther animated by my invariable habit of watching, with the closest attention, the proceedings of any bricklayers, stone-sawyers, or paviors,—whose work my nurse would allow me to stop to contemplate in our walks; or, delight of delights, might be seen at ease from some fortunate window of inn or lodging on our journeys. In those cases the day was not long enough for my rapture and riveted observation.

Constantly, as aforesaid, in the garden when the weather was fine, my time there was passed chiefly in the same kind of close watching of the ways of plants. I had not the smallest taste for growing them, or taking care of them, any more than for taking care of the birds, or the trees, or the sky, or the sea. My whole time passed in staring at them, or into them. In no morbid curiosity, but in admiring wonder, I pulled every flower to pieces till I knew all that could be seen of it with child’s eyes; and used to lay up little treasures of seeds, by way of pearls and beads,—never with any thought of sowing them. The old gardener only came once a week, for what sweeping and weeding needed doing; I was fain to learn to sweep the walks with him, but was discouraged and shamed by his always doing the bits I had done over again. I was extremely fond of digging holes, but that form of gardening was not allowed. Necessarily, I fell always back into my merely contemplative mind, and at nine years old began a poem, called “Eudosia,”—I forget wholly where I got hold of this name, or what I understood by it,—“On the Universe,” though I could understand not a little by it, now. A couplet or two, as the real beginning at once of “Deucalion” and “Proserpina,” may be perhaps allowed, together with the preceding, a place in this grave memoir; the rather that I am again

enabled to give accurate date—September 28th, 1828—for the beginning of its “First book,” as follows:—

“When first the wrath of heaven o’erwhelmed the world,  
 And o’er the rocks, and hills, and mountains, hurl’d  
 The waters’ gathering mass; and sea o’er shore,—  
 Then mountains fell, and vales, unknown before,  
 Lay where they were. Far different was the Earth  
 When first the flood came down, than at its second birth.  
 Now for its produce!—Queen of flowers, O rose,  
 From whose fair colored leaves such odor flows,  
 Thou must now be before thy subjects named,  
 Both for thy beauty and thy sweetness famed.  
 Thou art the flower of England, and the flow’r  
 Of Beauty too—of Venus’ odorous bower.  
 And thou wilt often shed sweet odors round,  
 And often stooping, hide thy head on ground.\*  
 And then the lily, towering up so proud,  
 And raising its gay head among the various crowd,  
 There the black spots upon a scarlet ground,  
 And there the taper-pointed leaves are found.”

In 220 lines, of such quality, the first book ascends from the rose to the oak. The second begins—to my surprise, and in extremely exceptional violation of my above-boasted custom—with an ecstatic apostrophe to what I had never seen!

“I sing the Pine, which clothes high Switzer’s † head,  
 And high enthroned, grows on a rocky bed,  
 On gulphs so deep, on cliffs that are so high,  
 He that would dare to climb them, dares to die.”

This enthusiasm, however, only lasts—mostly exhausting itself in a description, verified out of “Harry and Lucy,” of the slide of Alpnach,—through 76 lines, when the verses cease, and the book being turned upside down, begins at the other end with the information that “Rock-crystal is accompanied by Actynolite, Axinite, and Epidote, at Bourg d’Oisans in

---

\* An awkward way—chiefly for the rhyme’s sake—of saying that roses are often too heavy for their stalks.

† Switzer, clearly short for Switzerland.

Dauphiny." But the garden-meditations never ceased, and it is impossible to say how much strength was gained, or how much time uselessly given, except in pleasure, to these quiet hours and foolish rhymes. Their happiness made all the duties of outer life irksome, and their unprogressive reveries might, the reader may think, if my mother had wished, have been changed into a beginning of sound botanical knowledge. But, while there were books on geology and mineralogy which I could understand, all on botany were then,—and they are little mended now,—harder than the Latin grammar. The mineralogy was enough for me seriously to work at, and I am inclined finally to aver that the garden-time could not have been more rightly passed, unless in weeding.

At six punctually I joined my father and mother at tea, being, in the drawing-room, restricted to the inhabitation of the sacred niche above referred to, a recess beside the fireplace, well lighted from the lateral window in the summer evenings, and by the chimney-piece lamp in winter, and out of all inconvenient heat, or hurtful draught. A good writing-table before it shut me well in, and carried my plate and cup, or books in service. After tea, my father read to my mother what pleased themselves, I picking up what I could, or reading what I liked better instead. Thus I heard all the Shakespeare comedies and historical plays again and again,—all Scott, and all "Don Quixote," a favorite book of my father's, and at which I could then laugh to ecstasy; now, it is one of the saddest, and, in some things, the most offensive of books to me.

My father was an absolutely beautiful reader of the *best* poetry and prose;—of Shakespeare, Pope, Spenser, Byron, and Scott; as of Goldsmith, Addison, and Johnson. Lighter ballad poetry he had not fineness of ear to do justice to: his sense of the strength and wisdom of true meaning, and of the force of rightly ordered syllables, made his delivery of "Hamlet," "Lear," "Cæsar," or "Marmion," melodiously grand and just; but he had no idea of modulating the refrain of a ballad, and had little patience with the tenor of its sentiment.

He looked always, in the matter of what he read, for heroic will and consummate reason : never tolerated the morbid love of misery for its own sake, and never read, either for his own pleasure or my instruction, such ballads as "Burd Helen," the "Twa Corbies," or any other rhyme or story which sought its interest in vain love or fruitless death.

But true, pure, and ennobling sadness began very early to mingle its undertone with the constant happiness of those days ;—a ballad music, beautiful in sincerity, and hallowing them like cathedral chant. Concerning which,—I must go back now to the days I have only heard of with the hearing of the ear, and yet of which some are to me as if mine eyes had seen them.

It must have been a little after 1780 that my paternal grandmother, Catherine Tweeddale, ran away with my paternal grandfather when she was not quite sixteen ; and my aunt Jessie, my father's only sister, was born a year afterward ; a few weeks after which event, my grandmother, not yet seventeen, was surprised, by a friend who came into her room unannounced, dancing a threesome reel, with two chairs for her partners ; she having found at the moment no other way of adequately expressing the pleasure she took in this mortal life, and its gifts and promises.

The latter failed somewhat afterward ; and my aunt Jessie, a very precious and perfect creature, beautiful in her dark-eyed, Highland way,—utterly religious, in her quiet Puritan way,—and very submissive to Fates mostly unkind, was married to a somewhat rough tanner, with a fairly good business in the good town of Perth : and, when I was old enough to be taken first to visit them, my aunt and my uncle the tanner lived in a square-built gray stone house in the suburb of Perth known as "Bridge-End," the house some fifty yards north of the bridge ; its garden sloping steeply to the Tay, which eddied, three or four feet deep of sombre crystal, round the steps where the servants dipped their pails.

A mistaken correspondent in "Fors" once complained of my coarse habit of sneering at people of no ancestry. I have no such habit ; though not always entirely at ease in writing of

my uncles the baker and the tanner. And my readers may trust me when I tell them that, in now remembering my dreams in the house of the entirely honest chief baker of Market Street, Croydon, and of Peter,—not Simon,—the tanner, whose house was by the riverside of Perth, I would not change the dreams, far less the tender realities, of those early days, for anything I hear now remembered by lords or dames, of their days of childhood in castle halls, and by sweet lawns and lakes in park-walled forest.

Lawn and lake enough indeed I had, in the North Inch of Perth, and pools of pausing Tay, before Rose Terrace, (where I used to live after my uncle died, briefly apoplectic, at Bridge-End,) in the peace of the fair Scotch summer days, with my widowed aunt, and my little cousin Jessie, then traversing a bright space between her sixth and ninth year; dark-eyed deeply, \* like her mother, and similarly pious; so that she and I used to compete in the Sunday evening Scriptural examinations; and be as proud as two little peacocks because Jessie's elder brothers, and sister Mary, used to get "put down," and either Jessie or I was always "Dux." We agreed upon this that we would be married when we were a little older; not considering it to be preparatorily necessary to be in any degree wiser.

Strangely, the kitchen servant-of-all-work in the house at Rose Terrace was a very old "Mause,"—before, my grandfather's servant in Edinburgh,—who might well have been the prototype of the Mause of "Old Mortality," † but had even a

---

\* As opposed to the darkness of mere iris, making the eyes like black cherries.

† Vulgar modern Puritanism has shown its degeneracy in nothing more than in its incapability of understanding Scott's exquisitely finished portraits of the Covenanter. In Old Mortality alone, there are four which cannot be surpassed; the typical one, Elspeth, faultlessly sublime and pure; the second, Ephraim Macbriar, giving the too common phase of the character, which is touched with ascetic insanity; the third, Mause, colored and made sometimes ludicrous by Scottish conceit, but utterly strong and pure at heart; the last, Balfour, a study of supreme interest, showing the effect of the Puritan faith, sincerely held, on a naturally and incurably cruel and base spirit. Add to these four studies,

more solemn, fearless, and patient faith, fastened in her by extreme suffering; for she had been nearly starved to death when she was a girl, and had literally picked the bones out of cast-out dust-heaps to gnaw; and ever afterward, to see the waste of an atom of food was as shocking to her as blasphemy. "Oh, Miss Margaret!" she said once to my mother, who had shaken some crumbs off a dirty plate out of the window, "I had rather you had knocked me down." She would make her dinner upon anything in the house that the other servants wouldn't eat;—often upon potato skins, giving her own dinner away to any poor person she saw; and would always stand during the whole church service, (though at least seventy years old when I knew her, and very feeble,) if she could persuade any wild Amorite out of the streets to take her seat. Her wrinkled and worn face, moveless in resolution and patience, incapable of smile, and knit sometimes perhaps too severely against Jessie and me, if we wanted more creamy milk to our porridge, or jumped off our favorite box on Sunday,—("Never mind, John," said Jessie to me, once, seeing me in an unchristian state of provocation on this subject, "when we're married, we'll jump off boxes all day long, if we like!")—may have been partly instrumental in giving me that slight bias against Evangelical religion, which I confess to be sometimes traceable in my later works; but I never can be thankful enough for having seen in our own "Old Mause," the Scottish Puritan spirit in its perfect faith and force; and been enabled therefore afterward to trace its agency in the reforming policy of Scotland, with the reverence and honor it deserves.

My aunt, a pure dove-priestess, if ever there was one, of Highland Dodona, was of a far gentler temper; but still, to me, remained at a wistful distance. She had been much saddened by the loss of three of her children before her husband's death. Little Peter, especially, had been the cornerstone of her love's building; and it was thrown down swiftly:

---

from this single novel, those in the Heart of Midlothian, and Nicol Jarvie and Andrew Fairservice from Rob Roy, and you have a series of theological analyses far beyond those of any other philosophical work that I know, of any period.

—white swelling came in the knee; he suffered much, and grew weaker gradually, dutiful always, and loving, and wholly patient. She wanted him one day to take half a glass of port wine, and took him on her knee, and put it to his lips. “Not now, mamma; in a minute,” said he; and put his head on her shoulder, and gave one long, low sigh, and died. Then there was Catharine; and—I forget the other little daughter’s name, I did not see them; my mother told me of them;—eagerly always about Catharine, who had been her own favorite. My aunt had been talking earnestly one day with her husband about these two children; planning this and that for their schooling and what not: at night, for a little while she could not sleep; and as she lay thinking, she saw the door of the room open, and two spades come into it, and stand at the foot of her bed. Both the children were dead within brief time afterward. I was about to write “within a fortnight”—but I cannot be sure of remembering my mother’s words accurately.

But when I was in Perth, there were still—Mary, her eldest daughter, who looked after us children when Mause was too busy; James and John, William and Andrew; (I can’t think whom the unapostolic William was named after). But the boys were then all at school or college,—the scholars, William and Andrew, only came home to tease Jessie and me, and eat the biggest jargonel pears; the collegians were wholly abstract; and the two girls and I played in our quiet ways on the North Inch, and by the “Lead,” a stream “led” from the Tay past Rose Terrace into the town for molinary purposes; and long ago, I suppose, bricked over or choked with rubbish; but then lovely, and a perpetual treasure of flowing diamond to us children. Mary, by the way, was ascending toward twelve—fair, blue-eyed, and moderately pretty; and as pious as Jennie, without being quite so zealous.

My father rarely stayed with us in Perth, but went on business travel through Scotland, and even my mother became a curiously unimportant figure at Rose Terrace. I can’t understand how she so rarely walked with us children; she and my aunt seemed always to have their own secluded ways. Mary, Jessie, and I were allowed to do what we liked on the

Inch : and I don't remember doing any lessons in these Perth times, except the above-described competitive divinity on Sunday.

Had there been anybody then to teach me anything about plants or pebbles, it had been good for me ; as it was, I passed my days much as the thistles and tansy did, only with perpetual watching of all the ways of running water,—a singular awe developing itself in me, both of the pools of Tay, where the water changed from brown to blue-black, and of the precipices of Kinnoull ; partly out of my own mind, and partly because the servants always became serious when we went up Kinnoull way, especially if I wanted to stay and look at the little crystal spring of Bower's Well.

“But you say you were not afraid of anything?” writes a friend, anxious for the unassailable veracity of these memoirs. Well, I said, not of ghosts, thunder, or beasts,—meaning to specify the commonest terrors of mere childhood. Every day, as I grew wiser, taught me a reasonable fear ; else I had not above described myself as the most reasonable person of my acquaintance. And by the swirls of smooth blackness, broken by no fleck of foam, where Tay gathered herself like Medusa,\* I never passed without awe, even in those thoughtless days ; neither do I in the least mean that I could walk among tombstones in the night (neither, for that matter, in the day), as if they were only paving stones set upright. Far the contrary ; but it is important to the reader's confidence in writings which have seemed inordinately impressional and emotional, that he should know I was never subject to—I should perhaps rather say, sorrowfully, never capable of—any manner of illusion or false imagination, nor in the least liable to have my nerves shaken by surprise. When I was about five years old, having been on amicable terms for a while with a black Newfoundland, then on probation for watch-dog at Herne Hill ; after one of our long summer journeys my first thought on getting home was to go to see Lion. My mother trusted me to go to the stable with our one serving-man, Thomas, giving

---

\* I always think of Tay as a goddess river, as Greta a nymph one.

him strict orders that I was not to be allowed within stretch of the dog's chain. Thomas, for better security, carried me in his arms. Lion was at his dinner, and took no notice of either of us ; on which I besought leave to pat him. Foolish Thomas stooped toward him that I might, when the dog instantly flew at me, and bit a piece clean out of the corner of my lip on the left side. I was brought up the back stairs, bleeding fast, but not a whit frightened, except lest Lion should be sent away. Lion indeed had to go ; but not Thomas : my mother was sure he was sorry, and I think blamed herself the most. The bitten side of the (then really pretty) mouth, was spoiled for evermore, but the wound, drawn close, healed quickly ; the last use I made of my movable lips before Dr. Aveline drew them into ordered silence for a while, was to observe, "Mamma, though I can't speak, I can play upon the fiddle." But the house was of another opinion, and I never attained any proficiency upon that instrument worthy of my genius. Not the slightest diminution of my love of dogs, nor the slightest nervousness in managing them, was induced by the accident.

I scarcely know whether I was in any real danger or not when, another day, in the same stable, quite by myself, I went head foremost into the large water-tub kept for the garden. I think I might have got awkwardly wedged if I had tried to draw my feet in after me : instead, I used the small watering-pot I had in my hand to give myself a good thrust up from the bottom, and caught the opposite edge of the tub with my left hand, getting not a little credit afterward for my decision of method. Looking back to the few chances that have in any such manner tried my head, I believe it has never failed me when I wanted it, and that I am much more likely to be confused by sudden admiration than by sudden danger.

The dark pools of Tay, which have led me into this boasting, were under the high bank at the head of the North Inch, —the path above them being seldom traversed by us children unless at harvest time, when we used to go gleaning in the fields beyond ; Jessie and I afterward grinding our corn in

the kitchen pepper-mill, and kneading and toasting for ourselves cakes of pepper bread, of quite unpurchasable quality.

In the general course of this my careful narration, I rebut with as much indignation as may be permitted without ill manners, the charge of partiality to anything merely because it was seen when I was young. I hesitate, however, in recording as a constant truth for the world, the impression left on me when I went gleaming with Jessie, that Scottish sheaves are more golden than are bound in other lands, and that no harvests elsewhere visible to human eyes are so like the "corn of heaven" \* as those of Strath-Tay and Strath-Earn.

---

## CHAPTER IV.

### UNDER NEW TUTORSHIPS.

When I was about eight or nine I had a bad feverish illness at Dunkeld, during which I believe I was in some danger, and am sure I was very uncomfortable. It came on after a long walk in which I had been gathering quantities of foxgloves and pulling them to pieces to examine their seeds, and there were hints about their having poisoned me; very absurd, but which extended the gathering awe from river eddies to foxglove dells. Not long after that, when we were back at home, my cousin Jessie fell ill, and died very slowly, of water on the brain. I was very sorry, not so much in any strength of early affection, as in the feeling that the happy, happy days at Perth were for ever ended, since there was no more Jessie.

Before her illness took its fatal form,—before, indeed, I believe it had at all declared itself—my aunt dreamed one of her foresight dreams, simple and plain enough for anyone's interpretation;—that she was approaching the ford of a dark river, alone, when little Jessie came running up behind her, and passed her, and went through first. Then she passed

---

\* Psalm lxxviii. 24.

through herself, and looking back from the other side, saw her old Mause approaching from the distance to the bank of the stream. And so it was, that Jessie, immediately afterward, sickened rapidly and died; and a few months, or it might be nearly a year afterward, my aunt died of decline; and Mause, some two or three years later, having had no care after her mistress and Jessie were gone, but when she might go to them.

I was at Plymouth with my father and mother when my Scottish aunt died, and had been very happy with my nurse on the hill east of the town, looking out on the bay and breakwater; and came in to find my father, for the first time I had ever seen him, in deep distress of sobbing tears.

I was very sorry that my aunt was dead, but, at that time (and a good deal since, also,) I lived mostly in the present, like an animal, and my principal sensation was,—What a pity it was to pass such an uncomfortable evening—and we at Plymouth!

The deaths of Jessie and her mother of course ended our Scottish days. The only surviving daughter, Mary, was thenceforward adopted by my father and mother, and brought up with me. She was fourteen when she came to us, and I four years younger;—so with the Perth days, closed the first decade of my life. Mary was a rather pretty, blue-eyed, clumsily-made girl, very amiable and affectionate in a quiet way, with no parts, but good sense and good principle, honestly and inoffensively pious, and equal tempered, but with no pretty girlish ways or fancies. She became a serene additional neutral tint in the household harmony; read alternate verses of the Bible with my mother and me in the mornings, and went to a day school in the forenoon. When we travelled she took somewhat of a governess position toward me, we being allowed to explore places together without my nurse;—but we generally took old Anne too for better company.

It began now to be of some importance what church I went to on Sunday morning. My father, who was still much broken in health, could not go to the long Church of England

service, and, my mother being evangelical, he went contentedly, or at least submissively, with her and me to Beresford Chapel, Walworth, where the Rev. D. Andrews preached, regularly, a somewhat eloquent, forcible, and ingenious sermon, not tiresome to him:—the prayers were abridged from the Church Service, and we, being the grandest people in the congregation, were allowed—though, as I now remember, not without offended and reproachful glances from the more conscientious worshippers—to come in when even those short prayers were half over. Mary and I used each to write an abstract of the sermon in the afternoon, to please ourselves,—Mary dutifully, and I to show how well I could do it. We never went to church in afternoon or evening. I remember yet the amazed and appalling sensation, as of a vision preliminary to the Day of Judgment, of going, a year or two later, first into a church by candlelight.

We had no family worship, but our servants were better cared for than is often the case in ostentatiously religious houses. My mother used to take them, when girls, from families known to her, sister after sister, and we never had a bad one.

On the Sunday evening my father would sometimes read us a sermon of Blair's, or it might be, a clerk or a customer would dine with us, when the conversation, in mere necessary courtesy, would take generally the direction of sherry. Mary and I got through the evening how we could, over the "Pilgrim's Progress," Bunyan's "Holy War," "Quarles's Emblems," "Foxe's Book of Martyrs," Mrs. Sherwood's "Lady of the Manor,"—a very awful book to me, because of the stories in it of wicked girls who had gone to balls, dying immediately after of fever,—and Mrs. Sherwood's "Henry Milner,"—of which more presently,—the *Youth's Magazine*, "Alfred Campbell the Young Pilgrim," and, though rather as a profane indulgence, permitted because of the hardness of our hearts, Bingley's "Natural History." We none of us cared for singing hymns or psalms as such, and were too honest to amuse ourselves with them as sacred music, besides that we did not find their music amusing.

My father and mother, though due cheques for charities were of course sent to Dr. Andrews, and various civilities at Christmas, in the way of turkeys or boxes of raisins, intimated their satisfaction with the style of his sermons and purity of his doctrine,—had yet, with their usual shyness, never asked for his acquaintance, or even permitted the state of their souls to be inquired after in pastoral visits. Mary and I, however, were charmed merely by the distant effect of him, and used to walk with Anne up and down in Walworth, merely in hope of seeing him pass on the other side of the way. At last, one day, when, by extreme favor of Fortune, he met us in a great hurry on our own side of it, and nearly tumbled over me, Anne, as he recovered himself, dropped him a low courtesey; whereupon he stopped, inquired who we were, and was extremely gracious to us; and we, coming home in a fever of delight, announced, not much to my mother's satisfaction, that the Doctor had said he would call some day! And so, little by little, the blissful acquaintance was made. I might be eleven or going on twelve by that time. Miss Andrews, the elder sister of the "Angel in the House," was an extremely beautiful girl of seventeen; she sang "Tambourgi, Tambourgi"\* with great spirit and a rich voice, went at blackberry time on rambles with us at the Norwood Spa, and made me feel generally that there was something in girls that I did not understand, and that was curiously agreeable. And at last, because I was so fond of the Doctor, and he had the reputation (in Walworth) of being a good scholar, my father thought he might pleasantly initiate me in Greek, such initiation having been already too long deferred. The Doctor, it afterward turned out, knew little more of Greek than the letters, and declensions of nouns; but he wrote the letters prettily, and had an accurate and sensitive ear for rhythm. He began me with the odes of Anacreon, and made me scan both them and my Virgil thoroughly, sometimes, by way of interlude, reciting bits of Shakespeare to me with force and propriety. The Anacreontic metre entirely pleased me, nor

---

\* Hebrew Melodies.

less the Anacreontic sentiment. I learned half the odes by heart merely to please myself, and learned with certainty, what in later study of Greek art it has proved extremely advantageous to me to know, that the Greeks liked doves, swallows, and roses just as well as I did.

In the intervals of these unlaborious Greek lessons, I went on amusing myself—partly in writing English doggerel, partly in map drawing, or copying Cruikshank's illustrations to Grimm, which I did with great, and to most people now incredible, exactness, a sheet of them being, by good hap, well preserved, done when I was between ten and eleven. But I never saw any boy's work in my life showing so little original faculty, or grasp by memory. I could literally draw nothing, not a cat, not a mouse, not a boat, not a bush, "out of my head," and there was, luckily, at present no idea on the part either of parents or preceptor, of teaching me to draw out of other people's heads.

Nevertheless, Mary, at her day school, was getting drawing lessons with the other girls. Her report of the pleasantness and zeal of the master, and the frank and somewhat unusual execution of the drawings he gave her to copy, interested my father, and he was still more pleased by Mary's copying, for a proof of industry while he was away on his winter's journey—copying, in pencil, so as to produce the effect of a vigorous engraving, the little water-color by Prout of a wayside cottage, which was the foundation of our future water-color collection, being then our only possession in that kind—of other kind, two miniatures on ivory completed our gallery.

I perceive, in thinking over the good work of that patient black and white study, that Mary could have drawn, if she had been well taught and kindly encouraged. But her power of patient copying did not serve her in drawing from nature, and when, that same summer, I between ten and eleven (1829), we went to stay at Matlock in Derbyshire, all that she proved able to accomplish was an outline of Caxton's New Bath Hotel, in which our efforts in the direction of art, for that year, ended.

But, in the glittering white broken spar, specked with galena, by which the walks of the hotel garden were made

bright, and in the shops of the pretty village, and in many a happy walk among its cliffs, I pursued my mineralogical studies on fluor, calcite, and the ores of lead, with indescribable rapture when I was allowed to go into a cave. My father and mother showed far more kindness than I knew, in yielding to my subterranean passion ; for my mother could not bear dirty places, and my father had a nervous feeling that the ladders would break, or the roof fall, before we got out again. They went with me, nevertheless, wherever I wanted to go,—my father even into the terrible Speedwell mine at Castleton, where, for once, I was a little frightened myself.

From Matlock we must have gone on to Cumberland, for I find in my father's writing the legend, "Begun 28th November, 1830, finished 11th January, 1832," on the fly-leaf of the "Itieriad," a poem in four books, which I indited, between those dates, on the subject of our journey among the Lakes, and of which some little notice may be taken farther on.

It must have been in the spring of 1831 that the important step was taken of giving me a drawing master. Mary showed no gift of representing any of the scenes of our travels, and I began to express some wish that I could draw myself. Whereupon, Mary's pleasant drawing master, to whom my father and mother were equitable enough not to impute Mary's want of genius, was invited to give *me* also an hour in the week.

I suppose a drawing master's business can only become established by his assertion of himself to the public as the possessor of a style ; and teaching in that only. Nevertheless, Mr. Runciman's memory sustains disgrace in my mind in that he gave no impulse nor even indulgence to the extraordinary gift I had for drawing delicately with the pen point. Any work of that kind was done thenceforward only to please myself. Mr. Runciman gave me nothing but his own mannered and inefficient drawings to copy, and greatly broke the force both of my mind and hand.

Yet he taught me much, and suggested more. He taught

me perspective, at once accurately and simply—an invaluable bit of teaching. He compelled me into a swiftness and facility of hand which I found afterward extremely useful, though what I have just called the “force,” the strong accuracy of my line, was lost. He cultivated in me,—indeed founded,—the habit of looking for the essential points in the things drawn, so as to abstract them decisively, and he explained to me the meaning and importance of composition, though he himself could not compose.

A very happy time followed, for about two years.

I was, of course, far behind Mary in touch-skill of pencil drawing, and it was good for her that this superiority was acknowledged, and due honor done her for the steady pains of her unimpulsive practice and unwearied attention. For, as she did not write poems like me, nor collect spars like me, nor exhibit any prevailing vivacity of mind in any direction, she was gradually sinking into far too subordinate a position to my high-mightiness. But I could make no pretence for some time to rival her in free-hand copying, and my first attempts from nature were not felt by my father to be the least flattering to his vanity.

These were made under the stimulus of a journey to Dover with the forethought of which my mother comforted me through an illness of 1829. I find my quite first sketch-book, an extremely inconvenient upright small octavo in mottled and flexible cover, the paper pure white, and ribbedly gritty, filled with outlines, irregularly defaced by impulsive efforts at finish, in arbitrary places and corners, of Dover and Tunbridge Castles and the main tower of Canterbury Cathedral. These, with a really good study, supplemented by detached detail, of Battle Abbey, I have set aside for preservation; the really first sketch I ever made from nature being No. 1, of a street in Sevenoaks. I got little satisfaction and less praise by these works; but the native architectural instinct is instantly developed in these,—highly notable for anyone who cares to note such nativities. Two little pencillings from Canterbury south porch and central tower, I have given to Miss Gale, of Burgate House, Canterbury; the remnants of

the book itself to Mrs. Talbot, of Tyn-y-Ffynon, Barmouth, both very dear friends.

But, before everything, at this time, came my pleasure in merely watching the sea. I was not allowed to row, far less to sail, nor to walk near the harbor alone; so that I learned nothing of shipping, or anything else worth learning, but spent four or five hours every day in simply staring and wondering at the sea,—an occupation which never failed me till I was forty. Whenever I could get to a beach it was enough for me to have the waves to look at, and hear, and pursue and fly from. I never took to natural history of shells, or shrimps, or weeds, or jelly-fish. Pebbles?—yes if there were any; otherwise, merely stared all day long at the tumbling and creaming strength of the sea. Idiotically, it now appears to me, wasting all that priceless youth in mere dream and trance of admiration; it had a certain strain of Byronic passion in it, which meant something: but it was a fearful loss of time.

The summer of 1832 must, I think, have been passed at home, for my next sketch-book contains only some efforts at tree-drawing in Dulwich, and a view of the bridge over the now bricked-up “Effra,” by which the Norwood road then crossed it at the bottom of Herne Hill: the road itself, just at the place where, from the top of the bridge, one looked up and down the streamlet, bridged now into putridly damp shade by the railway, close to Herne Hill Station. This sketch was the first in which I was ever supposed to show any talent for drawing. But on my thirteenth (?) birthday, 8th February, 1832, my father’s partner, Mr. Henry Telford, gave me Rogers’ “Italy,” and determined the main tenor of my life.

At that time I had never heard of Turner, except in the well-remembered saying of Mr. Runciman’s, that “the world had lately been much dazzled and led away by some splendid ideas thrown out by Turner.” But I had no sooner cast eyes on the Rogers vignettes than I took them for my only masters, and set myself to imitate them as far as I possibly could by fine pen shading.

I have told this story so often that I begin to doubt its

time. It is curiously tiresome that Mr. Telford did not himself write my name in the book, and my father, who writes in it, "The gift of Henry Telford, Esq.," still more curiously, for him, puts no date: if it was a year later, no matter; there is no doubt however that early in the spring of 1833 Prout published his sketches in Flanders and Germany. I well remember going with my father into the shop where subscribers entered their names, and being referred to the specimen print, the turreted window over the Moselle, at Coblenz. We got the book home to Herne Hill before the time of our usual annual tour; and as my mother watched my father's pleasure and mine in looking at the wonderful places, she said, why should not we go and see some of them in reality? My father hesitated a little, then with glittering eyes said—why not? And there were two or three weeks of entirely rapturous and amazed preparation. I recollect that very evening bringing down my big geography book, still most precious to me; (I take it down now, and for the first time put my own initials under my father's name in it)—and looking with Mary at the outline of Mont Blanc, copied from Saussure, at p. 201, and reading some of the very singular information about the Alps which it illustrates. So that Switzerland must have been at once included in the plans,—soon prosperously, and with result of all manner of good, by God's help fulfilled.

We went by Calais and Brussels to Cologne; up the Rhine to Strasburg, across the Black Forest to Schaffhausen, then made a sweep through North Switzerland by Basle, Berne, Interlachen, Lucerne, Zurich, to Constance,—following up the Rhine still to Coire, then over Splugen to Como, Milan, and Genoa; meaning, as I now remember, for Rome. But, it being June already, the heat of Genoa warned us of imprudence: we turned, and came back over the Simplon to Geneva, saw Chamouni, and so home by Lyons and Dijon.

To do all this in the then only possible way, with post-horses, and, on the lakes, with oared boats, needed careful calculation of time each day. My father liked to get to our sleeping place as early as he could, and never would stop the horses for me to draw anything (the extra pence to postilion

for waiting being also an item of weight in his mind) ;—thus I got into the bad habit, yet not without its discipline, of making scrawls as the carriage went along, and working them up “out of my head” in the evening. I produced in this manner, throughout the journey, some thirty sheets or so of small pen and Indian ink drawings, four or five in a sheet; some not inelegant, all laborious, but for the most part one just like another, and without exception stupid and characterless to the last degree.

With these flying scrawls on the road, I made, when staying in towns, some elaborate pencil and pen outlines, of which perhaps half a dozen are worth register and preservation. My father’s pride in a study of the doubly-towered Renaissance church of Dijon was great. A still more laborious Hôtel de Ville of Brussels remains with it at Brantwood. The drawing of that Hôtel de Ville by me now at Oxford is a copy of Prout’s, which I made in illustration of the volume in which I wrote the beginning of a rhymed history of the tour.

For it had excited all the poor little faculties that were in me to their utmost strain, and I had certainly more passionate happiness, of a quality utterly indescribable to people who never felt the like, and more, in solid quantity, in those three months, than most people have in all their lives. The impression of the Alps first seen from Schaffhausen of Milan, and of Geneva, I will try to give some account of afterward,—my first business now is to get on.

The winter of ’33, and what time I could steal to amuse myself in, out of ’34, were spent in comparing, writing fair, and drawing vignettes for the decoration of the aforesaid poetical account of our tour, in imitation of Rogers’ “Italy.” The drawings were made on separate pieces of paper and pasted into the books; many have since been taken out, others are there for which the verses were never written, for I had spent my fervor before I got up the Rhine. I leave the unfinished folly in Joanie’s care, that none but friends may see it.

Meantime, it having been perceived by my father and mother that Dr. Andrews could neither prepare me for the

University, nor for the duties of a bishopric, I was sent as a day scholar to the private school kept by the Rev. Thomas Dale, in Grove Lane, within walking distance of Herne Hill. Walking down with my father after breakfast, carrying my blue bag of books, I came home to half-past one dinner, and prepared my lessons in the evening for next day. Under these conditions I saw little of my fellow-scholars, the two sons of Mr. Dale, Tom and James; and three boarders, the sons of Colonel Matson, of Woolwich; of Alderman Key, of Denmark Hill; and a fine lively boy, Willoughby Jones, afterward Sir W., and only lately, to my sorrow, dead.

Finding me in all respects what boys could only look upon as an innocent, they treated me as I suppose they would have treated a girl; they neither thrashed nor chaffed me,—finding, indeed, from the first that chaff had no effect on me. Generally I did not understand it, nor in the least mind it if I did, the fountain of pure conceit in my own heart sustaining me serenely against all deprecation, whether by master or companion. I was fairly intelligent of books, had a good quick and holding memory, learned whatever I was bid as fast as I could, and as well; and since all the other boys learned always as little as they could, though I was far in retard of them in real knowledge, I almost always knew the day's lesson best. I have already described, in the first chapter of "Fiction Fair and Foul," Mr. Dale's rejection of my clearly known old grammar as a "Scotch thing." In that one action he rejected himself from being my master; and I thenceforward learned all he told me only because I had to do it.

While these steps were taken for my classical advancement, a master was found for me, still in that unlucky Walworth, to teach me mathematics. Mr. Rowbotham was an extremely industrious, deserving, and fairly well-informed person in his own branches, who, with his wife, and various impediments and inconveniences in the way of children, kept a "young gentleman's Academy" near the Elephant and Castle, in one of the first houses which have black plots of grass in front, fenced by iron railings from the Walworth Road.

He knew Latin, German, and French grammar; was able

to teach the "use of the globes" as far as needed in a preparatory school, and was, up to far beyond the point needed for me, a really sound mathematician. For the rest, utterly unacquainted with men or their history, with nature and its meanings; stupid and disconsolate, incapable of any manner of mirth or fancy, thinking mathematics the only proper occupation of human intellect, asthmatic to a degree causing often helpless suffering, and hopelessly poor, spending his evenings, after his school-drudgery was over, in writing manuals of arithmetic and algebra, and compiling French and German grammars, which he allowed the booksellers to cheat him out of,—adding perhaps, with all his year's lamp-labor, fifteen or twenty pounds to his income;—a more wretched, innocent, patient, insensible, unadmirable, uncomfortable, intolerable being never was produced in this era of England by the culture characteristic of her metropolis.

Under the tuition, twice a week in the evening, of Mr. Rowbotham, (invited always to substantial tea with us before the lesson as a really efficient help to his hungry science, after the walk up Herne Hill, painful to asthma,) I prospered fairly in 1834, picking up some bits of French grammar, of which I had really felt the want,—I had before got hold, somehow, of words enough to make my way about with,—and I don't know how, but I recollect, at Paris, going to the Louvre under charge of Salvador, (I wanted to make a sketch from Rembrandt's Supper at Emmaus,) and on Salvador's application to the custode for permission, it appeared I was not old enough to have a ticket,—fifteen was then the earliest admission-age; but seeing me look woebegone, the good-natured custode said he thought if I went in to the "Board," or whatever it was, of authorities, and asked for permission myself, they would give it me. Whereupon I instantly begged to be introduced to the Board, and the custode taking me in under his coat lappets, I did verily, in what broken French was feasible to me, represent my case to several gentlemen of an official and impressive aspect, and got my permission, and outlined the Supper at Emmaus with some real success in expression, and was extremely proud of myself. But

my narrow knowledge of the language, though thus available for business, left me sorrowful and ashamed after the fatal dinner at Mr. Domecq's, when the little Elise, then just nine, seeing that her elder sisters did not choose to trouble themselves with me, and being herself of an entirely benevolent and pitiful temper, came across the drawing-room to me in my desolation, and leaning an elbow on my knee, set herself deliberately to chatter to me mellifluously for an hour and a half by the time-piece,—requiring no answer, of which she saw I was incapable, but satisfied with my grateful and respectful attention, and admiring interest, if not exactly always in what she said, at least in the way she said it. She gave me the entire history of her school, and of the objectionable characters of her teachers, and of the delightful characters of her companions, and of the mischief she got into, and the surreptitious enjoyments they devised, and the joys of coming back to the Champs Elysées, and the general likeness of Paris to the Garden of Eden. And the hour and a half seemed but too short, and left me resolved, anyhow, to do my best to learn French.

So, as I said, I progressed in this study to the contentment of Mr. Rowbotham, went easy through the three first books of Euclid, and got as far as quadratics in Algebra. But there I stopped, virtually, for ever. The moment I got into sums of series, or symbols expressing the relations instead of the real magnitudes of things,—partly in want of faculty, partly in an already well-developed and healthy hatred of things vainly bothering and intangible,—I jibbed—or stood stunned. Afterward at Oxford they dragged me through some conic sections, of which the facts representable by drawing became afterward of extreme value to me; and taught me as much trigonometry as made my mountain work, in plan and elevation, unaccusable. In elementary geometry I was always happy, and, for a boy, strong; and my conceit, developing now every hour more venomously as I began to perceive the weakness of my masters, led me to spend nearly every moment I could command for study in my own way, through the year 1835, in trying to trisect an angle. For some time

afterward I had the sense to reproach myself for the waste of thoughtful hours in that year, little knowing or dreaming how many a year to come, from that time forth, was to be worse wasted.

While the course of my education was thus daily gathering the growth of me into a stubborn little standard bush, various frost-stroke was stripping away from me the poor little flowers—or herbs—of the forest, that had once grown, happily for me, at my side.

---

## CHAPTER V.

### PARNASSUS AND PLYNLIMMON.

I have allowed, in the last chapter, my record of boyish achievements and experiments in art to run on to a date much in advance of the early years which were most seriously eventful for me in good and evil. I resume the general story of them with the less hesitation, because, such as it is, nobody else can tell it; while, in later years, my friends in some respects know me better than I know myself.

The second decade of my life was cut away still more sharply from the perfectly happy time of childhood, by the death of my Croydon aunt; death of "cold" literally, caught in some homely washing operations in an east wind. Her brown and white spaniel, Dash, lay beside her body, and on her coffin, till they were taken away from him; then he was brought to Herne Hill, and I think had been my companion some time before Mary came to us.

With the death of my Croydon aunt ended for me all the days by Wandel streams, as at Perth by Tay; and thus when I was ten years old, an exclusively Herne Hill-top life set in (when we were not travelling), of no very beneficial character.

My Croydon aunt left four sons—John, William, George, and Charles; and two daughters—Margaret and Bridget. All handsome lads and pretty lasses; but Margaret, in early youth, met with some mischance that twisted her spine, and

hopelessly deformed her. She was clever, and witty, like her mother ; but never of any interest to me, though I gave a kind of brotherly, rather than cousinly, affection to all my Croydon cousins. But I never liked invalids, and don't to this day ; and Margaret used to wear her hair in ringlets, which I couldn't bear the sight of.

Bridget was a very different creature ; a black-eyed, or, with precision, dark hazel-eyed, slim-made, lively girl ; a little too sharp in the features to be quite pretty, a little too wiry-jointed to be quite graceful ; capricious, and more or less selfish in temper, yet nice enough to be once or twice asked to Perth with us, or to stay for a month or two at Herne Hill ; but never attaching herself much to us, neither us to her. I felt her an inconvenience in my nursery arrangements, the nursery having become my child's study as I grew studious ; and she had no mind, or, it might be, no leave, to work with me in the garden.

The four boys were all of them good, and steadily active. The eldest, John, with wider business habits than the rest, went soon to push his fortune in Australia, and did so ; the second, William, prospered also in London.

The third brother, George, was the best of boys and men, but of small wit. He extremely resembled a rural George the Fourth, with an expansive, healthy, benevolent eagerness of simplicity in his face, greatly bettering him as a type of British character. He went into the business in Market Street, with his father, and both were a great joy to all of us in their affectionateness and truth : neither of them in all their lives ever did a dishonest, unkind, or otherwise faultful thing—but still less a clever one ! For the present, I leave them happily filling and driving their cart of quartern loaves in morning round from Market Street.

The fourth, and youngest, Charles, was like the last-born in a fairy tale, ruddy as the boy David, bright of heart, not wanting in common sense, or even in *good* sense ; and affectionate, like all the rest. He took to his schooling kindly, and became grammatical, polite, and presentable in our high Herne Hill circle. His elder brother, John, had taken care of

his education in more important matters: very early in the child's life he put him on a barebacked pony, with the simple elementary instruction that he should be thrashed if he came off. And he stayed on. Similarly, for first lesson in swimming, he pitched the boy like a pebble into the middle of the Croydon Canal, jumping in, of course, after him; but I believe the lad squattered to the bank without help, and became when he was only "that high" a fearless master of horse and wave.

My mother used to tell these two stories with the greater satisfaction, because, in her own son's education, she had sacrificed her pride in his heroism to her anxiety for his safety; and never allowed me to go to the edge of a pond, or be in the same field with a pony. As ill-luck also would have it, there was no manner of farm or marsh near us, which might of necessity modify these restrictions; but I have already noted with thankfulness the good I got out of the tadpole-haunted ditch in Croxted Lane; while also, even between us and tutorial Walworth, there was one Elysian field for me in the neglected grass of Camberwell Green. There *was* a pond in the corner of it, of considerable size, and unknown depth,—probably, even in summer, full three feet in the middle; the sable opacity of its waters adding to the mystery of danger. Large, as I said, for a pond, perhaps sixty or seventy yards the long way of the Green, fifty the short; while on its western edge grew a stately elm, from whose boughs, it was currently reported, and conscientiously believed, a wicked boy had fallen into the pond on Sunday, and forthwith the soul of him into a deeper and darker pool.

It was one of the most valued privileges of my early life to be permitted by my nurse to contemplate this judicial pond with awe, from the other side of the way. The loss of it, by the sanitary conversion of Camberwell Green into a bouquet for Camberwell's button-hole, is to this day matter of perennial lament to me.

In the carrying out of the precautionary laws above described I was, of course, never allowed, on my visits to Croydon, to go out with my cousins, lest they should lead me into

mischievous; and no more adventurous joys were ever possible to me there, than my walks with Anne or my mother where the stream from Scarborough pond ran across the road; or on the crisp turf of Duppas Hill; my watchings of the process of my father's drawings in Indian ink, and my own untired contemplations of the pump and gutter on the other side of the so-called street, but really lane,—not more than twelve feet from wall to wall. So that, when at last it was thought that Charles, with all his good natural gifts and graces, should be brought from Croydon town to London city, and initiated into the lofty life and work of its burgess orders; and when, accordingly, he was, after various taking of counsel and making of inquiry, apprenticed to Messrs. Smith, Elder, & Co., of 65, Cornhill, with the high privilege of coming out to dine at Herne Hill every Sunday, the new and beaming presence of cousin Charles became a vivid excitement, and admirable revelation of the activities of youth to me, and I began to get really attached to him.

I was not myself the sort of creature that a boy could care much for,—or indeed any human being, except papa and mamma, and Mrs. Richard Gray (of whom more presently); being indeed nothing more than a conceited and unentertainingly troublesome little monkey. But Charles was always kind to me, and naturally answered with some cousinly or even brotherly tenderness my admiration of him, and delight in him.

At Messrs. Smith & Elder's he was an admittedly exemplary apprentice, rapidly becoming a serviceable shopman, taking orders intelligently, and knowing well both his books and his customers. As all right-minded apprentices and good shopmen do, he took personal pride in everything produced by the firm; and on Sundays always brought a volume or two in his pocket to show us the character of its most ambitious publications; especially choosing, on my behalf, any which chanced to contain good engravings. In this way I became familiar with Stanfield and Harding long before I possessed a single engraving myself from either of them; but the really most precious, and continuous in deep effect upon me, of all

gifts to my childhood, was from my Croydon aunt, of the "Forget-me-not" of 1827, with a beautiful engraving in it of Prout's "Sepulchral monument at Verona."

Strange, that the true first impulse to the most refined instincts of my mind should have been given by my totally uneducated, but entirely good and right-minded, mother's sister.

But more magnificent results came of Charles's literary connection, through the interest we all took in the embossed and gilded small octavo which Smith & Elder published annually, by title "Friendship's Offering." This was edited by a pious Scotch missionary, and minor—very much minor—key, poet, Thomas Pringle; mentioned once or twice with a sprinkling of honor in Lockhart's "Life of Scott." A strictly conscientious and earnest, accurately trained, though narrowly learned, man, with all the Scottish conceit, restlessness for travel, and petulant courage of the Parks and Livingstones; with also some pretty tinges of romance and inklings of philosophy to mellow him, he was an admitted, though little regarded, member of the best literary circles, and acquainted, in the course of catering for his little embossed octavo, with everybody in the outer circles, and lower, down to little me. He had been patronized by Scott; was on terms of polite correspondence with Wordsworth and Rogers; of familiar intercourse with the Ettrick Shepherd; and had himself written a book of poems on the subject of Africa, in which antelopes were called springboks, and other African manners and customs carefully observed.

Partly to oblige the good-natured and lively shopboy, who told wonderful things of his little student cousin;—partly in the look-out for thin compositions of tractable stucco, wherewith to fill interstices in the masonry of "Friendship's Offering," Mr. Pringle visited us at Herne Hill, heard the traditions of my literary life, expressed some interest in its farther progress,—and sometimes took a copy of verses away in his pocket. He was the first person who intimated to my father and mother, with some decision, that there were as yet no wholly trustworthy indications of my one day occupying

a higher place in English literature than either Milton or Byron ; and accordingly I think none of us attached much importance to his opinions. But he had the sense to recognize, through the parental vanity, my father's high natural powers, and exquisitely romantic sensibility ; nor less my mother's tried sincerity in the evangelical faith, which he had set himself apart to preach : and he thus became an honored, though never quite cordially welcomed, guest on occasions of state Sunday dinner ; and more or less an adviser thenceforward of the mode of my education. He himself found interest enough in my real love of nature and ready faculty of rhyme, to induce him to read and criticise for me some of my verses with attention ; and at last, as a sacred Eleusinian initiation and Delphic pilgrimage, to take me in his hand one day when he had a visit to pay to the poet Rogers.

The old man, previously warned of my admissible claims, in Mr. Pringle's sight, to the beatitude of such introduction, was sufficiently gracious to me, though the cultivation of germinating genius was never held by Mr. Rogers to be an industry altogether delectable to genius in its zenith. Moreover, I was unfortunate in the line of observations by which, in return for his notice, I endeavored to show myself worthy of it. I congratulated him with enthusiasm on the beauty of the engravings by which his poems were illustrated,—but betrayed, I fear me, at the same time some lack of an equally vivid interest in the composition of the poems themselves. At all events, Mr. Pringle—I thought at the time, somewhat abruptly—diverted the conversation to subjects connected with Africa. These were doubtless more calculated to interest the polished minstrel of St. James's Place ; but again I fell into misdemeanors by allowing my own attention, as my wandering eyes too frankly confessed, to determine itself on the pictures glowing from the crimson-silken walls ; and accordingly, after we had taken leave, Mr. Pringle took occasion to advise me that, in future, when I was in the company of distinguished men, I should listen more attentively to their conversation.

These, and such other—(I have elsewhere related the Ettrick

Shepherd's favoring visit to us, also obtained by Mr. Pringle) —glorifications and advancements being the reward of my literary efforts, I was nevertheless not beguiled by them into any abandonment of the scientific studies which were indeed natural and delightful to me. I have above registered their beginnings in the sparry walks at Matlock : but my father's business also took him often to Bristol, where he placed my mother, with Mary and me, at Clifton. Miss Edgeworth's story of "Lazy Lawrence," and the visit to Matlock by Harry and Lucy, gave an almost romantic and visionary charm to mineralogy in those dells ; and the piece of iron oxide with bright Bristol diamonds,—No. 51 of the Brantwood collection,—was I think the first stone on which I began my studies of silica. The diamonds of it were bright with many an association besides, since from Clifton we nearly always crossed to Chepstow,—the rapture of being afloat, for half an hour even, on that muddy sea, concentrating into these impressive minutes the pleasures of a year of other boys' boating,—and so round by Tintern and Malvern, where the hills, extremely delightful in themselves to me because I was allowed to run free on them, there being no precipices to fall over nor streams to fall into, were also classical to me through Mrs. Sherwood's "Henry Milner," a book which I loved long, and respect still. So that there was this of curious and precious in the means of my education in these years, that my romance was always ratified to me by the seal of locality—and every charm of locality spiritualized by the glow and the passion of romance.

There was one district, however, that of the Cumberland lakes, which needed no charm of association to deepen the appeal of its realities. I have said somewhere that my first memory in life was of Friar's Crag on Derwentwater ;—meaning, I suppose, my first memory of things afterward chiefly precious to me ; at all events, I knew Keswick before I knew Perth, and after the Perth days were ended, my mother and I stayed either there, at the Royal Oak, or at Lowwood Inn, or at Coniston Waterhead, while my father went on his business journeys to Whitehaven, Lancaster, Newcastle, and other northern towns. The inn at Coniston was then actually at

the upper end of the lake, the road from Ambleside to the village passing just between it and the water ; and the view of the long reach of lake, with its softly wooded lateral hills, had for my father a tender charm which excited the same feeling as that with which he afterward regarded the lakes of Italy. Low-wood Inn also was then little more than a country cottage,—and Ambleside a rural village ; and the absolute peace and bliss which anyone who cared for grassy hills and for sweet waters might find at every footstep, and at every turn of crag or bend of bay, was totally unlike anything I ever saw, or read of, elsewhere.

My first sight of bolder scenery was in Wales ; and I have written,—more than it would be wise to print,—about the drive from Hereford to Rhaiadyr, and under Plynlimmon to Pont-y-Monach : the joy of a walk with my father in the Sunday afternoon toward Hafod, dashed only with some alarmed sense of the sin of being so happy among the hills, instead of writing out a sermon at home ;—my father's presence and countenance not wholly comforting me, for we both of us had alike a subdued consciousness of being profane and rebellious characters, compared to my mother.

From Pont-y-Monach we went north, gathering pebbles on the beach at Aberystwith, and getting up Cader Idris with help of ponies :—it remained, and rightly, for many a year after, a king of mountains to me. Followed Harlech and its sands, Festiniog, the pass of Aberglaslyn, and marvel of Menai Straits and Bridge, which I looked at, then, as Miss Edgeworth had taught me, with reverence for the mechanical skill of man,—little thinking, poor innocent, what use I should see the creature putting his skill to, in the half century to come.

The Menai *Bridge* it was, remember, good reader, not *tube* ;—but the trim plank roadway swinging smooth between its iron cobwebs from tower to tower.

And so on to Llanberis and up Snowdon, of which ascent I remember, as the most exciting event, the finding for the first time in my life a real “ mineral ” for myself, a piece of copper pyrites ! But the general impression of Welsh mountain form

was so true and clear that subsequent journeys little changed or deepened it.

And if only then my father and mother had seen the real strengths and weaknesses of their little John;—if they had given me but a shaggy scrap of a Welsh pony, and left me in charge of a good Welsh guide, and of his wife, if I needed any coddling, they would have made a man of me there and then, and afterward the comfort of their own hearts, and probably the first geologist of my time in Europe.

If only! But they could no more have done it than thrown me like my cousin Charles into Croydon Canal, trusting me to find my way out by the laws of nature.

Instead, they took me back to London, and my father spared time from his business hours, once or twice a week, to take me to a four-square, sky-lighted, sawdust-floored prison of a riding-school in Moorfields, the smell of which, as we turned in at the gate of it, was a terror and horror and abomination to me: and there I was put on big horses that jumped, and reared, and circled, and sidled; and fell off them regularly whenever they did any of those things; and was a disgrace to my family, and a burning shame and misery to myself, till at last the riding-school was given up on my spraining my right-hand forefinger (it has never come straight again since),—and a well-broken Shetland pony bought for me, and the two of us led about the Norwood roads by a riding-master with a leading string. I used to do pretty well as long as we went straight, and then get thinking of something, and fall off when we turned a corner. I might have got some inkling of a seat in Heaven's good time, if no fuss had been made about me, nor inquiries instituted whether I had been off or on; but as my mother, the moment I got home, made searching scrutiny into the day's disgraces, I merely got more and more nervous and helpless after every tumble; and this branch of my education was at last abandoned, my parents consoling themselves, as best they might, in the conclusion that my not being able to learn to ride was the sign of my being a singular genius.

The rest of the year was passed in such home employment as I have above described;—but either in that or the preced-

ing year, my mineralogical taste received a new and very important impulse from a friend who entered afterward intimately into our family life, but of whom I have not yet spoken.

My illness at Dunkeld, above noticed, was attended by two physicians,—my mother,—and Dr. Grant. The Doctor must then have been a youth who had just obtained his diploma. I do not know the origin of his acquaintance with my parents; but I know that my father had almost paternal influence over him; and was of service to him, to what extent I know not, but certainly continued and effective, in beginning the world. And as I grew older I used often to hear expressions of much affection and respect for Dr. Grant from my father and mother, coupled with others of regret or blame that he did not enough bring out his powers, or use his advantages.

Ever after the Dunkeld illness, Dr. Grant's name was associated in my mind with a brown powder—rhubarb—or the like—of a gritty and acrid nature, which, by his orders, I had then to take. The name thenceforward always sounded to me gr-r-ish and granular; and a certain dread, not amounting to dislike—but, on the contrary, affectionate, (for *me*)—made the Doctor's presence somewhat solemnizing to me; the rather as he never jested, and had a brownish, partly austere, and sere, wrinkled, and—rhubarby, in fact, sort of a face. For the rest, a man entirely kind and conscientious, much affectionate to my father, and acknowledging a sort of ward-to-guardian's duty to him, together with the responsibility of a medical adviser, acquainted both with his imagination and his constitution.

I conjecture that it must have been owing to Dr. Grant's being of fairly good family, and in every sense and every reality of the word a gentleman, that, soon after coming up to London, he got a surgeon's appointment in one of His Majesty's frigates commissioned for a cruise on the west coast of South America. Fortunately the health of her company gave the Doctor little to do professionally; and he was able to give most of his time to the study of the natural history of the coast of Chili and Peru. One of the results of these shore

expeditions was the finding such a stag-beetle as had never before been seen. It had peculiar or colossal nippers, and—I forget what “chiasos” means in Greek, but its jaws were chiasoi. It was brought home beautifully packed in a box of cotton; and, when the box was opened, excited the admiration of all beholders, and was called the “Chiasognathos Grantii.” A second result was his collection of a very perfect series of Valparaiso humming-birds, out of which he spared, for a present to my mother, as many as filled with purple and golden flutter two glass cases as large as Mr. Gould’s at the British Museum, which became resplendent decorations of the drawing-room at Herne Hill,—were to me, as I grew older, conclusive standards of plume texture and color,—and are now placed in the best lighted recess of the parish school at Coniston.

The third result was more important still. Dr. Grant had been presented by the Spanish masters of mines with characteristic and rich specimens of the most beautiful veinstones of Copiapo. It was a mighty fact for me, at the height of my child’s interest in minerals, to see our own parlor table loaded with foliated silver and arborescent gold. Not only the man of science, but the latent miser in me, was developed largely in an hour or two! In the pieces which Dr. Grant gave me, I counted my treasure grain by grain; and recall to-day, in acute sympathy with it, the indignation I felt at seeing no instantly reverential change in cousin Charles’s countenance, when I informed him that the film on the surface of an unassuming specimen, amounting in quantity to about the sixteenth part of a sixpence, was “native silver!”

Soon after his return from this prosperous voyage, Dr. Grant settled himself in a respectable house half-way down Richmond Hill, where gradually he obtained practice and accepted position among the gentry of that town and its parkly neighborhood. And every now and then, in the summer mornings, or the gayly frost-white winter ones, we used, papa and mamma, and Mary and I, to drive over Clapham and Wandsworth Commons to a breakfast picnic with Dr. Grant at the “Star and Garter.” Breakfasts much impressed on my

mind, partly by the pretty view from the windows ; but more, because while my orthodox breakfast, even in travelling, was of stale baker's bread, at these starry picnics I was allowed new French roll.

Leaving Dr. Grant, for the nonce, under these pleasant and dignifiedly crescent circumstances, I must turn to the friends who of all others, not relatives, were most powerfully influential on my child life,—Mr. and Mrs. Richard Gray.

Some considerable time during my father's clerkdom had been passed by him in Spain, in learning to know sherry, and seeing the ways of making and storing it at Xerez, Cadiz, and Lisbon. At Lisbon he became intimate with another young Scotsman of about his own age, also employed, I conceive, as a clerk, in some Spanish house, but himself of no narrow clerky mind. On the contrary, Richard Gray went far beyond my father in the romantic sentiment, and scholarly love of good literature, which so strangely mingled with my father's steady business habits. Equally energetic, industrious, and high-principled, Mr. Gray's enthusiasm was nevertheless irregularly, and too often uselessly, coruscant ; being to my father's, as Carlyle says of French against English fire at Dettingen, "faggot against anthracite." Yet, I will not venture absolutely to maintain that, under Richard's erratic and effervescent influence, an expedition to Cintra, or an assistance at a village festa, or even at a bull-fight, might not sometimes, to that extent, invalidate my former general assertion that, during nine years, my father never had a holiday. At all events, the young men became close and affectionate friends ; and the connection had a softening, cheering, and altogether beneficial effect on my father's character. Nor was their brotherly friendship any whit flawed or dimmed, when, a little while before leaving Spain, Mr. Gray married an extremely good and beautiful Scotch girl, Mary Monro.

Extremely good, and, in the gentlest way ;—entirely simple, meek, loving, and serious ; not clever enough to be any way naughty, but saved from being stupid by a vivid nature, full of enthusiasm like her husband's. Both of them evangelically pious, in a vivid, not virulent, way ; and each of them sacredly,

no less than passionately, in love with the other, they were the entirely best-matched pair I have yet seen in this match-making world and dispensation. Yet, as fate would have it, they had the one grief of having no children, which caused it, in years to come, to be Mrs. Gray's principal occupation in life to spoil *me*. By the time I was old enough to be spoiled, Mr. Gray, having fairly prospered in business, and come to London, was established, with his wife, her mother, and her mother's white French poodle, Petite, in a dignified house in Camberwell Grove. An entirely happy family; old Mrs. Monro as sweet as her daughter, perhaps slightly wiser; Richard rejoicing in them both with all his heart; and Petite, having, perhaps, as much sense as any two of them, delighted in, and beloved by all three.

Their house was near the top of the Grove,—which was a real grove in those days, and a grand one, some three-quarters of a mile long, steepishly down hill,—beautiful in perspective as an unprecedently “long-drawn aisle;” trees, elm, wych elm, sycamore and aspen, the branches meeting at top; the houses on each side with trim stone pathways up to them, through small plots of well-mown grass; three or four storied, mostly in grouped terraces,—well-built, of sober-colored brick, with high and steep slated roof—not gabled, but polygonal; all well to do, well kept, well broomed, dignifiedly and pleasantly vulgar, and their own Grove-world all in all to them. It was a pleasant mile and a furlong or two's walk from Herne Hill to the Grove; and whenever Mrs. Gray and my mother had anything to say to each other, they walked—up the hill or down—to say it; and Mr. Gray's house was always the same to us as our own at any time of day or night. But our house not at all so to the Grays, having its formalities inviolable; so that during the whole of childhood I had the sense that we were, in some way or other, always above our friends and relations,—more or less patronizing everybody, favoring them by our advice, instructing them by our example, and called upon, by what was due both to ourselves, and the constitution of society, to keep them at a certain distance.

With one exception; which I have deep pleasure in re-

membering. In the first chapter of the "Antiquary," the landlord at Queen's Ferry sets down to his esteemed guest a bottle of Robert Cockburn's best port; with which Robert Cockburn duly supplied Sir Walter himself, being at that time, if not the largest, the leading importer of the finest Portugal wine, as my father of Spanish. But Mr. Cockburn was primarily an old Edinburgh gentleman, and only by condescension a wine-merchant; a man of great power and pleasant sarcastic wit, moving in the first circles of Edinburgh; attached to my father by many links of association with the "auld toun," and sincerely respecting him. He was much the stateliest and truest piece of character who ever sate at our merchant feasts.

Mrs. Cockburn was even a little higher,—as representative of the Scottish lady of the old school,—indulgent yet to the new. She had been Lord Byron's first of first loves; she was the Mary Duff of Lachin-y-Gair. When I first remember her, still extremely beautiful in middle age, full of sense; and, though with some mixture of proud severity, extremely kind.

They had two sons, Alexander and Archibald, both in business with their father, both clever and energetic, but both distinctly resolute—as indeed their parents desired—that they would be gentlemen first, salesmen second: a character much to be honored and retained among us; nor in their case the least ambitious or affected: gentlemen they were,—born so, and more at home on the hills than in the counting-house, and withal attentive enough to their business. The house, nevertheless, did not become all that it might have been in less well-bred hands.

The two sons, one or other, often dined with us, and were more distinctly friends than most of our guests. Alexander had much of his father's humor; Archibald, a fine, young, dark Highlander, was extremely delightful to me, and took some pains with me, for the sake of my love of Scott, telling me anything about fishing or deer-stalking that I cared to listen to. For, even from earliest days, I cared to listen to the adventures of other people, though I never coveted any

for myself. I read all Captain Marryat's novels, without ever wishing to go to sea; traversed the field of Waterloo without the slightest inclination to be a soldier; went on ideal fishing with Isaac Walton without ever casting a fly; and knew Cooper's "Deerslayer" and "Pathfinder" almost by heart, without handling anything but a popgun, or having any paths to find beyond the solitudes of Gipsy Hill. I used sometimes to tell myself stories of campaigns in which I was an ingenious general, or caverns in which I discovered veins of gold; but these were merely to fill vacancies of fancy, and had no reference whatever to things actual or feasible. I already disliked growing older,—never expected to be wiser, and formed no more plans for the future than a little black silkworm does in the middle of its first mulberry leaf.

---

## CHAPTER VI.

### SCHAFFHAUSEN AND MILAN.

The visit to the field of Waterloo, spoken of by chance in last chapter, must have been when I was five years old,—on the occasion of papa and mamma's taking a fancy to see Paris in its festivities following the coronation of Charles X. We stayed several weeks in Paris, in a quiet family inn, and then some days at Brussels,—but I have no memory whatever of intermediate stages. It seems to me, on revision of those matin times, that I was very slow in receiving impressions, and needed to stop two or three days at least in a place, before I began to get a notion of it; but the notion, once got, was, as far as it went, always right; and since I had no occasion afterward to modify it, other impressions fell away from that principal one, and disappeared altogether. Hence what people call my prejudiced views of things,—which are, in fact, the exact contrary, namely, post-judiced. (I do not mean to introduce this word for general service, but it saves time and print just now.)

Another character of my perceptions I find curiously steady

—that I was only interested by things near me, or at least clearly visible and present. I suppose this is so with children generally ; but it remained—and remains—a part of my grown-up temper. In this visit to Paris, I was extremely taken up with the soft red cushions of the armchairs, which it took one half an hour to subside into after sitting down,—with the exquisitely polished floor of the salon, and the good-natured French “Boots” (more properly “Brushes”), who skated over it in the morning till it became as reflective as a mahogany table,—with the pretty court full of flowers and shrubs in beds and tubs, between our rez-de-chaussée windows and the outer gate,—with a nice black servant belonging to another family, who used to catch the house-cat for me ; and with an equally good-natured fille de chambre, who used to catch it back again, for fear I should tease it, (her experience of English boy-children having made her dubious of my intentions) ;—all these things and people I remember,—and the Tuileries garden, and the “Tivoli” gardens, where my father took me up and down a “Russian mountain,” and I saw fireworks of the finest. But I remember nothing of the Seine, nor of Notre Dame, nor of anything in or even out of the town, except the windmills on Montmartre.

Similarly at Brussels. I recollect no Hôtel de Ville, no stately streets, no surprises, or interests, except only the drive to Waterloo and slow walk over the field. The defacing mound was not then built—it was only nine years since the fight ; and each bank and hollow of the ground was still a true exponent of the courses of charge or recoil. Fastened in my mind by later reading, that sight of the slope of battle remains to me entirely distinct, while the results of a later examination of it after the building of the mound, have faded mostly away.

I must also note that the rapture of getting on board a steamer, spoken of in last letter, was of later date ; as a child I cared more for a beach on which the waves broke, or sands in which I could dig, than for wide sea. There was no “first sight” of the sea for me. I had gone to Scotland in Captain Spinks’ cutter, then a regular passage boat, when I was only

three years old ; but the weather was fine, and except for the pleasure of tattooing myself with tar among the ropes, I might as well have been ashore ; but I grew into the sense of ocean, as the Earth shaker, by the rattling beach, and lisp-ing sand.

I had meant, also in this place, to give a word or two to another poor relative, Nanny Clowsley, an entirely cheerful old woman, who lived, with a Dutch clock and some old tea-cups, in a single room (with small bed in alcove) on the third story of a gabled house, part of the group of old ones lately pulled down on Chelsea side of Battersea Bridge. But I had better keep what I have to say of Chelsea well together, early and late ; only, in speaking of shingle, I must note the use to me of the view out of Nanny Clowsley's window right down upon the Thames tide, with its tossing wherries at the flow, and stranded barges at ebb.

And now, I must get on, and come to the real first sights of several things.

I said that, for our English tours, Mr. Telford usually lent us his chariot. But for Switzerland, now taking Mary, we needed stronger wheels and more room ; and for this, and all following tours abroad, the first preparation and the begin-ning of delight was the choosing a carriage to our fancy, from the hireable reserves at Mr. Hopkinson's, of Long Acre.

The poor modern slaves and simpletons who let themselves be dragged like cattle, or felled timber, through the countries they imagine themselves visiting, can have no conception whatever of the complex joys, and ingenious hopes, connected with the choice and arrangement of the travelling carriage in old times. The mechanical questions first, of strength—easy rolling,—steady and safe poise of persons and luggage ; the general stateliness of effect to be obtained for the abashing of plebeian beholders ; the cunning design and distribution of store-cellars under the seats, secret drawers under front windows, invisible pockets under padded lining, safe from dust, and accessible only by insidious slits, or necromantic valves like Aladdin's trap-door ; the fitting of cushions where they would not slip, the rounding of corners for more delicate

repose ; the prudent attachments and springs of blinds ; the perfect fitting of windows, on which one-half the comfort of a travelling carriage really depends ; and the adaptation of all these concentrated luxuries to the probabilities of who would sit where, in the little apartment which was to be virtually one's home for five or six months ;—all this was an imaginary journey in itself, with every pleasure, and none of the discomfort, of practical travelling.

On the grand occasion of our first continental journey—which was meant to be half a year long—the carriage was chosen with, or in addition fitted with, a front seat outside for my father and Mary, a dickey, unusually large, for Anne and the courier, and four inside seats, though those in front very small, that papa and Mary might be received inside in stress of weather. I recollect, when we had finally settled which carriage we would have, the polite Mr. Hopkinson, advised of my dawning literary reputation, asking me (to the joy of my father) if I could translate the motto of the former possessor, under his painted arms,—“*Vix ea nostra voco*,”—which I accomplishing successfully, farther wittily observed that, however by right belonging to the former possessor, the motto was with greater propriety applicable to *us*.

For a family carriage of this solid construction, with its luggage, and load of six or more persons, four horses were of course necessary to get any sufficient way on it ; and half a dozen such teams were kept at every post-house. The modern reader may perhaps have as much difficulty in realizing these savagely and clumsily locomotive periods, though so recent, as any aspects of migratory Saxon or Goth ; and may not think me vainly garrulous in their description.

The French horses, and more or less those on all the great lines of European travelling, were properly stout trotting cart-horses, well up to their work and over it ; untrimmed, long-tailed, good-humoredly licentious, whinnying and frolicking with each other when they had a chance ; sagaciously steady to their work ; obedient to the voice mostly, to the rein only for more explicitness ; never touched by the whip, which was used merely to express the driver's exultation in himself

and them,—signal obstructive vehicles in front out of the way, and advise all the inhabitants of the villages and towns traversed on the day's journey, that persons of distinction were honoring them by their transitory presence. If everything was right, the four horses were driven by one postilion riding the shaft horse ; but if the horses were young, or the riders unpractised, there was a postilion for the leaders also. As a rule, there were four steady horses and a good driver, rarely drunk, often very young, the men of stronger build being more useful for other work, and any clever young rider able to manage the well-trained and merry-minded beasts, besides being lighter on their backs. Half the weight of the cavalier, in such cases, was in his boots, which were often brought out slung from the saddle like two buckets, the postilion, after the horses were harnessed, walking along the pole and getting into them.

Scarcely less official, for a travelling carriage of good class than its postilions, was the courier, or properly, *avant-courier*, whose primary office it was to ride in advance at a steady gallop, and order the horses at each post-house to be harnessed and ready waiting, so that no time might be lost between stages. His higher function was to make all bargains and pay all bills, so as to save the family unbecoming cares and mean anxieties, besides the trouble and disgrace of trying to speak French or any other foreign language. He, farther, knew the good inns in each town, and all the good rooms in each inn, so that he could write beforehand to secure those suited to his family. He was also, if an intelligent man and high-class courier, well acquainted with the proper sights to be seen in each town, and with all the occult means to be used for getting sight of those that weren't to be seen by the vulgar. Murray, the reader will remember, did not exist in those days ; the courier was a private Murray, who knew, if he had any wit, not the things to be seen only, but those you would yourself best like to see, and gave instructions to your *valet-de-place* accordingly, interfering only as a higher power in cases of difficulty needing to be overcome by money or tact. He invariably attended the

ladies in their shopping expeditions, took them to the fashionable shops, and arranged as he thought proper the prices of articles. Lastly, he knew, of course, all the other high-class couriers on the road, and told you, if you wished to know, all the people of consideration who chanced to be with you in the inn.

My father would have considered it an insolent and revolutionary trespass on the privileges of the nobility to have mounted his courier to ride in advance of us; besides that, wisely liberal of his money for comfort and pleasure, he never would have paid the cost of an extra horse for show. The horses were, therefore, ordered in advance, when possible, by the postilions of any preceding carriage (or, otherwise, we did not mind waiting till they were harnessed), and we carried our courier behind us in the dickey with Anne, being in all his other functions and accomplishments an indispensable luxury to us. Indispensable, first, because none of us could speak anything but French, and that only enough to ask our way in; for all specialties of bargaining, or details of information, we were helpless, even in France,—and might as well have been migratory sheep, or geese, in Switzerland or Italy. Indispensable, secondly, to my father's peace of mind, because, with perfect liberality of temper, he had a great dislike to being overreached. He perfectly well knew that his courier would have his commission, and allowed it without question; but he knew also that his courier would not be cheated by other people, and was content in his representative. Not for ostentation, but for real enjoyment and change of sensation from his suburban life, my father liked large rooms; and my mother, in mere continuance of her ordinary and essential habits, liked clean ones; clean, and large, means a good inn and a first floor. Also my father liked a view from his windows, and reasonably said, "Why should we travel to see less than we may?"—so that meant first floor *front*. Also my father liked delicate cookery, just because he was one of the smallest and rarest eaters; and my mother liked good meat. That meant, dinner without limiting price, in reason. Also, though my father never went

into society, he all the more enjoyed getting a glimpse, reverentially, of fashionable people—I mean, people of rank,—he scorned fashion, and it was a great thing to him to feel that Lord and Lady — were on the opposite landing, and that, at any moment, he might conceivably meet and pass them on the stairs. Salvador, duly advised, or penetratively perceptive of these dispositions of my father, entirely pleasing and admirable to the courier mind, had *carte-blanche* in all administrative functions and bargains. We found our pleasant rooms always ready, our good horses always waiting, everybody took their hats off when we arrived and departed. Salvador presented his accounts weekly, and they were settled without a word of demur.

To all these conditions of luxury and felicity, can the modern steam-puffed tourist conceive the added ruling and culminating one—that we were never in a hurry? coupled with the correlative power of always starting at the hour we chose, and that if we weren't ready, the horses would wait? As a rule, we breakfasted at our own home time—eight; the horses were pawing and neighing at the door (under the archway, I should have said) by nine. Between nine and three,—reckoning seven miles an hour, including stoppages, for minimum pace,—we had done our forty to fifty miles of journey, sate down to dinner at four,—and I had two hours of delicious exploring by myself in the evening; ordered in punctually at seven to tea, and finishing my sketches till half-past nine,—bedtime.

On longer days of journey we started at six, and did twenty miles before breakfast, coming in for four o'clock dinner as usual. In a quite long day we made a second stop, dining at any nice village hostelry, and coming in for late tea, after doing our eighty or ninety miles. But these pushes were seldom made unless to get to some pleasant cathedral town for Sunday, or pleasant Alpine village. We never travelled on Sunday; my father and I nearly always went—as philosophers—to mass, in the morning, and my mother, in pure good-nature to us, (I scarcely ever saw in her a trace of feminine curiosity,) would join with us in some such profanity as a drive on the

Corso, or the lake, in the afternoon. But we all, even my father, liked a walk in the fields better, round an Alpine chalet village.

At page 70 I threatened more accurate note of my first impressions of Switzerland and Italy in 1833. Of customary Calais I have something to say later on,—here I note only our going up Rhine to Strasburg, where, with all its miracles of building, I was already wise enough to feel the cathedral stiff and iron-worky; but was greatly excited and impressed by the high roofs and rich fronts of the wooden houses, in their sudden indication of nearness to Switzerland; and especially by finding the scene so admirably expressed by Prout in the 36th plate of his *Flanders and Germany*, still uninjured. And then, with Salvador was held council in the inn-parlor of Strasburg, whether—it was then the Friday afternoon—we should push on to-morrow for our Sunday's rest to Basle, or to Schaffhausen.

How much depended—if ever anything “depends” on anything else,—on the issue of that debate! Salvador inclined to the straight and level Rhine-side road, with the luxury of the Three Kings attainable by sunset. But at Basle, it had to be admitted, there were no Alps in sight, no cataract within hearing, and Salvador honorably laid before us the splendid alternative possibility of reaching, by traverse of the hilly road of the Black Forest, the gates of Schaffhausen itself, before they closed for the night.

The Black Forest! The fall of Schaffhausen! The chain of the Alps! within one's grasp for Sunday! What a Sunday, instead of customary Walworth and the Dulwich fields! My impassioned petition at last carried it, and the earliest morning saw us trotting over the bridge of boats to Kehl, and in the eastern light I well remember watching the line of the Black Forest hills enlarge and rise, as we crossed the plain of the Rhine. “Gates of the hills;” opening for me to a new life—to cease no more, except at the Gates of the Hills whence one returns not.

And so, we reached the base of the Schwartzwald, and entered an ascending dingle; and scarcely, I think, a quarter of

an hour after entering, saw our first "Swiss cottage."\* How much it meant to all of us,—how much prophesied to me, no modern traveller could the least conceive, if I spent days in trying to tell him. A sort of triumphant shriek—like all the railway whistles going off at once at Clapham Junction—has gone up from the Fooldom of Europe at the destruction of the myth of William Tell. To us, every word of it was true—but mythically luminous with more than mortal truth; and here, under the black woods, glowed the visible, beautiful, tangible testimony to it in the purple larch timber, carved to exquisiteness by the joy of peasant life, continuous, motionless here in the pine shadow on its ancestral turf,—unassailable and unassailing, in the blessedness of righteous poverty, of religious peace.

The myth of William Tell is destroyed forsooth? and you have tunnelled Gothard, and filled, it may be, the Bay of Uri;—and it was all for you and your sake that the grapes dropped blood from the press of St. Jacob, and the pine club struck down horse and helm in Morgarten Glen?

Difficult enough for you to imagine, that old travellers' time when Switzerland was yet the land of the Swiss, and the Alps had never been trod by foot of man. Steam, never heard of yet, but for short fair weather crossing at sea (were there paddle packets across Atlantic? I forget). Any way, the roads by land were safe; and entered once into this mountain Paradise, we wound on through its balmy glens, past cottage after cottage on their lawns, still glistening in the dew.

The road got into more barren heights by the midday, the hills arduous; once or twice we had to wait for horses, and we were still twenty miles from Schaffhausen at sunset; it was past midnight when we reached her closed gates. The disturbed porter had the grace to open them—not quite wide enough; we carried away one of our lamps in collision with the slanting bar as we drove through the arch. How much

---

\* Swiss, in character and real habit—the political boundaries are of no moment.

happier the privilege of dreamily entering a mediæval city, though with the loss of a lamp, than the free ingress of being jammed between a dray and a tram-car at a railroad station!

It is strange that I but dimly recollect the following morning; I fancy we must have gone to some sort of church or other; and certainly, part of the day went in admiring the bow-windows projecting into the clean streets. None of us seem to have thought the Alps would be visible without profane exertion in climbing hills. We dined at four, as usual, and the evening being entirely fine, went out to walk, all of us,—my father and mother and Mary and I.

We must have still spent some time in town-seeing, for it was drawing toward sunset when we got up to some sort of garden promenade—west of the town, I believe; and high above the Rhine, so as to command the open country across it to the south and west. At which open country of low undulation, far into blue,—gazing as at one of our own distances from Malvern of Worcestershire, or Dorking of Kent,—suddenly—behold—beyond.

There was no thought in any of us for a moment of their being clouds. They were clear as crystal, sharp on the pure horizon sky, and already tinged with rose by the sinking sun. Infinitely beyond all that we had ever thought or dreamed,—the seen walls of lost Eden could not have been more beautiful to us; not more awful, round heaven, the walls of sacred Death.

It is not possible to imagine, in any time of the world, a more blessed entrance into life, for a child of such a temperament as mine. True, the temperament belonged to the age: a very few years,—within the hundred,—before that, no child could have been born to care for mountains, or for the men that lived among them, in that way. Till Rousseau's time, there had been no "sentimental" love of nature; and till Scott's, no such apprehensive love of "all sorts and conditions of men," not in the soul merely, but in the flesh. St. Bernard of La Fontaine, looking out to Mont Blanc with his child's eyes, sees above Mont Blanc the Madonna; St. Bernard of Talloires, not the Lake of Annecy, but the dead between

Martigny and Aosta. But for me, the Alps and their people were alike beautiful in their snow, and their humanity; and I wanted, neither for them nor myself, sight of any thrones in heaven but the rocks, or of any spirits in heaven but the clouds.

Thus, in perfect health of life and fire of heart, not wanting to be anything but the boy I was, not wanting to have anything more than I had; knowing of sorrow only just so much as to make life serious to me, not enough to slacken in the least its sinews; and with so much of science mixed with feeling as to make the sight of the Alps not only the revelation of the beauty of the earth, but the opening of the first page of its volume,—I went down that evening from the garden-terrace of Schaffhausen with my destiny fixed in all of it that was to be sacred and useful. To that terrace, and the shore of the Lake of Geneva, my heart and faith return to this day, in every impulse that is yet nobly alive in them, and every thought that has in it help or peace.

The morning after that Sunday's eve at Schaffhausen was also cloudless, and we drove early to the falls, seeing again the chain of the Alps by morning light, and learning, at Lauffen, what an Alpine river was. Coming out of the gorge of Balstall, I got another ever memorable sight of the chain of the Alps, and these distant views, never seen by the modern traveller, taught me, and made me feel, more than the close marvels of Thun and Interlachen. It was again fortunate that we took the grandest pass into Italy,—that the first ravine of the main Alps I saw was the Via Mala, and the first lake of Italy, Como.

We took boat on the little recessed lake of Chiavenna, and rowed down the whole way of waters, passing another Sunday at Cadenabbia, and then, from villa to villa, across the lake, and across, to Como, and so to Milan by Monza.

It was then full, though early, summer time; and the first impression of Italy always ought to be in her summer. It was also well that, though my heart was with the Swiss cottager, the artificial taste in me had been mainly formed by Turner's rendering of those very scenes, in Rogers' "Italy."

The "Lake of Como," the two moonlight villas, and the "Farewell," had prepared me for all that was beautiful and right in the terraced gardens, proportioned arcades, and white spaces of sunny wall, which have in general no honest charm for the English mind. But to me, they were almost native through Turner,—familiar at once, and revered. I had no idea then of the Renaissance evil in them; they were associated only with what I had been told of the "divine art" of Raphael and Leonardo, and, by my ignorance of dates, associated with the stories of Shakespeare. Portia's villa, —Juliet's palace,—I thought to have been like these.

Also, as noticed in the epilogue to reprint of vol. ii. of "Modern Painters," I had always a quite true perception of size, whether in mountains or buildings, and with the perception, joy in it; so that the vastness of scale in the Milanese palaces, and the "mount of marble, a hundred spires," of the duomo, impressed me to the full at once: and not having yet the taste to discern good Gothic from bad, the mere richness and fineness of lace-like tracery against the sky was a consummate rapture to me—how much more getting up to it and climbing among it, with the Monte Rosa seen between its pinnacles across the plain!

I had been partly prepared for this view by the admirable presentment of it in London, a year or two before, in an exhibition, of which the vanishing has been in later life a greatly felt loss to me,—Burford's panorama in Leicester Square, which was an educational institution of the highest and purest value, and ought to have been supported by the Government as one of the most beneficial school instruments in London. There I had seen, exquisitely painted, the view from the roof of Milan Cathedral, when I had no hope of ever seeing the reality, but with a joy and wonder of the deepest;—and now to be there indeed, made deep wonder become fathomless.

Again, most fortunately, the weather was clear and cloudless all day long, and as the sun drew westward, we were able to drive to the Corso, where, at that time, the higher Milanese were happy and proud as ours in their park, and

whence, no railway station intervening, the whole chain of the Alps was visible on one side, and the beautiful city with its dominant frost-crystalline *Duomo* on the other. Then the drive home in the open carriage through the quiet twilight, up the long streets, and round the base of the *Duomo*, the smooth pavement under the wheels adding with its silentness to the sense of dream wonder in it all,—the perfect air in absolute calm, the just seen majesty of encompassing Alps, the perfectness—so it seemed to me—and purity, of the sweet, stately, stainless marble against the sky. What more, what else could be asked of seemingly immutable good, in this mutable world?

I wish in general to avoid interference with the reader's judgment on the matters which I endeavor serenely to narrate; but may, I think, here be pardoned for observing to him the advantage, in a certain way, of the contemplative abstraction from the world which, during this early continental travelling, was partly enforced by our ignorance, and partly secured by our love of comfort. There is something peculiarly delightful—nay, delightful inconceivably by the modern German-plated and French-polished tourist, in passing through the streets of a foreign city without understanding a word that anybody says! One's ear for all sound of voices then becomes entirely impartial; one is not diverted by the meaning of syllables from recognizing the absolute guttural, liquid, or honeyed quality of them; while the gesture of the body and the expression of the face have the same value for you that they have in a pantomime; every scene becomes a melodious opera to you, or a picturesquely inarticulate Punch. Consider, also, the gain in so consistent tranquillity. Most young people nowadays, or even lively old ones, travel more in search of adventures than of information. One of my most valued records of recent wandering is a series of sketches by an amiable and extremely clever girl, of the things that happened to her people and herself every day that they were abroad. Here it is brother Harry, and there it is mamma, and now paterfamilias, and now her little graceful self, and anon her merry or remonstrant sisterhood,

who meet with enchanting hardships, and enviable misadventures ; bind themselves with fetters of friendship, and glance into sparklings of amourette, with any sort of people in conical hats and fringy caps : and it is all very delightful and condescending ; and, of course, things are learnt about the country that way which can be learned in no other way, but only about that part of it which interests itself in you, or which you have pleasure in being acquainted with. Virtually, you are thinking of yourself all the time ; you necessarily talk to the cheerful people, not to the sad ones ; and your head is for the most part vividly taken up with very little things. I don't say that our isolation was meritorious, or that people in general should know no language but their own. Yet the meek ignorance has these advantages. We did not travel for adventures, nor for company, but to see with our eyes, and to measure with our hearts. If you have sympathy, the aspect of humanity is more true to the depths of it than its words ; and even in my own land, the things in which I have been least deceived are those which I have learned as their Spectator.

---

## CHAPTER VII.

## PAPA AND MAMMA.

The work to which, as partly above described, I set myself during the year 1834, under the excitement remaining from my foreign travels, was in four distinct directions, in any one of which my strength might at that time have been fixed by definite encouragement. There was first the effort to express sentiment in rhyme ; the sentiment being really genuine, under all the superficial vanities of its display ; and the rhymes rhythmic, only without any ideas in them. It was impossible to explain, either to myself or other people, why I liked staring at the sea, or scampering on a moor ; but, one had pleasure in making some sort of melodious noise about it, like the waves themselves, or the peewits. Then, secondly, there

was the real love of engraving, and of such characters of surface and shade as it could give. I have never seen drawing, by a youth, so entirely industrious in delicate line; and there was really the making of a fine landscape, or figure outline, engraver in me. But fate having ordered otherwise, I mourn the loss to engraving less than that before calculated, or rather incalculable, one, to geology! Then there was, thirdly, the violent instinct for architecture; but I never could have built or carved anything, because I was without power of design; and have perhaps done as much in that direction as it was worth doing with so limited faculty. And then, fourthly, there was the unabated, never to be abated, geological instinct, now fastened on the Alps. My fifteenth birthday gift being left to my choice, I asked for Saussure's "Voyages dans les Alpes," and thenceforward began progressive work, carrying on my mineralogical dictionary by the help of Jameson's three-volume "Mineralogy," (an entirely clear and serviceable book;) comparing his descriptions with the minerals in the British Museum, and writing my own more eloquent and exhaustive accounts in a shorthand of many ingeniously symbolic characters, which it took me much longer to write my descriptions in, than in common text, and which neither I nor anybody else could read a word of, afterward.

Such being the quadrilateral plan of my fortifiable dispositions, it is time now to explain, with such clew as I have found to them, the somewhat peculiar character and genius of both my parents; the influence of which was more important upon me, then, and far on into life, than any external conditions, either of friendship or tutorship, whether at the University, or in the world.

It was, in the first place, a matter of essential weight in the determination of subsequent lines, not only of labor but of thought, that while my father, as before told, gave me the best example of emotional reading,—*reading*, observe, proper, not recitation, which he disdained, and I disliked,—my mother was both able to teach me, and resolved that I should learn, absolute accuracy of diction and precision of accent in prose;

and made me know, as soon as I could speak plain, what I have in all later years tried to enforce on my readers, that accuracy of diction means accuracy of sensation, and precision of accent, precision of feeling. Trained, herself in girlhood, only at Mrs. Rice's country school, my mother had there learned severely right principles of truth, charity, and housewifery, with punctilious respect for the purity of that English which in her home-surroundings she perceived to be by no means as undefiled as the ripples of Wandel. She was the daughter, as aforesaid, of the early widowed landlady of the King's Head Inn and Tavern, which still exists, or existed a year or two since, presenting its side to Croydon market-place, its front and entrance door to the narrow alley which descends, steep for pedestrians, impassable to carriages, from the High Street to the lower town.

Thus native to the customs and dialect of Croydon Agora, my mother, as I now read her, must have been an extremely intelligent, admirably practical, and naïvely ambitious girl; keeping, without contention, the headship of her class, and availing herself with steady discretion of every advantage the country school and its modest mistress could offer her. I never in her after-life heard her speak with regret, and seldom without respectful praise, of any part of the discipline of Mrs. Rice.

I do not know for what reason, or under what conditions, my mother went to live with my Scottish grandfather and grandmother, first at Edinburgh, and then at the house of Bower's Well, on the slope of the Hill of Kinnoul, above Perth. I was stupidly and heartlessly careless of the past history of my family as long as I could have learnt it; not till after my mother's death did I begin to desire to know what I could never more be told.

But certainly the change, for her, was into a higher sphere of society,—that of real, though sometimes eccentric, and frequently poor, gentlemen and gentlewomen. She must then have been rapidly growing into a tall, handsome, and very finely made girl, with a beautiful mild firmness of expression; a faultless and accomplished housekeeper, and a natural,

essential, unassailable, yet inoffensive, prude. I never heard a single word of any sentiment, accident, admiration, or affection disturbing the serene tenor of her Scottish stewardship; yet I noticed that she never spoke without some slight shyness before my father, nor without some pleasure, to other people, of Dr. Thomas Brown.

That the Professor of Moral Philosophy was a frequent guest at my grandmother's tea-table, and fond of benignantly arguing with Miss Margaret, is evidence enough of the position she held in Edinburgh circles; her household skills and duties never therefore neglected—rather, if anything, still too scrupulously practised. Once, when she had put her white frock on for dinner, and hurried to the kitchen to give final glance at the state and order of things there, old Mause, having run against the white frock with a black saucepan, and been, it seems, rebuked by her young mistress with too little resignation to the will of Providence in that matter, shook her head sorrowfully, saying, “Ah, Miss Margaret, ye are just like Martha, carefu' and troubled about mony things.”

When my mother was thus, at twenty, in a Desdemona-like prime of womanhood, intent on highest moral philosophy,—“though still the house affairs would draw her thence”—my father was a dark-eyed, brilliantly active, and sensitive youth of sixteen. Margaret became to him an absolutely respected and admired—mildly liked—governess and confidante. Her sympathy was necessary to him in all his flashingly transient amours; her advice in all domestic business or sorrow, and her encouragement in all his plans of life.

These were already determined for commerce;—yet not to the abandonment of liberal study. He had learned Latin thoroughly, though with no large range of reading, under the noble traditions of Adams at the High School of Edinburgh: while, by the then living and universal influence of Sir Walter, every scene of his native city was exalted in his imagination by the purest poetry, and the proudest history, that ever hallowed or haunted the streets and rocks of a brightly inhabited capital. I have neither space, nor wish, to extend my proposed account of things that have been, by records of cor-

response ;—it is too much the habit of modern biographers to confuse epistolary talk with vital fact. But the following letter from Dr. Thomas Brown to my father, at this critical juncture of his life, must be read, in part as a testimony to the position he already held among the youths of Edinburgh, and yet more as explaining some points of his blended character, of the deepest significance afterward, both to himself and to me.

“8, N. ST. DAVID'S STREET, EDINBURGH,  
“February 18th, 1807.

“MY DEAR SIR: When I look at the date of the letter which you did me the honor to send me as your adviser in literary matters—an office which a *proficient* like you scarcely requires—I am quite ashamed of the interval which I have suffered to elapse. I can truly assure you, however, that it has been unavoidable, and has not arisen from any want of interest in your intellectual progress. Even when you were a mere boy I was much delighted with your early zeal and attainments; and for your own sake, as well as for your excellent mother's, I have always looked to you with great regard, and with the belief that you would distinguish yourself in whatever profession you might adopt.

“You seem, I think, to repent too much the time you have devoted to the *Belles Lettres*. I confess I do not regret this for you. You must, I am sure, have felt the effect which such studies have in giving a general refinement to the manners and to the heart, which, to anyone who is not to be strictly a *man of science*, is the most valuable effect of literature. You must remember that there is a great difference between studying *professionally*, and studying for relaxation and ornament. In the society in which you are to mix, the writers in *Belles Lettres* will be mentioned fifty times, when more abstract science will not be mentioned once; and there is this great advantage in that sort of knowledge, that the display of it, unless very immoderate indeed, is not counted pedantry, when the display of other intellectual attainments might run some risk of the imputation. There is indeed one evil in the reading of poetry and other light productions, that it is apt

to be indulged in to downright *gluttony*, and to occupy time which should be given to business; but I am sure I can rely on *you* that you will not so misapply your time. There is, however, *one science*, the first and greatest of sciences to all men, and to merchants particularly—the science of Political Economy. To this I think your chief attention should be directed. It is in truth the science of your own profession, which counteracts the—(word lost with seal)—and narrow habits which that profession is sometimes apt to produce; and which is of perpetual appeal in every discussion on mercantile and financial affairs. A merchant well instructed in Political Economy must always be fit to lead the views of his brother merchants—without it, he is a mere trader. Do not lose a day, therefore, without providing yourself with a copy of Adam Smith's 'Wealth of Nations,' and read and re-read it with attention—as I am sure you must read it with delight. In giving you this advice I consider you as a *merchant*, for as that is to be your profession in life, your test of the importance of any acquirement should be how far it will tend to render you an *honorable and distinguished merchant*;—a character of no small estimation in this commercial country. I therefore consider the physical sciences as greatly subordinate in relation to your prospects in life, and the society in which you will be called to mingle. All but chemistry require a greater preparation in mathematics than you probably have, and chemistry it is quite impossible to understand without some opportunity of seeing experiments systematically carried on. If, however, you have the opportunity to attend any of the lecturers on that science in London, it will be well worth your while, and in that case I think you should purchase either Dr. Thomson's or Mr. Murray's new system of chemistry, so as to keep up constantly with your lecturer. Even of physics in general it is pleasant to have some view, however superficial, and therefore, though you cannot expect without mathematics to have anything but a superficial view, you had better try to attain it. With this view you may read Gregory's 'Economy of Nature,' which, though not a good book, and not always accurate, is, I believe, the best popular

book we have, and sufficiently accurate for your purposes. Remember, however, that though you may be permitted to be a superficial natural philosopher, no such indulgence is to be given you in Political Economy.

“The only other circumstance remaining for me to request of you is that you will not suffer yourself to lose any of the languages you have acquired. Of the modern languages there is less fear, as your mercantile communications will in some measure keep them alive; but merchants do not correspond in Latin, and you may perhaps lose it unconsciously. Independently, however, of the admirable writers of whom you would thus deprive yourself, and considering the language merely as the accomplishment of a gentleman, it is of too great value to be carelessly resigned.

“Farewell, my dear sir. Accept the regard of all this family, and believe me, with every wish to be of service to you,

“Your sincere friend,

“T. BROWN.”

It may easily be conceived that a youth to whom such a letter as this was addressed by one of the chiefs of the purely intellectual circles of Edinburgh, would be regarded with more respect by his Croydon cousin than is usually rendered by grown young women to their schoolboy friends.

Their frank, cousinly relation went on, however, without a thought on either side of any closer ties, until my father, at two or three and twenty, after various apprenticeships in London, was going finally to London to begin his career in his own business. By that time he had made up his mind that Margaret, though not the least an ideal heroine to him, was quite the best sort of person he could have for a wife, the rather as they were already so well used to each other; and in a quiet, but enough resolute way, asked her if she were of the same mind, and would wait until he had an independence to offer her. His early tutress consented with frankly confessed joy, not indeed in the Agnes Wickfield way, “I have loved you all my life,” but feeling and admitting that it was

great delight to be allowed to love him now. The relations between Grace Nugent and Lord Colambre in Miss Edgeworth's "Absentee" extremely resemble those between my father and mother, except that Lord Colambre is a more eager lover. My father chose his wife much with the same kind of serenity and decision with which afterward he chose his clerks.

A time of active and hopeful contentment for both the young people followed, my mother being perhaps the more deeply in love, while John depended more absolutely on her sympathy and wise friendship than is at all usual with young men of the present day in their relations with admired young ladies. But neither of them ever permitted their feelings to degenerate into fretful or impatient passion. My mother showed her affection chiefly in steady endeavor to cultivate her powers of mind, and form her manners, so as to fit herself to be the undespised companion of a man whom she considered much her superior: my father in unremitting attention to the business on the success of which his marriage depended: and in a methodical regularity of conduct and correspondence which never left his mistress a moment of avoidable anxiety, or gave her motive for any serious displeasure.

On these terms the engagement lasted nine years; at the end of which time, my grandfather's debts having been all paid, and my father established in a business gradually increasing, and liable to no grave contingency, the now not very young people were married in Perth one evening after supper, the servants of the house having no suspicion of the event until John and Margaret drove away together next morning to Edinburgh.

In looking back to my past thoughts and ways, nothing astonishes me more than my want of curiosity about all these matters; and that, often and often as my mother used to tell with complacency the story of this carefully secret marriage, I never asked, "But, mother, why so secret, when it was just what all the friends of both of you so long expected, and what all your best friends so heartily wished?"

But, until lately, I never thought of writing any more about

myself than was set down in diaries, nor of my family at all: and thus too carelessly, and, as I now think, profanely, neglected the traditions of my people. "What does it all matter, now?" I said; "we are what we are, and shall be what we make ourselves."

Also, until very lately, I had accustomed myself to consider all that my parents had done, so far as their own happiness was concerned, entirely wise and exemplary. Yet the reader must not suppose that what I have said in my deliberate writings on the propriety of long engagements had any reference to this singular one in my own family. Of the heroism and patience with which the sacrifice was made, on both sides, I cannot judge:—but that it was greater than I should myself have been capable of, I know, and I believe that it was unwise. For during these years of waiting, my father fell gradually into a state of ill-health from which he never entirely recovered; and in close of life, they both had to leave their child, just when he was beginning to satisfy the hopes they had formed for him.

I have allowed this tale of the little I knew of their early trials and virtues to be thus chance told, because I think my history will, in the end, be completest if I write as its connected subjects occur to me, and not with formal chronology of plan. My reason for telling it in this place was chiefly to explain how my mother obtained her perfect skill in English reading, through the hard effort which, through the years of waiting, she made to efface the faults, and supply the defects, of her early education; effort which was aided and directed unerringly by her natural—for its intensity I might justly call it supernatural—purity of heart and conduct, leading her always to take most delight in the right and clear language which only can relate lovely things. Her unquestioning evangelical faith in the literal truth of the Bible placed me, as soon as I could conceive or think, in the presence of an unseen world; and set my active analytic power early to work on the questions of conscience, free will, and responsibility, which are easily determined in days of innocence; but are approached too often with prejudice, and always with disadvantage, after

men become stupefied by the opinions, or tainted by the sins, of the outer world; while the gloom, and even terror, with which the restrictions of the Sunday, and the doctrines of the "Pilgrim's Progress," the "Holy War," and Quarles' "Emblems," oppressed the seventh part of my time, was useful to me as the only form of vexation which I was called on to endure; and redeemed by the otherwise uninterrupted cheerfulness and tranquillity of a household wherein the common ways were all of pleasantness, and its single and strait path, of perfect peace.

My father's failure of health, following necessarily on the long years of responsibility and exertion, needed only this repose to effect its cure. Shy to an extreme degree in general company, all the more because he had natural powers which he was unable to his own satisfaction to express,—his business faculty was entirely superb and easy: he gave his full energy to counting-house work in the morning, and his afternoons to domestic rest. With instant perception and decision in all business questions; with principles of dealing which admitted of no infraction, and involved neither anxiety nor concealment, the counting-house work was more of an interest, or even an amusement, to him, than a care. His capital was either in the Bank, or in St. Catherine's Docks, in the form of insured butts of the finest sherry in the world; his partner, Mr. Domecq, a Spaniard as proud as himself, as honorable, and having perfect trust in him,—not only in his probity, but his judgment,—accurately complying with all his directions in the preparation of wine for the English market, and no less anxious than he to make every variety of it, in its several rank, incomparably good. The letters to Spain therefore needed only brief statement that the public of that year wanted their wine young or old, pale or brown, and the like; and the letters to customers were as brief in their assurances that if they found fault with their wine, they did not understand it, and if they wanted an extension of credit, they could not have it. These Spartan brevities of epistle were, however, always supported by the utmost care in executing his correspondents' orders; and by the unusual attention shown them

in travelling for those orders himself, instead of sending an agent or a clerk. His domiciliary visits of this kind were always conducted by him with great *savoir-faire* and pleasant courtesy, no less than the most attentive patience: and they were productive of the more confidence between him and the country merchant, that he was perfectly just and candid in appraisalment of the wine of rival houses, while his fine palate enabled him always to sustain triumphantly any and every ordeal of blindfold question which the suspicious customer might put him to. Also, when correspondents of importance came up to town, my father would put himself so far out of his way as to ask them to dine at Herne Hill, and try the contents of his own cellar. These London visits fell into groups, on any occasion in the metropolis of interest more than usual to the provincial mind. Our business dinners were then arranged so as to collect two or three country visitors together, and the table made symmetrical by selections from the house's customers in London, whose conversation might be most instructive to its rural friends.

Very early in my boy's life I began much to dislike these commercial feasts, and to form, by carefully attending to their dialogue, when it chanced to turn on any other subject than wine, an extremely low estimate of the commercial mind as such;—estimate which I have never had the slightest reason to alter.

Of our neighbors on Herne Hill we saw nothing, with one exception only, afterward to be noticed. They were for the most part well-to-do London tradesmen of the better class, who had little sympathy with my mother's old-fashioned ways, and none with my father's romantic sentiment.

There was probably the farther reason for our declining the intimacy of our immediate neighbors, that most of them were far more wealthy than we, and inclined to demonstrate their wealth by the magnificence of their establishments. My parents lived with strict economy, kept only female servants,\* used only tallow candles in plated candlesticks, were content

---

\* Thomas left us, I think partly in shame for my permanently injured lip; and we never had another indoor man-servant.

with the leasehold territory of their front and back gardens,—scarce an acre altogether,—and kept neither horse nor carriage. Our shop-keeping neighbors, on the contrary, had usually great cortège of footmen and glitter of plate, extensive pleasure grounds, costly hot-houses, and carriages driven by coachmen in wigs. It may be perhaps doubted by some of my readers whether the coldness of acquaintanceship was altogether on our side; but assuredly my father was too proud to join entertainments for which he could give no like return, and my mother did not care to leave her card on foot at the doors of ladies who dashed up to hers in their barouche.

Protected by these monastic severities and aristocratic dignities, from the snares and disturbances of the outer world, the routine of my childish days became fixed, as of the sunrise and sunset to a nestling. It may seem singular to many of my readers that I remember with most pleasure the time when it was most regular and most solitary. The entrance of my cousin Mary into our household was coincident with the introduction of masters above described, and with other changes in the aims and employments of the day, which, while they often increased its interest, disturbed its tranquillity. The ideas of success at school or college, put before me by my masters, were ignoble and comfortless, in comparison with my mother's regretful blame, or simple praise: and Mary, though of a mildly cheerful and entirely amiable disposition, necessarily touched the household heart with the sadness of her orphanage, and something interrupted its harmony by the difference, which my mother could not help showing, between the feelings with which she regarded her niece and her child.

And although I have dwelt with thankfulness on the many joys and advantages of these secluded years, the vigilant reader will not, I hope, have interpreted the accounts rendered of them into general praise of a like home education in the environs of London. But one farther good there was in it, hitherto unspoken; that great part of my acute perception and deep feeling of the beauty of architecture and scenery abroad, was owing to the well-formed habit of narrowing

myself to happiness within the four brick walls of our fifty by one hundred yards of garden ; and accepting with resignation the æsthetic external surroundings of a London suburb, and, yet more, of a London chapel. For Dr. Andrews' was the Londonian chapel in its perfect type, definable as accurately as a Roman basilica,—an oblong, flat-ceiled barn, lighted by windows with semicircular heads, brick-arched, filled by small-paned glass held by iron bars, like fine threaded halves of cobwebs ; galleries propped on iron pipes, up both sides ; pews, well shut in, each of them, by partitions of plain deal, and neatly brass-latched deal doors, filling the barn floor, all but its two lateral straw-matted passages ; pulpit, sublimely isolated, central from sides and clear of altar rails at end ; a stout, four-legged box of well-grained wainscot, high as the level of front galleries, and decorated with a cushion of crimson velvet, padded six inches thick, with gold tassels at the corners ; which was a great resource to me when I was tired of the sermon, because I liked watching the rich color of the folds and creases that came in it when the clergyman thumped it.

Imagine the change between one Sunday and the next,—from the morning service in this building, attended by the families of the small shopkeepers of the Walworth Road, in their Sunday trimmings ; our plumber's wife, fat, good, sensible Mrs. Goad, sat in the next pew in front of us, sternly sensitive to the interruption of her devotion by our late arrivals) ; fancy the change from this, to high mass in Rouen Cathedral, its nave filled by the white-capped peasantry of half Normandy !

Nor was the contrast less enchanting or marvellous between the street architecture familiar to my eyes, and that of Flanders and Italy, as an exposition of mercantile taste and power. My father's counting-house was in the centre of Billiter Street, some years since effaced from sight and memory of men, but a type, then, of English city state in perfection. We now build house fronts as advertisements, spending a hundred thousand pounds in the lying mask of our bankruptcies. But in my father's time both trade and building were still honest.

His counting-house was a room about fifteen feet by twenty, including desks for two clerks, and a small cupboard for sherry samples, on the first floor, with a larger room opposite for private polite receptions of elegant visitors, or the serving of a chop for himself if he had to stay late in town. The ground floor was occupied by friendly Messrs. Wardell and Co., a bottling retail firm, I believe. The only advertisement of the place of business was the brass plate under the bell-handle, inscribed "Ruskin, Telford, and Domecq," brightly scrubbed by the single female servant in charge of the establishment, old Maisie,—abbreviated or tenderly diminished into the "sie," from I know not what Christian name—Marion, I believe, as Mary into Mause. The whole house, three-storied, with garrets, was under her authority, with, doubtless, assistant morning charwoman,—cooking, waiting, and answering the door to distinguished visitors, all done by Maisie, the visitors being expected of course to announce themselves by the knocker with a flourish in proportion to their eminence in society. The business men rang the counting-house bell aforesaid, (round which the many coats of annual paint were cut into a beautiful slant section by daily scrubbing, like the coats of an agate;) and were admitted by lifting of latch, manipulated by the head clerk's hand in the counting-house, without stirring from his seat.

This unpretending establishment, as I said, formed part of the western side of Billiter Street, a narrow trench—it may have been thirty feet wide—admitting, with careful and precise driving, the passing each other of two brewers' drays. I am not sure that this was possible at the ends of the street, but only at a slight enlargement opposite the brewery in the middle. Effectively a mere trench between three-storied houses of prodigious brickwork, thoroughly well laid, and presenting no farther entertainment whatever to the æsthetic beholder than the alternation of the ends and sides of their beautifully level close courses of bricks, and the practised and skilful radiation of those which formed the window lintels.

Typical, I repeat, of the group of London edifices east of the Mansion House, and extending to the Tower; the under-

hill picturesquenesses of which, however, were in early days an entirely forbidden district to me, lest I should tumble into the docks ; but Fenchurch and Leadenhall streets, familiar to me as the perfection of British mercantile state and grandeur, —the reader may by effort, though still dimly, conceive the effect on my imagination of the fantastic gables of Ghent, and orange-scented cortiles of Genoa.

I can scarcely account to myself, on any of the ordinary principles of resignation, for the undimmed tranquillity of pleasure with which, after these infinite excitements in foreign lands, my father would return to his desk opposite the brick wall of the brewery, and I to my niche behind the drawing-room chimney-piece. But to both of us, the steady occupations, the beloved samenesses, and the sacred customs of home were more precious than all the fervors of wonder in things new to us, or delight in scenes of incomparable beauty. Very early, indeed, I had found that novelty was soon exhausted, and beauty, though inexhaustible, beyond a certain point or time of enthusiasm, no more to be enjoyed ; but it is not so often observed by philosophers that home, healthily organized, is always enjoyable ; nay, the sick thrill of pleasure through all the brain and heart with which, after even so much as a month or two of absence, I used to catch the first sight of the ridge of Herne Hill, and watch for every turn of the well-known road and every branch of the familiar trees, was—though not so deep or overwhelming—more intimately and vitally powerful than the brightest passions of joy in strange lands, or even in the unaccustomed scenery of my own. To my mother, her ordinary household cares, her reading with Mary and me, her chance of a chat with Mrs. Gray, and the unperturbed preparation for my father's return, and for the quiet evening, were more than all the splendors or wonders of the globe between poles and equator.

Thus we returned—full of new thoughts, and faithful to the old, to this exulting rest of home in the close of 1833. An unforeseen shadow was in the heaven of its charmed horizon.

Every day at Cornhill, Charles became more delightful and satisfactory to everybody who knew him. How a boy living

all day in London could keep so bright a complexion, and so crisply Achillean curls of hair—and all the gay spirit of his Croydon mother—was not easily conceivable ; but he became a perfect combination of the sparkle of Jin Vin with the steadiness of Tunstall, and was untroubled by the charms of any unattainable Margaret, for his master had no daughter ; but, as worse chance would have it, a son : so that, looking forward to possibilities as a rising apprentice ought, Charles saw that there were none in the house for him beyond the place of cashier, or perhaps only head-clerk. His elder brother, who had taught him to swim by throwing him into Croydon Canal, was getting on fast as a general trader in Australia, and naturally longed to have his best-loved brother there for a partner. Bref, it was resolved that Charles should go to Australia. The Christmas time of 1833 passed heavily, for I was very sorry ; Mary, a good deal more so : and my father and mother, though in their hearts caring for nobody in the world but me, were grave at the thought of Charles's going so far away ; but honestly and justifiably, thought it for the lad's good. I think the whole affair was decided, and Charles's outfit furnished, and ship's berth settled, and ship's captain interested in his favor, in something less than a fortnight, and down he went to Portsmouth to join his ship joyfully, with the world to win. By due post came the news that he was at anchor off Cowes, but that the ship could not sail because of the west wind. And post succeeded post, and still the west wind blew. We liked the west wind for its own sake, but it was a prolonging of farewell which teased us, though Charles wrote that he was enjoying himself immensely, and the captain, that he had made friends with every sailor on board, besides the passengers.

And still the west wind blew. I do not remember how long—some ten days or fortnight, I believe. At last, one day my mother and Mary went with my father into town on some shopping or sight-seeing business of a cheerful character ; and I was left at home, busy also about something that cheered me greatly, I know not what ; but when I heard the others come in, and upstairs into the drawing-room, I ran

eagerly down and into the room, beginning to tell them about this felicity that had befallen me, whatever it was. They all stood like statues, my father and mother very grave. Mary was looking out of the window—the farthest of the front three from the door. As I went on, boasting of myself, she turned round suddenly, her face all streaming with tears, and caught hold of me, and put her face close to mine, that I might hear the sobbing whisper, “Charles is gone.”

The west wind had still blown, clearly and strong, and the day before there had been a fresh breeze of it round the isle, at Spithead, exactly the kind of breeze that drifts the clouds, and ridges the waves, in Turner’s “Gosport.”

The ship was sending her boat on shore for some water, or the like—her little cutter, or somehow sailing, boat. There was a heavy sea running, and the sailors, and, I believe, also a passenger or two, had some difficulty in getting on board. “May I go, too?” said Charles to the captain, as he stood seeing them down the side. “Are you not afraid?” said the captain. “I never was afraid of anything in my life,” said Charles, and went down the side and leaped in.

The boat had not got fifty yards from the ship before she went over, but there were other boats sailing all about them, like gnats in midsummer. Two or three scudded to the spot in a minute, and every soul was saved, except Charles, who went down like a stone.

22d January, 1834.

All this we knew by little and little. For the first day or two we would not believe it, but thought he must have been taken up by some other boat and carried to sea. At last came word that his body had been thrown ashore at Cowes: and his father went down to see him buried. That done, and all the story heard, for still the ship stayed, he came to Herne Hill, to tell Charles’s “auntie” all about it. (The old man never called my mother anything else than auntie.) It was in the morning, in the front parlor—my mother knitting in her usual place at the fireside, I at my

drawing, or the like, in my own place also. My uncle told all the story, in the quiet, steady sort of way that the common English do, till just at the end he broke down into sobbing, saying (I can hear the words now), "They caught the cap off of his head, and yet they couldn't save him."

---

## CHAPTER VIII.

### VESTER, CAMENÆ.

The death of Charles closed the doors of my heart again for that time; and the self-engrossed quiet of the Herne Hill life continued for another year, leaving little to be remembered, and less to be told. My parents made one effort, however, to obtain some healthy companionship for me, to which I probably owe more than I knew at the moment.

Some six or seven gates down the hill toward the field, (which I have to return most true thanks to its present owner, Mr. Sopper, for having again opened to the public sight in consequence of the passage above describing the greatness of its loss both to the neighbor and the stranger), some six or seven gates down that way, a pretty lawn, shaded by a low spreading cedar, opened before an extremely neat and carefully kept house, where lived two people, modest in their ways as my father and mother themselves,—Mr. and Mrs. Fall; happier, however, in having son and daughter instead of an only child. Their son, Richard, was a year younger than I, but already at school at Shrewsbury, and somewhat in advance of me therefore in regular discipline; extremely gentle and good-natured,—his sister, still younger, a clever little girl, her mother's constant companion: and both of them unpretending, but rigid, examples of all Herne Hill proprieties, true religions, and useful learnings. I shudder still at the recollection of Mrs. Fall's raised eyebrows one day at my pronunciation of "naiveté" as "naivette."

I think it must have been as early as 1832 that my father, noticing with great respect the conduct of all matters in this

family, wrote to Mr. Fall in courteous request that "the two boys" might be permitted, when Richard was at home, to pursue their holiday tasks, or recreations, so far as it pleased them, together. The proposal was kindly taken: the two boys took stock of each other,—agreed to the arrangement,—and, as I had been promoted by that time to the possession of a study, all to myself, while Richard had only his own room, (and *that* liable to sisterly advice or intrusion,) the course which things fell into was that usually, when Richard was at home, he came up past the seven gates about ten in the morning; did what lessons he had to do at the same table with me, occasionally helping me a little with mine; and then we went together for afternoon walk with Dash, Gipsy, or whatever dog chanced to be dominant.

I do not venture to affirm that the snow of those Christmas holidays was whiter than it is now, though I might give some reasons for supposing that it remained longer white. But I affirm decisively that it used to fall deeper in the neighborhood of London than has been seen for the last twenty or twenty-five years. It was quite usual to find in the hollows of the Norwood Hills the field fences buried under crested waves of snow, while, from the higher ridges, half the counties of Kent and Surrey shone to the horizon like a cloudless and terrorless Arctic sea.

Richard Fall was entirely good-humored, sensible, and practical; but had no particular tastes; a distaste, if anything, for *my* styles both of art and poetry. He stiffly declined arbitration on the merits of my compositions; and though with pleasant cordiality in daily companionship, took rather the position of putting up with me, than of pride in his privilege of acquaintance with a rising author. He was never unkind or sarcastic; but laughed me inexorably out of writing bad English for rhyme's sake, or demonstrable nonsense either in prose or rhyme. We got gradually accustomed to be together, and far on into life were glad when any chance brought us together again.

The year 1834 passed innocuously enough, but with little profit, in the quadripartite industries before described, fol-

lowed for my own pleasure ;—with minglings of sapless effort in the classics, in which I neither felt, nor foresaw, the least good.

Innocuously *enough*, I say,—meaning, with as little mischief as a well-intentioned boy, virtually masterless, could suffer from having all his own way, and daily confirming himself in the serious impression that his own way was always the best.

I cannot analyze, at least without taking more trouble than I suppose any reader would care to take with me, the mixed good and evil in the third-rate literature which I preferred to the Latin classics. My volume of the “Forget-me-not,” which gave me that precious engraving of Verona, (curiously also another by Prout of St. Mark’s at Venice,) was somewhat above the general caste of annuals in its quality of letterpress ; and contained three stories, “The Red-nosed Lieutenant,” by the Rev. George Croly ; “Hans in Kelder,” by the author of “Chronicles of London Bridge ;” and “The Comet,” by Henry Neele, Esq., which were in their several ways extremely impressive to me. The partly childish, partly dull, or even, as aforesaid, idiotic way I had of staring at the same things all day long, carried itself out in reading, so that I could read the same things all the year round. As there was neither advantage nor credit to be got by remembering fictitious circumstances, I was, if anything, rather proud of my skill in forgetting, so as the sooner to recover the zest of the tales ; and I suppose these favorites, and a good many less important ones of the sort, were read some twenty times a year, during the earlier epoch of teens.

I wonder a little at my having been allowed so long to sit in that drawing-room corner with only my Rogers’ “Italy,” my “Forget-me-not,” the “Continental Annual,” and “Friendship’s offering,” for my working library ; and I wonder a little more that my father, in his passionate hope that I might one day write like Byron, never noticed that Byron’s early power was founded on a course of general reading of the masters in every walk of literature, such as is, I think, utterly unparalleled in any other young life, whether of student or author. But I was entirely incapable of such brain-work, and the real gift I

had in drawing involved the use in its practice of the best energy of the day. "Hans in Kelder," and "The Comet," were my manner of rest.

I do not know when my father first began to read Byron to me, with any expectation of my liking him ; all primary training, after the "Iliad," having been in Scott ; but it must have been about the beginning of the teen period, else I should recollect the first effect of it. "Manfred" evidently, I had got at, like "Macbeth," for the sake of the witches. Various questionable changes were made, however, at that 1831 turning of twelve, in the Hermitage discipline of Herne Hill. I was allowed to taste wine ; taken to the theatre ; and, on festive days, even dined with my father and mother at four : and it was then generally at dessert that my father would read any otherwise suspected delight : the "Noctes Ambrosianæ" regularly when they came out—without the least missing of the naughty words ; and at last, the shipwreck in "Don Juan,"—of which, finding me rightly appreciative, my father went on with nearly all the rest. I recollect that he and my mother looked across the table at each other with something of alarm, when, on asking me a few festas afterward what we should have for after-dinner reading, I instantly answered "Juan and Haidée." My selection was not adopted, and, feeling there was something wrong somewhere, I did not press it, attempting even some stutter of apology which made matters worse. Perhaps I was given a bit of "Childe Harold" instead, which I liked at that time nearly as well ; and indeed, the story of Haidée soon became too sad for me. But very certainly, by the end of this year 1834, I knew my Byron pretty well all through, all but "Cain," "Werner," the "Deformed Transformed," and "Vision of Judgment," none of which I could understand, nor did papa and mamma think it would be well I should try to.

The ingenuous reader may perhaps be so much surprised that mamma fell in with all this, that it becomes here needful to mark for him some peculiarities in my mother's prudery which he could not discover for himself, from anything hitherto told of her. He might indeed guess that, after taking

me at least six times straight through the Bible, she was not afraid of plain words to, or for, me; but might not feel that in the energy and affectionateness of her character, she had as much sympathy with all that is noble and beautiful in Byron as my father himself; nor that her Puritanism was clear enough in common sense to see that, while Shakespeare and Burns lay open on the table all day, there was no reason for much mystery with Byron (though until later I was not allowed to read him for myself). She had trust in my disposition and education, and was no more afraid of my turning out a Corsair or a Giaour than a Richard III., or a—Solomon. And she was perfectly right, so far. I never got the slightest harm from Byron: what harm came to me was from the facts of life, and from books of a baser kind, including a wide range of the works of authors popularly considered extremely instructive—from Victor Hugo down to Doctor Watts.

Farther, I will take leave to explain in this place what I meant by saying that my mother was an “inoffensive” prude. She was herself as strict as Alice Bridgenorth; but she understood the doctrine of the religion she had learnt, and, without ostentatiously calling herself a miserable sinner, knew that according to that doctrine, and probably in fact, Madge Wildfire was no worse a sinner than she. She was like her sister in universal charity—had sympathy with every passion, as well as every virtue, of true womanhood; and, in her heart of hearts, perhaps liked the real Margherita Cogni quite as well as the ideal wife of Faliero.

And there was one more feature in my mother’s character which must be here asserted at once, to put an end to the notion of which I see traces in some newspaper comments on my past descriptions of her, that she was in any wise like Esther’s religious aunt in “Bleak House.” Far on the contrary, there was a hearty, frank, and sometimes even irrepressible, laugh in my mother! Never sardonic, yet with a very definitely Smollettesque turn in it! so that between themselves, she and my father enjoyed their “Humphrey Clinker” extremely, long before I was able to understand either the jest or gist of it. Much more, she could exult in a harmless

bit of Smollettique reality. Years and years after this time, in one of our crossings of the Simplon, just at the top, where we had stopped to look about us, Nurse Anne sat down to rest herself on the railings at the roadside, just in front of the monastery;—the off roadside, from which the bank slopes steeply down outside the fence. Turning to observe the panoramic picturesque, Anne lost her balance, and went backward over the railings down the bank. My father could not help suggesting that she had done it expressly for the entertainment of the Holy Fathers; and neither he nor my mother could ever speak of the “performance” (as they called it) afterward, without laughing for a quarter of an hour.

If, however, there was the least bitterness or irony in a jest, my mother did not like it; but my father and I liked it all the more, if it were just; and, so far as I could understand it, I rejoiced in all the sarcasm of “Don Juan.” But my firm decision, as soon as I got well into the latter cantos of it, that Byron was to be my master in verse, as Turner in color, was made of course in that gosling (or say cygnet) epoch of existence, without consciousness of the deeper instincts that prompted it: only two things I consciously recognized, that his truth of observation was the most exact, and his chosen expression the most concentrated, that I had yet found in literature. By that time my father had himself put me through the two first books of Livy, and I knew, therefore, what close-set language was; but I saw then that Livy, as afterward that Horace and Tacitus, were studiously, often laboriously, and sometimes obscurely, concentrated: while Byron wrote, as easily as a hawk flies, and as clearly as a lake reflects, the exact truth in the precisely narrowest terms; nor only the exact truth, but the most central and useful one.

Of course I could no more measure Byron’s greater powers at that time than I could Turner’s; but I saw that both were right in all things that I knew right from wrong in; and that they must thenceforth be my masters, each in his own domain. The modern reader, not to say also modern scholar, is usually so ignorant of the essential qualities of Byron, that I cannot go farther in the story of my own novitiate under him without

illustrating, by rapid example, the things which I saw to be unrivalled in his work.

For this purpose I take his common prose, rather than his verse, since his modes of rhythm involve other questions than those with which I am now concerned. Read, for chance-first, the sentence on Sheridan, in his letter to Thomas Moore, from Venice, June 1st (or dawn of June 2d!), 1818. "The Whigs abuse him; however, he never left them, and such blunderers deserve neither credit nor compassion. As for his creditors—remember Sheridan never had a shilling, and was thrown, with great powers and passions, into the thick of the world, and placed upon the pinnacle of success, with no other external means to support him in his elevation. Did Fox pay *his* debts? or did Sheridan take a subscription? Was ——'s drunkenness more excusable than his? Were his intrigues more notorious than those of all his contemporaries? and is his memory to be blasted and theirs respected? Don't let yourself be led away by clamor, but compare him with the coalitioner Fox, and the pensioner Burke, as a man of principle; and with ten hundred thousand in personal views; and with none in talent, for he beat them all out and out. Without means, without connection, without character (which might be false at first, and drive him mad afterward from desperation), he beat them all, in all he ever attempted. But, alas poor human nature! Good-night, or rather morning. It is four, and the dawn gleams over the Grand Canal, and unshadows the Rialto."

Now, observe, that passage is noble, primarily because it contains the utmost number that will come together into the space, of absolutely just, wise, and kind thoughts. But it is more than noble, it is *perfect*, because the quantity it holds is not artificially or intricately concentrated, but with the serene swiftness of a smith's hammer-strokes on hot iron; and with choice of terms which, each in its place, will convey far more than they mean in the dictionary. Thus, "however" is used instead of "yet," because it stands for "howsoever," or, in full, for "yet whatever they did." "Thick" of society, because it means, not merely the crowd, but the *fog* of it; "ten

hundred thousand" instead of "a million," or "a thousand thousand," to take the sublimity out of the number and make us feel that it is a number of nobodies. Then the sentence in parenthesis, "which might be false," etc., is indeed obscure, because it was impossible to clarify it without a regular pause, and much loss of time; and the reader's sense is therefore left to expand it for himself into "it was, perhaps, falsely said of him at first, that he had no character," etc. Finally, the dawn "unshadows"—lessens the shadow on—the Rialto, but does not *gleam* on that, as on the broad water.

Next, take the two sentences on poetry, in his letters to Murray of September 15th, 1817, and April 12th, 1818; (for the collected force of these compare the deliberate published statement in the answer to Blackwood in 1820).

1817. "With regard to poetry in general, I am convinced, the more I think of it, that he (Moore), and *all* of us—Scott, Southey, Wordsworth, Moore, Campbell, I,—are all in the wrong, one as much as another; that we are upon a wrong revolutionary poetical system, or systems, not worth a damn in itself, and from which none but Rogers and Crabbe are free; and that the present and next generations will finally be of this opinion. I am the more confirmed in this by having lately gone over some of our classics, particularly Pope, whom I tried in this way: I took Moore's poems, and my own, and some others, and went over them side by side with Pope's, and I was really astonished (I ought not to have been so) and mortified, at the ineffable distance in point of sense, learning, effect, and even *imagination*, passion, and *invention*, between the little Queen Anne's man, and us of the Lower Empire. Depend upon it, it is all Horace then, and Claudian now, among us; and if I had to begin again, I would mould myself accordingly. Crabbe's the man; but he has got a coarse and impracticable subject, and . . . is retired upon half-pay, and has done enough, unless he were to do as he did formerly."

1818. "I thought of a preface, defending Lord Hervey against Pope's attack, but Pope—quoad Pope, the poet,—against all the world, in the unjustifiable attempts begun by

Warton, and carried on at this day by the new school of critics and scribblers, who think themselves poets because they do *not* write like Pope. I have no patience with such cursed humbug and bad taste; your whole generation are not worth a canto of the 'Rape of the Lock,' or the 'Essay on Man,' or the 'Dunciad,' or 'anything that is his.'"

There is nothing which needs explanation in the brevities and amenities of these two fragments, except, in the first of them, the distinctive and exhaustive enumeration of the qualities of great poetry,—and note especially the order in which he puts these.

A. Sense. That is to say, the first thing you have to think of is whether the would-be poet is a wise man—so also in the answer to Blackwood. "They call him (Pope) the poet of reason!—is that any reason why he should not be a poet?"

B. Learning. The Ayrshire ploughman may have good gifts, but he is out of court with relation to Homer, or Dante, or Milton.

C. Effect. Has he *efficiency* in his verse?—does it tell on the ear and the spirit in an instant? See the "effect" on her audience of Beatrice's "ottave," in the story at p. 286 of Miss Alexander's "Songs of Tuscany."

D. Imagination. Put thus low because many novelists and artists have this faculty, yet are not poets, or even good novelists or painters; because they have not sense to manage it, nor the art to give it effect.

E. Passion. Lower yet, because all good men and women have as much as either they or the poet ought to have.

F. Invention. And this lowest, because one may be a good poet without having this at all. Byron had scarcely any himself, while Scott had any quantity—yet never could write a play.

But neither the force and precision, nor the rhythm, of Byron's language, were at all the central reasons for my taking him for master. Knowing the Song of Moses and the Sermon on the Mount by heart, and half the Apocalypse besides, I was in no need of tutorship either in the majesty or simplicity of English words; and for their logical

arrangement, I had had Byron's own master, Pope, since I could lisp. But the thing wholly new and precious to me in Byron was his measured and living *truth*—measured, as compared with Homer; and living, as compared with everybody else. My own inexorable measuring wand,—not enchanter's, but cloth-worker's and builder's,—reduced to mere incredibility all the statements of the poets usually called sublime. It was of no use for Homer to tell me that Pelion was put on the top of Ossa. I knew perfectly well it wouldn't go on the top of Ossa. Of no use for Pope to tell me that trees where his mistress looked would crowd into a shade, because I was satisfied that they would do nothing of the sort. Nay, the whole world, as it was described to me either by poetry or theology, was every hour becoming more and more shadowy and impossible. I rejoiced in all stories of Pallas and Venus, of Achilles and Æneas, of Elijah and St. John: but, without doubting in my heart that there were real spirits of wisdom and beauty, nor that there had been invincible heroes and inspired prophets, I felt already, with fatal and increasing sadness, that there was no clear utterance about any of them—that there were for *me* neither Goddess guides nor prophetic teachers; and that the poetical histories, whether of this world or the next, were to me as the words of Peter to the shut-up disciples—"as idle tales; and they believed them not."

But here at last I had found a man who spoke only of what he had seen, and known; and spoke without exaggeration, without mystery, without enmity, and without mercy. "That *is* so;—make what you will of it!" Shakespeare said the Alps voided their rheum on the valleys, which indeed is precisely true, with the final truth, in that matter, of James Forbes,—but it was told in a mythic manner, and with an unpleasant British bias to the nasty. But Byron, saying that "the glacier's cold and restless mass moved onward day by day," said plainly what he saw and knew,—no more. So also, the "Arabian Nights" had told me of thieves who lived in enchanted caves, and beauties who fought with genii in the air; but Byron told me of thieves with whom he had ridden

on their own hills, and of the fair Persians or Greeks who lived and died under the very sun that rose over my visible Norwood hills.

And in this narrow, but sure, truth, to Byron, as already to me, it appeared that Love was a transient thing, and death a dreadful one. He did not attempt to console me for Jessie's death, by saying she was happier in Heaven ; or for Charles's, by saying it was a Providential dispensation to me on Earth. He did not tell me that war was a just price for the glory of captains, or that the National command of murder diminished its guilt. Of all things within range of human thought he felt the facts, and discerned the natures with accurate justice.

But even all this he might have done, and yet been no master of mine, had not he sympathized with me in reverent love of beauty, and indignant recoil from ugliness. The witch of the Staubbach in her rainbow was a greatly more pleasant vision than Shakespeare's, like a rat without a tail, or Burns's, in her cutty sark. The sea-king Conrad had an immediate advantage with me over Coleridge's long, lank, brown, and ancient, mariner ; and whatever Pope might have gracefully said, or honestly felt, of Windsor woods and streams, was mere tinkling cymbal to me, compared with Byron's love of Lachin-y-Gair.

I must pause here, in tracing the sources of his influence over me, lest the reader should mistake the analysis which I am now able to give them, for a description of the feelings possible to me at fifteen. Most of these, however, were assuredly within the knot of my unfolding mind—as the saffron of the crocus yet beneath the earth ; and Byron—though he could not teach me to love mountains or sea more than I did in childhood, first animated them for me with the sense of real human nobleness and grief. He taught me the meaning of Chillon and of Meillerie, and bade me seek first in Venice—the ruined homes of Foscari and Falieri.

And observe, the force with which he struck depended again on there being unquestionable reality of person in his stories, as of principle in his thoughts. Romance, enough

and to spare, I had learnt from Scott—but his *Lady of the Lake* was as openly fictitious as his *White Maid of Avenel*: while Rogers was a mere dilettante, who felt no difference between landing where Tell leaped ashore, or standing where “*St. Preux has stood.*” Even Shakespeare’s *Venice* was visionary; and *Portia* as impossible as *Miranda*. But Byron told me of, and reanimated for me, the real people whose feet had worn the marble I trod on.

One word only, though it trenches on a future subject, I must permit myself about his rhythm. Its natural flow in almost prosaic simplicity and tranquillity interested me extremely, in opposition alike to the symmetrical clauses of Pope’s logical metre, and to the balanced strophes of classic and Hebrew verse. But though I followed his manner instantly in what verses I wrote for my own amusement, my respect for the structural, as opposed to fluent, force of the classic measures, supported as it was partly by Byron’s contempt for his own work, and partly by my own architect’s instinct for “the principle of the pyramid,” made me long endeavor, in forming my prose style, to keep the cadences of Pope and Johnson for all serious statement. Of Johnson’s influence on me I have to give account in the last chapter of this volume; meantime, I must get back to the days of mere rivulet-singing, in my poor little water-cress life.

I had a sharp attack of pleurisy in the spring of ’35, which gave me much gasping pain, and put me in some danger for three or four days, during which our old family physician, Dr. Walshman, and my mother, defended me against the wish of all other scientific people to have me bled. “He wants all the blood he has in him to fight the illness,” said the old doctor, and brought me well through, weak enough, however, to claim a fortnight’s nursing and petting afterward, during which I read the “*Fair Maid of Perth,*” learned the song of “*Poor Louise,*” and feasted on Stanfield’s drawing of *St. Michael’s Mount*, engraved in the “*Coast Scenery,*” and Turner’s “*Santa Saba,*” “*Pool of Bethesda,*” and “*Corinth,*” engraved in the Bible series, lent me by Richard Fall’s little sister. I got an immense quantity of useful learning out of those four

plates, and am very thankful to possess now the originals of the Bethesda and Corinth.

Moreover, I planned all my proceedings on the journey to Switzerland, which was to begin the moment I was strong enough. I shaded in cobalt a "cyanometer" to measure the blue of the sky with; bought a ruled notebook for geological observations, and a large quarto for architectural sketches, with square rule and foot-rule ingeniously fastened outside. And I determined that the events and sentiments of this journey should be described in a poetic diary in the style of "Don Juan," artfully combined with that of "Childe Harold." Two cantos of this work were indeed finished—carrying me across France to Chamouni—where I broke down, finding that I had exhausted on the Jura all the descriptive terms at my disposal, and that none were left for the Alps. I must try to give, in the next chapter, some useful account of the same part of the journey in less exalted language.

---

## CHAPTER IX.

### THE COL DE LA FAUCILLE.

About the moment in the forenoon when the modern fashionable traveller, intent on Paris, Nice, and Monaco, and started by the morning mail from Charing Cross, has a little recovered himself from the qualms of his crossing, and the irritation of fighting for seats at Boulogne, and begins to look at his watch to see how near he is to the buffet of Amiens, he is apt to be balked and worried by the train's useless stop at one inconsiderable station, lettered ABBEVILLE. As the carriage gets in motion again, he may see, if he cares to lift his eyes for an instant from his newspaper, two square towers, with a curiously attached bit of traceried arch, dominant over the poplars and osiers of the marshy level he is traversing. Such glimpse is probably all he will ever wish to get of them; and I scarcely know how far I can make even

the most sympathetic reader understand their power over my own life.

The country town in which they are central,—once, like Croyland, a mere monk's and peasant's refuge (so for some time called "Refuge"),—among the swamps of Somme, received about the year 650 the name of "Abbatis Villa,"—"Abbot's-ford," I had like to have written: house and village, I suppose we may rightly say,—as the chief dependence of the great monastery founded by St. Riquier at his native place, on the hillside five miles east of the present town. Concerning which saint I translate from the *Dict<sup>o</sup> des Sciences Eccles<sup>iques</sup>*, what it may perhaps be well for the reader, in present political junctures, to remember for more weighty reasons than any arising out of such interest as he may take in my poor little nascent personality.

"St. Riquier, in Latin 'Sanctus Richarius,' born in the village of Centula, at two leagues from Abbeville, was so touched by the piety of two holy priests of Ireland, whom he had hospitably received, that he also embraced 'la pénitence.' Being ordained priest, he devoted himself to preaching, and so passed into England. Then, returning into Ponthieu, he became, by God's help, powerful in work and word in leading the people to repentance. He preached at the court of Dagobert, and, a little while after that prince's death, founded the monastery which bore his name, and another, called Forest-Moutier, in the wood of Crécy, where he ended his life and penitence."

I find further in the "Ecclesiastical History of Abbeville," published in 1646 at Paris by François Pelican, "Rue St. Jacques, à l'enseigne du Pelican," that St. Riquier was himself of royal blood, that St. Angilbert, the seventh abbot, had married Charlemagne's second daughter Bertha—"qui se rendit aussi Religieuse de l'ordre de Saint Benoist." Louis, the eleventh abbot, was cousin-german to Charles the Bald; the twelfth was St. Angilbert's son, Charlemagne's grandson. Raoul, the thirteenth abbot, was the brother of the Empress Judith; and Carloman, the sixteenth, was the son of Charles the Bald.

Lifting again your eyes, good reader, as the train gets to its speed, you may see gleaming opposite on the hillside the white village and its abbey,—not, indeed, the walls of the home of these princes and princesses, (afterward again and again ruined,) but the still beautiful abbey built on their foundations by the monks of St. Maur.

In the year when the above-quoted history of Abbeville was written (say 1600 for surety), the town, then familiarly called “Faithful Abbeville,” contained 40,000 souls, “living in great unity among themselves, of a marvellous frankness, fearing to do wrong to their neighbor, the women modest, honest, full of faith and charity, and adorned with a goodness and beauty toute innocente: the noblesse numerous, hardy, and adroit in arms, the masterships (maistrises) of arts and trades, with excellent workers in every profession, under sixty-four Mayor-Bannerets, who are the chiefs of the trades, and elect the mayor of the city, who is an independent Home Ruler, de grande probité, d’authorité, et sans reproche, aided by four eschevins of the present, and four of the past year; having authority of justice, police, and war, and right to keep the weights and measures true and unchanged, and to punish those who abuse them, or sell by false weight or measure, or sell anything without the town’s mark on it.” Moreover, the town contained, besides the great church of St. Wulfran, thirteen parish churches, six monasteries, eight nunneries, and five hospitals, among which churches I am especially bound to name that of St. George, begun by our own Edward in 1368, on the 10th of January; transferred and re-consecrated in 1469 by the Bishop of Bethlehem, and enlarged by the Marguilliers in 1536, “because the congregation had so increased that numbers had to remain outside on days of solemnity.”

These reconstructions took place with so great ease and rapidity at Abbeville, owing partly to the number of its, unanimous workmen, partly to the easily workable quality of the stone they used, and partly to the uncertainty of a foundation always on piles, that there is now scarce vestige left of any building prior to the fifteenth century. St. Wulfran

itself, with St. Riquier, and all that remain of the parish churches (four only, now, I believe, besides St. Wulfran), are of the same flamboyant Gothic,—walls and towers alike coeval with the gabled timber houses of which the busier streets chiefly consisted when first I saw them.

I must here, in advance, tell the general reader that there have been, in sum, three centres of my life's thought: Rouen, Geneva, and Pisa. All that I did at Venice was by-work, because her history had been falsely written before, and not even by any of her own people understood; and because, in the world of painting, Tintoret was virtually unseen, Veronese unfelt, Carpaccio not so much as named, when I began to study them; something also was due to my love of gliding about in gondolas. But Roten, Geneva, and Pisa have been tutresses of all I know, and were mistresses of all I did, from the first moments I entered their gates.

In this journey of 1835 I first saw Rouen and Venice—Pisa not till 1840; nor could I understand the full power of any of those great scenes till much later. But for Abbeville, which is the preface and interpretation of Rouen, I was ready on that 5th of June, and felt that here was entrance for me into immediately healthy labor and joy.

For here I saw that art (of its local kind), religion, and present human life, were yet in perfect harmony. There were no dead six days and dismal seventh in those sculptured churches; there was no beadle to lock me out of them, or pew-shutter to shut me in. I might haunt them, fancying myself a ghost; peep round their pillars, like Rob Roy; kneel in them, and scandalize nobody; draw in them, and disturb none. Outside, the faithful old town gathered itself, and nestled under their buttresses like a brood beneath the mother's wings; the quiet, uninjurious aristocracy of the newer town opened into silent streets, between self-possessed and hidden dignities of dwelling, each with its courtyard and richly trellised garden. The commercial square, with the main street of traverse, consisted of uncompetitive shops, such as were needful, of the native wares: cloth and hosiery

spun, woven, and knitted within the walls ; cheese of neighboring Neuchatel ; fruit of their own gardens, bread from the fields above the green côteaux ; meat of their herds, untainted by American tin ; smith's work of sufficient scythe and ploughshare, hammered on the open anvil ; groceries dainty, the coffee generally roasting odoriferously in the street before the door ; for the modistes,—well, perhaps a bonnet or two from Paris, the rest, wholesome dress for peasant and dame of Ponthieu. Above the prosperous, serenely busy and beneficent shop, the old dwelling-house of its ancestral masters ; pleasantly carved, proudly roofed, keeping its place, and order, and recognized function, unailing, unenlarging, for centuries. Round all, the breezy ramparts, with their long waving avenues ; through all, in variously circuiting cleanness and sweetness of navigable river and active mill-stream, the green chalk-water of the Somme.

My most intense happinesses have of course been among mountains. But for cheerful, unalloyed, unwearying pleasure, the getting in sight of Abbeville on a fine summer afternoon, jumping out in the courtyard of the Hôtel de l'Europe, and rushing down the street to see St. Wulfran again before the sun was off the towers, are things to cherish the past for,—to the end.

Of Rouen, and its Cathedral, my saying remains yet to be said, if days be given me, in "Our Fathers have Told Us." The sight of them, and following journey up the Seine to Paris, then to Soissons and Rheims, determined, as aforesaid, the first centre and circle of future life-work. Beyond Rheims, at Bar-le-Duc, I was brought again within the greater radius of the Alps, and my father was kind enough to go down by Plombières to Dijon, that I might approach them by the straightest pass of Jura.

The reader must pardon my relating so much as I think he may care to hear of this journey of 1835, rather as what *used* to happen, than as limitable to that date ; for it is extremely difficult for me now to separate the circumstances of any one journey from those of subsequent days, in which we stayed at the same inns, with variation only from the blue room to

the green, saw the same sights, and rejoiced the more in every pleasure—that it was not new.

And this latter part of the road from Paris to Geneva, beautiful without being the least terrific or pathetic, but in the most lovable and cheerful way, became afterward so dear and so domestic to me, that I will not attempt here to check my gossip of it.

We used always to drive out of the yard of La Cloche at Dijon in early morning—seven, after joyful breakfast at half-past six. The small saloon on the first floor to the front had a bedroom across the passage at the west end of it, whose windows commanded the cathedral towers over a low roof on the opposite side of the street. This was always mine, and its bed was in an alcove at the back, separated only by a lath partition from an extremely narrow passage leading from the outer gallery to Anne's room. It was a delight for Anne to which I think she looked forward all across France, to open a little hidden door from this passage, at the back of the alcove exactly above my pillow, and surprise—or wake, me in the morning.

I think I only remember once starting in rain. Usually the morning sun shone through the misty spray and far-thrown diamonds of the fountain in the southeastern suburb, and threw long poplar shadows across the road to Genlis.

Genlis, Auxonne, Dole, Mont-sous-Vaudrey—three stages of 12 or 14 kilometres each, two of 18 ; in all about 70 kilometres = 42 miles, from Dijon gate to Jura foot—we went straight for the hills always, lunching on French plums and bread.

Level plain of little interest to Auxonne. I used to wonder how any mortal creature could be content to live within actual sight of Jura, and never go to see them, all their lives ! At Auxonne, cross the Saône, wide and beautiful in clear shallows of green stream—little more, yet, than a noble mountain torrent ; one saw in an instant it came from Jura. Another hour of patience, and from the broken yellow limestone slopes of Dole—there, at last, they were—the long blue surges of them fading as far as eye could see to the

south, more abruptly near to the northeast, where the bold outlier, almost island, of them, rises like a precipitous Wrekin, above Salins. Beyond Dole, a new wildness comes into the more undulating country, notable chiefly for its clay-built cottages with enormously high thatched gables of roof. Strange, that I never inquired into the special reason of that form, nor looked into a single cottage to see the mode of its inhabitation!

The village, or rural town, of Poligny, clustered out of well-built old stone houses, with gardens and orchards; and gathering at the midst of it into some pretence or manner of a street, straggles along the roots of Jura at the opening of a little valley, which in Yorkshire or Derbyshire limestone would have been a gorge between nodding cliffs, with a pretty pattering stream at the bottom; but, in Jura is a far retiring theatre of rising terraces, with bits of field and garden getting foot on them at various heights; a spiry convent in its hollow, and well-built little nests of husbandry-building set in corners of meadow, and on juts of rock;—no stream, to speak of, nor springs in it, nor the smallest conceivable reason for its being there, but that God made it.

“Far” retiring, I said,—perhaps a mile into the hills from the outer plain, by half a mile across, permitting the main road from Paris to Geneva to serpentine and zigzag capriciously up the cliff terraces with innocent engineering, finding itself every now and then where it had no notion of getting to, and looking, in a circumflex of puzzled level, where it was to go next;—retrospect of the plain of Burgundy enlarging under its backward sweeps, till at last, under a broken bit of steep final crag, it got quite up the side, and out over the edge of the ravine, where said ravine closes as unreasonably as it had opened, and the surprised traveller finds himself, magically as if he were Jack of the Beanstalk, in a new plain of an upper world. A world of level rock, breaking at the surface into yellow soil, capable of scanty, but healthy, turf, and sprinkled copse and thicket; with here and there, beyond, a blue surge of pines, and over those, if the evening or morning were clear, always one small bright silvery likeness of a cloud.

These first tracts of Jura differ in many pleasant ways from the limestone levels round Ingleborough, which are their English types. The Yorkshire moors are mostly by a hundred or two feet higher, and exposed to drift of rain under violent, nearly constant, wind. They break into wide fields of loose blocks, and rugged slopes of shale; and are mixed with sands and clay from the millstone grit, which nourish rank grass, and lodge in occasional morass: the wild winds also forbidding any vestige or comfort of tree, except here and there in a sheltered nook of new plantation. But the Jura sky is as calm and clear as that of the rest of France; if the day is bright on the plain, the bounding hills are bright also; the Jura rock, balanced in the make of it between chalk and marble, weathers indeed into curious rifts and furrows, but rarely breaks loose, and has long ago clothed itself either with forest flowers, or with sweet short grass, and all blossoms that love sunshine. The pure air, even on this lower ledge of a thousand feet above sea, cherishes their sweetest scents and liveliest colors, and the winter gives them rest under thawless serenity of snow.

A still greater and stranger difference exists in the system of streams. For all their losing themselves and hiding, and intermitting, their presence is distinctly felt on a Yorkshire moor; one sees the places they have been in yesterday, the wells where they will flow after the next shower, and a trickle here at the bottom of a crag, or a tinkle there from the top of it, is always making one think whether this is one of the sources of Aire, or rootlets of Ribble, or beginnings of Bolton Strid, or threads of silver which are to be spun into Tees.

But no whisper, nor murmur, nor patter, nor song of streamlet disturbs the enchanted silence of open Jura. The rain-cloud clasps her cliffs, and floats along her fields; it passes, and in an hour the rocks are dry, and only beads of dew left in the *Alchemilla* leaves,—but of rivulet, or brook,—no vestige yesterday, or to-day, or to-morrow. Through unseen fissures and filmy crannies the waters of cliff and plain have alike vanished, only far down in the depths of the main valley glides the strong river, unconscious of change.

One is taught thus much for one's earliest lesson, in the two stages from Poligny to Champagnole, level over the absolutely crisp turf and sun-bright rock, without so much water anywhere as a cress could grow in, or a tadpole wag his tail in,—and then, by a zigzag of shady road, forming the Park and Boulevard of the wistful little village, down to the single-arched bridge that leaps the Ain, which pauses underneath in magnificent pools of clear pale green: the green of spring leaves; then clashes into foam, half weir, half natural cascade, and into a confused race of currents beneath hollow overhanging of crag festooned with leafage. The only marvel is, to anyone knowing Jura structure, that rivers should be visible anywhere at all, and that the rocks should be consistent enough to carry them in open air through the great valleys without perpetual “pertes” like that of the Rhone. Below the Lac de Joux the Orbe thus loses itself indeed, reappearing seven hundred feet\* beneath in a scene of which I permit myself to quote my Papa Saussure's description.

“A semicircular rock at least two hundred feet high, composed of great horizontal rocks hewn vertical, and divided † by ranks of pine which grow on their projecting ledges, closes to the west the valley of Valorbe. Mountains yet more elevated and covered with forests, form a circuit round this rock, which opens only to give passage to the Orbe, whose source is at its foot. Its waters, of a perfect limpidity, flow at first with a majestic tranquillity upon a bed tapestried with beautiful green moss (*Fontinalis antipyretica*), but soon, drawn into a steep slope, the thread of the current breaks itself in foam against the rocks which occupy the middle of its bed, while the borders, less agitated, flowing always on their green ground, set off the whiteness of the midst of the river; and thus it withdraws itself from sight, in following the course of a deep valley covered with pines, whose blackness is rendered more striking by the vivid green of the beeches which are scattered among them.

---

\* Six hundred and eighty French feet. Saussure, § 385.

† “Taillés à pic, et entrecoupés.”

“ Ah, if Petrarch had seen this spring and had found there his Laura, how much would not he have preferred it to that of Vaucluse, more abundant, perhaps, and more rapid, but of which the sterile rocks have neither the greatness of ours, nor the rich parure, which embellishes them.”

I have never seen the source of the Orbe, but would commend to the reader's notice the frequent beauty of these great springs in literally *rising* at the base of cliffs, instead of falling, as one would have imagined likely, out of clefts in the front of them. In our own English antitype of the source of Orbe, Malham Cove, the flow of water is, in like manner, wholly at the base of the rock, and seems to rise to the ledge of its outlet from a deeper interior pool.

The old Hôtel de la Poste at Champagnole stood just above the bridge of Ain, opposite the town, where the road got level again as it darted away toward Geneva. I think the year 1842 was the first in which we lengthened the day from Dijon by the two stages beyond Poligny; but afterward, the Hôtel de la Poste at Champagnole became a kind of home to us: going out, we had so much delight there, and coming home, so many thoughts, that a great space of life seemed to be passed in its peace. No one was ever in the house but ourselves; if a family stopped every third day or so, it was enough to maintain the inn, which, besides, had its own farm; and those who did stop, rushed away for Geneva early in the morning. We, who were to sleep again at Morez, were in no hurry; and in returning always left Geneva on Friday, to get the Sunday at Champagnole.

But my own great joy was in the early June evening, when we had arrived from Dijon, and I got out after the quickly dressed trout and cutlet for the first walk on rock and under pine.

With all my Tory prejudice (I mean, principle), I have to confess that one great joy of Swiss—above all, Jurassic Swiss—ground to me, is in its effectual, not merely theoretic, *liberty*. Among the greater hills, one can't always go just where one chooses,—all around is the too far, or too steep,—one wants to get to this, and climb that, and can't do either;—but in

Jura one can go every way, and be happy everywhere. Generally, if there was time, I used to climb the islet of crag to the north of the village, on which there are a few gray walls of ruined castle, and the yet traceable paths of its "pleasance," whence to look if the likeness of white cloud were still on the horizon. Still there, in the clear evening, and again and again, each year more marvellous to me; the derniers rochers, and calotte of Mont Blanc. Only those; that is to say, just as much as may be seen over the Dome du Gouté from St. Martin's. But it looks as large from Champagnole as it does there—glowing in the last light like a harvest moon.

If there were not time to reach the castle rock, at least I could get into the woods above the Ain, and gather my first Alpine flowers. Again and again, I feel the duty of gratitude to the formalities and even vulgarities of Herne Hill, for making me to feel by contrast the divine wildness of Jura forest.

Then came the morning drive into the higher glen of the Ain, where the road began first to wind beside the falling stream. One never understands how those winding roads steal with their tranquil slope from height to height; it was but an hour's walking beside the carriage,—an hour passed like a minute; and one emerged on the high plain of St. Laurent, and the gentians began to gleam among the roadside grass, and the pines swept round the horizon with the dark infinitude of ocean.

All Switzerland was there in hope and sensation, and what was less than Switzerland was in some sort better, in its meek simplicity and healthy purity. The Jura cottage is not carved with the stately richness of the Bernese, nor set together with the antique strength of Uri. It is covered with thin-slit fine shingles, side-roofed as it were to the ground for mere dryness' sake, a little crossing of laths here and there underneath the window its only ornament. It has no daintiness of garden nor wealth of farm about it,—is indeed little more than a delicately-built chalet, yet trim and domestic, mildly intelligent of things other than pastoral, watch-making and the like, though set in the midst of the meadows, the

gentian at its door, the lily of the valley wild in the copses hard by.

My delight in these cottages, and in the sense of human industry and enjoyment through the whole scene, was at the root of all pleasure in its beauty ; see the passage afterward written in the "Seven Lamps," insisting on this as if it were general to human nature thus to admire through sympathy. I have noticed since, with sorrowful accuracy, how many people there are who, wherever they find themselves, think only "of their position." But the feeling which gave me so much happiness, both then and through life, differed also curiously, in its impersonal character, from that of many even of the best and kindest persons.

In the beginning of the Carlyle-Emerson correspondence, edited with too little comment by my dear friend Charles Norton, I find at page 18 this—to me entirely disputable, and to my thought, so far as undisputed, much blameable and pitiable, exclamation of my master's : "Not till we can think that here and there one is thinking of us, one is loving us, does this waste earth become a peopled garden." My training, as the reader has perhaps enough perceived, produced in me the precisely opposite sentiment. *My* times of happiness had always been when *nobody* was thinking of me ; and the main discomfort and drawback to all proceedings and designs, the attention and interference of the public—represented by my mother and the gardener. The garden was no waste place to me, because I did not suppose myself an object of interest either to the ants or the butterflies ; and the only qualification of the entire delight of my evening walk at Champagnole or St. Laurent was the sense that my father and mother *were* thinking of me, and would be frightened if I was five minutes late for tea.

I don't mean in the least that I could have done without them. They were, to me, much more than Carlyle's wife to him ; and if Carlyle had written, instead of, that he wanted Emerson to think of him in America, that he wanted his father and mother to be thinking of him at Ecclefechan, it had been well. But that the rest of the world was waste to

him unless he had admirers in it, is a sorry state of sentiment enough ; and I am somewhat tempted, for once, to admire the exactly opposite temper of my own solitude. My entire delight was in observing without being myself noticed,—if I could have been invisible, all the better. I was absolutely interested in men and their ways, as I was interested in marmots and chamois, in tomtits and trout. If only they would stay still and let me look at them, and not get into their holes and up their heights. The living inhabitation of the world—the grazing and nesting in it,—the spiritual power of the air, the rocks, the waters,—to be in the midst of it, and rejoice and wonder at it, and help it if I could,—happier if it needed no help of mine,—this was the essential love of *Nature* in me, this the root of all that I have usefully become, and the light of all that I have rightly learned.

Whether we slept at St. Laurent or Morez, the morning of the next day was an eventful one. In ordinarily fine weather, the ascent from Morez to Les Rousses, walked most of the way, was mere enchantment ; so also breakfast, and fringed-gentian gathering, at Les Rousses. Then came usually an hour of tortured watching the increase of the noon clouds ; for, however early we had risen, it was impossible to reach the Col de la Faucille before two o'clock, or later if we had bad horses, and at two o'clock, if there are clouds above Jura, there will be assuredly clouds on the Alps.

It is worth notice, Saussure himself not having noticed it, that this main pass of Jura, unlike the great passes of the Alps, reaches its traverse-point very nearly under the highest summit of that part of the chain. The col, separating the source of the Bienne, which runs down to Morez and St. Claude, from that of the Valserine, which winds through the midst of Jura to the Rhone at Bellegarde, is a spur of the Dole itself, under whose prolonged masses the road is then carried six miles farther, ascending very slightly to the Col de la Faucille, where the chain opens suddenly, and a sweep of the road, traversed in five minutes at a trot, opens the whole lake of Geneva, and the chain of the Alps along a hundred miles of horizon.

I have never seen that view perfectly but once—in this year 1835 ; when I drew it carefully in my then fashion, and have been content to look back to it as the confirming sequel of the first view of the Alps from Schaffhausen. Very few travellers, even in old times, saw it at all ; tired of the long posting journey from Paris, by the time they got to the col they were mostly thinking only of their dinners and rest at Geneva ; the guide-books said nothing about it ; and though, for everybody, it was an inevitable task to ascend the Righi, nobody ever thought there was anything to be seen from the Dole.

Both mountains have had enormous influence on my whole life ;—the Dole continually and calmly ; the Righi at sorrowful intervals, as will be seen. But the Col de la Faucille, on that day of 1835, opened to me in distinct vision the Holy Land of my future work and true home in this world. My eyes had been opened, and my heart with them, to see and to possess royally such a kingdom ! Far as the eye could reach—that land and its moving or pausing waters ; Arve, and his gates of Cluse, and his glacier fountains ; Rhone, and the infinitude of his sapphire lake,—his peace beneath the narcissus meads of Vevay—his cruelty beneath the promontories of Sierre. And all that rose against and melted into the sky, of mountain and mountain snow ; and all that living plain, burning with human gladness—studded with white homes,—a milky way of star-dwellings cast across its sunlit blue.

---

## CHAPTER X.

### QUEM TU, MELPOMENE.

Whether in the biography of a nation, or of a single person, it is alike impossible to trace it steadily through successive years. Some forces are failing while others strengthen, and most act irregularly, or else at uncorresponding periods of renewed enthusiasm after intervals of lassitude. For all clearness of exposition, it is necessary to follow first one, then

another, without confusing notices of what is happening in other directions.

I must accordingly cease talk of pictorial and rhythmic efforts of the year 1835, at this point; and go back to give account of another segment of my learning, which might have had better consequence than ever came of it, had the stars so pleased.

I cannot, and perhaps the reader will be thankful, remember anything of the Apolline instincts under which I averred to incredulous papa and mamma that, "though I could not speak, I could play upon the fiddle." But even to this day, I look back with starts of sorrow to a lost opportunity of showing what was in me, of that manner of genius, on the occasion of a grand military dinner in the state room of the Sussex, at Tunbridge Wells; where, when I was something about eight or nine years old, we were staying in an unadventurous manner, enjoying the pantiles, the common, the sight, if not the taste, of the lovely fountain, and drives to the High Rocks. After the military dinner there was military music, and by connivance of waiters, Anne and I got in, somehow, mixed up with the dessert. I believe I was rather a pretty boy then, and dressed in a not wholly civilian manner, in a sort of laced and buttoned surtout. My mind was extremely set on watching the instrumental manœuvres of the band,—with admiration of all, but burning envy of the drummer.

The colonel took notice of my rapt attention, and sent an ensign to bring me round to him; and after getting, I know not how, at my mind in the matter, told me I might go and ask the drummer to give me his lovely round-headed sticks, and he would. I was in two minds to do it, having good confidence in my powers of keeping time. But the dismal shyness conquered:—I shook my head wofully, and my musical career was blighted. No one will ever know what I could then have brought out of that drum, or (if my father had perchance taken me to Spain) out of a tambourine.

My mother, busy in graver matters, had never cultivated the little she had been taught of music, though her natural

sensibility to it was great. Mrs. Richard Gray used sometimes to play gracefully to me, but if ever she struck a false note, her husband used to put his fingers in his ears, and dance about the room, exclaiming, "O Mary, Mary dear!" and so extinguish her. Our own Perth Mary played dutifully her scales, and little more; but I got useful help, almost unconsciously, from a family of young people who ought, if my chronology had been systematic, to have been affectionately spoken of long ago.

In above describing my father's counting-house, I said the door was opened by a latch pulled by the head clerk. This head clerk, or, putting it more modestly, topmost of two clerks, Henry Watson, was a person of much import in my father's life and mine; import which, I perceive, looking back, to have been as in many respects tender and fortunate, yet in others extremely doleful, both to us and himself.

The chief fault in my father's mind, (I say so reverently, for its faults were few, but necessarily, for they were very fatal,) was his dislike of being excelled. He knew his own power—felt that he had not nerve to use or display it, in full measure; but all the more, could not bear, in his own sphere, any approach to equality. He chose his clerks first for trustworthiness, secondly for—*incapacity*. I am not sure that he would have sent away a clever one, if he had chanced on such a person; but he assuredly did not look for mercantile genius in them, but rather for subordinates who would be subordinate for ever. Frederick the Great chose his clerks in the same way; but then, his clerks never supposed themselves likely to be king, while a merchant's clerks are apt to hope they may at least become partners, if not successors. Also, Friedrich's clerks were absolutely fit for *their* business; but my father's clerks were, in many ways, utterly unfit for theirs. Of which unfitness my father greatly complaining, nevertheless by no means bestirred himself to find fitter ones. He used to send Henry Watson on business tours, and assure him afterward that he had done more harm than good: he would now and then leave Henry Ritchie to write a business letter; and, I think, find with some satisfaction that

it was needful afterward to write two, himself, in correction of it. There was scarcely a day when he did not come home in some irritation at something that one or other of them had done, or not done. But they stayed with him till his death.

Of the second in command, Mr. Ritchie, I will say what is needful in another place ; but the clerk of confidence, Henry Watson, has already been left unnoticed too long. He was, I believe, the principal support of a widowed mother and three grown-up sisters, amiable, well educated, and fairly sensible women, all of them ; refined beyond the average tone of their position,—and desirous, not vulgarly, of keeping themselves in the upper-edge circle of the middle class. Not vulgarly, I say, as caring merely to have carriages stopping at their door, but with real sense of the good that *is* in good London society, in London society's way. They liked, as they did not drop their own h's, to talk with people who did not drop theirs ; to hear what was going on in polite circles ; and to have *entrée* to a pleasant dance, or rightly given concert. Being themselves both good and pleasing musicians, (the qualities are not united in all musicians,) this was not difficult for them ;—nevertheless it meant necessarily having a house in a street of tone, near the Park, and being nicely dressed, and giving now and then a little reception themselves. On the whole, it meant the total absorption of Henry's salary, and of the earnings, in some official, or otherwise plumaged occupations, of two brothers besides, David and William. The latter, now I think of it, was a West-End wine merchant, supplying the nobility with Clos-Vougeot, Hochheimer, dignifiedly still Champagne, and other nectareous drinks, of which the bottom fills up half the bottle, and which are only to be had out of the cellars of Grand Dukes and Counts of the Empire. The family lived, to the edge of their means,—not too narrowly : the young ladies enjoyed themselves, studied German—and at that time it was thought very fine and poetical to study German ;—sang extremely well, gracefully and easily ; had good taste in dress, the better for being a little matronly and old-fash-

ioned : and the whole family thought themselves extremely *élite*, in a substantial and virtuous manner.

When Henry Watson was first taken, (then, I believe, a boy of sixteen,) I know not by what chance, or on what commendation, into my father's counting-house, the opening was thought by his family a magnificent one ; they were very thankful and happy, and, of course, in their brother's interest, eager to do all they could to please my father and mother. They found, however, my mother not very easily pleased ; and presently began themselves to be not a little surprised and *displeased* by the way things went on, both in the counting-house and at Herne Hill. At the one, there was steady work ; at the other, little show : the clerks could by no means venture to leave their desks for a garden-party, and after dark were allowed only tallow candles. That the head of the Firm should live in the half of a party-walled house, beyond the suburb of Camberwell, was a degradation and disgrace to everybody connected with the business ! and that Henry should be obliged every morning to take omnibus into the eastern City, and work within scent of Billingsgate, instead of walking elegantly across Piccadilly to an office in St. James's Street, was alike injurious to him, and disparaging to my father's taste and knowledge of the world. Also, to the feminine circle, my mother was a singular, and sorrowfully intractable, phenomenon. Taking herself no interest in German studies, and being little curious as to the events, and little respectful to the opinions, of Mayfair, she was apt to look with some severity, perhaps a tinge of jealousy, on what she thought pretentious in the accomplishments, or affected in the manners, of the young people : while they, on the other hand, though quite sensible of my mother's worth, grateful for her good will, and in time really attached to her, were not disposed to pay much attention to the opinions of a woman who knew only her own language ;—and were more restive than responsive under kindnesses which frequently took the form of advice.

These differences in feeling, irreconcilable though they were, did not hinder the growth of consistently pleasant and

sincerely affectionate relations between my mother and the young housewives. With what best of girl nature was in them, Fanny, Helen, and foolishhest, cleverest little Juliet, enjoyed, in spring time, exchanging for a day or two the dusty dignity of their street of tone in Mayfair for the lilacs and laburnums of Herne Hill: and held themselves, with their brother Henry, always ready at call to come out on any occasion of the Hill's hospitality to some respected correspondent of the House, and sing to us the prettiest airs from the new opera, with a due foundation and tonic intermixture of classical German.

Henry had a singularly beautiful tenor voice; and the three sisters, though not, any one of them, of special power, sang their parts with sufficient precision, with intelligent taste, and with the pretty unison of sisterly voices. In this way, from early childhood, I was accustomed to hear a great range of good music completely and rightly rendered, without breakings down, missings out, affectations of manner, or vulgar prominence of execution. Had the quartette sung me English glees, or Scotch ballads, or British salt-water ones, or had any one of the girls had gift enough to render higher music with its proper splendor, I might easily have been led to spare some time from my maps and mineralogy for attentive listening. As it was, the scientific German compositions were simply tiresome to me, and the pretty modulations of Italian, which I understood no syllable of, pleasant only as the trills of the blackbirds, who often listened, and expressed their satisfaction by joining in the part-songs through the window that opened to the back garden in the spring evenings. Yet the education of my ear and taste went on without trouble of mine. I do not think I ever heard any masterly professional music, until, as good hap was, I heard the best, only to be heard during a narrow space of those young days.

I too carelessly left without explanation the casual sentence about "fatal dinner at Mr. Domecq's" when I was fourteen, above, Chap. IV., p. 73. My father's Spanish partner was at that time living in the Champs Élysées, with his English

wife and his five daughters ; the eldest, Diana, on the eve of her marriage with one of Napoleon's officers, Count Maison ; the four others, much younger, chanced to be at home on vacation from their convent school : and we had happy family dinner with them, and mamma and the girls and a delightful old French gentleman, Mr. Badell, played afterward at "la toilette de Madame" with me ; only I couldn't remember whether I was the necklace or the garters ; and then Clotilde and Cécile played "les Échos" and other fascinations of dance-melody,—only I couldn't dance ; and at last Élise had to take pity on me as above described. But the best, if not the largest, part of the conversation among the elders was of the recent death of Bellini, the sorrow of all Paris for him, and the power with which his "I Puritani" was being rendered by the reigning four great singers for whom it was written.

It puzzles me that I have no recollection of any first sight and hearing of an opera. Not even, for that matter, of my first going to a theatre, though I was full twelve, before being taken ; and afterward, it was a matter of intense rapture, of a common sort, to be taken to a pantomime. And I greatly enjoy theatre to this day—it is one of the pleasures that have least worn out ; yet, while I remember Friar's Crag at Derwentwater when I was four years old, and the courtyard of our Paris inn at five, I have no memory whatever, and am a little proud to have none, of my first theatre. To be taken now at Paris to the feebly dramatic "Puritani" was no great joy to me ; but I then heard, and it will always be a rare, and only once or twice in a century possible, thing to hear, four great musicians, all rightly to be called of genius, singing together, with sincere desire to assist each other, not eclipse ; and to exhibit, not only their own power of singing, but the beauty of the music they sang.

Still more fortunately it happened that a woman of *faultless* genius led the following dances,—Taglioni ; a person of the highest natural faculties, and stainlessly simple character, gathered with sincerest ardor and reverence into her art. My mother, though she allowed me without serious remonstrance to be taken to the theatre by my father, had the

strictest Puritan prejudice against the stage ; yet enjoyed it so much that I think she felt the sacrifice she made in not going with us to be a sort of price accepted by the laws of virtue for what was sinful in her concession to my father and me. She went, however, to hear and see this group of players, renowned, without any rivals, through all the cities of Europe ; —and, strange and pretty to say, her instinct of the innocence, beauty, and wonder, in every motion of the Grace of her century, was so strong, that from that time forth my mother would always, at a word, go with us to see Taglioni.

Afterward, a season did not pass without my hearing twice or thrice, at least, those four singers ; and I learned the better because my ear was never jaded the intention of the music written for them, or studied by them ; and am extremely glad now that I heard *their* renderings of Mozart and Rossini, neither of whom can be now said ever to be heard at all, owing to the detestable quickening of the time. Grisi and Malibran sang at least one-third slower than any modern cantatrice ; \* and Patti, the last time I heard her, massacred Zerlina's part in "La ci darem," as if the audience and she had but the one object of getting Mozart's air done with as soon as possible.

Afterward, (the confession may as well be got over at once,) when I had got settled in my furrow at Christ Church, it chanced that the better men of the college had founded a musical society, under instruction of the cathedral organist, Mr. Marshall, an extremely simple, good-natured, and good-humored person, by whose encouragement I was brought to the point of trying to learn to sing, "Come mai posso vivere se Rosina non m'ascolta," and to play the two lines of prelude to the "A te o cara," and what notes I could manage to read of accompaniments to other songs of similarly tender purport. In which, though never even getting so far as to read with ease, I nevertheless, between my fine rhythmic ear, and true lover's sentiment, got to understand some principles of

---

\* It is a pretty conceit of musical people to call themselves scientific, when they have not yet fixed their unit of time !

musical art, which I shall perhaps be able to enforce with benefit on the musical public mind, even to-day, if only I can get first done with this autobiography.

What the furrow at Christ Church was to be like, or where to lead, none of my people seem at this time to have been thinking. My mother, watching the naturalistic and methodic bent of me, was, I suppose, tranquil in the thought of my becoming another White of Selborne, or Vicar of Wakefield, victorious in Whistonian and every other controversy. My father perhaps conceived more cometic or meteoric career for me, but neither of them put the matter seriously in hand, however deeply laid up in heart : and I was allowed without remonstrance to go on measuring the blue of the sky, and watching the flight of the clouds, till I had forgotten most of the Latin I ever knew, and all the Greek, except Anacreon's ode to the rose.

Some little effort was made to pull me together in 1836 by sending me to hear Mr. Dale's lectures at King's College, where I explained to Mr. Dale, on meeting him one day in the court of entrance, that porticoes should not be carried on the top of arches ; and considered myself exalted because I went in at the same door with boys who had square caps on. The lectures were on early English literature, of which, though I had never read a word of any before Pope, I thought myself already a much better judge than Mr. Dale. His quotation of "Knut the king came sailing by" stayed with me ; and I think that was about all I learnt during the summer. For, as my adverse stars would have it, that year, my father's partner, Mr. Domecq, thought it might for once be expedient that he should himself pay a complimentary round of visits to his British customers, and asked if meanwhile he might leave his daughters at Herne Hill to see the lions at the Tower, and so on. How we got them all into Herne Hill corners and cupboards would be inexplicable but with a plan of the three stories ! The arrangements were half Noah's ark, half Doll's house, but we got them all in : Clotilde, a graceful oval-faced blonde of fifteen ; Cécile, a dark, finely-browed, beautifully-featured girl of thirteen ; Élise, again, fair, round-

faced like an English girl, a treasure of good nature and good sense ; Caroline, a delicately quaint little thing of eleven. They had all been born abroad, Clotilde at Cadiz, and of course convent-bred ; but lately accustomed to be much in society during vacation at Paris. Deeper than any one dreamed, the sight of them in the Champs Élysées had sealed itself in me, for they were the first well-bred and well-dressed girls I had ever seen—or at least spoken to. I mean of course, by well-dressed, perfectly simply dressed, with Parisian cutting and fitting. They were all “bigoted”—as Protestants would say ; quietly firm, as they ought to say—Roman Catholics ; spoke Spanish and French with perfect grace, and English with broken precision ; were all fairly sensible, Clotilde sternly and accurately so, Élise gayly and kindly, Cécile serenely, Caroline keenly. A most curious galaxy, or southern cross, of unconceived stars, floating on a sudden into my obscure firmament of London suburb.

How my parents could allow their young novice to be cast into the fiery furnace of the outer world in this helpless manner the reader may wonder, and only the Fates know ; but there was this excuse for them, that they had never seen me the least interested or anxious about girls—never caring to stay in the promenades at Cheltenham or Bath, or on the parade at Dover ; on the contrary, growling and mewling if I was ever kept there, and off to the sea or the fields the moment I got leave ; and they had educated me in such extremely orthodox English Toryism and Evangelicalism that they could not conceive their scientific, religious, and George the Third revering youth, wavering in his constitutional balance toward French Catholics. And I had never *said* anything about the Champs Élysées ! Virtually convent-bred more closely than the maids themselves, without a single sisterly or cousinly affection for refuge or lightning-rod, and having no athletic skill or pleasure to check my dreaming, I was thrown, bound hand and foot, in my unaccomplished simplicity, into the fiery furnace, or fiery cross, of these four girls,—who of course reduced me to a mere heap of white ashes in four days. Four days, at the most, it took to re-

duce me to ashes, but the Mercredi des cendres lasted four years.

Anything more comic in the externals of it, anything more tragic in the essence, could not have been invented by the skilfullest designer in either kind. In my social behavior and mind I was a curious combination of Mr. Traddles, Mr. Toots, and Mr. Winkle. I had the real fidelity and single-mindedness of Mr. Traddles, with the conversational abilities of Mr. Toots, and the heroic ambition of Mr. Winkle;—all these illuminated by imagination like Mr. Copperfield's, at his first Norwood dinner.

Clotilde (Adèle Clotilde in full, but her sisters called her Clotilde, after the queen-saint, and I Adèle, because it rhymed to shell, spell, and knell) was only made more resplendent by the circlet of her sisters' beauty; while my own shyness and unrepresentableness were farther stiffened, or rather sanded, by a patriotic and Protestant conceit, which was tempered neither by politeness nor sympathy; so that, while in company I sate jealously miserable like a stockfish (in truth, I imagine, looking like nothing so much as a skate in an aquarium trying to get up the glass), on any blessed occasion of tête-à-tête I endeavored to entertain my Spanish-born, Paris-bred, and Catholic-hearted mistress with my own views upon the subjects of the Spanish Armada, the Battle of Waterloo, and the doctrine of Transubstantiation.

To these modes of recommending myself, however, I did not fail to add what display I could make of the talents I supposed myself to possess. I wrote with great pains, and straining of my invention, a story about Naples, (which I had never seen,) and "the Bandit Leoni," whom I represented as typical of what my own sanguinary and adventurous disposition would have been had I been brought up a bandit; and "the Maiden Giuletta," in whom I portrayed all the perfections of my mistress. Our connection with Messrs. Smith & Elder enabled me to get this story printed in *Friendship's Offering*; and Adèle laughed over it in rippling ecstasies of derision, of which I bore the pain bravely, for the sake of seeing her thoroughly amused.

I dared not address any sonnets straight to herself; but when she went back to Paris, wrote her a French letter seven quarto pages long, descriptive of the desolations and solitudes of Herne Hill since her departure. This letter, either Élise or Caroline wrote to tell me she had really read, and “laughed immensely at the French of.” Both Caroline and Élise pitied me a little, and did not like to say she had also laughed at the contents.

The old people, meanwhile, saw little harm in all this. Mr. Domecq, who was extremely good-natured, and a good judge of character, rather liked me, because he saw that I was good-natured also, and had some seedling brains, which would come up in time: in the interests of the business he was perfectly ready to give me any of his daughters I liked, who could also be got to like me, but considered that the time was not come to talk of such things. My father was entirely of the same mind, besides being pleased at my getting a story printed in *Friendship's Offering*, glad that I saw something of girls with good manners, and in hopes that if I wrote poetry about them, it might be as good as the “Hours of Idleness.” My mother, who looked upon the idea of my marrying a Roman Catholic as too monstrous to be possible in the decrees of Heaven, and too preposterous to be even guarded against on earth, was rather annoyed at the whole business, as she would have been if one of her chimneys had begun smoking,—but had not the slightest notion her house was on fire. She saw more, however, than my father, into the depth of the feeling, but did not, in her motherly tenderness, like to grieve me by any serious check to it. She hoped, when the Domecqs went back to Paris, we might see no more of them, and that Adèle's influence and memory would pass away—with next winter's snow.

Under these indulgent circumstances,—bitterly ashamed of the figure I had made, but yet not a whit dashed back out of my daily swelling foam of furious conceit, supported as it was by real depth of feeling, and (note it well, good reader) by a true and glorious sense of the newly revealed miracle of human love, in its exaltation of the physical beauty of the world I

had till then sought by its own light alone,—I set myself in that my seventeenth year, in a state of majestic imbecility, to write a tragedy on a Venetian subject, in which the sorrows of my soul were to be enshrined in immortal verse,—the fair heroine, Bianca, was to be endowed with the perfections of Desdemona and the brightness of Juliet,—and Venice and Love were to be described, as never had been thought of before. I may note in passing, that on my first sight of the Ducal Palace, the year before, I had deliberately announced to my father and mother, and—it seemed to me stupidly incredulous—Mary, that I meant to make such a drawing of the Ducal Palace as never had been made before. This I proceeded to perform by collecting some hasty memoranda on the spot, and finishing my design elaborately out of my head at Treviso. The drawing still exists,—for a wonder, out of perspective, which I had now got too conceited to follow the rules of,—and with the diaper pattern of the red and white marbles represented as a bold panelling in relief. No figure disturbs the solemn tranquillity of the Riva, and the gondolas—each in the shape of a Turkish crescent standing on its back on the water—float about without the aid of gondoliers.

I remember nothing more of that year, 1836, than sitting under the mulberry tree in the back garden, writing my tragedy. I forget whether we went travelling or not, or what I did in the rest of the day. It is all now blank to me, except Venice, Bianca, and looking out over Shooter's Hill, where I could see the last turn of the road to Paris.

Some Greek, though I don't know what, must have been read, and some mathematics, for I certainly knew the difference between a square and cube root when I went to Oxford, and was put by my tutor into Herodotus, out of whom I immediately gathered materials enough to write my Scythian drinking song, in imitation of the "Giaour."

The reflective reader can scarcely but have begun to doubt, by this time, the accuracy of my statement that I took no harm from Byron. But he need not. The particular form of expression which my folly took was indeed directed by him; but this form was the best it could have taken. I got

better practice in English by imitating the "Giaour" and "Bride of Abydos" than I could have had under any other master, (the tragedy was of course Shakespearian!) and the state of my mind was—my mind's own fault, and that of surrounding mischance or mismanagement—not Byron's. In that same year, 1836, I took to reading Shelley also, and wasted much time over the "Sensitive Plant" and "Epipsy-chidion;" and I took a good deal of harm from *him*, in trying to write lines like "prickly and pulpous and blistered and blue;" or "it was a little lawny islet by anemone and violet,—like mosaic paven," etc.; but in the state of frothy fever I was in, there was little good for me to be got out of anything. The perseverance with which I tried to wade through the "Revolt of Islam," and find out (I never did, and don't know to this day) who revolted against whom, or what, was creditable to me; and the "Prometheus" really made me understand something of Æschylus. I am not sure that, for what I was to turn out, my days of ferment could have been got over much easier: at any rate, it was better than if I had been learning to shoot, or hunt, or smoke, or gamble. The entirely inscrutable thing to me, looking back on myself, is my total want of all reason, will, or design in the business: I had neither the resolution to win Adèle, the courage to do without her, the sense to consider what was at last to come of it all, or the grace to think how disagreeable I was making myself at the time to everybody about me. There was really no more capacity nor intelligence in me than in a just fledged owlet, or just open-eyed puppy, disconsolate at the existence of the moon.

Out of my feebly melodious complaints to that luminary, however, I was startled by a letter to my father from Christ Church, advising him that there was room for my residence in the January term of 1837, and that I must come up to matriculate in October of the instant year, 1836.

Strangely enough, my father had never inquired into the nature and manner of matriculation, till he took me up to display in Oxford;—he, very nearly as much a boy as I, for anything we knew of what we were about. He never had

any doubt about putting me at the most fashionable college, and of course my name had been down at Christ Church years before I was called up ; but it had never dawned on my father's mind that there were two, fashionable and unfashionable, orders, or castes, of undergraduate at Christ Church, one of these being called Gentlemen-Commoners, the other Commoners ; and that these last seemed to occupy an almost bisectional point between the Gentlemen-Commoners and the Servitors. All these "invidious" distinctions are now done away with in our Reformed University. Nobody sets up for the special rank of a gentleman, but nobody will be set down as a commoner ; and though, of the old people, anybody will beg or canvass for a place for their children in a charity school, everybody would be furious at the thought of his son's wearing, at college, the gown of a Servitor.

How far I agree with the modern British citizen in these lofty sentiments, my general writings have enough shown ; but I leave the reader to form his own opinions without any contrary comment of mine, on the results of the exploded system of things in my own college life.

My father did not like the word "commoner,"—all the less, because our relationships in general were not uncommon. Also, though himself satisfying his pride enough in being the head of the sherry trade, he felt and saw in his son powers which had not their full scope in the sherry trade. His ideal of my future,—now entirely formed in conviction of my genius,—was that I should enter at college into the best society, take all the prizes every year, and a double first to finish with ; marry Lady Clara Vere de Vere ; write poetry as good as Byron's, only pious ; preach sermons as good as Bossuet's, only Protestant ; be made, at forty, Bishop of Winchester, and at fifty, Primate of England.

With all these hopes, and under all these temptations, my father was yet restrained and embarrassed in no small degree by his old and steady sense of what was becoming to his station in life ; and he consulted anxiously, but honestly, the Dean of Christ Church, (Gaisford,) and my college tutor that was to be, Mr. Walter Brown, whether a person in his posi-

tion might without impropriety enter his son as a gentleman-commoner. I did not hear the dialogues, but the old Dean must have answered with a grunt, that my father had every right to make me a gentleman-commoner if he liked, and could pay the fees; the tutor, more attentively laying before him the conditions of the question, may perhaps have said, with courtesy, that it would be good for the college to have a reading man among the gentlemen-commoners, who, as a rule, were not studiously inclined; but he was compelled also to give my father a hint, that as far as my reading had already gone, it was not altogether certain I could pass the entrance examination which had to be sustained by commoners. This last suggestion was conclusive. It was not to be endured that the boy who had been expected to carry all before him, should get himself jammed in the first turnstile. I was entered as a Gentleman-Commoner without further debate, and remember still, as if it were yesterday, the pride of first walking out of the Angel Hotel, and past University College, holding my father's arm, in my velvet cap and silk gown.

Yes, good reader, the velvet and silk made a difference, not to my mother only, but to me! Quite one of the telling and weighty points in the home debates concerning this choice of Hercules, had been that the commoner's gown was not only of ugly stuff, but had no flowing lines in it, and was virtually only a black rag tied to one's shoulders. One was thrice a gownsman in a flowing gown.

So little, indeed, am I disposed now in maturer years to deride these unphilosophical feelings, that instead of effacing distinction of dress at the University (except for the boating clubs), I would fain have seen them extended into the entire social order of the country. I think that nobody but duchesses should be allowed to wear diamonds; that lords should be known from common people by their stars, a quarter of a mile off; that every peasant girl should boast her county by some dainty ratification of cap or bodice; and that in the towns a vintner should be known from a fishmonger by the cut of his jerkin.

That walk to the Schools, and the waiting, outside the

Divinity School, in comforting admiration of its door, my turn for matriculation, continue still for me, at pleasure. But I remember nothing more that year; nor anything of the first days of the next, until early in January we drove down to Oxford, only my mother and I, by the beautiful Henley road, weary a little as we changed horses for the last stage from Dorchester; solemnized, in spite of velvet and silk, as we entered among the towers in the twilight; and after one more rest under the domestic roof of the Angel, I found myself the next day at evening, alone, by the fireside, entered into command of my own life, in my own college room in Peckwater.

---

## CHAPTER XI.

### CHRIST CHURCH CHOIR.

Alone, by the fireside of the little back-room, which looked into the narrow lane, chiefly then of stabling, I sate collecting my resolution for college life.

I had not much to collect; nor, so far as I knew, much to collect it against. I had about as clear understanding of my whereabouts, or foresight of my fortune, as Davie Gellatley might have had in my place; with these farther inferiorities to Davie, that I could neither dance, sing, nor roast eggs. There was not the slightest fear of my gambling, for I had never touched a card, and looked upon dice as people now do on dynamite. No fear of my being tempted by the strange woman, for was not I in love? and besides, never allowed to be out after half-past nine. No fear of my running in debt, for there were no Turners to be had in Oxford, and I cared for nothing else in the world of material possession. No fear of my breaking my neck out hunting, for I couldn't have ridden a hack down the High Street; and no fear of my ruining myself at a race, for I never had been but at one race in my life, and had not the least wish to win anybody else's money.

I expected some ridicule, indeed, for these my simple ways,

but was safe against ridicule in my conceit: the only thing I doubted myself in, and very rightly, was the power of applying for three years to work in which I took not the slightest interest. I resolved, however, to do my parents and myself as much credit as I could, said my prayers very seriously, and went to bed in good hope.

And here I must stay, for a minute or two, to give some account of the state of mind I had got into during the above-described progress of my education, touching religious matters.

As far as I recollect, the steady Bible reading with my mother ended with our first continental journey, when I was fourteen; one could not read three chapters after breakfast while the horses were at the door. For this lesson was substituted my own private reading of a chapter, morning and evening, and, of course, saying the Lord's Prayer after it, and asking for everything that was nice for myself and my family; after which I waked or slept, without much thought of anything but my earthly affairs, whether by night or day.

It had never entered into my head to doubt a word of the Bible, though I saw well enough already that its words were to be understood otherwise than I had been taught; but the more I believed it, the less it did me any good. It was all very well for Abraham to do what angels bid him,—so would I, if any angels bid me; but none had ever appeared to me that I knew of, not even Adèle, who couldn't be an angel because she was a Roman Catholic.

Also, if I had lived in Christ's time, of course I would have gone with Him up to the mountain, or sailed with Him on the Lake of Galilee; but that was quite another thing from going to Beresford Chapel, Walworth, or St. Bride's, Fleet Street. Also, though I felt myself somehow called to imitate Christian in the "Pilgrim's Progress," I couldn't see that either Billiter Street and the Tower Wharf, where my father had his cellars, or the cherry-blossomed garden at Herne Hill, where my mother potted her flowers, could be places I was bound to fly from as in the City of Destruction. Without much reasoning on the matter, I had virtually concluded

from my general Bible reading that, never having meant or done any harm that I knew of, I could not be in danger of hell : while I saw also that even the *crème de la crème* of religious people seemed to be in no hurry to go to heaven. On the whole, it seemed to me, all that was required of *me* was to say my prayers, go to church, learn my lessons, obey my parents, and enjoy my dinner.

Thus minded, in the slowly granted light of the winter morning I looked out upon the view from my college windows, of Christ Church library and the smooth-gravelled square of Peckwater, vexed a little because I was not in an oriel window looking out on a Gothic chapel : but quite unconscious of the real condemnation I had fallen under, or of the loss that was involved to me in having nothing but Christ Church library, and a gravelled square, to see out of window during the spring-times of two years of youth.

At the moment I felt that, though dull, it was all very grand ; and that the architecture, though Renaissance, was bold, learned, well-proportioned, and variously didactic. In reality, I might just as well have been sent to the dungeon of Chillon, except for the damp ; better, indeed, if I could have seen the three small trees from the window slit, and good groining and pavement, instead of the modern vulgar upholstery of my room furniture.

Even the first sight of college chapel disappointed me, after the large churches abroad ; but its narrow vaults had very different offices.

On the whole, of important places and services for the Christian souls of England, the choir of Christ Church was at that epoch of English history virtually the navel, and seat of life. There remained in it the traditions of Saxon, Norman, Elizabethan, religion unbroken,—the memory of loyalty, the reality of learning, and, in nominal obedience at least, and in the heart of them with true docility, stood every morning, to be animated for the highest duties owed to their country, the noblest of English youth. The greater number of the peers of England, and, as a rule, the best of her squirealty, passed necessarily through Christ Church.

The cathedral itself was an epitome of English history. Every stone, every pane of glass, every panel of woodwork, was true, and of its time,—not an accursed sham of architect's job. The first shrine of St. Frideswide had indeed been destroyed, and her body rent and scattered on the dust by the Puritan ; but her second shrine was still beautiful in its kind,—most lovely English work both of heart and hand. The Norman vaults above were true English Norman ; bad and rude enough, but the best we could do with our own wits, and no French help. The roof was true Tudor,—grotesque, inventively constructive, delicately carved ; it, with the roof of the hall staircase, summing the builder's skill of the fifteenth century. The west window, with its clumsy painting of the Adoration of the Shepherds, a monument of the transition from window to picture which ended in Dutch pictures of the cattle without either shepherds or Christ,—but still, the best men could do of the day ; and the plain final woodwork of the stalls represented still the last art of living England in the form of honest and comfortable carpentry.

In this choir, written so closely and consecutively with indisputable British history, met every morning a congregation representing the best of what Britain had become,—orderly, as the crew of a man-of-war, in the goodly ship of their temple. Every man in his place, according to his rank, age, and learning ; every man of sense or heart there recognizing that he was either fulfilling, or being prepared to fulfil, the gravest duties required of Englishmen. A well-educated foreigner, admitted to that morning service, might have learned and judged more quickly and justly what the country had been, and still had power to be, than by months of stay in court or city. There, in his stall, sat the greatest divine of England,—under his commandant niche, her greatest scholar,—among the tutors the present Dean Liddell, and a man of curious intellectual power and simple virtue, Osborne Gordon. The group of noblemen gave, in the Marquis of Kildare, Earl of Desart, Earl of Emlyn, and Francis Charteris, now Lord Wemyss,—the brightest types of high race and active power. Henry Acland and Charles Newton among the senior under-

graduates, and I among the freshmen, showed, if one had known it, elements of curious possibilities in coming days. None of us then conscious of any need or chance of change, least of all the stern captain, who, with rounded brow and glittering dark eye, led in his old thunderous Latin the responses of the morning prayer.

For all that I saw, and was made to think, in that cathedral choir, I am most thankful to this day.

The influence on me of the next goodliest part of the college buildings,—the hall,—was of a different and curiously mixed character. Had it only been used, as it only ought to have been, for festivity and magnificence,—for the refectory daily, the reception of guests, the delivery of speeches on state occasions, and the like,—the hall, like the cathedral, would have had an entirely salutary and beneficently solemnizing effect on me, hallowing to me my daily bread, or, if our Dean Abbot had condescended sometimes to dine with us, our incidental venison. But with the extremely bad taste (which, to my mind, is our cardinal modern sin, the staple to the hinge of our taste for money, and distaste for money's worth, and every other worthiness)—in that bad taste, I say, the Abbot allowed our Hall to be used for “collections.” The word is wholly abominable to my mind, whether as expressing extorted charities in church, or extracted knowledge in examination. “Collections,” in scholastic sense, meant the college examination at the end of every term, at which the Abbot had always the worse than bad taste to be present as our inquisitor, though he had never once presided at our table as our host. Of course the collective quantity of Greek possessed by all the undergraduate heads in hall, was to *him*, infinitesimal. Scornful at once, and vindictive, thunderous always, more sullen and threatening as the day went on, he stalked with baleful emanation of Gorgonian cold from dais to door, and door to dais, of the majestic torture chamber,—vast as the great council hall of Venice, but degraded now by the mean terrors, swallow-like under its eaves, of doleful creatures who had no counsel in them, except how to hide their crib in time, at each fateful Abbot's transit. Of course *I* never used

a crib, but I believe the Dean would rather I had used fifty, than borne the puzzled and hopeless aspect which I presented toward the afternoon, over whatever I had to do. And as my Latin writing was, I suppose, the worst in the university,—as I never by any chance knew a first from a second future, or, even to the end of my Oxford career, could get into my head where the Pelasgi lived, or where the Heraclidæ returned from,—it may be imagined with what sort of countenance the Dean gave me his first and second fingers to shake at our parting, or with what comfort I met the inquiries of my father and mother as to the extent to which I was, in college opinion, carrying all before me.

As time went on, the aspect of my college hall to me meant little more than the fear and shame of those examination days; but even in the first surprise and sublimity of finding myself dining there, were many reasons for the qualification of my pleasure. The change from our front parlor at Herne Hill, some fifteen feet by eighteen, and meat and pudding with my mother and Mary, to a hall about as big as the nave of Canterbury Cathedral, with its extremity lost in mist, its roof in darkness, and its company, an innumerable, immeasurable vision in vanishing perspective, was in itself more appalling to me than appetizing; but also, from first to last, I had the clownish feeling of having no business there.

In the cathedral, however born or bred, I felt myself present by as good a right as its bishop,—nay, that in some of its lessons and uses, the building was less his than mine. But at table, with this learned and lordly perspective of guests, and state of worldly service, I had nothing to do; my own proper style of dining was for ever, I felt, divided from this—impassably. With baked potatoes under the mutton, just out of the oven, into the little parlor off the shop in Market Street, or beside a gypsy's kettle on Addington Hill (not that I had ever been beside a gypsy's kettle, but often wanted to be); or with an oak-cake and butter—for I was always a gourmand—in a Scotch shepherd's cottage, to be divided with his collie, I was myself, and in my place: but at the gentlemen-commoners' table, in Cardinal Wolsey's dining-room, I was,

in all sorts of ways at once, less than myself, and in all sorts of wrong places at once, out of my place.

I may as well here record a somewhat comic incident, extremely trivial, which took place a little while afterward; and which, in spite of its triviality, farther contributed to diminish in my own mind the charm of Christ Church hall. I had been received as a good-humored and inoffensive little cur, contemptuously, yet kindly, among the dogs of race at the gentlemen-commoners' table; and my tutor, and the men who read in class with me, were beginning to recognize that I had some little gift in reading with good accent, thinking of what I read, and even asking troublesome questions about it, to the extent of being one day eagerly and admiringly congratulated by the whole class the moment we got into quad, on the consummate manner in which I had floored our tutor. I having had no more intention to floor, or consciousness of flooring, the tutor, than a babe unborn! but had only happened, to the exquisite joy of my companions, to ask him something which he didn't happen to know. But, a good while before attaining this degree of public approval, I had made a direct attempt to bring myself into favorable notice, which had been far less successful.

It was an institution of the college that every week the undergraduates should write an essay on a philosophical subject, explicatory of some brief Latin text of Horace, Juvenal, or other accredited and pithy writer; and, I suppose, as a sort of guarantee to the men that what they wrote was really looked at, the essay pronounced the best was read aloud in hall on Saturday afternoon, with enforced attendance of the other undergraduates. Here, at least, was something in which I felt that my little faculties had some scope, and both conscientiously, and with real interest in the task, I wrote my weekly essay with all the sagacity and eloquence I possessed. And therefore, though much flattered, I was not surprised, when, a few weeks after coming up, my tutor announced to me, with a look of approval, that I was to read my essay in hall next Saturday.

Serenely, and on good grounds, confident in my powers of

a crib, but I believe the Dean would rather I had used fifty, than borne the puzzled and hopeless aspect which I presented toward the afternoon, over whatever I had to do. And as my Latin writing was, I suppose, the worst in the university, —as I never by any chance knew a first from a second future, or, even to the end of my Oxford career, could get into my head where the Pelasgi lived, or where the Heraclidæ returned from,—it may be imagined with what sort of countenance the Dean gave me his first and second fingers to shake at our parting, or with what comfort I met the inquiries of my father and mother as to the extent to which I was, in college opinion, carrying all before me.

As time went on, the aspect of my college hall to me meant little more than the fear and shame of those examination days; but even in the first surprise and sublimity of finding myself dining there, were many reasons for the qualification of my pleasure. The change from our front parlor at Herne Hill, some fifteen feet by eighteen, and meat and pudding with my mother and Mary, to a hall about as big as the nave of Canterbury Cathedral, with its extremity lost in mist, its roof in darkness, and its company, an innumerable, immeasurable vision in vanishing perspective, was in itself more appalling to me than appetizing; but also, from first to last, I had the clownish feeling of having no business there.

In the cathedral, however born or bred, I felt myself present by as good a right as its bishop,—nay, that in some of its lessons and uses, the building was less his than mine. But at table, with this learned and lordly perspective of guests, and state of worldly service, I had nothing to do; my own proper style of dining was for ever, I felt, divided from this —impassably. With baked potatoes under the mutton, just out of the oven, into the little parlor off the shop in Market Street, or beside a gypsy's kettle on Addington Hill (not that I had ever been beside a gypsy's kettle, but often wanted to be); or with an oak-cake and butter—for I was always a gourmand—in a Scotch shepherd's cottage, to be divided with his collie, I was myself, and in my place: but at the gentlemen-commoners' table, in Cardinal Wolsey's dining-room, I was,

in all sorts of ways at once, less than myself, and in all sorts of wrong places at once, out of my place.

I may as well here record a somewhat comic incident, extremely trivial, which took place a little while afterward; and which, in spite of its triviality, farther contributed to diminish in my own mind the charm of Christ Church hall. It had been received as a good-humored and inoffensive little burlesque, contemptuously, yet kindly, among the dogs of race at the gentlemen-commoners' table; and my tutor, and the men who read in class with me, were beginning to recognize that I had some little gift in reading with good accent, thinking of what I read, and even asking troublesome questions about it, to the extent of being one day eagerly and admiringly congratulated by the whole class the moment we got into quad, on the consummate manner in which I had floored our tutor. I having had no more intention to floor, or consciousness of flooring, the tutor, than a babe unborn! but had only happened, to the exquisite joy of my companions, to ask him something which he didn't happen to know. But, a good while before attaining this degree of public approval, I had made a direct attempt to bring myself into favorable notice, which had been far less successful.

It was an institution of the college that every week the undergraduates should write an essay on a philosophical subject, explicatory of some brief Latin text of Horace, Juvenal, or other accredited and pithy writer; and, I suppose, as a sort of guarantee to the men that what they wrote was really looked at, the essay pronounced the best was read aloud in hall on Saturday afternoon, with enforced attendance of the other undergraduates. Here, at least, was something in which I felt that my little faculties had some scope, and both conscientiously, and with real interest in the task, I wrote my weekly essay with all the sagacity and eloquence I possessed. And therefore, though much flattered, I was not surprised, when, a few weeks after coming up, my tutor announced to me, with a look of approval, that I was to read my essay in hall next Saturday.

Serenely, and on good grounds, confident in my powers of

reading rightly, and with a decent gravity which I felt to be becoming on this my first occasion of public distinction, I read my essay, I have reason to believe, not ungracefully; and descended from the rostrum to receive—as I doubted not—the thanks of the gentlemen-commoners for this creditable presentment of the wisdom of that body. But poor Clara, after her first ball, receiving her cousin's compliments in the cloak-room, was less surprised than I by my welcome from my cousins at the long-table. Not in envy, truly, but in fiery disdain varied in expression through every form and manner of English language, from the Olympian sarcasm of Charteris to the level-delivered volley of Grimston, they explained to me that I had committed grossest *lèse-majesté* against the order of gentlemen-commoners; that no gentleman-commoner's essay ought ever to contain more than twelve lines, with four words in each; and that even indulging to my folly, and conceit, and want of *savoir-faire*, the impropriety of writing an essay with any meaning in it, like vulgar students,—the thoughtlessness and audacity of writing one that would take at least a quarter of an hour to read, and then reading it all, might for this once be forgiven to such a greenhorn, but that Coventry wasn't the word for the place I should be sent to if ever I did such a thing again. I am happy at least in remembering that I bore my fall from the clouds without much hurt, or even too ridiculous astonishment. I at once admitted the justice of these representations, yet do not remember that I modified the style of my future essays materially in consequence, neither do I remember what line of conduct I had proposed to myself in the event of again obtaining the privilege of edifying the Saturday's congregation. Perhaps my essays really diminished in value, or perhaps even the tutors had enough of them. All I know is, I was never asked to.

I ought to have noticed that the first introductions to the men at my table were made easier by the chance of my having been shut up for two days of storm at the Hospice of the Grimsel, in 1835, with some thirty travellers from various countries, among whom a Christ Church gentleman-commoner, Mr. Strangways, had played chess with me, and been

HOIR.

a little interested in the way I drew grass. He at once acknowledged me in Hall for a fellow-creature ; and the rest of his set, finding they could get a good deal out of me in amusement without my knowing it, set a good deal out not take upon myself to reform their manners and that I did Evangelical, or otherwise impertinent, point of view, and that I did up kindly ; so that, in a fortnight or so, I had fair choice from any what companions I liked, out of the whole college.

Fortunately for me—beyond all words, fortunately—Henry Acland, by about a year and a half my senior, chose *me* ; saw what helpless possibilities were in me, and took me affectionately in hand. His rooms, next the gate on the north side of Canterbury, were within fifty yards of mine, and became to me the only place where I was happy. He quietly showed me the manner of life of English youth of good sense, good family, and enlarged education ; we both of us already lived in elements far external to the college quadrangle. He told me of the plains of Troy ; a year or two afterward I showed him, on his marriage journey, the path up the Montanvert ; and the friendship between us has never changed, but by deepening, to this day.

Of other friends, I had some sensible and many kind ones ; an excellent college tutor ; and later on, for a private one, the entirely right-minded and accomplished scholar already named, Osborne Gordon. At the corner of the great quadrangle lived Dr. Buckland, always ready to help me,—or, a greater favor still, to be helped by me, in diagram drawing for his lectures. My picture of the granite veins in Trewavas Head, with a cutter weathering the point in a squall, in the style of Copley Fielding, still, I believe, forms part of the resources of the geological department. Mr. Parker, then first founding the Architectural Society, and Charles Newton, already notable in his intense and curious way of looking into things, were there to sympathize with me, and to teach me more accurately the study of architecture. Within eight miles were the pictures of Blenheim. In all ways, opportunities, and privileges, it was not conceivable that a youth of my age could have been placed more favorably—if only he had had the wit to know them,

and the will to use the partly irresolute, partly <sup>in.</sup> Alas! there I stood—or tottered—that I can think of <sup>day</sup> idiotic, in the midst of them: nothing the image of me, except among men, or birds, or beasts, quite the the “Duckling <sup>at</sup> poor little Shepherdess Agnes’s picture of Astray.”

I counted it just a little to my credit that I was not ashamed, but pleased, that my mother came to Oxford with me to take such care of me as she could. Through all three years of residence, during term time, she had lodging in the High Street (first in Mr. Adams’s pretty house of sixteenth century woodwork), and my father lived alone all through the week at Herne Hill, parting with wife and son at once for the son’s sake. On the Saturday, he came down to us, and I went with him and mother, in the old domestic way, to St. Peter’s, for the Sunday morning service: otherwise, they never appeared with me in public, lest my companions should laugh at me, or anyone else ask malicious questions concerning vintner papa and his old-fashioned wife.

None of the men, through my whole college career, ever said one word in depreciation of either of them, or in sarcasm at my habitually spending my evenings with my mother. But once, when Adèle’s elder sister came with her husband to see Oxford, and I mentioned, somewhat unnecessarily, at dinner, that she was the Countess Diane de Maison, they had no mercy on me for a month afterward.

The reader will please also note that my mother did not come to Oxford because she could not part with me,—still less, because she distrusted me. She came simply that she might be at hand in case of accident or sudden illness. She had always been my physician as well as my nurse; on several occasions her timely watchfulness had saved me from the most serious danger; nor was her caution now, as will be seen, unjustified by the event. But for the first two years of my college life I caused her no anxiety; and my day was always happier because I could tell her at tea whatever had pleased or profited me in it.

The routine of day is perhaps worth telling. I never missed chapel; and in winter got an hour’s reading before it. Break-

fast at nine,—half-an-hour allowed for it to a second, for Captain Marryat with my roll and butter. College lectures till one. Lunch, with a little talk to anybody who cared to come in, or share their own commons with me. At two, Buckland or other professor's lecture. Walk till five, hall dinner, wine either given or accepted, and quiet chat over it with the reading men, or a frolic with those of my own table; but I always got round to the High Street to my mother's tea at seven, and amused myself till Tom \* rang in, and I got with a run to Canterbury gate, and settled to a steady bit of of final reading till ten. I can't make out more than six hours' real work in the day, but that was constantly and unflinchingly given.

My Herodotean history, at any rate, got well settled down into me, and remains a greatly precious possession to this day. Also my college tutor, Mr. Walter Brown, became somewhat loved by me, and with gentleness encouraged me into some small acquaintance with Greek verbs. My mathematics progressed well under another tutor whom I liked, Mr. Hill; the natural instinct in me for pure geometry being keen, and my grasp of it, as far as I had gone, thorough. At my "little go" in the spring of '38, the diagrams of Euclid being given me, as was customary with the Euclid examination paper, I handed the book back to the examiner, saying scornfully, "I don't want any figures, sir." "You had better take them," replied he, mildly; which I did, as he bid me; but I could then, and can still, dictate blindfold the demonstration of any problem, with any letters, at any of its points. I just scraped through, and no more, with my Latin writing, came creditably off with what else had to be done, and my tutor was satisfied with me,—not enough recognizing that the "little go" had asked, and got out out of me, pretty nearly all I had in me, or was ever likely to have in that kind.

It was extremely unfortunate for me that the two higher lecturers of the college, Kynaston (afterward Master of St.

---

\* I try to do without notes, but for the sake of any not English reader must explain that "Tom" is the name of the great bell of Oxford, in Christ Church western tower.

Originality—passing slightly into grotesqueness, and a little diminishing their effective power. The Doctor had too much humor ever to follow far enough the dull side of a subject. Frank was too fond of his bear-cub to give attention enough to the training of the cubbish element in himself; and a day scarcely passed without Mit's com-mit-ting herself in some manner disapproved by the statelier college demoiselles. But all were frank, kind, and clever, vital in the highest degree; to me, medicinal and saving.

Dr. Buckland was extremely like Sydney Smith in his staple of character; no rival with him in wit, but like him in humor, common sense, and benevolently cheerful doctrine of Divinity. At his breakfast-table I met the leading scientific men of the day, from Herschel downward, and often intelligent and courteous foreigners,—with whom my stutter of French, refined by Adèle into some precision of accent, was sometimes useful. Everyone was at ease and amused at that breakfast-table,—the menu and service of it usually in themselves interesting. I have always regretted a day of unlucky engagement on which I missed a delicate toast of mice; and remembered, with delight, being waited upon one hot summer morning by two graceful and polite little Carolina lizards, who kept off the flies.

I have above noticed the farther and incalculable good it was to me that Acland took me up in my first and foolish days, and with pretty irony and loving insight,—or, rather, sympathy with what was best, and blindness to what was worst in me,—gave me the good of seeing a noble young English life in its purity, sagacity, honor, reckless daring, and happy piety; its English pride shining prettily through all, like a girl's in her beauty. It is extremely interesting to me to contrast the Englishman's silently conscious pride in what he *is*, with the vexed restlessness and wretchedness of the Frenchman, in his thirst for "gloire," to be gained by agonized effort to become something he *is not*.

One day when the Cherwell was running deep over one of its most slippery weirs, question arising between Acland and me whether it were traversable, and I declaring it too

positively to be impassable, Acland instantly took off boot and sock, and walked over and back. He ran no risk but of a sound ducking, being, of course, a strong swimmer : and I suppose him wise enough not to have done it had there been real danger. But he would certainly have run the margin fine, and possessed in its quite highest, and in a certain sense, most laughable degree, the constitutional English serenity in danger, which, with the foolish of us, degenerates into delight in it, but with the wise, whether soldier or physician, is the basis of the most fortunate action and swiftest decision of deliberate skill. When, thirty years afterward, Dr. Acland was wrecked in the steamer Tyne, off the coast of Dorset, the steamer having lain wedged on the rocks all night, —no one knew what rocks,—and the dawn breaking on half a mile of dangerous surf between the ship and shore,—the officers, in anxious debate, the crew, in confusion, the passengers, in hysterics or at prayers, were all astonished, and many scandalized, at the appearance of Dr. Acland from the saloon in punctilious morning dress, with the announcement that “breakfast was ready.” To the impatient clamor of indignation with which his unsympathetic conduct was greeted, he replied by pointing out that not a boat could go on shore, far less come out from it, in that state of the tide, and that in the meantime, as most of them were wet, all cold, and at the best must be dragged ashore through the surf, if not swim for their lives in it, they would be extremely prudent to begin the day, as usual, with breakfast. The hysterics ceased, the confusion calmed, what wits anybody had become available to them again, and not a life was ultimately lost.

In all this playful and proud heroism of his youth, Henry Acland delighted me as a leopard or a falcon would, without in the least affecting my own character by his example. I had been too often adjured and commanded to take care of myself, ever to think of following him over slippery weirs, or accompanying him in pilot boats through white-topped shoal water ; but both in art and science he could pull me on, being years ahead of me, yet glad of my sympathy, for, till I came, he was literally alone in the university in caring for either.

To Dr. Buckland, geology was only the pleasant occupation of his own merry life. To Henry Acland physiology was an entrusted gospel of which he was the solitary and first preacher to the heathen ; and already in his undergraduate's room in Canterbury he was designing—a few years later in his professional room in Tom quad, he was realizing,—the introduction of physiological study which has made the university what she has now become.

Indeed, the curious point in Acland's character was its early completeness. Already in these yet boyish days, his judgment was unerring, his aims determined, his powers developed ; and had he not, as time went on, been bound to the routine of professional work, and satisfied in the serenity, not to say arrested by the interests, of a beautiful home life,—it is no use thinking or saying what he might have been ; those who know him best are the most thankful that he is what he is.

Next to Acland, but with a many-feet-thick wall between, in my æsthetic choice of idols, which required primarily of man or woman that they should be comely, before I regarded any of their farther qualities, came Francis Charteris. I have always held Charteris the most ideal Scotsman, and on the whole the grandest type of European Circassian race hitherto visible to me ; and his subtle, effortless, inevitable, unmalicious sarcasm, and generally sufficient and available sense, gave a constantly natural, and therefore inoffensive, hauteur to his delicate beauty. He could do what he liked with anyone,—at least with anyone of good humor and sympathy ; and when one day, the old sub-dean coming out of Canterbury gate at the instant Charteris was dismounting at it in forbidden pink, and Charteris turned serenely to him, as he took his foot out of the stirrup, to inform him that “ he had been out with the Dean's hounds,” the old man and the boy were both alike pleased.

Charteris never failed in anything, but never troubled himself about anything. Naturally of high ability and activity, he did all he chose with ease,—neither had falls in hunting, nor toil in reading, nor ambition nor anxiety in examination,

—nor disgrace in recklessness of life. He was partly checked, it may be in some measure weakened, by hectic danger in his constitution, possibly the real cause of his never having made his mark in after life.

The Earl of Desart, next to Charteris, interested me most of the men at my table. A youth of the same bright promise, and of kind disposition, he had less natural activity, and less—being Irish,—common sense, than the Scot; and the University made no attempt to give him more. It has been the pride of recent days to equalize the position, and disguise the distinction of noble and servitor. Perhaps it might have been wiser, instead of effacing the distinction, to reverse the manner of it. In those days the happy servitor's tenure of his college-room and revenue depended on his industry, while it was the privilege of the noble to support with lavish gifts the college, from which he expected no return, and to buy with sums equivalent to his dignity the privileges of rejecting alike its instruction and its control. It seems to me singular, and little suggestive of sagacity in the common English character, that it had never occurred to either an old dean, or a young duke, that possibly the Church of England and the House of Peers might hold a different position in the country in years to come if the entrance examination had been made severer for the rich than the poor; and the nobility and good breeding of a student expected to be blazoned consistently by the shield on his seal, the tassel on his cap, the grace of his conduct, and the accuracy of his learning.

In the last respect, indeed, Eton and Harrow boys are for ever distinguished,—whether idle or industrious in after life,—from youth of general England; but how much of the best capacity of her noblesse is lost by her carelessness of their university training, she may soon have more serious cause to calculate than I am willing to foretell.

I have little to record of my admired Irish fellow-student than that he gave the supper at which my freshman's initiation into the body of gentlemen-commoners was to be duly and formally ratified. Curious glances were directed to me under the ordeal of the necessary toasts,—but it had not

occurred to the hospitality of my entertainers that I probably knew as much about wine as they did. When we broke up at the small hours, I helped to carry the son of the head of my college downstairs, and walked across Peckwater to my own rooms, deliberating, as I went, whether there was any immediately practicable trigonometric method of determining whether I was walking straight toward the lamp over the door.

From this time—that is to say, from about the third week after I came into residence—it began to be recognized that, muf' or milksop though I might be, I could hold my own on occasion; and in next term, when I had to return civilities, that I gave good wine, and that of curious quality, without any bush; and saw with good humor the fruit I had sent for from London thrown out of the window to the porter's children; farther, that I could take any quantity of jests, though I could not make one, and could be extremely interested in hearing conversation on topics I knew nothing about,—to that degree that Bob Grimston condescended to take me with him one day to a tavern across Magdalen Bridge, to hear him elucidate from the landlord some points of the horses entered for the Derby, an object only to be properly accomplished by sitting with indifference on a corner of the kitchen table, and carrying on the dialogue with careful pauses, and more by winks than words.

The quieter men of the set were also some of them interested in my drawing; and one or two—Scott Murray, for instance, and Lord Kildare—were as punctual as I in chapel, and had some thoughts concerning college life and its issues, which they were glad to share with me. In this second year of residence, my position in college was thus alike pleasant, and satisfactorily to my parents, eminent: and I was received without demur into the Christ Church society, which had its quiet club-room at the corner of Oriel Lane, looking across to the “beautiful gate” of St. Mary's; and on whose books were entered the names of most of the good men belonging to the upper table and its set, who had passed through Christ Church for the last ten or twelve years.

Under these luxurious, and—in the world's sight—honor-

able, conditions, my mind gradually recovering its tranquillity and spring, and making some daily, though infinitesimal, progress toward the attainment of common sense, I believe that I did harder and better work in my college reading than I can at all remember. It seems to me now as if I had known Thucydides, as I knew Homer (Pope's!), since I could spell; but the fact was, that for a youth who had so little Greek to bless himself with at seventeen, to know every syllable of his Thucydides at half-past eighteen meant some steady sitting at it. The perfect honesty of the Greek soldier, his high breeding, his political insight, and the scorn of construction with which he knotted his meaning into a rhythmic strength that writhed and wrought every way at once, all interested me intensely in him as a writer; while his subject, the central tragedy of all the world, the suicide of Greece, was felt by me with a sympathy in which the best powers of my heart and brain were brought up to their fullest, for my years.

I open, and lay beside me as I write, the perfectly clean and well-preserved third volume of Arnold, over which I spent so much toil, and burnt with such sorrow; my close-written abstracts still dovetailed into its pages; and read with surprised gratitude the editor's final sentence in the preface dated "Fox How, Ambleside, January, 1835."

"Not the wildest extravagance of atheistic wickedness in modern times can go further than the sophists of Greece went before them. Whatever audacity can dare, and subtlety contrive, to make the words 'good' and 'evil' change their meaning, has been already tried in the days of Plato, and by his eloquence, and wisdom, and faith unshaken, put to shame."

---

## CHAPTER XII.

ROSLYN CHAPEL.

I must yet return, before closing the broken record of these first twenty years, to one or two scattered days in 1836, when things happened which led forward into phases of work to be given account of in next volume.

I cannot find the date of my father's buying his first Copley Fielding,—“Between King's House and Inveroran, Argyllshire.” It cost a tremendous sum, for *us*—forty-seven guineas; and the day it came home was a festa, and many a day after, in looking at it, and fancying the hills and the rain were real.

My father and I were in absolute sympathy about Copley Fielding, and I could find it in my heart now to wish I had lived at the Land's End, and never seen any art but Prout's and his. We were very much set up at making his acquaintance, and then very happy in it: the modestest of presidents he was; the simplest of painters, without a vestige of romance, but the purest love of daily sunshine and the constant hills. Fancy him, while Stanfield and Harding and Roberts were grand-touring in Italy, and Sicily, and Styria, and Bohemia, and Illyria, and the Alps, and the Pyrenees, and the Sierra Morena,—Fielding never crossing to Calais, but year after year returning to Saddleback and Ben Venue, or, less ambitious yet, to Sandgate and the Sussex Downs.

The drawings I made in 1835 were really interesting even to artists, and appeared promising enough to my father to justify him in promoting me from Mr. Runciman's tutelage to the higher privileges of art-instruction. Lessons from any of the members of the Water-Color Society cost a guinea, and six were supposed to have efficiency for the production of an adequately skilled water-color amateur. There was, of course, no question by what master they should be given; and I know not whether papa or I most enjoyed the six hours in Newman Street: my father's intense delight in Fielding's work making it a real pleasure to the painter that he should stay chatting while I had my lesson. Nor was my father's talk (if he could be got to talk) unworthy any painter's attention, though he never put out his strength but in writing. I chance in good time on a letter from Northcote in 1830, showing how much value the old painter put on my father's judgment of a piece of literary work which remains classical to this day, and is indeed the best piece of existing criticism founded on the principles of Sir Joshua's school:

“DEAR SIR,—I received your most kind and consoling letter, yet I was very sorry to find you had been so ill, but hope you have now recovered your health. The praise you are so good as to bestow on me and the “Volume of Conversations” gives me more pleasure than perhaps you apprehend, as the book was published against my consent, and, in its first appearance in the magazines, totally without my knowledge. I have done all in my power to prevent its coming before the public, because there are several hard and cruel opinions of persons that I would not have them see in a printed book; besides that, Hazlitt, although a man of real abilities, yet had a desire to give pain to others, and has also frequently exaggerated that which I had said in confidence to him. However, I thank God that this book, which made me tremble at its coming before the world, is received with unexpected fa-

~~on~~

vor ^ to my part, and the approbation of a mind like yours give (*sic*—short for “cannot but give”) me the greatest consolation I can receive, and sets my mind more at ease.

“Please to present my respectful compliments to Mrs. Ruskin, who I hope is well, and kind remembrances to your son.

“I remain always, dear Sir,

“Your most obliged friend \*

“And very humble servant,

“JAMES NORTHCOTE.

“ARGYLL HOUSE, October 13th, 1830.

“To John J. Ruskin, Esq.”

And thus the proposed six lessons in Newman Street ran on into perhaps eight or nine, during which Copley Fielding taught me to wash color smoothly in successive tints, to shade cobalt through pink madder into yellow ochre for skies, to use a broken scraggy touch for the tops of mountains, to

---

\* In memory of the quiet old man who thus honored us with his friendship, and in most true sense of their value, I hope to reprint the parts of the Conversations which I think he would have wished to be preserved.

represent calm lakes by broad strips of shade with lines of light between them (usually at about twice the distance of the lines of this print), to produce dark clouds and rain with twelve or twenty successive washes, and to crumble burnt umber with a dry brush for foliage and foreground. With these instructions, I succeeded in copying a drawing which Fielding made before me, some twelve inches by nine, of Ben Venue and the Trosachs, with brown cows standing in Loch Achray, so much to my own satisfaction that I put my work up over my bed room chimney-piece the last thing at night, and woke to its contemplation in the morning with a rapture, mixed of self-complacency and the sense of new faculty, in which I floated all that day, as in a newly-discovered and strongly buoyant species of air.

In a very little while, however, I found that this great first step did not mean consistent progress at the same pace. I saw that my washes, however careful or multitudinous, did not in the end look as smooth as Fielding's, and that my crumbings of burnt umber became uninteresting after a certain number of repetitions.

With still greater discouragement, I perceived the Fielding processes to be inapplicable to the Alps. My scraggy touches did not to my satisfaction represent aiguilles, nor my ruled lines of shade, the Lake of Geneva. The water-color drawing was abandoned, with a dim undercurrent of feeling that I had no gift for it,—and in truth I had none for color arrangement,—and the pencil outline returned to with resolute energy.

I had never, up to this time, seen a Turner drawing, and scarcely know whether to lay to the score of dulness, or prudence, the tranquillity in which I copied the engravings of the Rogers vignettes, without so much as once asking where the originals were. The facts being that they lay at the bottom of an old drawer in Queen Anne Street, inaccessible to me as the bottom of the sea,—and that, if I had seen them, they would only have destroyed my pleasure in the engravings,—my rest in these was at least fortunate: and the more I consider of this and other such forms of failure in what most people would call laudable curiosity, the more I

am disposed to regard with thankfulness, and even respect, the habits which have remained with me during life, of always working resignedly at the thing under my hand till I could do it, and looking exclusively at the thing before my eyes till I could see it.

On the other hand, the Academy Turners were too far beyond all hope of imitation to disturb me, and the impressions they produced before 1836 were confused; many of them, like the "Quillebœuf," or the "Keelmen heaving in Coals," being of little charm in color; and the "Fountain of Indolence," or "Golden Bough," perhaps seeming to me already fantastic, beside the naturalism of Landseer, and the human interest and intelligible finish of Wilkie.

But in 1836 Turner exhibited three pictures, in which the characteristics of his later manner were developed with his best skill and enthusiasm; "Juliet and her Nurse," "Rome from Mount Aventine," and "Mercury and Argus." His freak in placing Juliet at Venice instead of Verona, and the mysteries of lamp-light and rockets with which he had disguised Venice herself, gave occasion to an article in *Blackwood's Magazine* of sufficiently telling ribaldry, expressing, with some force, and extreme discourtesy, the feelings of the pupils of Sir George Beaumont at the appearance of these unaccredited views of Nature.

The review raised me to the height of "black anger" in which I have remained pretty nearly ever since; and having by that time some confidence in my power of words, and—not merely judgment, but sincere *experience*—of the charm of Turner's work, I wrote an answer to *Blackwood*, of which I wish I could now find any fragment. But my father thought it right to ask Turner's leave for its publication; it was copied in my best hand, and sent to Queen Anne Street, and the old man returned kindly answer, as follows:

"47, QUEEN ANN (*sic*) STREET WEST,

"October 6th, 1836.

"MY DEAR SIR,—I beg to thank you for your zeal, kindness, and the trouble you have taken in my behalf, in regard of the

criticism of *Blackwood's Magazine* for October, respecting my works ; but I never move in these matters, they are of no import save mischief and the meal tub, which Maga fears for by my having invaded the flour tub.

“P.S.—If you wish to have the manuscript back, have the goodness to let me know. If not, with your sanction, I will send it on to the possessor of the picture of Juliet.”

I cannot give the signature of this letter, which has been cut off for some friend ! In later years it used to be, to my father, “Yours most truly,” and to me, “Yours truly.”

The “possessor of the picture” was Mr. Munro of Novar, who never spoke to me of the first chapter of “Modern Painters” thus coming into his hands. Nor did I ever care to ask him about it ; and still, for a year or two longer, I persevered in the study of Turner engravings only, and the use of Copley Fielding’s method for such efforts at color as I made on the vacation journeys during Oxford days.

We made three tours in those summers, without crossing Channel. In 1837, to Yorkshire and the Lakes ; in 1838, to Scotland ; in 1839, to Cornwall.

On the journey of 1837, when I was eighteen, I felt, for the last time, the pure childish love of nature which Wordsworth so idly takes for an intimation of immortality. We went down by the North Road, as usual ; and on the fourth day arrived at Catterick Bridge, where there is a clear pebble-bedded stream, and both west and east some rising of hills, foretelling the moorlands and dells of upland Yorkshire ; and there the feeling came back to me—as it could never return more.

It is a feeling only possible to youth, for all care, regret, or knowledge of evil destroys it ; and it requires also the full sensibility of nerve and blood, the conscious strength of heart, and hope ; not but that I suppose the purity of youth may feel what is best of it even through sickness and the waiting for death ; but only in thinking death itself God’s sending.

In myself, it has always been quite exclusively confined to

*wild*, that is to say, wholly natural places, and especially to scenery animated by streams, or by the sea. The sense of the freedom, spontaneous, unpolluted power of nature was essential in it. I enjoyed a lawn, a garden, a daisied field, a quiet pond, as other children do; but by the side of Wandel, or on the downs of Sandgate, or by a Yorkshire stream under a cliff, I was different from other children, that ever I have noticed; but the feeling cannot be described by any of us that have it. Wordsworth's "haunted me like a passion" is no description of it, for it is not *like*, but *is*, a passion; the point is to define how it *differs* from other passions,—what sort of human, pre-eminently human, feeling it is that loves a stone for a stone's sake, and a cloud for a cloud's. A monkey loves a monkey for a monkey's sake, and a nut for the kernel's, but not a stone for a stone's. I took stones for bread, but not certainly at the Devil's bidding.

I was different, be it once more said, from other children even of my own type, not so much in the actual nature of the feeling, but in the mixture of it. I had, in my little clay pitcher, vialfuls, as it were, of Wordsworth's reverence, Shelley's sensitiveness, Turner's accuracy, all in one. A snowdrop was to me, as to Wordsworth, part of the Sermon on the Mount; but I never should have written sonnets to the celandine, because it is of a coarse yellow, and imperfect form. With Shelley, I loved blue sky and blue eyes, but never in the least confused the heavens with my own poor little Psychidion. And the reverence and passion were alike kept in their places by the constructive Turnerian element; and I did not weary myself in wishing that a daisy could see the beauty of its shadow, but in trying to draw the shadow rightly, myself.

But so stubborn and chemically inalterable the laws of the prescription were, that now, looking back from 1886 to that brook shore of 1837, whence I could see the whole of my youth, I find myself in nothing whatsoever *changed*. Some of me is dead, more of me stronger. I have learned a few things, forgotten many; in the total of me, I am but the same youth, disappointed and rheumatic.

And in illustration of this stubbornness, not by stiffening of the wood with age, but in the structure of the pith, let me insist a minute or two more on the curious joy I felt in 1837 in returning to the haunts of boyhood. No boy could possibly have been more excited than I was by seeing Italy and the Alps; neither boy nor man ever knew better the difference between a Cumberland cottage and Venetian palace, or a Cumberland stream and the Rhone:—my very knowledge of this difference will be found next year expressing itself in the first bit of promising literary work I ever did; but after all the furious excitement and wild joy of the Continent, the coming back to a Yorkshire stream-side felt like returning to heaven. We went on into well-known Cumberland; my father took me up Scawfell and Helvellyn, with a clever Keswick guide, who knew mineralogy, Mr. Wright; and the summer passed beneficently and peacefully.

A little incident which happened, I fancy in the beginning of '38, shows that I had thus recovered some tranquillity and sense, that might at that time have been settled down to simple and healthy life, easily enough, had my parents seen the chance.

I forgot to say, when speaking of Mr. and Mrs. Richard Gray, that, when I was a child my mother had another religious friend, who lived just at the top of Camberwell Grove, or between it and the White Gate,—Mrs. Withers; an extremely amiable and charitable person, with whom my mother organized, I imagine, such schemes of almsgiving as her own housekeeping prevented her seeing to herself. Mr. Withers was a coal-merchant, ultimately not a successful one. Of him I remember only a reddish and rather vacant face; of Mrs. Withers, no material aspect, only the above vague but certain facts; and that she was a familiar element in my mother's life, dying out of it however without much notice or miss, before I was old enough to get any clear notion of her.

In this spring of '38, however, the widowed Mr. Withers, having by that time retired to the rural districts in reduced circumstances, came up to town on some small vestige of carboniferous business, bringing his only daughter with him to

show my mother ;—who, for a wonder, asked her to stay with us, while her father visited his umquwhile clientage at the coal wharves. Charlotte Withers was a frugile, fair, freckled, sensitive slip of a girl about sixteen ; graceful in an unfinished and small wild-flower sort of a way, extremely intelligent, affectionate, wholly right-minded, and mild in piety. An altogether sweet and delicate creature of ordinary sort, not pretty, but quite pleasant to see, especially if her eyes were looking your way, and her mind with them.

We got to like each other in a mildly confidential way in the course of a week. We disputed on the relative dignities of music and painting ; and I wrote an essay nine foolscap pages long, proposing the entire establishment of my own opinions, and the total discomfiture and overthrow of hers, according to my usual manner of paying court to my mistresses. Charlotte Withers, however, thought I did her great honor, and carried away the essay as if it had been a school prize.

And, as I said, if my father and mother had chosen to keep her a month longer, we should have fallen quite melodiously and quietly in love ; and they might have given me an excellently pleasant little wife, and set me up, geology and all, in the coal business, without any resistance or farther trouble on my part. I don't suppose the idea ever occurred to them ; Charlotte was not the kind of person they proposed for me. So Charlotte went away at the week's end, when her father was ready for her. I walked with her to Camberwell Green, and we said good-by, rather sorrowfully, at the corner of the New Road ; and that possibility of meek happiness vanished for ever. A little while afterward, her father "negotiated" a marriage for her with a well-to-do Newcastle trader, whom she took because she was bid. He treated her pretty much as one of his coal sacks, and in a year or two she died.

Very dimly, and rather against my own will, the incident showed me what my mother had once or twice observed to me, to my immense indignation, that Adèle was not the only girl in the world ; and my enjoyment of our tour in the Trosachs was not described in any more Byronian heroics ;

the tragedy also having been given up, because, when I had described a gondola, a bravo, the heroine Bianca, and moonlight on the Grand Canal, I found I had not much more to say.

Scott's country took me at last well out of it all. It is of little use to the reader now to tell him that still at that date the shore of Loch Katrine, at the east extremity of the lake, was exactly as Scott had seen it, and described,

“Onward, amid the copse 'gan peep,  
A narrow inlet, still and deep.”

In literal and lovely truth, that was so:—by the side of the footpath (it was no more) which wound through the Trosachs, deep and calm under the blaeberry bushes, a dark winding, clear-brown pool, not five feet wide at first, reflected the entangled moss of its margin, and arch of branches above, with scarcely a gleam of sky.

That inlet of Loch Katrine was in itself an extremely rare thing; I have never myself seen the like of it in lake shores. A winding recess of deep water, without any entering stream to account for it—possible only, I imagine, among rocks of the quiet abnormal confusion of the Trosachs; and besides the natural sweetness and wonder of it, made sacred by the most beautiful poem that Scotland ever sang by her stream sides. And all that the nineteenth century conceived of wise and right to do with this piece of mountain inheritance, was to thrust the nose of a steamer into it, plank its blaeberries over with a platform, and drive the populace headlong past it as fast as they can scuffle.

It had been well for me if I had climbed Ben Venue and Ben Ledi, hammer in hand, as Scawfell and Helvellyn. But I had given myself some literary work instead, to which I was farther urged by the sight of Roslyn and Melrose.

The idea had come into my head in the summer of '37, and, I imagine, rose immediately out of my sense of the contrast between the cottages of Westmoreland and those of Italy. Anyhow, the November number of Loudon's *Architectural Magazine* for 1837 opens with “Introduction to the Poetry of

Architecture ; or, *The Architecture of the Nations of Europe considered in its Association with Natural Scenery and National Character,*" by Kataphusin. I could not have put in fewer, or more inclusive words, the definition of what half my future life was to be spent in discoursing of ; while the nom-de-plume I chose "*According to Nature,*" was equally expressive of the temper in which I was to discourse alike on that and every other subject. The adoption of a nom-de-plume at all, implied (as also the concealment of name on the first publication of "*Modern Painters*") a sense of a power of judgment in myself, which it would not have been becoming in a youth of eighteen to claim. Had either my father or tutor then said to me, "Write as it is becoming in a youth to write,—let the reader discover what you know, and be persuaded to what you judge," I perhaps might not now have been ashamed of my youth's essays. Had they said to me more sternly, "Hold your tongue till you need not ask the reader's condescension in listening to you," I might perhaps have been satisfied with my work when it was mature.

As it is, these youthful essays, though deformed by assumption, and shallow in contents, are curiously right up to the points they reach ; and already distinguished above most of the literature of the time, for the skill of language which the public at once felt for a pleasant gift in me.

I have above said that had it not been for constant reading of the Bible, I might probably have taken Johnson for my model of English. To a useful extent I have always done so ; in these first essays, partly because I could not help it, partly of set, and well set, purpose.

On our foreign journeys, it being of course desirable to keep the luggage as light as possible, my father had judged that four little volumes of Johnson—the "*Idler*" and the "*Rambler*"—did, under names wholly appropriate to the circumstances, contain more substantial literary nourishment than could be, from any other author, packed into so portable compass. And accordingly, in spare hours, and on wet days, the turns and returns of reiterated "*Rambler*" and iterated "*Idler*" fastened themselves in my ears and mind ; nor was it

possible for me, till long afterward, to quit myself of Johnsonian symmetry and balance in sentences intended, either with swordman's or pavior's blow, to cleave an enemy's crest, or drive down the oaken pile of a principle. I never for an instant compared Johnson to Scott, Pope, Byron, or any of the really great writers whom I loved. But I at once and forever recognized in him a man entirely sincere, and infallibly wise in the view and estimate he gave of the common questions, business, and ways of the world. I valued his sentences not primarily because they were symmetrical, but because they were just, and clear; it is a method of judgment rarely used by the average public, who ask from an author always, in the first place, arguments in favor of their own opinions, in elegant terms; and are just as ready with their applause for a sentence of Macaulay's, which may have no more sense in it than a blot pinched between doubled paper, as to reject one of Johnson's, telling against their own prejudice,—though its symmetry be as of thunder answering from two horizons.

I hold it more than happy that, during those continental journeys, in which the vivid excitement of the greater part of the day left me glad to give spare half-hours to the study of a thoughtful book, Johnson was the one author accessible to me. No other writer could have secured me, as he did, against all chance of being misled by my own sanguine and metaphysical temperament. He taught me carefully to measure life, and distrust fortune; and he secured me, by his adamant common-sense, for ever, from being caught in the cobwebs of German metaphysics, or sloughed in the English drainage of them.

I open, at this moment, the larger of the volumes of the "Idler" to which I owe so much. After turning over a few leaves, I chance on the closing sentence of No. 65, which transcribing, I may show the reader in sum what it taught me,—in words which, writing this account of myself, I conclusively obey.

"Of these learned men, let those who aspire to the same praise imitate the diligence, and avoid the scrupulosity.

Let it be always remembered that life is short, that knowledge is endless, and that many doubts deserve not to be cleared. Let those whom nature and study have qualified to teach mankind, tell us what they have learned while they are yet able to tell it, and trust their reputation only to themselves."

It is impossible for me now to know how far my own honest desire for truth, and compassionate sense of what is instantly helpful to creatures who are every instant perishing, might have brought me, in their own time, to think and judge as Johnson thought and measured,—even had I never learned of him. He at least set me in the straight path from the beginning, and, whatever time I might waste in vain pleasure, or weak effort, he saved me for ever from false thoughts and futile speculations.

Why, I know not, for Mr. Loudon was certainly not tired of me, the *Kataphusin* papers close abruptly, as if their business was at its natural end, without a word of allusion in any part of them, or apology for the want of allusion, to the higher forms of civil and religious architecture. I find, indeed, a casual indication of some ulterior purpose in a ponderous sentence of the paper on the Westmoreland cottage, announcing that "it will be seen hereafter, when we leave the lowly valley for the torn ravine, and the grassy knoll for the ribbed precipice, that if the continental architects cannot adorn the pasture with the humble roof, they can crest the crag with eternal battlements." But this magnificent promise ends in nothing more tremendous than a "chapter on chimneys," illustrated, as I find this morning to my extreme surprise, by a fairly good drawing of the building which is now the principal feature in the view from my study window,—Coniston Hall.

On the whole, however, these papers, written at intervals during 1838, indicate a fairly progressive and rightly consolidated range of thought on these subjects, within the chrysalid torpor of me.

From the Trosachs we drove to Edinburgh: and, somewhere on the road near Linlithgow, my father, reading some

letters got by that day's post, coolly announced to my mother and me that Mr. Domecq was going to bring his four daughters to England again, to finish their schooling at New Hall, near Chelmsford.

And I am unconscious of anything more in that journey, or of anything after it, until I found myself driving down to Chelmsford. My mother had no business of course to take me with her to pay a visit in a convent ; but I suppose felt it would be too cruel to leave me behind. The young ladies were allowed a chat with us in the parlor, and invited (with acceptance) to spend their vacations always at Herne Hill. And so began a second era of that part of my life which is not "worthy of memory," but only of the "Guarda e Passa."

There was some solace during my autumnal studies in thinking that she was really in England, really over *there*,— I could see the sky over Chelmsford from my study window,—and that she was shut up in a convent and couldn't be seen by anybody, or spoken to, but by nuns ; and that perhaps she wouldn't quite like it, and would like to come to Herne Hill again, and bear with me a little.

I wonder mightily now what sort of a creature I should have turned out, if at this time Love had been with me instead of against me ; and instead of the distracting and useless pain, I had had the joy of approved love, and the untellable, incalculable motive of its sympathy and praise.

It seems to me such things are not allowed in this world. The men capable of the highest imaginative passion are always tossed on fiery waves by it : the men who find it smooth water, and not scalding, are of another sort. My father's second clerk, Mr. Ritchie, wrote unfeelingly to his colleague, bachelor Henry, who would not marry for his mother's and sister's sakes, "If you want to know what happiness is, get a wife, and half a dozen children, and come to Margate." But Mr. Ritchie remained all his life nothing more than a portly gentleman with gooseberry eyes, of the Irvingite persuasion.

There must be great happiness in the love-matches of the typical English squire. Yet English squires make their happy lives only a portion for foxes.

Of course, when Adèle and her sisters came back at Christmas, and stayed with us four or five weeks, every feeling and folly that had been subdued or forgotten, returned in redoubled force. I don't know what would have happened if Adèle had been a perfectly beautiful and amiable girl, and had herself in the least liked me. I suppose then my mother would have been overcome. But though extremely lovely at fifteen, Adèle was not prettier than French girls in general at eighteen ; she was firm, and fiery, and high principled ; but, as the light traits already noticed of her enough show, not in the least amiable ; and although she would have married me, had her father wished it, was always glad to have me out of her way. My love was much too high and fantastic to be diminished by her loss of beauty ; but I perfectly well saw and admitted it, having never at any time been in the slightest degree blinded by love, as I perceive other men are, out of my critic nature. And day followed on day, and month to month, of complex absurdity, pain, error, wasted affection, and rewardless semi-virtue, which I am content to sweep out of the way of what better things I can recollect at this time, into the smallest possible size of dust heap, and wish the Dustman Oblivion good clearance of them.

With this one general note, concerning children's conduct to their parents, that a great quantity of external and irksome obedience may be shown them, which virtually is no obedience, because it is not cheerful and total. The *wish* to disobey is already disobedience ; and although at this time I was really doing a great many things I did not like, to please my parents, I have not now *one* self-approving thought or consolation in having done so, so much did its sullenness and maimedness pollute the meagre sacrifice.

But, before I quit, for this time, the field of romance, let me write the epitaph of one of its sweet shadows, which some who knew the shadow may be glad I should write. The ground floor, under my father's counting-house at Billiter Street, I have already said was occupied by Messrs. Wardell & Co. The head of this firm was an extremely intelligent and refined elderly gentleman, darkish, with spiritedly curling

and projecting dark hair, and bright eyes ; good-natured and amiable in a high degree, well educated, not over wise, always well pleased with himself, happy in a sensible wife, and a very beautiful, and entirely gentle and good, only daughter. Not over wise, I repeat, but an excellent man of business ; older and, I suppose, already considerably richer, than my father. He had a handsome house at Hampstead, and spared no pains on his daughter's education.

It must have been some time about this year 1839, or the previous one, that my father having been deploring to Mr. Wardell the discomfortable state of mind I had got into about Adèle, Mr. Wardell proposed to him to try whether some slight diversion of my thoughts might not be effected by a visit to Hampstead. My father's fancy was still set on Lady Clara Vere de Vere ; but Miss Wardell was everything that a girl should be, and an heiress,—of perhaps something more than my own fortune was likely to come to. And the two fathers agreed that nothing could be more fit, rational, and desirable, than such an arrangement. So I was sent to pass a summer afternoon, and dine at Hampstead.

It would have been an extremely delightful afternoon for any youth not a simpleton. Miss Wardell had often enough heard me spoken of by her father as a well-conducted youth, already of some literary reputation—author of the “*Poetry of Architecture*”—winner of the Newdigate,—first class man in expectation. She herself had been brought up in a way closely resembling my own, in severe seclusion by devoted parents, at a suburban villa with a pretty garden, to skip, and gather flowers, in. The chief difference was that, from the first, Miss Wardell had had excellent masters, and was now an extremely accomplished, intelligent, and faultless maid of seventeen ; fragile and delicate to a degree enhancing her beauty with some solemnity of fear, yet in perfect health, as far as a fast-growing girl could be ; a softly moulded, slender brunette, with her father's dark curling hair transfigured into playful grace round the pretty, modest, not unthoughtful, gray-eyed face. Of the afternoon at Hampstead, I remember only that it was a fine day, and that we walked in the garden ;

mamma, as her mere duty to me in politeness at a first visit, superintending,—it would have been wiser to have left us to get on how we could. I very heartily and reverently admired the pretty creature, and would fain have done, or said, anything I could to please her. Literally to *please* her, for that is indeed, my hope with all girls, in spite of what I have above related of my mistaken ways of recommending myself. My primary thought is how to serve *them*, and make them happy, and if they could use me for a plank bridge over a stream, or set me up for a post to tie a swing to, or anything of the sort not requiring me to talk, I should be always quite happy in such promotion. This sincere devotion to them, with intense delight in whatever beauty or grace they chance to have, and in most cases, perceptive sympathy, heightened by faith in their right feelings, for the most part gives me considerable power with girls; but all this prevents me from ever being in the least at ease with them,—and I have no doubt that during the whole afternoon at Hampstead, I gave little pleasure to my companion. For the rest, though I extremely admired Miss Wardell, she was not my sort of beauty. I like oval faces, crystalline blonde, with straightish, at the utmost wavy, (or, in length, wreathed) hair, and the form elastic, and foot firm. Miss Wardell's dark and tender grace had no power over me, except to make me extremely afraid of being tiresome to her. On the whole, I suppose I came off pretty well, for she afterward allowed herself to be brought out to Herne Hill to see the pictures, and so on; and I recollect her looking a little frightenedly pleased at my kneeling down to hold a book for her, or some such matter.

After this second interview, however, my father and mother asking me seriously what I thought of her, and I explaining to them that though I saw all her beauty, and merit, and niceness, she yet was not my sort of girl,—the negotiations went no farther at that time, and a little while after, were ended for all time; for at Hampstead they went on teaching the tender creature High German, and French of Paris, and Kant's "Metaphysics," and Newton's "Principia;" and then they took her to Paris, and tired her out with seeing everything

every day, all day long, besides the dazzle and excitement of such a first outing from Hampstead ; and she at last getting too pale and weak, they brought her back to some English seaside place, I forget where : and there she fell into nervous fever and faded away, with the light of death flickering clearer and clearer in her soft eyes, and never skipped in Hampstead garden more.

How the parents, especially the father, lived on, I never could understand ; but I suppose they were honestly religious without talking of it, and they had nothing to blame themselves in, except not having known better. The father, though with grave lines altering his face for ever, went steadily on with his business, and lived to be old.

I cannot be sure of the date of either Miss Withers' or Miss Wardell's death ; that of Sybilla Dowie (told in "Fors"), more sad than either, was much later ; but the loss of her sweet spirit, following her lover's, had been felt by us before the time of which I am now writing. I had never myself seen Death, nor had any part in the grief or anxiety of a sick chamber ; nor had I ever seen, far less conceived, the misery of unaided poverty. But I had been made to think of it ; and in the deaths of the creatures whom I had seen joyful, the sense of deep pity, not sorrow for myself, but for them, began to mingle with all the thoughts, which, founded on the Homeric, Æschylean, and Shakesperian tragedy, had now begun to modify the untried faith of childhood. The blue of the mountains became deep to me with the purple of mourning,—the clouds that gather round the setting sun, not subdued, but raised in awe as the harmonies of a Miserere,—and all the strength and framework of my mind, lurid, like the vaults of Roslyn, when weird fire gleamed on its pillars, foliage-bound, and far in the depth of twilight, "blazed every rose-carved buttress fair."

### CHAPTER I.

#### OF AGE.

This second volume must, I fear, be less pleasing to the general reader, with whom the first has found more favor than I had hoped,—not because I tire of talking, but that the talk must be less of other persons, and more of myself. For as I look deeper into the mirror, I find myself a more curious person than I had thought. I used to fancy that everybody would like clouds and rocks as well as I did, if once told to look at them ; whereas, after fifty years of trial, I find that is not so, even in modern days ; having long ago known that, in ancient ones, the clouds and mountains, which have been life to me, were mere inconvenience and horror to most of mankind.

I related, in the first volume, page 80, some small part of my pleasures under St. Vincent's rock at Clifton, and the beginning of quartz-study there with the now No. 51 of the Brantwood series. Compare with these childish sentiments, those of the maturely judging John Evelyn, at the same place, 30th June, 1654 :—

“The city” (Bristol) “wholly mercantile, as standing neere the famous Severne, commodiously for Ireland and the Western world. Here I first saw the manner of refining sugar, and casting it into loaves, where we had a collation of eggs

fried in the suggar furnace,\* together with excellent Spanish wine: but what appeared most stupendious to me, was the rock of St. Vincent, a little distance from y<sup>e</sup> towne, the precipice whereoff is equal to anything of that nature I have seen in y<sup>e</sup> most confragose cataracts of the Alpes, the river gliding between them at an extraordinary depth. Here we went searching for diamonds, and to the Hot Wells at its foote. There is also on the side of this horrid Alp a very romantic seate: and so we returned to Bathe in the evening."

Of course Evelyn uses the word "horrid" only in its Latin sense; but his mind is evidently relieved by returning to Bath; and although, farther on, he describes without alarm the towne and county of Nottingham as "seeming to be but one entire rock, as it were," he explains his toleration of that structure in the close of his sentence—"an exceeding pleasant shire, full of gentry." Of his impressions of the "stupendious rocks of Fontainebleau, and ungentle people of the Simplon," I have to speak in another place.

In these and many other such particulars I find the typical English mind, both then and now, so adverse to my own, as also to those of my few companions through the sorrows of this world, that it becomes for me a matter of acute Darwinian interest to trace my species from origin to extinction: and I have, therefore, to warn the reader, and ask his pardon, that while a modest person writes his autobiography chiefly by giving accounts of the people he has met, I find it only possible, within my planned limits, to take note of those who have had distinct power in the training or the pruning of little me to any good.

I return first to my true master in mathematics, poor Mr. Rowbotham. Of course he missed his Herne Hill evenings sadly when I went to Oxford. But always, when we came home, it was understood that once in the fortnight, or so, as he felt himself able, he should still toil up the hill to tea. We

---

\* Note (by Evelyn's editor in 1827): "A kind of entertainment like that we now have of eating beefsteaks drest on the stoker's shovel, and drinking porter at the famous brewhouses in London."

were always sorry to see him at the gate ; but felt that it was our clear small duty to put up with his sighing for an hour or two in such rest as his woful life could find. Nor were we without some real affection for him. His face had a certain grandeur, from its constancy of patience, bewildered innocence, and firm lines of faculty in geometric sort. Also he brought us news from the mathematical and grammatical world, and told us some interesting details of manufacture, if he had been on a visit to his friend Mr. Crawshay. His own home became yearly more wretched, till one day its little ten-years-old Peepy choked himself with his teetotum. The father told us, with real sorrow, the stages of the child's protracted suffering before he died ; but observed, finally, that it was better he should have been taken away,—both for him and his parents. Evidently the poor mathematical mind was relieved from one of its least soluble burdens, and the sad face, that evening, had an expression of more than usual repose.

I never forgot the lesson it taught me of what human life meant in the suburbs of London.

The rigidly moral muse of Mr. Pringle had by this time gone to Africa, or, let us hope, Arabia Felix, in the other world ; and the reins of my poetical genius had been given into the hand of kindly Mr. W. H. Harrison in the Vauxhall Road, of whom account has already been given in the first chapter of "On the Old Road" enough to carry us on for the present.

I must next bring up to time the history of my father's affectionate physician, Dr. Grant. Increasing steadily in reputation, he married a widowed lady, Mrs. Sidney, of good position in Richmond ; and became the guardian of her two extremely nice and clever daughters, Augusta and Emma, who both felt great respect, and soon great regard, for their step-father, and were every day more dutiful and pleasing children to him. Estimating my mother's character also as they ought, later on, they were familiar visitors to us ; the younger, Emma, having good taste for drawing, and other quiet accomplishments and pursuits. At the time I am now look-

ing back to, however, the Star and Garter breakfasts had become rarer, and were connected mostly with visits to Hampton Court, where the great vine, and the maze, were of thrilling attraction to me; and the Cartoons began to take the aspect of mild nightmare and nuisance which they have ever since retained.

My runs with cousin Mary in the maze, (once, as in Dantesque alleys of lucent verdure in the Moon, with Adèle and Élise), always had something of an enchanted and Faery-Queen glamor in them: and I went on designing more and more complicated mazes in the blank leaves of my lesson books—wasting, I suppose, nearly as much time that way as in the trisection of the angle. Howbeit, afterward, the coins of Cnossus, and characters of Dædalus, Theseus, and the Minotaur, became intelligible to me as to few: and I have much unprinted MSS. about them, intended for expansion in “Ariadne Florentina,” and other labyrinthine volumes, but which the world must get on now without the benefit of, as it can.

Meantime, from the Grove, white-haired mamma Monro, and silvery-fringed Petite, had gone to their rest. Mrs. Gray cared no longer for the pride of her house, or shade of her avenue; while more and more, Mr. Gray’s devotion to “Don Quixote,” and to my poetry in “Friendships Offering” interfered with his business habits. At last it was thought that, being true Scots both of them, they might better prosper over the Border. They went to Glasgow, where Mr. Gray took up some sort of a wine business, and read “Rob Roy” instead of “Don Quixote.” We went to Glasgow to see them, on our Scottish tour, and sorrowfully perceived them to be going downward, even in their Scottish world. For a little change, they were asked to Oxford that autumn, to see their spoiled Johnnie carrying all before him: and the good couple being seated in Christ Church Cathedral under the organ, and seeing me walk in with my companions in our silken sleeves, and with accompanying flourishes by Mr. Marshall on the trumpet stop, and Rembrandtesque effects of candlelight upon the Norman columns, were both of them melted into

tears ; and remained speechless with reverent delight all the evening afterward.

I have left too long without word the continual benevolence toward us of the family at Widmore, Mr. Telford and his three sisters ; the latter absolutely well-educated women—wise, without either severity or ostentation, using all they knew for the good of their neighbors, and exhibiting in their own lives every joy of sisterly love and active homeliness. Mr. Henry Telford's perfectly quiet, slightly melancholy, exquisitely sensitive face, browned by continual riding from Bromley to Billiter Street, remains with me, among the most precious of the pictures which, unseen of any guest, hang on the walls of my refectory.

Mr. and Mrs. Robert Cockburn, as the years drew on, became more and more kindly, but less and less approvingly, interested in our monastic ways at Herne Hill ; and in my partly thwarted and uncomfortable, partly singular, development of literary character. Mrs. Cockburn took earnest pains with my mother to get her to send me more into society, that I might be licked a little into shape. But my mother was satisfied with me as I was : and besides, Mrs. Cockburn and she never got quite well on together. My mother, according to her established manner, would no more dine with her than with anyone else, and was even careless in returning calls ; and Mrs. Cockburn—which was wonderful in a woman of so much sense—instead of being merely sorry for my mother's shyness, and trying to efface her sense of inferiority in education and position, took this somewhat in pique. But among the fateful chances of my own life in her endeavors to do something for me, and somehow break the shell of me, she one day asked me to dine with Lockhart, and see his little harebell-like daintiness of a daughter. I suppose Mrs. Cockburn must have told him of my love of Scott, yet I do not remember manifesting that sentiment in any wise during dinner : I recollect only, over the wine, making some small effort to display my Oxonian orthodoxy and sound learning, with respect to the principles of Church Establishment, and being surprised, and somewhat discomfited, by finding that

Mr. Lockhart knew the Greek for "bishop" and "elder" as well as I did. On going into the drawing-room, however, I made every effort to ingratiate myself with the little dark-eyed, high-foreheaded Charlotte, and was very sorry,—but I don't think the child was,—when she was sent to bed.

But the most happy turn of Fortune's wheel for me, in this year '39, was the coming of Osborne Gordon to Herne Hill to be my private tutor, and read with me in our little nursery. Taking up the ravelled ends of yet workable and spinnable flax in me, he began to twist them, at first through much wholesome pain, into such tenor as they were really capable of.

The first thing he did was to stop all pressure in reading. His inaugural sentence was, "When you have got too much to do, don't do it,"—a golden saying which I have often repeated since, but not enough obeyed.

To Gordon himself, his own proverb was less serviceable. He was a man of quite exceptional power, and there is no saying what he might have done, with any strong motive. Very early, a keen, though entirely benevolent, sense of the absurdity of the world took away his heart in working for it:—perhaps I should rather have said, the density and unmal-leability of the world, than absurdity. He thought there was nothing to be done with it, and that after all it would get on by itself. Chiefly, that autumn, in our walks over the Nor-wood hills, he, being then an ordained, or on the point of being ordained, priest, surprised me greatly by avoiding, evidently with the sense of its being useless bother, my favorite topic of conversation, namely, the torpor of the Protestant churches, and their duty, as it to me appeared, before any thought of missionary work, out of Europe, or comfortable settling to pastoral work at home, to trample finally out the smouldering "diabolic fire" of the Papacy, in all Papal-Catholic lands. For I was then by training, thinking, and the teaching of such small experience as I had, as zealous, pugnacious, and self-sure a Protestant as you please. The first condition of my being so was, of course, total ignorance of Christian history; the second,—one for

which the Roman Church is indeed guiltily responsible,—that all the Catholic Cantons of Switzerland, counting Savoy also as a main point of Alpine territory, are idle and dirty, and all Protestant ones busy and clean—a most impressive fact to my evangelical mother, whose first duty and first luxury of life consisted in purity of person and surroundings; while she and my father alike looked on idleness as indisputably Satanic. They failed not, therefore, to look carefully on the map for the bridge, or gate, or vale, or ridge, which marked the separation of Protestant from the benighted Catholic cantons; and it was rare if the first or second field and cottage, beyond the border, did not too clearly justify their exulting,—though also indignant and partly sorrowful,—enforcement upon me of the natural consequences of Popery.

The third reason for my strength of feeling at this time was a curious one. In proportion to the delight I felt in the ceremonial of foreign churches, was my conviction of the falseness of religious sentiment founded on these enjoyments. I had no foolish scorn of them, as the proper expressions of the Catholic Faith; but infinite scorn of the lascivious sensibility which could change its beliefs because it delighted in these, and be “piped into a new creed by the whine of an organ pipe.” So that alike my reason, and romantic pleasure, on the Continent, combined to make a better Protestant of me;—yet not a malicious nor ungenerous one. I never suspected Catholic priests of dishonesty, nor doubted the purity of the former Catholic Church. I was a Protestant Cavalier, not Protestant Roundhead,—entirely desirous of keeping all that was noble and traditional in religious ritual, and reverent to the existing piety of the Catholic peasantry. So that the “diabolic fire” which I wanted trampled out, was only the corrupt Catholicism which rendered the vice of Paris and the dirt of Savoy possible; and which I was quite right in thinking it the duty of every Christian priest to attack, and end the schism and scandal of it.

Osborne, on the contrary, was a practical Englishman, of the shrewdest, yet gentlest type; keenly perceptive of folly,

but disposed to pardon most human failings as little more. His ambition was restricted to the walls of Christ Church ; he was already the chiefly trusted aid of the old Dean ; probably, next to him, the best Greek scholar in Oxford, and perfectly practised in all the college routine of business. He thought that the Church of England had—even in Oxford—enough to do in looking after her own faults ; and addressed himself, in our conversations on Forest Hill, mainly to mollify my Protestant animosities, enlarge my small acquaintance with ecclesiastical history, and recall my attention to the immediate business in hand, of enjoying our walk, and recollecting what we had read in the morning.

In his proper work with me, no tutor could have been more diligent or patient. His own scholarly power was of the highest order ; his memory (the necessary instrument of great scholarship) errorless and effortless ; his judgment and feeling in literature sound ; his interpretation of political events always rational, and founded on wide detail of well-balanced knowledge ; and all this without in the least priding himself on his classic power, or wishing to check any of my impulses in other directions. He had taken his double first with the half of his strength, and would have taken a triple one without priding himself on it : he was amused by my facility in rhyming, recognized my true instinct in painting, and sympathized with me in love of country life and picturesque towns, but always in a quieting and reposeful manner. Once in after life, provoked at finding myself still unable to read Greek easily, I intimated to him a half-formed purpose to throw everything else aside, for a time, and make myself a sound Greek scholar. "I think it would give you more trouble than it is worth," said he. Another time, as I was making the drawing of "Chamouni in Afternoon Sunshine" for him, (now at his sister's,) I spoke of the constant vexation I suffered because I could not draw better. "And I," he said, simply, "should be very content if I could draw at all."

During Gordon's stay with us, this 1839 autumn, we got our second Turner drawing. Certainly the most curious

failure of memory—among the many I find—is that I don't know when I *saw* my first! I feel as if Mr. Windus's parlor at Tottenham had been familiar to me since the dawn of existence in Brunswick Square.

Mr. Godfrey Windus was a retired coachmaker, living in a cheerful little villa, with low rooms on the ground floor opening pleasantly into each other, like a sort of grouped conservatory, between his front and back gardens: their walls beset, but not crowded, with Turner drawings of the England series; while in his portfolio-stands, coming there straight from the publishers of the books they illustrated, were the entire series of the illustrations to Scott, to Byron, to the South Coast, and to Finden's Bible.

Nobody, in all England, at that time,—and Turner was already sixty,—*cared*, in the true sense of the word, for Turner, but the retired coachmaker of Tottenham, and I.

Nor, indeed, could the public ever see the drawings, so as to begin to care for them. Mr. Fawkes's were shut up at Farnley, Sir Peregrine Acland's, perishing of damp in his passages, and Mr. Windus bought all that were made for engravers as soon as the engraver had done with them. The advantage, however, of seeing them all collected at his house,—he gave an open day each week, and to me the run of his rooms at any time,—was, to the general student, inestimable, and, for me, the means of writing “Modern Painters.”

It is, I think, noteworthy that, although first attracted to Turner by the mountain truth in Rogers's “Italy,”—when I saw the drawings, it was almost wholly the pure artistic quality that fascinated me, whatever the subject; so that I was not in the least hindered by the beauty of Mr. Windus's “Llanberis” or “Melrose” from being quite happy when my father at last gave me, not for a beginning of Turner collection, but for a specimen of Turner's work, which was all—as it was supposed—I should ever need or aspire to possess, the “Richmond Bridge, Surrey.”

The triumphant talk between us over it, when we brought it home, consisted, as I remember, greatly in commendation of the quantity of Turnerian subject and character which this

single specimen united:—"it had trees, architecture, water, a lovely sky, and a clustered bouquet of brilliant figures."

And verily the Surrey "Richmond" remained for at least two years our only Turner possession, and the second we bought, the "Gosport," which came home when Gordon was staying with us, had still none of the delicate beauty of Turner except in its sky; nor were either my father or I the least offended by the ill-made bonnets of the lady-passengers in the cutter, nor by the helmsman's head being put on the wrong way.

The reader is not to think, because I speak thus frankly of Turner's faults, that I judge them greater, or know them better, now, than I did then. I knew them at this time of getting "Richmond" and "Gosport" just as well as other people; but knew also the power shown through these faults, to a degree quite wonderful for a boy;—it being my chief recreation, after Greek or trigonometry in the nursery-study, to go down and feast on my "Gosport."

And so, after Christmas, I went back to Oxford for the last push, in January, 1840, and did very steady work with Gordon, in St. Aldate's;\* the sense that I was coming of age somewhat increasing the feeling of responsibility for one's time. On my twenty-first birthday my father brought me for a present the drawing of "Winchelsea,"—a curious choice, and an unlucky one. The thunderous sky and broken white light of storm round the distant gate and scarcely visible church, were but too true symbols of the time that was coming upon us; but neither he nor I were given to reading omens, or dreading them. I suppose he had been struck by the power of the drawing, and he always liked soldiers. I was disappointed, and saw for the first time clearly that my father's joy in Rubens and Sir Joshua could never become sentient of Turner's microscopic touch. But I was entirely grateful for his purpose,

---

\* The street, named from its parish church, going down past Christ Church to the river. It was the regular course of a gentleman commoner's residence to be promoted from Peckwater to Tom Quad, and turned out into the street for his last term. I have no notion at this minute who St. Aldate was;—American visitors may be advised that in Oxford it will be expected of them to call him, St. Old.

and very thankful to have any new Turner drawing whatsoever; and as at home the "Gosport," so in St. Aldate's the "Winchelsea," was the chief recreation of my fatigued hours.

This Turner gift, however, was only complimentary. The same day my father transferred into my name in the stocks as much as would bring in at least £200 a year, and watched with some anxiety the use I should make of this first command of money. Not that I had ever been under definite restriction about it: at Oxford I ran what accounts with the tradesmen I liked, and the bills were sent in to my mother weekly; there was never any difficulty or demur on either side, and there was nothing out of the common way in Oxford I wanted to buy, except the engraving of Turner's "Grand Canal," for my room wall,—and "Monsieur Jabot," the first I ever saw of Topffer's rivalless caricatures, one day when I had a headache. For anything on which my state or comfort in the least depended, my father was more disposed to be extravagant than I; but he had always the most curious suspicion of my taste for minerals, and only the year before, in the summer term, was entirely vexed and discomfited at my giving eleven shillings for a piece of Cornish chalcedony. That I never thought of buying a mineral without telling him what I had paid for it, besides advising him duly of the fact, curiously marks the intimate confidence between us: but alas, my respect for his judgment was at this time by these littlenesses gradually diminished; and my confidence in my own painfully manifested to him a very little while after he had permitted me the above-stated measure of independence. The Turner drawings hitherto bought,—"Richmond," "Gosport," "Winchelsea,"—were all supplied by Mr. Griffith, an agent in whom Turner had perfect confidence, and my father none. Both were fatally wrong. Had Turner dealt straight with my father, there is no saying how much happiness might have come of it for all three of us; had my father not been always afraid of being taken in by Mr. Griffith, he might at that time have bought some of the loveliest drawings that Turner ever made, at entirely fair prices. But Mr. Griffith's art-salesmanship entirely offended my father from the first, and the best drawings were always

let pass, because Mr. Griffith recommended them, while "Winchelsea" and "Gosport" were both bought—among other reasons—because Mr. Griffith said they were not drawings which we ought to have!

Among those of purest quality in his folios at this time was one I especially coveted, the "Harlech." There had been a good deal of dealers' yea and nay about it, whether it was for sale or not; it was a smaller drawing than most of the England and Wales series, and there were many hints in the market about its being iniquitous in price. The private view day of the Old Water Color came; and, arm in arm with my father, I met Mr. Griffith in the crowd. After the proper five minutes of how we liked the exhibition, he turned specially to me. "I have some good news for you, the Harlech is really for sale." "I'll take it then," I replied, without so much as a glance at my father, and without asking the price. Smiling a little ironically, Mr. Griffith went on, "And—seventy,"—implying that seventy was a low price, at once told me in answer to my confidence. But it was thirty above the "Winchelsea," twenty-four above "Gosport," and my father was of course suré that Mr. Griffith had put twenty pounds on at the instant.

The mingled grief and scorn on his face told me what I had done; but I was too happy on pouncing on my "Harlech" to feel for him. All sorts of blindness and error on both sides, but, on his side, inevitable,—on mine, more foolish than culpable; fatal every way, beyond words.

I can scarcely understand my eagerness and delight in getting the "Harlech" at this time, because, during the winter, negotiations had been carried on in Paris for Adèle's marriage; and it does not seem as if I had been really so much crushed by that event as I expected to be. There are expressions, however, in the foolish diaries I began to write, soon after, of general disdain of life, and all that it could in future bestow on me, which seem inconsistent with extreme satisfaction in getting a water-color drawing, sixteen inches by nine. But whatever germs of better things remained in me, were then all centred in this love of Turner. It was not a

piece of painted paper, but a Welsh castle and village, and Snowdon in blue cloud, that I bought for my seventy pounds. This must have been in the Easter holidays ;—“ Harlech ” was brought home and safely installed in the drawing-room on the other side of the fireplace from my idol-niche : and I went triumphantly back to St. Aldate’s and “ Winchelsea.”

In spite of Gordon’s wholesome moderatorship, the work had come by that time to high pressure, until twelve at night from six in the morning, with little exercise, no cheerfulness, and no sense of any use in what I read, to myself or anybody else : things progressing also smoothly in Paris, to the abyss. One evening, after Gordon had left me, about ten o’clock, a short tickling cough surprised me, because preceded by a curious sensation in the throat, and followed by a curious taste in the mouth, which I presently perceived to be that of blood. It must have been on a Saturday or Sunday evening, for my father, as well as my mother, was in the High Street lodgings. I walked round to them and told them what had happened.

My mother, an entirely skilled physician in all forms of consumptive disease, was not frightened, but sent round to the Deanery to ask leave for me to sleep out of my lodgings. Morning consultations ended in our going up to town, and town consultations in my being forbid any farther reading under pressure, and in the Dean’s giving me, with many growls, permission to put off taking my degree for a year. During the month or two following, passed at Herne Hill, my father’s disappointment at the end of his hopes of my obtaining distinction in Oxford was sorrowfully silenced by his anxiety for my life. Once or twice the short cough and mouth-taste—it was no more—of blood, returned ; but my mother steadily maintained there was nothing serious the matter, and that I only wanted rest and fresh air. The doctors, almost unanimously,—Sir James Clarke excepted,—gave gloomier views. Sir James cheerfully, but decidedly, ordered me abroad before autumn, to be as much in open carriages as possible, and to winter in Italy.

And Mr. Telford consented to sit in the counting-house, and the clerks promised to be diligent ; and my father, to

whom the business was nothing, but for me, left his desk, and all other cares of life, but that of nursing me.

Of his own feelings, he said little; mine, in the sickly fermentation of temper I was in, were little deserving of utterance, describable indeed less as feelings than as the want of them, in all wholesome directions but one;—magnetic pointing to all presence of natural beauty, and to the poles of such art and science as interpreted it. My preparations for the journey were made with some renewal of spirit; my mother was steadily, bravely, habitually cheerful; while my father, capable to the utmost of every wise enjoyment in travelling, and most of all, of that in lovely landscape, had some personal joy in the thought of seeing South Italy. The attacks of the throat cough seemed to have ceased, and the line of our journey began to be planned with some of the old exultation.

That we might not go through Paris, the route was arranged by Rouen and the Loire to Tours, then across France by Auvergne, and down the Rhone to Avignon; thence, by the Riviera and Florence, to the South.

“And is there to be no more Oxford?” asks Froude, a little reproachfully, in a recent letter concerning these memoranda; for he was at Oriel while I was at Christ Church, and does not think I have given an exhaustive view either of the studies or manners of the University in our day.

No, dear friend. I have no space in this story to describe the advantages I never used; nor does my own failure give me right to blame, even were there any use in blaming, a system now passed away. Oxford taught me as much Greek and Latin as she could; and though I think she might also have told me that fritillaries grew in Iffley meadow, it was better that she left me to find them for myself, than that she should have told me, as nowadays she would, that the painting on them was only to amuse the midges. For the rest, the whole time I was there, my mind was simply in the state of a squash before 'tis a peascod,—and remained so yet a year or two afterward, I grieve to say;—so that for any account of my real life, the gossip hitherto given to its codling or cocoon condition has brought us but a little way. I must get on

to the days of opening sight, and effective labor ; and to the scenes of nobler education which all men, who keep their hearts open, receive in the End of Days.

---

## CHAPTER II.

### ROME.

However dearly bought, the permission to cease reading, and put what strength was left into my sketching again, gave healthy stimulus to all faculties which had been latently progressive in me ; and the sketch-books and rulers were prepared for this journey on hitherto unexampled stateliness of system.

It had chanced, in the spring of the year, that David Roberts had brought home and exhibited his sketches in Egypt and the Holy Land. They were the first studies ever made conscientiously by an English painter, not to exhibit his own skill, or make capital out of his subjects, but to give true portraiture of scenes of historical and religious interest. They were faithful and laborious beyond any outlines from nature I had ever seen, and I felt also that their severely restricted method was within reach of my own skill, and applicable to all my own purposes.

With Roberts's deficiencies or mannerism I have here no concern. He taught me, of absolute good, the use of the fine point instead of the blunt one ; attention and indefatigable correctness in detail ; and the simplest means of expressing ordinary light and shade on gray ground, flat wash for the full shadows, and heightening of the gradated lights by warm white.

I tried these adopted principles first in the courtyard of the Château de Blois : and came in to papa and mamma declaring that "Prout would give his ears to make such a drawing as that."

With some truth and modesty, I might have said he "would have changed eyes with me ;" for Prout's manner was grave-

ly restricted by his nearness of sight. But also this Blois sketch showed some dawning notions of grace in proportion, and largeness of effect, which enabled me for the first time that year, to render continental subjects with just expression of their character and scale, and well-rounded solidification of pillars and sculpture.

The last days of the summer were well spent at Amboise, Tours, Aubusson, Pont Gibaud, and Le Puy; but as we emerged into the Rhone valley, autumn broke angrily on us; and the journey by Valence to Avignon was all made gloomy by the ravage of a just past inundation, of which the main mass at Montelimar had risen from six to eight feet in the streets, and the slime remained, instead of fields, over—I forget in fact, and can scarcely venture to conceive,—what extent of plain. The Rhone, through these vast gravelly levels a mere driving weight of discolored water;—the Alps, on the other side, now in late autumn snowless up to their lower peaks, and showing few eminent ones;—the bise, now first letting one feel what malignant wind could be,—might, perhaps, all be more depressing to me in my then state of temper; but I have never cared to see the lower Rhone any more; and to my love of cottage rather than castle, added at this time another strong moral principle, that if ever one was metamorphosed into a river, and could choose one's own size, it would be out of all doubt more prudent and delightful to be Tees or Wharfe than Rhone.

And then, for the first time, at Frejus, and on the Esterelle and the Western Riviera, I saw some initial letters of Italy, as distinct from Lombardy,—Italy of the stone pine and orange and palm, white villa and blue sea; and saw it with right judgment, as a wreck, and a viciously neglected one.

I don't think the reader has yet been informed that I inherited to the full my mother's love of tidiness and cleanliness; so that quite one of the most poetical charms of Switzerland to me, next to her white snows, was her white sleeves. Also I had my father's love of solidity and soundness,—of unveneered, unrouged, and well finished things; and here on the Riviera there were lemons and palms, yes,—but the lemons

pale, and mostly skin ; the palms not much larger than parasols ; the sea—blue, yes, but its beach nasty ; the buildings, pompous, luxurious, painted like Grimaldi,—usually broken down at the ends, and in the middle, having sham architraves daubed over windows with no glass in them ; the rocks shaly and ragged, the people filthy : and over everything, a coat of plaster dust.

I was in a bad humor? Yes, but everything I have described is as I say, for all that ; and though the last time I was at Sestri I wanted to stay there, the ladies with me wouldn't and couldn't, because of the filth of the inn ; and the last time I was at Genoa, 1882, my walk round the ramparts was only to study what uglinesses of plants liked to grow in dust, and crawl, like the lizards, into clefts of ruin.

At Genoa I saw then for the first time the circular *Pieta* by Michael Angelo, which was my initiation in all Italian art. For at this time I understood no jot of Italian painting, but only Rubens, Vandyke, and Velasquez. At Genoa, I did not even hunt down the Vandykes, but went into the confused frontage of the city at its port, (no traversing blank quay blocking out the sea, then,) and drew the crescent of houses round the harbor, borne on their ancient arches;—a noble subject, and one of the best sketches I ever made.

From Genoa, more happy journey by the Eastern Riviera began to restore my spring of heart. I am just in time, in writing these memories, to catch the vision of the crossing *Magra*, in old time, and some of the other mountain streams of the two *Rivieras*.

It seems unbelievable to myself, as I set it down, but there were then only narrow mule bridges over the greater streams on either side of which were grouped the villages, where the river slackened behind its sea bar. Of course, in the large towns, Albenga, Savona, Ventimiglia, and so on, there were proper bridges ; but at the intermediate hamlets (and the torrents round whose embouchures they grew were often formidable), the country people trusted to the slack of the water at the bar, and its frequent failure altogether in summer, for traverse of their own carriages : and had neither mind nor

means to build Waterloo bridges for the convenience of English carriages and four. The English carriage got across the shingle how it could ; the boys of the village, if the horses could not pull it through, harnessed themselves in front ; and in windy weather, with deep water on the inside of the bar, and blue breakers on the other, one really began sometimes to think of the slackening wheels of Pharaoh.

It chanced that there were two days of rain as we passed the Western Riviera ; there was a hot night at Albenga before they came on, and my father wrote—which was extremely wrong of him—a parody of “ Woe is me, Alhama,” the refrain being instead, “ Woe is me, Albenga ;” the Moorish minarets of the old town and its Saracen legends, I suppose, having brought “ the Moorish King rode up and down ” into his head. Then the rain, with wild sirocco, came on ; and somewhere near Savona there was a pause at the brink of one of the streams, in rather angry flood, and some question if the carriage could get through. Loaded, it could not, and everybody was ordered to get out and be carried across, the carriage to follow, in such shifts as it might. Everybody obeyed these orders, and submitted to the national customs with great hilarity, except my mother, who absolutely refused to be carried in the arms of an Italian ragged opera hero, more or less resembling the figures whom she had seen carrying off into the mountains the terrified Taglioni, or Cerito. Out of the carriage she would not move, on any solicitation ; —if they could pull the carriage through, they could pull her too, she said. My father was alike alarmed and angry, but as the surrounding opera corps de ballet seemed to look on the whole thing rather as a jest and an occasion for bajocco gathering, than any crisis of fate, my mother had her way ; a good team of bare-legged youngsters was put to, and she and the carriage entered the stream with shouting. Two-thirds through, the sand was soft, and horses and boys stopped to breathe. There was another, and really now serious, remonstrance with my mother, we being all nervous about quicksands, as if it had been the middle of Lancaster Bay. But stir she would not ; the horses got their wind again, and the

boys their way, and with much whip cracking and splashing, carriage and dama Inglese were victoriously dragged to dry land, with general promotion of good will between the two nations.

Of the passage of Magra, a day or two afterward, my memory is vague as its own waves. There were all sorts of paths across the tract of troubled shingle, and I was thinking of the Carrara mountains beyond, all the while. Most of the streams fordable easily enough; a plank or two, loosely propped with a heap of stones, for pier and buttress, replaced after every storm, served the foot-passenger. The main stream could neither be bridged nor forded, but was clumsily ferried, and at one place my mother had no choice really but between wading or being carried. She suffered the indignity, I think with some feeling of its being a consequence of the French Revolution, and remained cross all the way to Carrara.

We were going on to Massa to sleep, but had time to stop and walk up the dazzling white road to the lower quarry, and even to look into one or two "studios,"—beginnings of my fixed contempt for rooms so called, ever since. Nevertheless, partly in my father's sense of what was kind and proper to be done,—partly by way of buying "a trifle from Matlock,"—and partly because he and I both liked the fancy of the group, we bought a two-feet-high "Bacchus and Ariadne," copied from I know not what (we supposed classic) original, and with as much art in it as usually goes to a French time-piece. It remained long on a pedestal in the library at Denmark Hill, till it got smoked, and was put out of the way.

With the passage of the Magra, and the purchase of the Bacchus and Ariadne, to remain for a sort of monument of the two-feet high knowledge of classic art then possessed by me, ended the state of mind in which my notions of sculpture lay between Chantrey and Roubilliac. Across Magra I felt that I was in Italy proper; the next day we drove over the bridge of Serchio into Lucca.

I am wrong in saying I "felt," *then*, I was in Italy proper. It is only in looking back that I can mark the exact point where the tide began to turn for me; and total ignorance of

what early Christian art meant, and of what living sculpture meant, were first pierced by vague wonder and embarrassed awe, at the new mystery round me. The effect of Lucca on me at this time is now quite confused with the far greater one in 1845. Not so that of the first sight of Pisa, where the solemnity and purity of its architecture impressed me deeply ; —yet chiefly in connection with Byron and Shelley. A masked brother of the Misericordia first met us in the cathedral of Lucca ; but the possible occurrence of the dark figures in the open sunlight of the streets added greatly to the imaginative effect of Pisa on my then nervous and depressed fancy. I drew the Spina Chapel with the Ponte-a-Mare beyond, very usefully and well ; but the languor of the muddy Arno as against Reuss, or Genevoise Rhone, made me suspect all past or future description of Italian rivers. Singularly, I never saw Arno in full flood till 1882, nor understood till then that all the rivers of Italy are mountain torrents. I am ashamed, myself, to read, but feel it an inevitable duty to print, the piece of diary which records my first impression of Florence.

“ November 13th, 1840. I have just been walking, or sauntering, in the square of the statues, the air perfectly balmy ; and I shall not soon forget, I hope, the impression left by this square as it opened from the river, with the enormous mass of tower above,—or of the Duomo itself. I had not expected any mass of a church, rather something graceful, like La Salute at Venice ; and, luckily, coming on it at the southeast angle, where the gallery round the dome is complete, got nearly run over before I recovered from the stun of the effect. Not that it is good as architecture even in its own barbarous style. I cannot tell what to think of it ; but the wealth of exterior marble is quite overwhelming, and the motion of magnificent figure in marble and bronze about the great square, thrilling.

“ Nov. 15th. I still cannot make up my mind about this place, though my present feelings are of grievous disappointment. The galleries, which I walked through yesterday, are impressive enough ; but I had as soon be in the British Mu-

seum, as far as enjoyment goes, except for the Raphaels. I can understand nothing else, and not much of *them*."

At Florence then, this time, the Newgate-like palaces were rightly hateful to me ; the old shop and market streets rightly pleasant ; the inside of the Duomo a horror, the outside a Chinese puzzle. All sacred art,—frescoes, tempera, what not, mere zero, as they were to the Italians themselves ; the country round, dead wall and dusty olive ;—the whole, a provocation and weariness, except for one master, M. Angelo.

I saw at once in him that there was emotion and human life, more than in the Greeks ; and a severity and meaning which were not in Rubens. Everybody about me swearing that Michael Angelo was the finest thing in the world, I was extremely proud of being pleased with him ; confirmed greatly in my notion of my own infallibility, and with help of Rogers in the Lorenzo Chapel, and long sittings and standings about the Bacchus in the Uffizii, progressed greatly and vitally in Michael-Angelesque directions. But I at once pronounced the knife-grinder in the Tribune a vulgar nuisance, as I do still ; the Venus de Medicis, an uninteresting little person ; Raphael's St. John, a piece of black bombast ; and the Uffizii collection in general, an unbecoming medley, got together by people who knew nothing, and cared less than nothing,\* about the arts. On the whole, when I last walked through the Uffizii, in 1882, I was precisely of the same opinion, and proud of having arrived at it so quickly. It was not to be expected of me at that time to like either Angelico or Botticelli ; and if I had, the upper corridor of the Uffizii was an entirely vile and contemptible place wherein to see the great Madonna of the one, or the Venus Marina of the other. Both were then in the outer passage from the entrance to the Tribune.

These conclusions being comfortably arrived at, I sate myself down in the middle of the Ponte Vecchio, and made

---

\* That is, cared the wrong way,—liked them for their meanest skills, and worst uses.

a very true and valuable sketch of the general perspective of its shops and the buildings beyond, looking toward the Duomo. I seem to have had time or will for no more in Florence ; the Mercato Vecchio was too crowded to work in, and the carving of the Duomo could not be disengaged from its color. Hopeful, but now somewhat doubtful, of finding things more to our mind in the south, we drove through the Porta Romana.

Siena, Radicofani, Viterbo, and the fourth day, Rome ;—a gloomy journey, with gloomier rests. I had a bad weary headache at Siena ; and the cathedral seemed to me every way absurd—over-cut, over-striped, over-crocketed, overgabled, a piece of costly confectionery, and faithless vanity. In the main it is so : the power of Siena was in her old cathedral, *her* Edward the Confessor's Westminster. Is the ruin of it yet spared ?

The volcanic desert of Radicofani, with gathering storm, and an ominously Æolian keyhole in a vile inn, remained long to all of us a terrific memory. At Viterbo I was better, and made a sketch of the convent on one side of the square, rightly felt and done. On the fourth day papa and mamma observed with triumph, though much worried by the jolting, that every mile nearer Rome the road got worse !

My stock of Latin learning, with which to begin my studies of the city, consisted of the two first books of Livy, never well known, and the names of places remembered without ever looking where they were on a map ; Juvenal, a page or two of Tacitus, and in Virgil the burning of Troy, the story of Dido, the episode of Euryalus, and the last battle. Of course, I had nominally read the whole "Æneid," but thought most of it nonsense. Of later Roman history, I had read English abstracts of the imperial vices, and supposed the malaria in the Campagna to be the consequence of the Papacy. I had never heard of a good Roman emperor, or a good pope ; was not quite sure whether Trajan lived before Christ or after, and would have thanked, with a sense of relieved satisfaction, anybody who might have told me that Marcus Antoninus was a Roman philosopher contemporary with Socrates.

The first sight of St. Peter's dome, twenty miles away, was little more to any of us than the apparition of a gray milestone, announcing twenty miles yet of stony road before rest. The first sluggish reach of Tiber, with its mud shore and ochreous water, was a quite vile and saddening sight to me, —as compared with breezy tide of Thames, seen from Nanny Clowsley's. The Piazza del Popolo was as familiar to me, from paintings, as Cheapside, and much less interesting. We went, of course, to some hotel in the Piazza di Spagna, and I went to bed tired and sulky at finding myself in a big street of a big modern town, with nothing to draw, and no end of things to be bothered with. Next day, waking refreshed, of course I said, "I am in Rome," after Mr. Rogers; and accompanied papa and mamma, with a tinge of curiosity, to St. Peter's.

Most people and books had told me I should be disappointed in its appearance of size. But I have not vainly boasted my habit and faculty of measuring magnitudes, and there was no question to me how big it was. The characters I was not prepared for were the clumsy dulness of the façade, and the entirely vile taste and vapid design of the interior. We walked round it, saw the mosaic copies of pictures we did not care for, the pompous tombs of people whose names we did not know, got out to the fresh air and fountains again with infinite sense of relief, and never again went near the place, any of us, except to hear music, or see processions and paraphernalia.

So we went home to lunch, and of course drove about the town in the afternoon, and saw the Forum, Coliseum, and so on. I had no distinct idea what the Forum was or ever had been, or how the three pillars, or the seven, were connected with it, or the Arch of Severus, standing without any road underneath, or the ragged block of buildings above, with their tower of the commonest possible eighteenth century type. There was, however, one extreme good in all this, that I saw things, with whatever faculty was in me, exactly for what they were; and though my religious instruction, as aforesaid, led me to suppose the malaria in the Campagna was the

consequence of the Papacy, that did not in the least affect my clear and invincible perception that the outline of Soracte was good, and the outlines of tufo and pozzolana foregrounds bad, whether it was Papal or Protestant pozzolana. What the Forum or Capitol had been, I did not in the least care; the pillars of the Forum I saw were on a small scale, and their capitals rudely carved, and the houses above them nothing like so interesting as the side of any close in the "Auld toun" of Edinburgh.

Having ascertained these general facts about the city and its ruins, I had to begin my gallery work. Of course all the great religious paintings, Perugino's antechamber, Angelico's chapel, and the whole lower story of the Sistine, were entirely useless to me. No soul ever bade me look at them, and I had no sense yet to find them out for myself. Everybody told me to look at the roof of the Sistine chapel, and I liked it; but everybody also told me to look at Raphael's "Transfiguration," and Domenichino's "St. Jerome;" which also I did attentively, as I was bid, and pronounced—without the smallest hesitation—Domenichino's a bad picture, and Raphael's an ugly one; and thenceforward paid no more attention to what anybody said (unless I happened to agree with it) on the subject of painting.

Sir Joshua's verdict on the "Stanze" was a different matter, and I studied them long and carefully, admitting at once that there was more in them than I was the least able to see or understand, but decisively ascertaining that they could not give me the least pleasure, and contained a mixture of Paganism and Papacy wholly inconsistent with the religious instruction I had received in Walworth.

Having laid these foundations of future study, I never afterward had occasion seriously to interfere with them. Domenichino is always spoken of—as long as, in deference to Sir Joshua, I name him at all—as an entirely bad painter; the "Stanze," as never giving, or likely to give, anybody in a healthy state of mind,—that is to say, desirous of knowing what sibyls were really like, or how a Greek conceived the Muses,—the slightest pleasure; and the opposition of the

Parnassus to the Disputa, shown, in the "Stones of Venice,"\* to foretell the fall of Catholic Theology.

The main wonders of Rome thus taken stock of, and the course of minor sight-seeing begun, we thought it time to present a letter of introduction which Henry Acland had given me to Mr. Joseph Severn.

Although in the large octavo volume containing the works of Coleridge, Shelley, and Keats, which so often lay on my niche-table at Herne Hill, the Keats part had never attracted me, and always puzzled, I had got quite enough perception of his natural power, and felt enough regret for his death, to make me wait with reverence on his guardian friend. I forget exactly where Mr. Severn lived at that time, but his door was at the right of the landing at the top of a long flight of squarely reverting stair,—broad, to about the span of an English lane that would allow two carts to pass; and broad-stepped also, its gentle incline attained by some three inches of fall to a foot of flat. Up this I was advancing slowly,—it being forbidden me ever to strain breath,—and was within eighteen or twenty steps of Mr. Severn's door, when it opened, and two gentlemen came out, closed it behind them with an expression of excluding the world for evermore from that side of the house, and began to descend the stairs to meet me, holding to my left. One was a rather short, rubicund, serenely beaming person; the other, not much taller, but paler, with a beautifully modelled forehead, and extremely vivid, though kind, dark eyes.

They looked hard at me as they passed, but in my usual shyness, and also because I have held it a first principle of manners not to waylay people;—above all, not to stop them when they are going out, I made no sign, and leaving them to descend the reverting stair in peace, climbed, at still slackening pace, the remaining steps to Mr. Severn's door, and left

---

\* I have authorized the republication of this book in its original text and form, chiefly for the sake of its clear, and the reader will find, wholly incontrovertible, statement of the deadly influence of Renaissance Theology on the Arts in Italy, and on the religion of the World.

my card and letter of introduction with the servant, who told me he had just gone out. His dark-eyed companion was George Richmond, to whom, also, Acland had given me a letter. Both Mr. Severn and he came immediately to see us. My father and mother's quiet out-of-the-wayness at first interested, soon pleased, and at last won them, so completely, that before Christmas came, out of all people in Rome they chose us to eat their Christmas dinner with. Much more for my father's sake and mother's, than mine; not that they were uninterested in me also, but as *my* ways of out-of-the-wayness were by no means quiet, but perpetually firing up under their feet in little splutters and spitfires of the most appalling heresy; and those not only troublesome in immediate cackle, but carried out into steady, and not always refutable, objection to nearly everything sacred in their sight, of the autocratic masters and authentic splendors of Rome, their dialogues with me were apt to resolve themselves into delicate disguises of necessary reproof; and even with my father and mother, into consultation as to what was best to be done to bring me to anything like a right mind. The old people's confidence in *them* had been unbounded from the first, in consequence of Mr. Severn's having said to Mr. Richmond when they met me on the stairs, "What a poetical countenance!"—and my recently fanatical misbehavior in the affair of the Harlech, coupled with my now irrepressible impertinences to Raphael and Domenichino, began to give me in my parents' eyes something of the distant aspect of the Prodigal Son.

The weight of adverse authority which I had thus to support was soon increased by the zeal of Mr. Richmond's younger brother, Tom, whom I found, on the first occasion of my visiting them in their common studio, eagerly painting a torso with shadows of smalt blue, which, it was explained to me, were afterward to be glazed so as to change into the flesh color of Titian. As I did not at that time see anything particular in the flesh color of Titian, and did not see the slightest probability—if there were—of its being imitable by that process, here was at once another chasm of separation opened between my friends and me, virtually never closed to the

end of time ; and in its immediately volcanic effect, decisive of the manner in which I spent the rest of my time in Rome and Italy. For, making up my mind thenceforward that the sentiment of Raphael and tints of Titian were alike beyond me, if not wholly out of my way ; and that the sculpture galleries of the Vatican were mere bewilderment and worry, I took the bit in my teeth, and proceeded to sketch what I could find in Rome to represent in my own way, bringing in primarily,—by way of defiance to Raphael, Titian, and the Apollo Belvidere all in one,—a careful study of old clothes hanging out of old windows in the Jews' quarter.

The gauntlet being thus thrown, the two Mr. Richmonds and my father had nothing for it but to amuse themselves as best they could with my unclassical efforts, not, taken on my own terms, without interest. I did the best I could for the Forum, in a careful general view ; a study of the aqueducts of the Campagna from St. John Lateran, and of the Aventine from the Ponte Rotto, were extremely pleasant to most beholders ; and at last even Mr. Richmond was so far mollified as to ask me to draw the street of the Trinita di Monte for him, with which he had many happy associations. There was another practical chance for me in life at this crisis,—I might have made the most precious records of all the cities in Italy. But all my chances of being anything but what I am were thrown away, or broken short, one after another. An entirely mocking and mirage-colored one, as it seemed then, yet became, many a year later, a great and beautiful influence on my life.

Between my Protestantism and, as Tom Richmond rightly called it, Proutism, I had now abjured Roman shows altogether, and was equally rude and restive, whether I was asked to go to a church, a palace, or a gallery,—when papa and mamma began to perceive some dawn of docility in me about going to hear musical church services. This they naturally attributed to my native taste for Gregorian chants, and my increasing aptitude for musical composition. But the fact was, that at services of this kind there was always a chance of seeing, at intervals, above the bowed heads of the Italian

crowd, for an instant or two before she also stooped—or sometimes, eminent in her grace above a stunted group of them,—a fair English girl, who was not only the admitted Queen of beauty in the English circle of that winter in Rome, but was so, in the kind of beauty which I had only hitherto dreamed of as possible, but never yet seen living : statuesque severity with womanly sweetness joined. I don't think I ever succeeded in getting nearer than within fifty yards of her ; but she was the light and solace of all the Roman winter to me, in the mere chance glimpses of her far away, and the hope of them.

Meantime, my father, to whom our Roman physician had given an encouraging report of me, recovered some of his natural cheerfulness, and enjoyed, with his niece, who if not an enthusiastic, was an indefatigable and attentive sight-seeker and seer, everything that Rome had to show ; the musical festas especially, whenever his cross-grained boy consented, for Miss Tollemache's secret sake, to go with him ; while Mr. Severn and George Richmond became every day more kindly—nor, we felt, without real pleasure to themselves—helpful to us all. No *habitué* of the brightest circles of present London society will doubt the privilege we had in better and better knowing George Richmond. But there is nothing in any circle that ever I saw or heard of, like what Mr. Joseph Severn then was in Rome. He understood everybody, native and foreign, civil and ecclesiastic, in what was nicest in them, and never saw anything else than the nicest ; or saw what other people got angry about as only a humorous part of the nature of things. It was the nature of things that the Pope should be at St. Peter's, and the beggars on the Pincian steps. He forgave the Pope his papacy, revered the beggar's beard, and felt that alike the steps of the Pincian, and the Araceli, and the Lateran, and the Capitol, led to heaven, and everybody was going up, somehow ; but might be happy where they were in the meantime. Lightly sagacious, lovingly humorous, daintily sentimental, he was in council with the cardinals to-day, and at picnic in Campagna with the brightest English belles to-morrow ; and caught the

hearts of all in the golden net of his good will and good understanding, as if life were but for him the rippling chant of his favorite song,—

“Gente, e qui l'uccellatore.”

---

### CHAPTER III.

#### CUMÆ.

In my needful and fixed resolve to set the facts down continuously, leaving the reader to his reflections on them, I am slipping a little too fast over the surfaces of things; and it becomes at this point desirable that I should know, or at least try to guess, something of what the reader's reflections *are!* and whether in the main he is getting at the sense of the facts I tell him.

Does he think me a lucky or unlucky youth, I wonder? Commendable, on the whole, and exemplary—or the reverse? Of promising gifts—or merely glitter of morning, to pass at noon? I ask him at this point, because several letters from pleased acquaintances have announced to me, of late, that they have obtained quite new lights upon my character from these jottings, and like me much better than they ever did before. Which was not the least the effect I intended to produce on them; and which moreover is the exact opposite of the effect on my own mind of meeting myself, by turning back, face to face.

On the contrary, I suffer great pain, and shame, in perceiving with better knowledge the little that I was, and the much that I lost—of time, chance, and—duty, (a duty missed is the worst of loss); and I cannot in the least understand what my acquaintances have found, in anything hitherto told them of my childhood, more amiable than they might have guessed of the author of “Time and Tide,” or “Unto This Last.” The real fact being, whatever they make of it, that hitherto, and for a year or two on, yet, I was simply a little floppy and

soppy tadpole,—little more than a stomach with a tail to it, flattening and wriggling itself up the crystal ripples and in the pure sands of the spring-head of youth.

But there were always good eyes in me, and a good habit of keeping head up stream ; and now the time was coming when I began to think about helping princesses by fetching up their balls from the bottom ; when I got a sudden glimpse of myself in the true shape of me, extremely startling and discouraging :—here, in Rome it was, toward the Christmas time.

Among the living Roman arts of which polite travellers were expected to carry specimens home with them, one of the prettiest used to be the cutting cameos out of pink shells. We bought, according to custom, some coquillage of Gods and Graces ; but the cameo cutters were also skilful in mortal portraiture, and papa and mamma, still expectant of my future greatness, resolved to have me carved in cameo.

I had always been content enough with my front face in the glass, and had never thought of contriving vision of the profile. The cameo finished, I saw at a glance to be well cut ; but the image it gave of me was not to my mind. I did not analyze its elements at the time, but should now describe it as a George the Third's penny, with a halfpenny worth of George the Fourth, the pride of Amurath the Fifth, and the temper of eight little Lucifers in a swept lodging.

Now I knew myself proud ; yes, and of late, sullen ; but did not in the least recognize pride or sulkiness for leading faults of my nature. On the contrary, I knew myself wholly reverent to all real greatness, and wholly good-humored—when I got my own way. What more can you expect of average boy, or beast ?

And it seemed hard to me that only the excrescent faults, and by no means the constant capacities, should be set forth, carved by the petty justice of the practical cameo. Concerning which, as also other later portraits of me, I will be thus far proud as to tell the disappointed spectator, once for all, that the main good of my face, as of my life, is in the eyes,—and only in those, seen near ; that a very dear and

wise French friend also told me, a long while after this, that the lips, though not Apolline, were kind: the George the Third and Fourth character I recognize very definitely among my people, as already noticed in my cousin George of Croydon; and of the shape of head, fore and aft, I have my own opinions, but do not think it time, yet, to tell them.

I think it, however, quite time to say a little more fully, not only what happened to me, now of age, but what was in me: to which end I permit a passage or two out of my diary, written for the first time this year wholly for my own use, and note of things I saw and thought; and neither to please papa, nor to be printed,—with corrections,—by Mr. Harrison.

I see, indeed, in turning the old leaves, that I have been a little too morose in my record of impressions on the Riviera. Here is a page more pleasant, giving first sight of a place afterward much important in my life—the promontory of Sestri di Levante.

“Sestri, Nov. 4th (1840). Very wet all morning; merely able to get the four miles to this most lovely village, the clouds drifting like smoke from the hills, and hanging in wreaths about the white churches on their woody slopes. Kept in here till three, then the clouds broke, and we got up the woody promontory that overhangs the village. The clouds were rising gradually from the Apennines, fragments entangled here and there in the ravines catching the level sunlight like so many tongues of fire; the dark blue outline of the hills clear as crystal against a pale distant purity of green sky, the sun touching here and there upon their turfey precipices, and the white, square villages along the gulf gleaming like silver to the northwest;—a mass of higher mountain, plunging down into broad valleys dark with olive, their summits at first gray with rain, then deep blue with flying showers—the sun suddenly catching the near woods at their base, already colored exquisitely by the autumn, with such a burst of robing,—penetrating, glow as Turner only could even imagine, set off by the gray storm behind. To the south, an expanse of sea, varied by reflection of white

Alpine cloud, and delicate lines of most pure blue, the low sun sending its line of light—forty miles long—from the horizon; the surges dashing far below against rocks of black marble, and lines of foam drifting back with the current into the open sea. Overhead, a group of dark Italian pine and ever-green oak, with such lovely ground about their roots as we have in the best bits of the islands of Derwentwater. This continued till near sunset, when a tall double rainbow rose to the east over the fiery woods, and as the sun sank, the storm of falling rain on the mountains became suddenly purple—nearly crimson; the rainbow, its hues scarcely traceable, one broad belt of crimson, the clouds above all fire. The whole scene such as can only come once or twice in a lifetime.”

I see that we got to Rome on a Saturday, November 28th. The actual first entry next morning is, perhaps, worth keeping:

“Nov. 29th, Sunday. A great fuss about Pope officiating in the Sistine Chapel—Advent Sunday. Got into a crowd, and made myself very uncomfortable for nothing: no music worth hearing, a little mummery with Pope and dirty cardinals. Outside and west façade of St. Peter’s certainly very fine: the inside would make a nice ball-room, but is good for nothing else.”

“Nov. 30th. Drove up to the Capitol—a filthy, melancholy-looking, rubbishy place; and down to the Forum, which is certainly a very good subject; and then a little farther on, among quantities of bricks and rubbish, till I was quite sick.”

With disgust, I meant; but from December 20th to 25th I had a qualm of real fever, which it was a wonder came to no worse. On the 30th I am afoot again; thus:—

“I have been walking backward and forward on the Pincian, being unable to do anything else since this confounded illness, and trying to find out why every imaginable delight palls so very rapidly on even the keenest feelings. I had all Rome before me; towers, cupolas, cypresses, and palaces mingled in every possible grouping; a light Decemberish mist, mixed with the slightest vestige of wood smoke,

hovering between the distances, and giving beautiful gray outlines of every form between the eye and the sun; and over the rich evergreen oaks of the Borghese gardens, a range of Apennine, with one principal pyramid of pure snow, like a piece of sudden comet-light fallen on the earth. It was not like moonlight, nor like sunlight, but as soft as the one, and as powerful as the other. And yet, with all this around me, I could not feel it. I was as tired of my walk, and as glad when I thought I had done duty, as ever on the Norwood road."

There was a girl walking up and down with some children, her light cap prettily set on very well dressed hair: of whose country I had no doubt; long before I heard her complain to one of her charges, who was jabbering English as fast as the fountain tinkled on the other side of the road, "Qu'elle n'en comprenait pas un mot." This girl after two or three turns sat down beside another *bonne*. There they sate laughing and chattering, with the expression of perfect happiness on their faces, thinking no more of the Alpine heights behind them, or the city beneath them, than of Constantinople; while I, with every feeling raised, I should think to a great degree above theirs, was in a state of actually severe mental pain, because I could perceive materials of the highest pleasure around me, and felt the time hang heavy on my hands. Here is the pride, you perceive, good reader, and the sullens—*dum pituita molestat*—both plain enough. But it is no lofty pride in which I say my "*feelings*" were raised above the French *bonne's*. Very solemnly, I did not think myself a better creature than she, nor so good; but only I knew there was a link between far Soracte and me,—nay, even between unseen Voltur and me,—which was not between her and them; and meant a wider, earthly, if not heavenly, horizon, under the birth-star.

Meantime, beneath the hill, my mother knitted, as quietly as if she had been at home, in the corner of the great Roman room in which she cared for nothing but the cleanliness, as distinguishing it from the accommodation of provincial inns; and the days turned, and it was time to think of the journey

to Naples, before any of us were tired of Rome. And simple cousin Mary, whom I never condescended to ask for either sympathy or opinion, was really making better use of her Roman days than any of us. She was a sound, plain musician; (having been finished by Moscheles); attended to the church orchestras carefully, read her guide-books accurately, knew always where she was, and in her sincere religion, conquered her early Puritanism to the point of reverently visiting St. Paul's grave and St. Cecilia's house, and at last going up the Scala Santa on her knees, like any good girl of Rome.

So passed the days, till there was spring sunshine in the air as we climbed the Alban mount, and went down into the ravine under La Riccia, afterward described in perhaps the oftenest quoted passage of "Modern Painters." The diary says: "A hollow with another village on the hill opposite, a most elegant and finished group of church tower and roof, descending by delicate upright sprigs\* of tree into a dark rich-toned depth of ravine, out of which rose nearer, and clear against its shade, a gray wall of rock, an absolute miracle for blending of bright lichenous color."

With a few sentences more, to similar effect, and then a bit of Pontine marsh description, dwelling much on the moving points of the "black cattle, white gulls, black, bristly high-bred swine, and birds of all sorts, waders and dippers innumerable." It is very interesting, at least to myself, to find how, so early as this, while I never drew anything but in pencil outline, I *saw* everything first in color, as it ought to be seen.

I must give room to the detail of the day from Mola to Naples, because it shows, to proof enough, the constant watchfulness upon which the statements in "Modern Painters" were afterward founded, though neither that nor any other book had yet been dreamed of, and I wrote only to keep memory of things seen, for what good might come of the memory anyhow.

---

\* I have substituted this word for a sketch like the end of a broom, which would convey no idea to anybody but myself.

“Naples, January 9th (1841). Dressed yesterday at Mola by a window commanding a misty sunrise over the sea—a grove of oranges sloping down to the beach, flushed with its light; Gaeta opposite, glittering along its promontory. Ran out to terrace at side of the house, a leaden bit of roof, with pots of orange and Indian fig. There was a range of Skiddaw-like mountains rising from the shore, the ravines just like those of Saddleback, or the west side of Skiddaw; the higher parts bright with fresh-fallen snow; the highest, misty with a touch of soft white, swift\* cloud. Nearer, they softened into green, bare masses of hill, like Malvern, but with their tops covered with olives and lines of vine,—the village of Mola showing its white walls and level roofs above the olives, with a breath of blue smoke floating above them, and a long range of distant hills running out into the sea beyond. The air was fresh, and yet so pure and soft, and so full of perfume from the orange trees below the terrace, that it seemed more like an early summer morning than January. It got soon threatening, however, though the sun kept with us as we drove through the village;—confined streets, but bright and varied, down to the shore, and then under the slopes of the snowy precipice, now thoroughly dazzling with the risen sun, and between hedges of tall myrtle, into the plain of Garigliano. A heavy rain-cloud raced † us the ten miles, and stooped over us, stealing the blue sky inch by inch, till it had left only a strip of amber-blue ‡ behind the Apennines, the near hills thrown into deep dark purple shade, the snow behind them, first blazing—the only strong light in the picture—then in shade, dark against the pure sky; the gray above, warm and lurid—a little washed with rain in parts; below, a copse of willow coming against the dark purples, nearly pure Indian

---

\* Note the instant marking the *pace* of the cloud,—the work of *Cœli Enarrant* having been begun practically years before this. See below also of the rain-cloud.

† This distinct approach, or chase, by rain-cloud is opposed, in my last lectures on sky, to the *gathering* of rain-cloud all through the air, under the influence of plague wind.

‡ Palest transparent blue passing into gold.

yellow, a little touched with red. Then came a lovely bit of aqueduct, with coats of shattered mosaic, the hills seen through its arches, and pieces of bright green meadow mixing with the yellow of the willows. At Capua, detained by a rascally Dogana,—we had one at Garigliano as well, howling beggars all about (*Caffé del Giglio d'Oro*), one ape of a creature clinging with its legs about another's neck, and chopping its jaws with its fists. Hence a dead flat of vines hanging from elms, and road perfectly straight, and cut utterly up by a deluge of rain. I was quite tired as it grew dark, fragments of blue and amber sky showing through colossal thunder clouds, and two or three pure stars laboring among the dark masses. It lightened fast as we got into Naples, and we were stopped again, first by Dogana, and then at passport office, till I lost temper and patience, and could have cried like a girl, for I was quite wearied with the bad roads, and disappointed with the approach to Naples, and cold. I could not help wondering at this. How little could I have imagined, sitting in my home corner, yearning for a glance of the hill snow, or the orange leaf, that I should, at entering Naples, be as thoroughly out of humor as ever after a monotonous day in London. More so!"

For full ten years, since earliest geologic reading, I had thoroughly known the structure and present look of Vesuvius and Monte Somma; nor had "Friendship's Offering" and "Forget-me-not," in the days of the Bandit Leoni, left me without useful notions of the Bay of Naples. But the beautiful forms of Monte St. Angelo and Capri were new to me, and the first feeling of being in the presence of the power and mystery of the under earth, unspeakably solemn; though Vesuvius was virtually in repose, and the slow changes in the heaped white cloud above the crater were only like those of a thunder cloud.

The first sight of the Alps had been to me as a direct revelation of the benevolent will in creation. Long since, in the volcanic powers of destruction, I had been taught by Homer, and further forced by my own reason, to see, if not the personality of an Evil Spirit, at all events the permitted sym-

bol of evil, unredeemed ; wholly distinct from the conditions of storm, or heat, or frost, on which the healthy courses of organic life depended. In the same literal way in which the snows and Alpine roses of Lauterbrunnen were visible Paradise, here, in the valley of ashes and throat of lava, were visible Hell. If thus in the natural, how else should it be in the spiritual, world?

I had never yet read a line of Dante. From the moment when I knew the words,—

“It now is evening there, where buried lies  
The body in which I cast a shade, removed  
To Naples from Brundusium’s wall,”

not Naples only, but Italy, became forever flushed with the sacred twilight of them. But even now, what pieces I knew of Virgil, in that kind, became all at once true, when I saw the birdless lake ; for me also, the voice of it had teaching which was to be practically a warning law of future life :—

“Nec te  
Nequidquam lucis Hecate præfecit Avernis.”

The legends became true,—*began* to come true, I should have said,—trains of thought now first rising which did not take clear current till forty years afterward ; and in this first trickling, sorrowful in disappointment. “There *were* such places then, and Sybils *did* live in them !—but is this all ?”

Frightful enough, yes, the spasmodic ground—the boiling sulphur lake—the Dog’s grotto with its floor a foot deep in poisoned air that could be stirred with the hand. Awful, but also for the Delphi of Italy, ignoble. And all that was fairest in the whole sweep of isle and sea, I saw, as was already my wont, with precise note of its faults.

The common English traveller, if he can gather a black bunch of grapes with his own fingers, and have his bottle of Falernian brought him by a girl with black eyes, asks no more of this world, nor the next ; and declares Naples a Paradise. But I knew, from the first moment when my foot furrowed volcanic ashes, that no mountain form or color could

exist in perfection when everything was made of scoria, and that blue sea was to be little boasted if it broke on black sand. And I saw also, with really wise anger, the horror of neglect in the governing power, which Mr. Gladstone found, forsooth, in the Neapolitan prisons! but which neither he nor any other Englishman, so far as I know, except Byron and I, saw to have made the Apennines one prison wall, and all the modern life of Italy one captivity of shame and crime; alike against the honor of her ancestors, and the kindness of her God.

With these strong insights into the faults of others, there came also at Naples, I am thankful to say, some stroke of volcanic lightning on my own. The sense of the uselessness of all Naples and its gulf to me, in my then state of illness and gloom, was borne in upon me with reproach: the chrysalid envelope began to tear itself open here and there to some purpose, and I bade farewell to the last outlines of Monte St. Angelo as they faded in the south, with dim notions of bettering my ways in future.

At Mola di Gaeta we stopped a whole day that I might go back to draw the castle of Itri. It was hinted darkly to us that Itri was of no good repute; we disdained all imputations on such a lovely place, and drove back there for a day's rambling. While I drew, my mother and Mary went at their own sweet wills up and down; Mary had by this time, at school and on the road, made herself mistress of syllables enough to express some sympathy with any *contadina* who wore a pretty cap, or carried a pretty baby; and, the appearance of English women being rare at Itri, the *contadine* were pleased, and everything that was amiable to *mamma* and Mary. I made an excellent sketch, and we returned in exultation to the orange-groves of Mola. We afterward heard that the entire population of Itri consisted of *banditti*, and never troubled ourselves about *banditti* any more.

We stopped at Albano for the Sunday, and I went out in the morning for a walk through its *ilex* groves with my father and mother and Mary. For some time back, the little cough bringing blood had not troubled me, and I had been taking

longer walks and otherwise counting on comparative safety, when here suddenly, in the gentle morning saunter through the shade, the cough came back—with a little darker stain on the handkerchief than usual. I sat down on a bank by the roadside, and my father's face was very grave.

We got quietly back to the inn, where he found some sort of light carriage disposable, and set out, himself, to fetch the doctor from Rome.

It has always been one of the great shadows of thought to me, to fancy my father's feelings as he was driven that day those eighteen miles across the Campagna.

Good Dr. Gloag comforted him, and returned with him. But there was nothing new to be done, nor said. Such chance attack was natural in the spring, he said, only I must be cautious for a while. My mother never lost her courage for an instant. Next day we went on to Rome, and it was the last time the cough ever troubled me.

The weather was fine at Easter, and I saw the Benediction, and sate in the open air of twilight opposite the castle of St. Angelo, and saw the dome-lines kindle on St. Peter's, and the castle veil the sky with flying fire. Bearing with me from that last night in Rome many thoughts that ripened slowly afterward, chiefly convincing me how guiltily and meanly dead the Protestant mind was to the whole meaning and end of mediæval Church splendor; and how meanly and guiltily dead the existing Catholic mind was, to the course by which to reach the Italian soul, instead of its eyes.

Re-opening, but a few days since, the book which my Christ Church official tutor, Walter Brown, recommended to me as the most useful code of English religious wisdom, the "Natural History of Enthusiasm," I chanced on this following passage, which I think must have been one of the first to startle the complacency of my Puritan creed. My since experience in theological writing furnishes me with no more terrific example of the absence alike of charity and understanding in the leading masters of that sect, beyond all others into which the Church has ever been divided:—

"If it be for a moment forgotten that in every bell, and

bowl, and vest of the Romish service there is hid a device against the liberty and welfare of mankind, and that its gold, and pearls, and fine linen are the deckings of eternal ruin; and if this apparatus of worship be compared with the impurities and the cruelties of the old Polytheistic rites, great praise may seem due to its contrivers. All the materials of poetic and scenic effect have been elaborated by the genius and taste of the Italian artists until a spectacle has been got up which leaves the most splendid shows of the ancient idol worship of Greece and Rome at a vast distance of inferiority."

Yet I cannot distinctly remember being shocked, even at this passage, and I know there was much in the rest of the book that pleased me; but I had already the advantage over its author, and over all such authors, of knowing, when I saw them, sincere art from lying art, and happy faith from insolent dogmatism. I knew that the voices in the Trinita di Monte did not sing to deceive me; and that the kneeling multitude before the Pontiff were indeed bettered and strengthened by his benediction.

Although I had been able, weather favoring, to see the Easter ceremonies without danger, there was no sign, take all in all, of gain to my health from Roman winter. My own discouragement was great; and the first cautious journeyings back by Terni and Fuligno were sad enough;—the night at Terni very deeply so. For in the evening, when we came back from seeing the falls, the servant of a young Englishman asked to speak with us, saying that he was alone in charge of his master, who had been stopped there by sudden, he feared mortal, illness. Would my father come and see him? My father went, and found a beautifully featured Scottish youth of three or four and twenty, indeed in the last day of decline. He died during the night, and we were of some use to the despairing servant afterward. I forget now whether we ever knew who the youth was. I find his name in my diary, "Farquharson," but no more.

As we drew northward, however, out of the volcanic country, I recovered heart; the enchanted world of Venice enlarg-

ing in front of me. I had only yet once seen her, and that six years ago, when still a child. That the fairy tale should come true now seemed wholly incredible, and the start from the gate of Padua in the morning,—Venice, asserted by people whom we could not but believe, to be really over there, on the horizon, in the sea! How to tell the feeling of it!

I have not yet fancied the reader's answer to the first question proposed in outset of this chapter,—does he think me a fortunate or unfortunate youth?

As to preparation for the future world, terrestrial or celestial, or future self in either, there may be two opinions—two or three perhaps—on the matter. But, there is no question that, of absolute happiness, I had the share of about a quarter of a million of average people, all to myself. I say "people," not "boys." I don't know what delight boys take in cricket, or boating, or throwing stones at birds, or learning to shoot them. But of average people in continuity of occupation, shopmen, clerks, Stock Exchange people, club and Pall Mall people, certainly there was no reckoning the quantity of happiness I had in comparison, followed indeed by times of reaction, or of puzzled satiety; and partly avenged by extremes of vexation at what vexed nobody else; but indisputably and infinitely precious in itself, every day complete at the end, as with Sydney Smith's salad: "Fate cannot harm me; I have dined, to-day."

The two chapters closing the first, and beginning the second volume of the "Stones of Venice" were written, I see on re-reading, in the melancholy experience of 1852, with honest effort to tell every traveller what was really to be seen. They do not attempt to recall my own joys of 1835 and 1841, when there was not even beginning of railway bridge; when everything, muddy Brenta, vulgar villa, dusty causeway, sandy beach, was equally rich in rapture, on the morning that brought us in sight of Venice: and the black knot of gondolas in the canal of Mestre, more beautiful to me than a sunrise full of clouds all scarlet and gold.

But again, how to tell of it? or even explain it to myself,—the English mind, high or common, being utterly without

trace of the feeling. Sir Philip Sidney goes to Venice, and seems unconscious that it is in the sea at all. Elizabeth Lady Craven, in 1789, "expected to see a gay clean-looking town, with quays on each side of the canals, but was extremely disappointed; the houses are in the water, and look dirty and uncomfortable on the outside; the innumerable quantity of gondolas too, that look like swimming coffins, added to the dismal scene, and, I confess, Venice on my arrival struck me with horror rather than pleasure."

After this, she goes to the Casini, and is happy. It does not appear she had ever read the "Merchant," or "Othello;" still less has Evelyn read them, though for him, as for Sidney, *Othello's* and *Antonio's* Venice was still all but living. My Venice, like Turner's, had been chiefly created for us by Byron; but for me, there was also still the pure childish passion of pleasure in seeing boats float in clear water. The beginning of everything was in seeing the gondola-beak come actually inside the door at Danieli's, when the tide was up, and the water two feet deep at the foot of the stairs; and then, all along the canal sides, actual marble walls rising out of the salt sea, with hosts of little brown crabs on them, and Titians inside.

Between May 6th and 16th I made notes on effects of light, afterward greatly useful in "Modern Painters;" and two pencil drawings, "Ca' Contarini Fasan," and the "Giant's Staircase," of which, with two more made at Bologna in passing, and some half dozen at Naples and Amalfi, I can say, now forty years later, with certitude, that they could not have been much better done. I knew absolutely nothing of architecture proper, had never drawn a section nor a leaf moulding; but liked, as Turner did to the end of his days, anything that was graceful and rich, whether Gothic or Renaissance; was entirely certain and delicate in pencil-touch; and drew with an acuteness of delight in the thing as it actually stood, which makes the sketch living and like, from corner to corner. Thus much I could do, and *did* do, for the last time. Next year I began trying to do what I could not, and have gone on ever since, spending half of my days in that manner.

I find a sentence in diary on 6th May, which seems inconsistent with what I have said of the centres of my life work.

“Thank God I am here ; it is the Paradise of cities.”

\* \* \* \* \*

“This, and Chamouni, are my two bournes of Earth.”

But then, I *knew* neither Rouen nor Pisa, though I had seen both. (Geneva, when I spoke of it with them, is meant to include Chamouni.) Venice I regard more and more as a vain temptation—the diary says—where the stars are. “There is moon enough to make half the sanities of the earth lunatic, striking its pure flashes of light on the gray water.”

From Venice, by Padua, where St. Antonio,—by Milan, where the Duomo,—were still faultless to me, and each a perfect bliss ; to Turin—to Susa ; my health still bettering in the sight of Alps, and what breeze came down from them—and over Cenis for the first time. I woke from a sound tired sleep in a little one-windowed room at Laus-le-bourg, at six of the summer morning, June 2d, 1841; the red aiguilles on the north relieved against pure blue—the great pyramid of snow down the valley in one sheet of eastern light. I dressed in three minutes, ran down the village street, across the stream, and climbed the grassy slope on the south side of the valley, up to the first pines.

I had found my life again ;—all the best of it. What good of religion, love, admiration or hope, had ever been taught me, or felt by my best nature, rekindled at once ; and my line of work, both by my own will and the aid granted to it by fate in the future, determined for me. I went down thankfully to my father and mother, and told them I was sure I should get well.

As to my mere physical state, the doctors had been entirely mistaken about me. I wanted bracing air, exercise, and rest from all artificial excitement. The air of the Campagna was the worst they could have sent me into—the life of Rome the worst they could have chosen.

The three following diary entries, which meant much afterward, may summarily end what I fear has been a tiresome chapter.

I. "Geneva, June 5th. Yesterday from Chambery,—a fresh north wind blowing away the dust. Much pleased with the respectable young wife of a confectioner, at one of the mid-towns where I went to get some Savoy biscuits—and asked for 'a pound.' 'Mais, Monsieur, une livre sera un peu —volumineuse! je vous en donnerai la moitié; vous verrez si cela vous suffira;'—'Ah, Louise' (to a little bright-eyed lady in the inner room, who was expressing her disapprobation of some of the affairs of life too loudly), 'si tu n'es pas sage, tu vas savoir'—but so playfully and kindly! Got here on a lovely afternoon near sunset, and the green bastions and bright Salève and rushing Rhone and far Jura, all so lovely that I was nearly vowing never to go into Italy again."

II. "June 6th. Pouring rain all day, and slow extempore sermon from a weak-voiced young man in a white arched small chapel, with a braying organ and doggerel hymns. Several times, about the same hour on Sunday mornings, a fit of self-reproach has come upon me for my idling at present, and I have formed resolutions to be always trying to get knowledge of some kind or other, or bodily strength, or some real available, continuing good, rather than the mere amusement of the time. It came on me to-day very strongly, and I would give anything and everything to keep myself in the temper, for I always slip out of it next day."

III. "December 11th, 1842. Very odd! Exactly the same fit came on me in the same church, next year, and was the origin of Turner's work."

---

## CHAPTER IV.

### FONTAINEBLEAU.

We reached Rochester on the 29th of June, and a month was spent at home, considering what was to be done next. My own feeling, ever since the morning at Lans-le-bourg, was that, if only left free in mountain air, I should get well, fast enough. After debate with London doctors, it was

thought best to give me my way; and, stipulating only that Richard Fall should go with me, papa and mamma sent me, early in August, on my first independent journey, into Wales.

But they desired me, on my way there, to stop at Leamington, and show myself to its dominant physician, Dr. Jephson—called a quack by all the Faculty, yet of whom they had heard favorably from wise friends.

Jephson was no quack; but a man of the highest general power, and keenest medical instincts. He had risen, by stubborn industry and acute observation, from an apothecary's boy to be the first physician in Leamington; and was the first true physician I ever knew—nor since, till I knew Sir William Gull, have I met the match of him.

He examined me for ten minutes; then said, "Stay here, and I'll put you to rights in six weeks." I said I was not the least disposed to stay there, and was going into Wales, but would obey any directions and follow any prescriptions he chose to give me. No, he said, I must stay, or he could do nothing for me. I thought this did look a little like quackery, and accordingly made my bow, and proceeded on my journey into Wales, after writing a full account of the interview to my father.

At Pont-y-Monach lay for me a letter from him, bidding me go back to Leamington at once, and place myself under Jephson's care. Richard therefore went on to Snowdon by himself; and I, returning with what speed the mail could make, presented myself to the doctor penitently. He sent me into tiny lodgings near the Wells, where I spent six weeks of life extremely new to me; much grumbled at in my diary,—not unpleasant, now remembered.

Salt water from the Wells in the morning, and iron, visibly glittering in deposit at bottom of glass, twice a day. Breakfast at eight, with herb tea—dandelion, I think; dinner at one, supper at six, both of meat, bread, and water, only;—fish, meat, or fowl, as I chose, but only one dish of the meat chosen, and no vegetables nor fruit. Walk, forenoon and afternoon, and early to bed. Such the regimen suddenly enforced on my luxurious life.

To which discipline I submitted accurately : and found life still worth having on these terms, and the renewed hope of its continuance, extremely interesting.

Nor wanting in interest, the grotesquely prosaic position itself. Here I was, in a small square brick lodging-house, number what you like of its row, looking out on a bit of suburban paddock, and a broken paling ; mean litter everywhere about ; the muddy lingering of Leam, about three yards broad, at the other side of the paddock ; a ragged brambly bank at the other side of *it*. Down the row, beginnings of poor people's shops, then an aristocratic grocer and mercer or two, the circulating library, and the Pump Room.

After the Bay of Naples, Mount Aventine, and St. Mark's Place, it felt like the first practical scene of a pantomime, after the transformation, and before the business begins. But I had been extremely dull under Mount Aventine ; and did not, to my surprise, feel at all disposed to be dull here,—but somewhat amused, and with a pleasant feeling of things being really at last all right, for *me* at least ; though it wasn't as grand as Peckwater, nor as pretty as St. Mark's Place. Any how, I was down to Croydon level again in the world ; and might do what I liked in my own lodgings, and hadn't any Collections to get ready for.

The first thing I did was to go to the library and choose a book to work at. After due examination, I bought Agassiz's "Poissons Fossiles !" and set myself to counting of scales and learning of hard names,—thinking, as some people do still, that in that manner I might best advance in geology. Also I supplied myself with some Captain Marryat ; and some beautiful new cakes of color wherewith to finish a drawing, in Turner's grandest manner, of the Chateau of Amboise at sunset, with the moon rising in the distance, and shining through a bridge.

The "Poissons Fossiles" turned out a most useful purchase, enabling me finally to perceive, after steady work on them, that Agassiz was a mere blockhead to have paid for all that good drawing of the nasty ugly things, and that it

didn't matter a stale herring to any mortal whether they had any names or not.

For any positive or useful purpose, I could not more utterly have wasted my time ; but it was no small gain to know that time spent in that sort of work *was* wasted ; and that to have caught a chub in the Avon, and learned how to cook it spicily and herbaceously, so as to have pleased Izaak Walton, if the odor of it could reach him in the Anglers' Paradise, would have been a better result of six weeks' study than to be able to count and call by their right names every scale stuck in the mud of the universe.

Also I got a wholesome perception, from that book, of the true relation between artists and scientific gentlemen. For I saw that the real genius concerned in the "Poissons Fossiles" was the lithographer's, and not at all the scientific gentleman's ; and that the book ought to have been called after the lithographer, *his* fishes, only with their scales counted and called bad names by subservient Mons. Agassiz.

The second thing of specific meaning that went on in Leamington lodgings was the aforesaid highly labored drawing of the Chateau of Amboise, "out of my head ;" representing the castle as about seven hundred feet above the river, (it is perhaps eighty or ninety,) with sunset light on it, in imitation of Turner ; and the moon rising behind it, in imitation of Turner ; and some steps and balustrades (which are not there) going down to the river, in imitation of Turner ; with the fretwork of St. Hubert's Chapel done very carefully in my own way,—I thought perhaps a little better than Turner.

This drawing, and the poem of the "Broken Chain," which it was to illustrate, after being beautifully engraved by Goodall, turned out afterward equally salutary exercises ; proving to me that in those directions of imagination I was even a worse blockhead than Agassiz himself. Meantime, the autumn weather was fine, the corn was ripe, and once out of sight of the paddock, the Pump Room, and the Parade, the space of surrounding Warwickshire within afternoon walk was extremely impressive to me, in its English way. Warwick tow-

ers in sight over the near tree tops; Kenilworth, within an afternoon's walk; Stratford, to be reached by an hour's drive with a trotting pony; and, round them, as far as eye could reach, a space of perfect England, not hill and *dale*,—that might be anywhere;—but hill and *flat*, through which the streams linger, and where the canals wind without lock.

Under these peaceful conditions I began to look carefully at cornflowers, thistles, and hollyhocks; and find, by entry on Sept. 15th, that I was writing a bit of the "King of the Golden River," and reading Alison's "Europe" and Turner's "Chemistry."

Anent the "King of the River," I remorsefully bethink me no word has been said of the dawn and sunrise of Dickens on us; from the first syllable of him in the "Sketches," altogether precious and admirable to my father and me; and the new number of "Pickwick" and following "Nickleby" looked to, through whatever laborious or tragic realities might be upon us, as unmixed bliss, for the next day. But Dickens taught us nothing with which we were not familiar,—only painted it perfectly for us. We knew quite as much about coachmen and hostlers as he did; and rather more about Yorkshire. As a caricaturist, both in the studied development of his own manner, and that of the illustrative etchings, he put himself out of the pale of great authors; so that he never became an educational element of my life, but only one of its chief comforts and restoratives.

The "King of the Golden River" was written to amuse a little girl; and being a fairly good imitation of Grimm and Dickens, mixed with a little true Alpine feeling of my own, has been rightly pleasing to nice children, and good for them. But it is totally valueless, for all that. I can no more write a story than compose a picture.

Jephson kept his word, and let me go in six weeks, with my health, he told me, —I doubt not, truly,—in my own hands. And indeed, if I had continued to live on mutton and iron, learned to swim in the sea which I loved, and set myself wholly upon my geology and poissons—vivants instead of

fossiles,—Well, I suppose I should have been drowned like Charles, or lain within a year or two,

“on a glacier, half way up to heaven,  
Taking my final rest.”

What might have been, the mute Fates know. I myself know only, with certainty, what ought *not* to have been,—that, getting released from Leamington, I took again to brown potatoes and cherry-pie; instead of learning to swim and climb, continued writing pathetic verses, and at this particularly foolish crisis of life, as aforesaid, trying to paint *twilight* like Turner. I was not simpleton enough to think I could follow him in daylight, but I thought I could do something like his “Kenilworth Castle” at sunset, with the milkmaid and the moon.

I have passed without notice what the reader might suppose a principal event of my life,—the being introduced to him by Mr. Griffith, at Norwood dinner, June 22d, 1840.

The diary says, “Introduced to-day to the man who beyond all doubt is the greatest of the age; greatest in every faculty of the imagination, in every branch of scenic\* knowledge; at once the painter and poet of the day, J. M. W. Turner. Everybody had described him to me as coarse, boorish, unintellectual, vulgar. This I knew to be impossible. I found in him a somewhat eccentric, keen-mannered, matter-of-fact, English-minded—gentleman: good-natured evidently, bad-tempered evidently, hating humbug of all sorts, shrewd, perhaps a little selfish, highly intellectual, the powers of the mind not brought out with any delight in their manifestation, or intention of display, but flashing out occasionally in a word or a look.”

Pretty close, that, and full, to be seen at a first glimpse, and set down the same evening.

Curiously, the drawing of Kenilworth was one of those that came out of Mr. Griffith’s folio after dinner; and I believe I must have talked some folly about it, as being “a leading

---

\*Meaning, I suppose, knowledge of what could rightly be represented or composed as a scene.

one of the England series ;" which would displease Turner greatly. There were few things he hated more than hearing people gush about particular drawings. He knew it merely meant they could not see the others.

Anyhow, he stood silent ; the general talk went on as if he had not been there. He wished me good-night kindly, and I did not see him again till I came back from Rome.

If he had but asked me to come and see him the next day ! shown me a pencil sketch, and let me see him lay a wash ! He would have saved me ten years of life, and would not have been less happy in the close of his own. One can only say, Such things are never to be ; every soul of us has to do its fight with the Untoward, and for itself discover the Unseen.

So here I was at Leamington, trying to paint twilight at Amboise, and meditating over the "Poissons Fossiles," and Michael Angelo. Set free of the Parade, I went to stay a few days with my college tutor, Walter Brown, Rector now of "Wendlebury," a village in the flats, eleven miles north of Oxford. Flats, not marshes : wholesome pastoral fields, separated by hedges ; here and there a haystack, a gate, or a stile. The village consisted of twelve or fifteen thatched cottages, and the Rectory. The Rectory was a square house, with a garden fifty yards square. The church, close by, about four yards high by twenty yards long, had a square tower at the end, and a weather-cock.

Good Mr. Walter Brown had married an entirely worthy, very plain, somewhat middle-aged wife, and settled himself down, with all his scholarship and good gifts, to promote the spiritual welfare of Wendlebury. He interested himself entirely in that object ; dug his garden himself ; took a scholar or two to prepare for Oxford examinations, with whom in the mornings he read in the old way ; studied the "Natural History of Enthusiasm," and was perfectly happy and contented, to the end of his time.

Finding him proud of his little church and its weather-cock, I made a drawing of it for him, in my best manner, at sunset, with a moonrise behind. He objected a little to having the sky upside down, with the darkest blue at the bot-

tom, to bring out the church ; but somehow, everybody at this time had begun to believe in me, and think I knew more about drawing than other people : and the meekness with which Mr. Brown would listen to me lecturing on Michael Angelo, from a series of outlines of the Last Judgment which I had brought from Rome, with the muscles engraved all over the bodies like branch railroads, remains wholly phenomenal and mystic in my memory. Nobody is ever the least meek to me now, when I *do* know something about it.

But Mr. Brown and his wife were in all ways extremely kind to me, and seemed to like having me with them. It was perhaps only their only politeness : I can neither fancy nor find anything in myself at this time which could have been pleasant to anybody, unless the mere wish to be pleasant, which I had always ; seeking to say, so far as I could honestly, what would be agreeable to whomsoever I spoke to.

From Wendlebury I went home, and made final preparation, with Gordon's help, for taking my degree in the spring. I find entry on Nov. 16th, 1841, at Herne Hill, "I have got my rooms in order at last ; I shall set to work on my reading to-morrow, methodically, but not hard." Setting my rooms in order has, throughout life, been an occasionally complacent recreation to me ; but I have never succeeded in keeping them in order three days after they were in it.

On the day following comes this : "Mem., why is hoarfrost formed in larger crystals on the ribs and edges of leaves than in other places ?" (on other parts of the leaf, I meant)—question which I had thought asked for the first time in my ice-study of '79, and which is not answered yet.

The entry next day is also worth copying : "Read the Clementina part of 'Sir Charles Grandison.' I never met with anything which affected me so powerfully ; at present I feel disposed to place this work above all other works of fiction I know. It is very, very grand ; and has, I think, a greater practical effect on me for good than anything I ever read in my life."

I find my first lessons from Harding were also at this time ; very delightful for what they were worth, though I saw well

enough his shortcomings. But it was lovely to see him draw, in his own way, and up to a certain point. His knowledge of tree form was true, and entirely won for himself, with an honest original perception. Also, he was a violent hater of the old Dutch school, and I imagine the first who told me that they were "sots, gamblers, and debauchees, delighting in the reality of the alehouse more than in its pictures." All which was awakening and beneficial to no small extent.

And so the year 1842 dawned for me, with many things in its morning cloud. In the early spring of it, a change came over Turner's mind. He wanted to make some drawings to please himself; but also to be paid for making them. He gave Mr. Griffith fifteen sketches for choice of subject by any one who would give him a commission. He got commissions for nine, of which my father let me choose at first one, then was coaxed and tricked into letting me have two. Turner got orders, out of all the round world besides, for seven more. With the sketches, four finished drawings were shown for samples of the sort of thing Turner meant to make of them, and for immediate purchase by anybody.

Among them was the "Splugen," which I had some hope of obtaining by supplication, when my father, who was travelling, came home. I waited dutifully till he should come. In the meantime it was bought, with the loveliest "Lake Lucerne," by Mr. Munro of Novar.

The thing became to me grave matter for meditation. In a story by Miss Edgeworth, the father would have come home in the nick of time, effaced Mr. Munro as he hesitated with the "Splugen" in his hand, and given the dutiful son that, and another. I found, after meditation, that Miss Edgeworth's way was not the world's, nor Providence's. I perceived then, and conclusively, that if you do a foolish thing, you suffer for it exactly the same, whether you do it piously or not. I knew perfectly well that this drawing was the best Swiss landscape yet painted by man; and that it was entirely proper for *me* to have it, and inexpedient that anybody else should. I ought to have secured it instantly, and begged my father's pardon, tenderly. He would

have been angry, and surprised, and grieved; but loved me none the less, found in the end I was right, and been entirely pleased. I should have been very uncomfortable and penitent for a while, but loved my father all the more for having hurt him, and, in the good of the thing itself, finally satisfied and triumphant. As it was, the "Splugen" was a thorn in both our sides, all our lives. My father was always trying to get it; Mr. Munro, aided by dealers, always raising the price on him, till it got up from 80 to 400 guineas. Then we gave it up,—with unspeakable wear and tear of best feelings on both sides.

And how about "Thou shalt not covet," etc.? Good reader, if you ask this, please consult my philosophical works. Here, I can only tell you facts, whether of circumstance or law. It is a law that if you do a foolish thing you suffer for it, whatever your motive. I do not say the motive itself may not be rewarded or punished on its own merits. In this case, nothing but mischief, as far as I know, came of the whole matter.

In the meantime, bearing the disappointment as best I could, I rejoiced in the sight of the sketches, and the hope of the drawings that were to be. And they gave me much more to think of than my mischance. I saw that these sketches were straight impressions from nature,—not artificial designs, like the Carthages and Romes. And it began to occur to me that perhaps even in the artifice of Turner there might be more truth than I had understood. I was by this time very learned in *his* principles of composition; but it seemed to me that in these later subjects Nature herself was composing with him.

Considering of these matters, one day on the road to Norwood, I noticed a bit of ivy round a thorn stem, which seemed, even to my critical judgment, not ill "composed;" and proceeded to make a light and shade pencil study of it in my gray paper pocket-book, carefully, as if it had been a bit of sculpture, liking it more and more as I drew. When it was done, I saw that I had virtually lost all my time since I was twelve years old, because no one had ever told me to

draw what was really there! All my time, I mean, given to drawing as an art; of course I had the records of places, but had never seen the beauty of anything, not even of a stone—how much less of a leaf!

I was neither so crushed nor so elated by the discovery as I ought to have been, but it ended the chrysalid days. Thenceforward my advance was steady, however slow.

This must have been in May, and a week or two afterward I went up for my degree, but find no entry of it. I only went up for a pass, and still wrote Latin so badly that there was a chance of my *not* passing! but the examiners forgave it because the divinity, philosophy, and mathematics were all above the average; and they gave me a complimentary double-fourth.

When I was sure I had got through, I went out for a walk in the fields north of New College, (since turned into the Parks,) happy in the sense of recovered freedom, but extremely doubtful to what use I should put it. There I was, at two and twenty, with such and such powers, all second-rate except the analytic ones, which were as much in embryo as the rest, and which I had no means of measuring; such and such likings, hitherto indulged rather against conscience; and a dim sense of duty to myself, my parents, and a daily more vague shadow of Eternal Law.

What should I be, or do? my utterly indulgent father ready to let me do anything; with my room always luxuriously furnished in his house,—my expenses paid if I chose to travel. I was not heartless enough, yet, to choose to do that, alone. Perhaps it may deserve some dim praise that I never seriously thought of leaving my father and mother to explore foreign countries; and certainly the fear of grieving them was intermingled more or less with all my thoughts; but then, I did not much *want* to explore foreign countries. I had not the least love of adventure, but liked to have comfortable rooms always ordered, and a three-course dinner ready by four o'clock. Although no coward under circumstances of accidental danger, I extremely objected to any vestige of danger as a continuous element in one's life. I would not go

to India for fear of tigers, nor to Russia for fear of bears, nor to Peru for fear of earthquakes; and finally, though I had no rightly glowing or grateful affection for either father or mother, yet as they could not well do without me, so also I found I was not altogether comfortable without *them*.

So for the present, we planned a summer-time in Switzerland, not of travelling, but chiefly stay in Chamouni, to give me mountain air, and the long-coveted power of examining the Mont Blanc rocks accurately. My mother loved Chamouni nearly as much as I; but this plan was of severe self-denial to my father, who did not like snow, nor wooden-walled rooms.

But he gave up all his own likings for me, and let me plan the stages through France as I chose, by Rouen, Chartres, Fontainebleau, and Auxerre. A pencil-sketch or two at first show only want of faith in my old manner, and more endeavor for light and shade, futile enough. The flat cross-country between Chartres and Fontainebleau, with an oppressive sense of Paris to the north, fretted me wickedly; when we got to the Fountain of Fair Water I lay feverishly wakeful through the night, and was so heavy and ill in the morning that I could not safely travel, and fancied some bad sickness was coming on. However, toward twelve o'clock the inn people brought me a little basket of wild strawberries; and they refreshed me, and I put my sketch-book in pocket and tottered out, though still in an extremely languid and woe-begone condition; and getting into a cart-road among some young trees, where there was nothing to see but the blue sky through thin branches, lay down on the bank by the roadside to see if I could sleep. But I couldn't, and the branches against the blue sky began to interest me, motionless as the branches of a tree of Jesse on a painted window.

Feeling gradually somewhat livelier, and that I wasn't going to die this time, and be buried in the sand, though I couldn't for the present walk any farther, I took out my book, and began to draw a little aspen tree, on the other side of the cart-road, carefully.

How I had managed to get into that utterly dull cart-

road, when there were sandstone rocks to be sought for, the Fates, as I have so often to observe, only know; but I was never fortunate enough to find at Fontainebleau any of the sublimities which I hear vaunted by French artists, and which disturbed poor Evelyn's mind nearly as much as the "horrid Alp" of Clifton:—

"7th March (1644). I set forwards with some company towards Fontaine Bleau, a sumptuous palace of the King's like ours at Hampton Court. By the way we passe through a forest so prodigiously encompass'd with hideous rocks of whitish hard stone, heaped one on another in mountainous heights, that I think the like is nowhere to be found more horrid and solitary. On the summit of one of these gloomy precipices, intermingled with trees and shrubs, the stones hanging over and menacing ruin, is built an hermitage."

I believe this passage to be accurately characteristic of the pure English mind about rocks. If they are only big enough to look as if they would break your head if they fell on it, it is all an Englishman asks, or can understand, of them. The modern thirst for self-glorification in getting to the top of them is indeed often accompanied with good interest in geographical and other science; and nice boys and girls *do* enjoy their climbing, and lunching in fields of primula. But I never trace a word in one of their journals of sorrow for the destruction of any Swiss scene or Swiss character, so only that they have their own champagne at lunch.

The "hideous rocks" of Fontainebleau were, I grieve to say, never hideous enough to please me. They always seemed to me no bigger than I could pack and send home for specimens, had they been worth carriage; and in my savage dislike of palaces and straight gravel walks, I never found out the spring which was the soul of the place. And to-day, I missed rocks, palace, and fountain all alike, and found myself lying on the bank of a cart-road in the sand, with no prospect whatever but that small aspen tree against the blue sky.

Languidly, but not idly, I began to draw it; and as I drew, the languor passed away: the beautiful lines insisted on being traced,—without weariness. More and more beautiful

they became, as each rose out of the rest, and took its place in the air. With wonder increasing every instant, I saw that they "composed" themselves, by finer laws than any known of men. At last, the tree was there, and everything that I had thought before about trees, nowhere.

The Norwood ivy had not abased me in that final manner, because one had always felt that ivy was an ornamental creature, and expected it to behave prettily, on occasion. But that all the trees of the wood (for I saw surely that my little aspen was only one of their millions) should be beautiful—more than Gothic tracery, more than Greek vase-imagery, more than the daintiest embroiderers of the East could embroider, or the artfullest painters of the West could limn,—this was indeed an end to all former thoughts with me, an insight into a new sylvan world.

Not sylvan only. The woods, which I had only looked on as wilderness, fulfilled I then saw, in their beauty, the same laws which guided the clouds, divided the light, and balanced the wave. "He hath made everything beautiful, in his time," became for me thenceforward the interpretation of the bond between the human mind and all visible things; and I returned along the wood-road feeling that it had led me far;—farther than ever fancy had reached, or theodolite measured.

To my sorrow, and extreme surprise, I find no diary whatever of the feelings or discoveries of this year. They were too many, and bewildering, to be written. I did not even draw much,—the things I now saw were beyond drawing,—but took to careful botany, while the month's time set apart for the rocks of Chamouni was spent in merely finding out what was to be done, and where. By the chance of guide dispensation, I had only one of the average standard, Michel Devouassoud, who knew his way to the show places, and little more; but I got the fresh air and the climbing; and thought over my Fontainebleau thoughts, by sweeter springs. The entry above quoted (p. 240), of Dec. 11th, the only one I can find of all the year's journeying, is very notable to me, in showing that the impulse which threw the new thoughts into the form of "Modern Painters," came to me in the fulfilment

of the one disagreeable duty I persisted in,—going to church! But it came to me, two years following, in my true mother-town of Geneva.

We went home in 1842 by the Rhine and Flanders: and at Cologne and St. Quentin I made the last drawings ever executed in my old manner. That of the great square at Cologne was given to Osborne Gordon, and remains I believe with his sister, Mrs. Pritchard. The St. Quentin has vanished into space.

We returned once more to the house at Herne Hill, and the lovely drawings Turner had made for me, Ehrenbreitstein and Lucerne, were first hung in its little front dining-room. But the Herne Hill days, and many joys with them, were now ended.

Perhaps my mother had sometimes—at Hampton Court, or Chatsworth, or Isola-Bella—admitted into her quiet soul the idea that it might be nice to have a larger garden. Sometimes a gold-tasselled Oxford friend would come out from Cayendish or Grosvenor Square to see me; and there was only the little back room opposite the nursery for him to wash his hands in. As his bank-balance enlarged, even my father thought it possible that his country customers might be more impressed by enjoying their after-dinner sherry with more room for their legs. And, now that I was of age and B.A. and so on—did not *I* also want a larger house?

No, good reader; but ever since first I could drive a spade, I had wanted to dig a canal, and make locks on it, like Harry in “Harry and Lucy.” And in the field at the back of the Denmark Hill house, now, in this hour of all our weaknesses, offered in temptation, I saw my way to a canal with any number of locks down toward Dulwich.

It is very wonderful to me, looking back, to remember this, and how entirely boyish—and very young-boyish, too—I was still, in all instincts of personal delight; while yet, looking out of myself, I saw farther than Kings of Naples or Cardinals of Rome.

Yet there was much, and very closely balanced, debate, before the house was taken. My mother wisely, though

sadly, said it was too late for her ;—she could not now manage a large garden : and my father, feeling his vanity had more than a word in the matter, besides all that might rightly be alleged of what was now convenient and becoming, hesitated painfully, as he had done about his first Copley Fielding.

But at last the lease of the larger house was bought : and everybody said how wise and proper ; and my mother *did* like arranging the rows of pots in the big greenhouse ; and the view from the breakfast-room into the field was really very lovely. And we bought three cows, and skimmed our own cream, and churned our own butter. And there was a stable, and a farmyard, and a haystack, and a pigsty, and a porter's lodge, where undesirable visitors could be stopped before startling us with a knock. But, for all these things, we never were so happy again. Never any more "at home."

At Champagnole, yes ; and in Chamouni,—in La Cloche, at Dijon,—in Le Cygne, at Lucerne. All these places were of the old time. But though we had many happy days in the Denmark Hill house, none of our new ways ever were the same to us as the old : the basketfuls of peaches had not the flavor of the numbered dozen or score ; nor were all the apples of the great orchard worth a single dishful of the Siberian crabs of Herne Hill.

And I never got my canal dug, after all ! Harry's making the lock-gates himself had indeed always seemed to me too magnificent ! inimitable if not incredible : but also, I had never, till now that the need came, entered into the statistics of water-supply. The gardeners wanted all that was in the butts for the greenhouse. Nothing but a dry ditch, incommo-  
dious to the cows, I saw to be possible, and resigned myself to destiny : yet the bewitching idea never went out of my head, and some water-works, on the model of Fontainebleau, were verily set aflowing—twenty years afterward, as will be told.

The next year, there was travelling enough for us up and down the new garden walks. Also, the first volume of "Modern Painters" took the best of the winter's leisure :

the summer was broken by some formal term-keeping at Oxford. There is nothing in diary worth noting, except a word about Camberwell church window, to which I must return in connection with things yet far ahead.

The said first volume must have been out by my father's birthday ; its success was assured by the end of the year, and on January 1st, 1844, " my father brought me in the 'Slaver' for a New Year's gift,"—knowing well, this time, how to please me. I had it at the foot of my bed next morning, like my own "Loch Achray" of old. But the pleasure of one's own first painting everybody can understand. The pleasure of a new Turner to me, nobody ever will, and it's no use talking of it.

For the second volume, (not meant to be the least like what it is,) I wanted more Chamouni. The journey of 1844 was planned entirely for central Alps, and on June 1st, 1844, we were happy by Lake Lemman shore, again.

---

## CHAPTER V.

### THE SIMPLON.

More and more deeply every hour, in retracing Alpine paths,—by my fireside,—the wonder grows on me, what Heaven made the Alps for, and gave the chamois its foot, and the gentian its blue,—yet gave no one the heart to love them. And in the Alps, why especially that mighty central pass was so divinely planned, yet no one to pass it but against their wills, till Napoleon came, and made a road over it.

Nor often, since, with any joy ; though in truth there is no other such piece of beauty and power, full of human interest of the most strangely varied kind, in all the mountain scenery of the globe, as that traverse, with its two terminal cities, Geneva and Milan ; its two lovely lakes of approach, Lemman and Maggiore ; its two tremendous valleys of vestibule, the Valais and Val d'Ossola ; and its own, not desolate nor terrible, but wholly beautiful, upper region of rose and snow.

Of my early joy in Milan, I have already told ; of Geneva, there is no telling, though I must now give what poor picture I may of the days we spent there, happy to young and old alike, again and again, in '33, '35, '42, and now, with full deliberation, in '44, knowing, and, in their repetitions twice, and thrice, and four times, magnifying, the well-remembered joys. And still I am more thankful, through every year of added life, that I was born in London, near enough to Geneva for me to reach it easily ;—and yet a city so contrary to everything Genevoise as best to teach me what the wonders of the little canton were.

A little canton, four miles square, and which did not wish to be six miles square ! A little town, composed of a cluster of water-mills, a street of penthouses, two wooden bridges, two dozen of stone houses on a little hill, and three or four perpendicular lanes up and down the hill. The four miles of acreage round, in grass, with modest gardens, and farm-dwelling houses ; the people, pious, learned, and busy, to a man, to a woman—to a boy, to a girl, of them ; progressing to and fro mostly on their feet, and only where they had business. And this bird's-nest of a place, to be the centre of religious and social thought, and of physical beauty, to all living Europe ! That is to say, thinking and designing Europe,—France, Germany, and Italy. They, and their pieties, and their prides, their arts and their insanities, their wraths and slaughters, springing and flowering, building and fortifying, foaming and thundering round this inconceivable point of patience : the most lovely spot, and the most notable, without any possible dispute, of the European universe ; yet the nations do not covet it, do not gravitate to it,—what is more wonderful, do not make a wilderness of it. They fight their battles at Chalons and Leipsic ; they build their cotton-mills on the Aire, and leave the Rhone running with a million of Aire power,—all pure. They build their pleasure-houses on Thames shingle, and Seine mud, to look across to Lambeth, and—whatever is on the other side of the Seine. They found their military powers in the sand of Berlin, and leave this precipice-guarded plain in peace. And yet it rules

them,—is the focus of thought to them, and of passion, of science, and of *contrat social* ; of rational conduct, and of decent—and other—manners. Saussure's school and Calvin's,—Rousseau's and Byron's,—Turner's,—

And of course, I was going to say, mine ; but I didn't write all that last page to end so. Yet Geneva had better have ended with educating me and the likes of me, instead of the people who have hold of it now, with their polypous knots of houses, communal with “London, Paris, and New York.”

Beneath which, and on the esplanades of the modern casino, New York and London now live—no more the Genevese. What their home once was, I must try to tell, as I saw it.

First, it was a notable town for keeping all its poor,—inside of it. In the very centre, where an English town has its biggest square, and its Exchange on the model of the Parthenon, built for the sake of the builder's commission on the cost ; there, on their little pile-propped island, and by the steep lane-sides, lived the Genevoise poor ; in their garrets,—their laborious upper spinning or watch-wheel cutting rooms,—their dark niches and angles of lane ; mostly busy ; the infirm and old all seen to and cared for, their porringers filled and their pallet-beds made, by household care.

But, outside the ramparts, no more poor. A sputter, perhaps, southward along the Savoy road ; but in all the champagne round, no mean rows of cubic lodgings with Doric porches ; no squalid fields of mud and thistles ; no deserts of abandoned brickfield and insolvent kitchen garden. On the instant, outside Geneva gates, perfectly smooth, clean, trimmed or prim-walled country roads ; the main broad one intent on far-away things, its signal-posts inscribed “Route de Paris ;” branching from it, right and left, a labyrinth of equally well-kept ways for fine carriage wheels, between the gentlemen's houses with their farms ; each having its own fifteen to twenty to fifty acres of mostly meadow, rich-waving always (in my time for being there) with grass and flowers, like a kaleidoscope. Stately plane trees, aspen and walnut,—sometimes in avenue,—casting breezy, never gloomy, shade round the dwelling-house. A dwelling-house indeed, all the

year round ; no travelling from it to fairer lands possible ; no shutting up for seasons in town ; hay-time and fruit-time, school-time and play, for generation after generation, within the cheerful white domicile with its green shutters and shingle roof,—pinnaced perhaps, humorously, at the corners, glittering on the edges with silvery tin. “Kept up” the whole place, and all the “neighbors” places, not ostentatiously, but perfectly ; enough gardeners to mow, enough vintagers to press, enough nurses to nurse ; no foxes to hunt, no birds to shoot ; but every household felicity possible to prudence and honor, felt and fulfilled from infancy to age.

Where the grounds came down to the waterside, they were mostly built out into it, till the water was four or five feet deep, lapping up, or lashing, under breeze, against the terrace wall. Not much boating ; fancy wherries, unmanageable, or too adventurous, upon the wild blue ; and Swiss boating a serious market and trade business, unfashionable in the high rural empyrean of Geneva. But between the Hôtel des Étrangers, (one of these country-houses open to the polite stranger, some half-mile out of the gates, where Salvador took us in '33 and '35) and the town, there were one or two landing-places for the raft-like flat feluccas ; and glimpses of the open lake and things beyond,—glimpses only, shut off quickly by garden-walls, until one came to the inlet of lake-water moat which bent itself under the ramparts back to the city gate. This was crossed, for people afoot who did not like going round to that main gate, by the delicatest of filiform suspension bridges ; strong enough it looked to carry a couple of lovers over in safety, or a nursemaid and children, but nothing heavier. One was allowed to cross it for a centime, which seemed to me always a most profitable transaction, the portress receiving placidly a sort of dirty flattened sixpence, (I forget its name) and returning me a waistcoat-pocketful of the loveliest little clean-struck centimes ; and then one might stand on the bridge any time, in perfect quiet. (The Genevese didn't like paying the centime, and went round by the gate.) Two swans, drifting about underneath, over a couple of fathoms of purest green water, and

the lake really opening from the moat, exactly where the Chamouni range of aiguilles rose beyond it far away. In our town walks we used always to time getting back to the little bridge at sunset, there to wait and watch.

That was the way of things on the north side ; on the south, the town is still, in the main buildings of it, as then ; the group of officially aristocratic houses round the cathedral and college presenting the same inaccessible sort of family dignity that they do to-day ; only, since then, the Geneva Liberals—— Well, I will not say what they have done ; the main town stands still on its height of pebble-gravel, knit almost into rock ; and still the upper terraces look across the variously mischievous Liberal works to the open southern country, rising in steady slope of garden, orchard, and vineyard—sprinkled with pretty farm-houses and bits of château, like a sea-shore with shells ; rising always steeper and steeper, till the air gets rosy in the distance, then blue, and the great walnut-trees have become dots, and the farmsteads, minikin as if they were the fairy-finest of models made to be packed in a box ; and then, instant—above vineyard, above farmstead, above field and wood, leaps up the Salève cliff, two thousand feet into the air.

I don't think anybody who goes to Geneva ever sees the Salève. For the most part, no English creature ever *does* see farther than over the way ; and the Salève, unless you carefully peer into it, and make out what it is, pretends to be nothing,—a long, low swell like the South Downs, I fancy most people take it for, and look no more. Yet there are few rocks in the high Alps more awful than the “Angle” of the Salève, at its foot—seven Shakespeare's Cliffs set one on the top of another, and all of marble.\*

On the other side of the high town the houses stand closer, leaving yet space for a little sycamore-shaded walk, whence one looks down on the whole southern reach of lake, opening

---

\* Not Parian, indeed, nor Carrara, but an extremely compact limestone, in which the compressed faulted veins are of marble indeed, and polish beautifully.

wide to the horizon, and edged there like the sea, but in the summer sunshine looking as if it was the one well of blue which the sunbeams drank to make the sky of. Beyond it, ghostly ranges of incredible mountains—the Dent d'Oche, and first cliffs toward Fribourg; to the west, the long wave of Jura, fading into the air above Neuchatel.

That was the view for full noon, when the lake was brightest and bluest. Then you fell down a perpendicular lane into the lower town again, and you went to Mr. Bautte's.

Virtually there was no other jeweller in Geneva, in the great times. There were some respectable, uncompetitive shops, not dazzling, in the main street; and smaller ones, with an average supply of miniature watches, that would go well for ten years; and uncostly, but honest, trinketry. But one went to Mr. Bautte's with awe, and of necessity, as one did to one's bankers. There was scarcely any external sign of Bautte whatever—a small brass plate at the side of a narrow arched door, into an alley—into a secluded alley—leading into a monastic courtyard, out of which—or rather out of the alley, where it opened to the court, you ascended a winding stair, wide enough for two only, and came to a green door, swinging, at the top of it; and there you paused to summon courage to enter.

A not large room, with a single counter at the further side. Nothing shown on the counter. Two confidential attendants behind it, and—it might possibly be Mr. Bautte!—or his son—or his partner—or anyhow the Ruling power—at his desk beside the back window. You told what you wanted: it was necessary to know your mind, and to be sure you *did* want it; there was no showing of things for temptation at Bautte's. You wanted a bracelet, a brooch, a watch—plain or enamelled. Choice of what was wanted was quietly given. There were no big stones, nor blinding galaxies of wealth. Entirely sound workmanship in the purest gold that could be worked; fine enamel for the most part, for color, rather than jewels; and a certain Bauttesque subtlety of linked and wreathed design, which the experienced eye recognized when worn in Paris or London. Absolutely just and moderate

price ; wear,—to the end of your days. You came away with a sense of duty fulfilled, of treasure possessed, and of a new foundation to the respectability of your family.

You returned into the light of the open street with a blissful sense of a parcel being made up to be sent after you, and in the consequently calm expatiation of mind, went usually to watch the Rhone.

Bautte's was in the main street, out of which one caught glimpses, down the short cross ones of the passing water, as at Sandgate, or the like fishing towns, one got peeps of the sea. With twenty steps you were beside it.

For all other rivers there is a surface, and an underneath, and a vaguely displeasing idea of the bottom. But the Rhone flows like one lambent jewel ; its surface is nowhere, its ethereal self is everywhere, the iridescent rush and translucent strength of it blue to the shore, and radiant to the depth.

Fifteen feet thick, of not flowing, but flying water ; not water, neither,—melted glacier, rather, one should call it ; the force of the ice is with it, and the wreathing of the clouds, the gladness of the sky, and the continuance of Time.

Waves of clear sea, are, indeed, lovely to watch, but they are always coming or gone, never in any taken shape to be seen for a second. But here was one mighty wave that was always itself, and every fluted swirl of it, constant as the wreathing of a shell. No wasting away of the fallen foam, no pause for gathering of power, no helpless ebb of discouraged recoil ; but alike through bright day and lulling night, the never-pausing plunge, and never-fading flash, and never-hushing whisper, and, while the sun was up, the ever-answering glow of unearthly aquamarine, ultramarine, violet-blue, gentian-blue, peacock-blue, river-of-paradise blue, glass of a painted window melted in the sun, and the witch of the Alps flinging the spun tresses of it for ever from her snow.

The innocent way, too, in which the river used to stop to look into every little corner. Great torrents always seem angry, and great rivers too often sullen ; but there is no anger, no disdain, in the Rhone. It seemed as if the moun-

tain stream was in mere bliss at recovering itself again out of the lake-sleep, and raced because it rejoiced in racing, fain yet to return and stay. There were pieces of wave that danced all day as if Perdita were looking on to learn; there were little streams that skipped like lambs and leaped like chamois; there were pools that shook the sunshine all through them, and were rippled in layers of overlaid ripples, like crystal sand; there were currents that twisted the light into golden braids, and inlaid the threads with turquoise enamel; there were strips of stream that had certainly above the lake been mill-streams, and were looking busily for mills to turn again; there were shoots of stream that had once shot fearfully into the air, and now sprang up again laughing that they had only fallen a foot or two;—and in the midst of all the gay glittering and eddied lingering, the noble bearing by of the midmost depth, so mighty, yet so terrorless and harmless, with its swallows skinning instead of petrels, and the dear old deceptit town as safe in the embracing sweep of it as if it were set in a brooch of sapphire.

And the day went on, as the river; but I never felt that I wasted time in watching the Rhone. One used to get giddy sometimes, or discontentedly envious of the fish. Then one went back for a walk in the penthouse street, long ago gone. There was no such other street anywhere. Penthouses five stories high, not so much for the protection of the people in the street as to keep the splash of heavy rain from the house windows, so that these might be the more safely open. Beam-pillars of squared pine, with one cross-tie beam, the undecorative structural arrangement, Swiss to the very heart and pitch of it, picturesque in comfort, stately and ancient without decay, and rough, here in mid Geneva, more than in the hill solitudes.

We arrived at Geneva on 1st June, 1844, with plan of another month at Chamouni; and fine things afterward, which also came prosperously to pass. I had learned to draw now with great botanical precision; and could color delicately, to a point of high finish. I was interested in everything, from clouds to lichens. Geneva was more wonderful to me, the

Alps more living and mighty, than ever; Chamouni more peaceful.

We reached the Prieuré on the 6th June, and found poor Michel Devouassoud's climbing days ended. He had got a chill, and a cough; medicined himself with absinthe, and was now fast dying. The body of guides had just sustained a graver loss, by the superannuation, according to law, in his sixtieth year, of Joseph Couttet, the Captain of Mont Blanc, and bravest at once and most sagacious of the old school of guides. Partly in regard for the old man, partly in respect for us, now favorably known in Chamouni, the law was relaxed by the Chef des Guides in our favor, and Couttet came to us on the morning of the 7th of June. My father explained to him that he wanted me taken charge of on the hills, and not permitted in any ambitious attempts, or taken into any dangerous places; and that, from what he had heard of Couttet's trustworthiness, and knowledge of his mountain, he had no doubt that I should be safe with him, and might learn more under his tutelage, in safety, than by the most daring expeditions under inferior masters. Couttet said little, but accepted the charge with a kindly glitter in his eyes, and a cheerful word or two, signifying that my father need not fear for me; and we set out together for the base of the Buet,—I on muleback, he walking.

For thirty years he remained my tutor and companion. Had he been my drawing-master also, it would have been better for me: if my work pleased Couttet, I found afterward it was always good; and he knew perfectly when I was trying vainly to do what I could not, or foolishly what no one else would care for.

The month at Chamouni, however, passed with his approval, and to my perfect benefit. I made two foreground studies in color, of considerable beauty; and, under his teaching, began to use my alpenstock easily, and to walk with firmness.

Of our habitual Chamouni life—papa's, mamma's, and mine—I shall give account further on: I take from this year's diary only the note on first reaching the bases of the aiguilles.

“At last, on steep inclined planes of snow, reached the base

of the little Charmoz ; but was amazed to find that the size of the aiguilles seemed to diminish with every step of approach, after a certain point, and that, thus seen (the aiguille) Blaitière, though still 3,000 feet above us, looked a mere rock, ascendable in a quarter of an hour. Of course, after being used to the higher rocks, one begins to measure them in their own way ; but where there is nothing to test scale—where the air is perfectly mistless, and the mountain masses are divided into sheets whose *edges* are the height of Dover cliffs, it is impossible effectually to estimate their magnitude but by trying them.”

This bit of moonlight is perhaps worth keeping : “28th June, half-past ten.—I never was dazzled by moonlight until now ; but as it rose from behind the Mont Blanc du Tacul, the full moon almost blinded me : it burst forth into the sky like a vast star. For an hour before, the aiguilles had appeared as dark masses against a sky looking as transparent as clear sea, edged at their summits with fleeces of cloud breaking into glorious spray and foam of white fire. A meteor fell over the Dôme as the moon rose : now it is so intensely bright that I cannot see the Mont Blanc underneath it ; the form is lost in its light.”

Many and many an hour of precious time and perfect sight was spent, during these years, in thus watching skies ; much was written which would be useful—if I took a year to put it together,—to myself ; but, in the present smoky world, to no other creature : and much was learned, which is of no use now to anybody ; for to me it is only sorrowful memory, and to others, an old man’s fantasy.

We left Chamouni on 4th July ; on the 8th I find this entry at St. Gingolph : “We dined late, which kept me later from my walk than I like, and it was wet with recent rain ; but the glades of greensward under groves of Spanish chestnut all the greener for it. Such richness I never saw in Italy ; the hay just cut, leaving the grass crisp and short ; the gray trauks and rich leaves mixed with mossy rock, and the cliffs above, nobler than Amalfi : the sunset sent down rays of opaque gold between me and the Jura, bringing out the suc-

cessive rises of the Pays de Vaud: the Jura a golden shadow, sharp-edged and baseless in the sky."

Hence, we crossed the Simplon to Baveno and back,—for the Simplon's and Lago Maggiore's sake only.

"Baveno, July 12th.—I have more feeling for Italy than ever, but it makes me deeply sad. The vines and pasture about this place make it a Paradise; the people are fine-featured, and singularly graceful in motion; but there is every appearance of hopeless vice. Four men have been playing cards and drinking, without stirring, in the inn-yard since twelve o'clock (noon. I had come in from an evening walk), and the gardens and enclosed spots of ground are foul as dunghills. The Isola Bella is fast going to decay—all the stucco of it green, damp, shattered, covered with weeds and dead leaves; yet the flowers and foliage of surpassing beauty."

And to this day, the uselessness of San Carlo's memory is to me one of the entirely wonderfulest things in Catholic history;—that Rome should go on sending missionaries to China, and, within a thousand yards across the water from St. Carlo's isle, leave the people of her own Italy's Garden of Eden in guilt and misery. I call the Lago Maggiore district the Eden of Italy; for there are no solfataras there, no earthquakes, no pestiferous marsh, no fever-striking sunshine. Purest air, richest earth, loveliest wave; and the same noble race that founded the architecture of Italy at Como.

Left to die, like the green lizards, in the blind clefts of their rocks, whence they see no God.

"Village of Simplon, 15th June.—At eight this evening I was sitting on the highest col of the Simplon, watching the light die on the Breithorn; nothing round me but rock and lichen, except one purple flower," (colored and very accurate drawing, at the side, of *Linaria Alpina*.) "and the forget-me-not, which grows everywhere. My walk home was very lovely, star after star coming out above my head, the white hills gleaming among them; the gulph of pines, with the torrent, black and awful below; lights breaking softly through cottage windows.

“Cassiopeia is rising above a piny mountain, exactly opposite my window.”

The linaria must have been brought “home” (the Simplon village inn was already more that to me than ever Denmark Hill), and painted next morning—it could not have been so rightly colored at night; also the day had been a heavy one. At six, morning, I had visited Signor Zanetti, and reviewed his collection of pictures on Isola Pescatore; walked up most of the defile of Gondo; and the moment we got to the Simplon village, dashed off to catch the sunset from the col; five miles up hill against time, (and walk against time up a regular slope of eight feet in the hundred is the most trying foot-work I know,) five miles back under the stars, with the hills not *under* but *among* them, and careful entry, of which I have only given a sentence, make up a day which shows there was now no farther need to be alarmed about my health. My good father, who was never well in the high air, and hated the chills from patches of melting snow, stayed, nevertheless, all next day at the village, to let me climb the long-coveted peak west of the Simplon col, which forms the great precipice on the Brieg side. “It commanded the Valais far down, the Bernese Alps in their whole extent, and two great mountains beyond the valley of Saas.” These were the Weisshorn, and lower peak near Zermatt.

That evening James Forbes and his wife were with us in the otherwise untenanted *salle-à-manger* (see “Deucalion,” Chap. X.), and next morning, the 17th, “I set off at six to visit the Père Barras, formerly Clavendier of the great St. Bernard, now at the monastery of the Simplon.” “On the Sempione,” (I meant the Fletsch-horn,) “a field of cirri, bounded by a contour like that of common cirrostrati, convex and fishy, but composed of the most exquisite sandy and silky forms, all in most rapid motion, but forming and vanishing, as usual, exactly at the same point, so that the mass was stationary. Reached the col in two hours of very slow walking, and breakfasted with the Father. He showed me the spot where the green actynolite is found, directly behind the convent. One of his dogs saw him with his hat on, and waited

in the passage, barking furiously with delight. He parted from me half a mile down on this side (Brieg side), and I waited at the second gallery for the carriage."

"19th July, Zermatt.—Clouds on the Matterhorn all day till sunset, when there were playing lights over the sky, and the Matterhorn appeared in full ruby, with a wreath of crimson cloud drifting from its top."

That day Gordon was to come up from Chamouni to meet us; he had slept at Visp, and was first at Zermatt. Just as we came in sight of the Matterhorn he met us, with his most settledly practical and constitutional face—

"Yes, the Matterhorn is all very fine; but do you know there's nothing to eat?"

"Nonsense; we can eat anything here."

"Well, the black bread's two months old, and there's nothing else but potatoes."

"There must be milk, anyhow."

Yes, there was milk, he supposed.

"You can sop your bread in it then; what could be nicer?"

But Gordon's downcast mien did not change; and I had to admit myself, when supper-time came, that one might almost as hopelessly have sopped the Matterhorn as the loaf.

Thus the Christian peasant had lived in the Alps, unthought of, for two thousand years—since Christ broke bread for His multitude; and lived thus under the direct care of the Catholic Church—for Sion, the capital of the Valais, is one of the grandest of old bishoprics; and just below this valley of black bread, the little mountain towns of Visp and Brieg are more groups of tinkling towers and convent cloisters than civic dwelling-places. As for the Catholic State, for a thousand years, while at every sunset Monte Rosa glowed across the whole Lombard plain, not a Lombard noble knew where the mountain was.

Yet, it may be, I err in my pity. I have many things yet to say of the Valais; meantime this passage from Saussure records a social state in 1796, which, as compared with that of

the poor in our great capitals, is one neither of discomfort nor disgrace :

“ La sobriété, compagne ordinaire de l’amour du travail, est encore une qualité remarquable des habitants de ces vallées. Ce pain de seigle, dont j’ai parlé, qu’on ne mange que six mois après qu’il est cuit, on le ramollit dans du petit lait ou dans du lait de beurre, et cette espèce de soupe fait leur principale nourriture ; le fromage et un peu de vieille vache ou de chèvre salées, se réservent pour les jours de fête ou pour les temps de grands travaux ; car pour la viande fraîche, ils n’en mangent jamais, c’est un mets trop dispendieux. Les gens riches du pays vivent avec la même économie ; je voyois notre hôte de Macugnaga, qui n’étoit rien moins que pauvre, aller tous les soirs prendre, dans un endroit fermé à clef, une pincée d’aulx dont il distribuoit gravement une gousse à sa femme, et autant à chacun de ses enfants, et cette gousse d’ail étoit l’assaisonnement unique d’un morceau de pain sec qu’ils brisoient entre deux pierres, & qu’ils mangeoient pour leur souper. Ceux d’entr’eux qui négocient au-dehors, viennent au moins une fois tous les deux ans passer quelques mois dans leur village ; et quoique hors de chez eux ils prennent l’habitude d’une meilleure nourriture, ils se remettent sans peine à celle de leur pays, et ne le quittent qu’avec un extrême regret ; j’ai été témoin d’un ou deux de ces départs, qui m’ont attendri jusqu’aux larmes.”

By the morning, however, our hosts had found some meat for the over-greedy foreigners, and the wine was good enough ; but it was no place for papa and mamma to stay in ; and, bravado apart, I liked black bread no better than they. So we went up to the Riffelberg, where I saw that on the north Monte Rosa was only a vast source of glacier, and, as a mountain, existed only for the Italian side ; the Matterhorn was too much of an Egyptian obelisk to please me (I trace continually the tacit reference in my Cumberland-built soul to moorish Skiddaw and far-sweeping Saddleback as the proper types of majestic form) ; and I went down to Visp again next day without lamentation : my mother, sixty-three on next 2d September, walking with me the ten miles from St. Nicholas to Visp

as lightly as a girl. And the old people went back to Brieg with me, that I might climb the Bell Alp (then unknown), whence I drew the panorama of the Simplon and Bernese range, now in Walkley Museum. But the more I got, the more I asked. After drawing the Weisshorn and Aletsch-horn, I wanted to see the Aiguille Verte again, and was given another fortnight for Chamouni; the old people staying at the Trois Couronnes of Vevay. I spent the days usefully, going first up to the base of the Aiguille d'Argentière, which commands the glorious white ocean of the Tours glacier below, and, opposite, the four precipices of the Aiguille Verte on its northeast flank; and that day, 27th July, we saw a herd of more than thirty chamois on the Argentière. "Pour les voir, faut aller où ils sont," said Couttet; and he might have added, where other living things are not; for, whether by shepherd or traveller, the snows round the Aiguilles of Chardonnet and Argentière are the least trodden of all the Mont Blanc fields. The herd was in three groups, twelve in one of them only; and did not put itself to speed, but retired slowly when we got within a quarter of a mile of them, each stopping to look back from the ridge behind which they disappeared.

"Iceland moss" (says the diary), "in enormous quantities among the Alpine roses, above the Argentière glacier—not growing at all, so far as I recollect, but on the hills on the northeast of the valley. Where we took the snow, the top of the glacier" (Tours) "was wreathed in vast surges which took us from twenty minutes to half an hour (each) to climb,—green lovely lakes in their hollows, no crevices." On the 29th July I went up the Buet, and down to Sixt, where I found myself very stiff and tired, and determined that the Alps were, on the whole, best seen from below. And after a walk to the Fer-à-cheval, considering the wild strawberries there to taste of slate, I went rather penitently down to Geneva again.

Feeling also a little ashamed of myself before papa—in the consciousness that all his pining in cold air, and dining on black bread, and waiting, day after day, not without anxiety, while I rambled he knew not whither, had not in the least

advanced the object nearest his heart,—the second volume of “Modern Painters.” I had, on the contrary, been acutely and minutely at work in quite other directions—felt tempted now to write on Alpine botany, or devote myself to painting myrtles and mica-slate for the rest of my days. The Turner charm was indeed as potent as ever; but I felt that other powers were now telling on me besides his,—even beyond his; not in delight, but in vital strength; and that no word more could be written of him, till I had tried the range of these.

It surprises me to find, by entries at Paris (which I was reasonable enough now to bear the sight of again), in August of this year, how far I had advanced in picture knowledge since the Roman days; progress which I see no ground for, and remember no steps of,—except only a lesson given me by George Richmond at one of Mr. Rogers’s breakfasts (the old man used to ask me, finding me always reverent to him, joyful in his pictures, and sometimes amusing, as an object of curiosity to his guests)—date uncertain, but probably in 1842. Until that year, Rubens had remained the type of color power to me, and (p. 222 above) Titian’s flesh tints of little worth! But that morning, as I was getting talkative over the wild Rubens sketch, (War or Discord, or Victory or the Furies, I forget what,) Richmond said, pointing to the Veronese beneath it, “Why are you not looking at this,—so much greater in manner?” “Greater,—how?” I asked, in surprise; “it seems to me quite tame beside the Rubens.” “That may be,” said Richmond, “but the Veronese is true, the other violently conventional.” “In what way true?” I asked, still not understanding. “Well,” said Richmond, “compare the pure shadows on the flesh, in Veronese, and its clear edge, with Rubens’s ochre and vermilion, and outline of asphalt.”

No more was needed. From that moment, I saw what was meant by Venetian color; yet during 1843, and early 1844, was so occupied with “Modern Painters,” degree-getting, and studies of foliage and foreground, that I cannot understand how I had reached, in picture knowledge, the point shown by these following entries, of which indeed the

first shows that the gain surprised me at the time, but foolishly regards it only as a change coming to pass in the Louvre on the instant, and does not recognize it as the result of growth: the fact being, I suppose, that the habit of looking for true color in nature had made me sensitive to the modesty and dignity of hues in painting also, before possessing no charm for me.

“Aug. 17th.—I have had a change wrought in me, and a strong one, by this visit to the Louvre, and know not how far it may go, chiefly in my full understanding of Titian, John Bellini, and Perugino, and being able to abandon everything for them; or rather, being *unable* to look at anything else.”

I allow the following technical note only for proof of the length I had got to. There shall be no more of the kind let into PRÆTERITA.

“1252 (‘The Entombment’) is the finest Titian in the gallery,—glowing, simple, broad, and grand. It is to be opposed to 1251 (‘The Flagellation’), in which the shades are brown instead of gray, the outlines strong brown lines, the draperies broken up by folds, the lights very round and vivid, and foiled by deep shades, the flesh forms, the brightest lights, and the draperies subdued.

“In 1252 every one of these conditions is reversed. Even the palest flesh is solemn and dark, in juxtaposition with golden white drapery; all the masses broad and flat, the shades gray, the outlines chaste and severe. It may be taken as an example of the highest dignity of expression wrought out by mere grandeur of color and composition.

“I found myself finally in the Louvre, fixed by this Titian, and turning to it, and to the one (picture), exactly opposite, ‘John and Gentile Bellini,’ by John Bellini. I was a long time hesitating between this and Raphael’s dark portrait; but decided for the John Bellini.

“Aug. 18th.—To-morrow we leave. I have been watching the twilight on the Tuileries, which was very grand and clear; and planning works. I shall try to paint a Madonna some day, I believe.”

## CHAPTER VI.

## THE CAMPO SANTO.

The summer's work of 1844, so far from advancing the design of "Modern Painters," had thrown me off it—first into fine botany, then into difficult geology, and lastly, as that entry about the Madonna shows, into a fit of figure study which meant much. It meant, especially, at last some looking into ecclesiastical history,—some notion of the merit of fourteenth century painting, and the total abandonment of Rubens and Rembrandt for the Venetian school. Which, the reader will please observe, signified not merely the advance in sense of color, but in perception of truth and modesty in light and shade. And on getting home, I felt that in the cyclone of confused new knowledge, this was the thing first to be got firm.

Scarcely any book writing was done that winter,—and there are no diaries; but, for the first time, I took up Turner's "Liber Studiorum" instead of engravings; mastered its principles, practised its method, and by spring-time in 1845 was able to study from nature accurately in full chiaroscuro, with a good frank power over the sepia tinting.

I must have read also, that winter, Rio's "Poésie Chrétienne," and Lord Lindsay's introduction to his "Christian Art." And perceiving thus, in some degree, what a blind bat and puppy I had been, all through Italy, determined that at least I must see Pisa and Florence again before writing another word of "Modern Painters."

How papa and mamma took this new vagary, I have no recollection; resignedly, at least: perhaps they also had some notion that I might think differently, and it was to be hoped in a more orthodox and becoming manner, after another sight of the Tribune. At all events, they concluded to give me my own way entirely this time; and what time I chose. My health caused them no farther anxiety; they could trust my word to take care of myself every day, just the same as if I

were coming home to tea : my mother was satisfied of Couttet's skill as a physician, and care, if needed, as a nurse ;—he was engaged for the summer in those capacities,—and, about the first week in April, I found myself dining on a trout of the Ain, at Champagnole ; with Switzerland and Italy at my feet—for to-morrow.

Curiously, the principal opposition to this unprincipled escapade had been made by Turner. He knew that one of my chief objects was to see the motives of his last sketches on the St. Gothard ; and he feared my getting into some scrape in the then disturbed state of the cantons. He had probably himself seen some of their doings in 1843, when “*la vieille Suisse prit les armes, prévint les Bas Valaisans, qui furent vaincus et massacrés au Pont du Trient, près de Martigny ;*” \* and again an expedition of the Corps Francs of the liberal cantons “*pour expulser les Jésuites, et renverser le gouvernement,*” at Lucerne, had been summarily “*renversée*” itself by the Lucernois, 8th December, 1844, only three months before my intended start for the Alps. Every time Turner saw me during the winter, he said something to dissuade me from going abroad ; when at last I went to say good-by, he came down with me into the hall in Queen Anne Street, and opening the door just enough for me to pass, laid hold of my arm, gripping it strongly. “*Why will you go to Switzerland—there'll be such a fidge about you, when you're gone.*”

I am never able to collect myself in a moment, and am simply helpless on any sudden need for decision like this ; the result being, usually, that I go on doing what I meant to do. If I say anything, it is sure to be wrong. I made no answer, but grasped his hand closely, and went. I believe he made up his mind that I was heartless and selfish ; anyhow he took no more pains with me.

As it chanced, even while I sat over my trout at Champagnole, there was another expedition of the Francs Corps—M.

---

\* “*La Suisse Historique,*” par E. H. Gaullieur. Genève, 1855, p. 428.

Gaullieur does not say against whom, but only that it had "une issue encore plus tragique que la première." But there had been no instance of annoyance to English or any other travellers, in all the course of these Swiss squabbles since 1833, in which year—by the way, the first of our journeys—we drove under some posted field-batteries into Basle, just after the fight at Liesthal between the liberal townspeople and Catholic peasants. The landlord of the "Three Kings" had been out; and run—or at least made the best speed he could—three leagues to the town gates.

It was no part of my plan, however, as my parents knew, to enter Switzerland in this spring-time: but to do what I could in Italy first. Geneva itself was quiet enough: Couttet met me there, and next day we drove over the ledges of the Salève, all aglow with primrose and soldanelle, down upon Annecy.

I had with me, besides Couttet, a young servant who became of great use to me in succeeding years; with respect to whom I must glance back at some of the past revolutions in our domestic dynasties. The cook and housemaid at Herne Hill, in its mainly characteristic time—1827–1834—were sisters, Mary and Elizabeth Stone. I have never seen a fillet of veal rightly roasted, nor a Yorkshire pudding rightly basted, since Mary Stone left us to be married in 1836. Elizabeth, also not to be excelled in her line, was yet replaceable, when her career ended in the same catastrophe, by a third younger sister, Hannah; but I can't in the least remember who waited on us, till our perennial parlor-maid, Lucy Tovey, came to us in 1829—remaining with us till 1875. Her sister Harriet replaced Hannah Stone, who must needs be married, like Mary and Elizabeth, in 1834; nor did she leave us till the Denmark Hill household was broken up. But in 1842 another young housemaid came, Anne Hobbs, whose brother John Hobbs, called always at Denmark Hill, George, to distinguish him, in vocal summons, from my father and me, became my body-servant in the same year, and only left me to push his higher fortune in 1854. I could not say before, without interrupting graver matters, that the idea of my not being able to dress myself began at Oxford, where it was thought be-

coming in a gentleman-commoner to have a squire to manage his scout. My good, honest, uninteresting Thomas Hughes, being vigilant that I put my waistcoat on right side outward, went abroad with us, instead of Salvador; my father, after the first two journeys, being quite able to do his courier's work himself. When we came home in '42, Hughes wanted to promote himself to some honor or other in the public-house line, and George Hobbs, a sensible and merry-minded youth of eighteen, came in his stead. Couttet and he sat in the back seat of the light-hooded barouche which I took for this Italian journey; the hood seldom raised, as I never travelled in bad weather unless surprised by it; and the three of us walked that April morning up the Salève slope, and trotted down to Annecy, in great peace of mind.

At Annecy I made the first careful trial of my new way of work. I herewith reproduce the study; it is very pleasant to me still; and certainly any artist who once accustoms himself to the method cannot afterward fall into any mean trickery or dull conventionalism. The outline must be made clearly and quietly, conveying as much accurate information as possible respecting the form and structure of the object; then, in washing, the chiaroscuro is lowered from the high lights with extreme care down to the middle tones, and the main masses left in full shade.

A rhyme written to Mont Blanc at Geneva, and another in vituperation of the idle people at Conflans, were, I think, the last serious exertions of my poetical powers. I perceived finally that I could express nothing I had to say, rightly, in that manner; and the "peace of mind" above referred to, which returns to me as the principal character of this opening journey, was perhaps, in part, the result of this extremely wholesome conclusion.

But also, the two full years, since the flash of volcanic lightning at Naples, had brought me into a deeper and more rational state of religious temper. I can scarcely yet call it religious thought; but the steadily read chapters, morning and evening, with the continual comparison between the Protestant and Papal services every Sunday abroad, made me

feel that all dogmatic teaching was a matter of chance and habit ; and that the life of religion depended on the force of faith, not the terms of it. In the sincerity and brightness of his imagination, I saw that George Herbert represented the theology of the Protestant Church in a perfectly central and deeply spiritual manner : his " Church Porch " I recognized to be blamelessly wise as a lesson to youth ; and the exquisitely faithful fancy of the other poems (in the " Temple ") drew me into learning most of them by heart,—the " Church Porch," the " Dialogue," " Employment," " Submission," " Gratefulness," and, chief favorite, " The Bag,"—deliberately and carefully. The code of feeling and law written in these verses may be always assigned as a standard of the purest unsectarian Christianity ; and whatever has been wisest in thought or happiest in the course of my following life was founded at this time on the teaching of Herbert. The reader will perhaps be glad to see the poem that has been most useful to me, " Submission," in simpler spelling than in the grand editions :

But that Thou art my wisdom, Lord,  
 And both mine eyes are Thine,  
 My mind would be extremely stirred  
 For missing my design.

Were it not better to bestow  
 Some place and power on me ?  
 Then should Thy praises with me grow,  
 And share in my degree.

But when I thus dispute and grieve  
 I do resume my sight,  
 And pilfering what I once did give,  
 Disseize Thee of Thy right.

How know I, if Thou shouldst me raise,  
 That I should then raise Thee ?  
 Perhaps great places and Thy praise  
 Do not so well agree !

Wherefore, unto my gift I stand,  
 I will no more advise ;  
 Only do Thou lend me Thine hand,  
 Since Thou hast both mine eyes.

In these, and other such favorite verses, George Herbert, as aforesaid, was to me at this time, and has been since, useful beyond every other teacher ; not that I ever attained to any likeness of feeling, but at least knew where I was myself wrong, or cold, in comparison. A little more force was also put on Bible study at this time, because I held myself responsible for George's tenets as well as my own, and wished to set him a discreet example ; he being well-disposed, and given to my guidance, with no harm as yet in any of his ways. So I read my chapter with him morning and evening ; and if there were no English church on Sundays, the Morning Service, Litany and all, very reverently ; after which we enjoyed ourselves, each in our own way, in the afternoons, George being always free, and Couttet, if he chose ; but he had little taste for the Sunday promenades in a town, and was glad if I would take him with me to gather flowers, or carry stones. I never, until this time, had thought of travelling, climbing, or sketching on the Sunday : the first infringement of this rule by climbing the isolated peak above Gap, with both Couttet and George, after our morning service, remains a weight on my conscience to this day. But it was thirteen years later before I made a sketch on Sunday.

By Gap and Sisteron to Frejus, along the Riviera to Sestri, where I gave a day to draw the stone-pines now at Oxford ; and so straight to my first fixed aim, Lucca, where I settled myself for ten days,—as I supposed. It turned out forty years.

The town is some thousand paces square ; the unbroken rampart walk round may be a short three miles. There are upward of twenty churches in that space, dating between the sixth and twelfth centuries ; a ruined feudal palace and tower, unmatched except at Verona : the streets clean—cheerfully inhabited, yet quiet ; nor desolate, even now. Two of the churches representing the perfectest phase of round-arched building in Europe, and one of them containing the loveliest Christian tomb in Italy.

The rampart walk, unbroken except by descents and ascents at the gates, commands every way the loveliest ranges of all

the Tuscan Apennine : when I was there in 1845, besides the ruined feudal palace, there was a maintained Ducal Palace, with a living Duke in it, whose military band played every evening on the most floral and peaceful space of rampart. After a well-spent day, and a three-course dinner,—military band,—chains, double braided, of amethyst Apennine linked by golden clouds,—then the mountain air of April, still soft as the marble towers, grew unsubstantial in the starlight,—such the monastic discipline of Lucca to my novitiate mind.

I must stop to think a little how it was that so early as this I could fasten on the tomb of Ilaria di Caretto with certainty of its being a supreme guide to me ever after. If I get tiresome, the reader must skip ; I write, for the moment, to amuse myself, and not him. The said reader, duly sagacious, must have felt, long since, that, though very respectable people in our way, we were all of us definitely vulgar people ; just as my aunt's dog Towzer was a vulgar dog, though a very good and dear dog. Said reader should have seen also that we had not set ourselves up to have "a taste" in anything. There was never any question about matching colors in furniture, or having the correct pattern in china. Everything for service in the house was bought plain, and of the best ; our toys were what we happened to take a fancy to in pleasant places—a cow in stalactite from Matlock, a fisher-wife doll from Calais, a Swiss farm from Berne, Bacchus and Ariadne from Carrara. But, among these toys, principal on the drawing-room chimney-piece, alway put away by my mother at night, and "put out" in the afternoon, were some pieces of Spanish clay, to which, without knowing it, I owed a quantity of strenuous teaching. Native baked clay figures, painted and gilded by untaught persons who had the gift ; manufacture mainly practised along the Xeres coast, I believe, and of late much decayed, but then flourishing, and its work as good as the worker could make it. There was a Don Whiskerandos contrabandista, splendidly handsome and good-natured, on a magnificent horse at the trot, brightly caparisoned : everything finely finished, his gun loose in his hand. There was a lemonade seller, a pomegranate seller, a

matador with his bull—animate all, and graceful, the coloring chiefly ruddy brown. Things of constant interest to me, and altogether wholesome ; vestiges of living sculpture come down into the Herne Hill times, from the days of Tanagra.

For loftier admiration, as before told, Chantrey in Lichfield, Roubilliac in Westminster, were set forth to me, and honestly felt ; a scratched white outline or two from Greek vases on the black Derbyshire marble did not interfere with my first general feeling about sculpture, that it should be living, and emotional ; that the flesh should be like flesh, and the drapery like clothes ; and that, whether trotting contrabandista, dancing girl, or dying gladiator, the subject should have an interest of its own, and not consist merely of figures with torches or garlands standing alternately on their right and left legs. Of “ideal” form and the like, I fortunately heard and thought nothing.

The point of connoisseurship I had reached, at sixteen, with these advantages and instincts, is curiously measured by the criticism of the Cathedral of Rheims in my Don Juan journal of 1835 :

The carving is not rich,—the Gothic heavy,  
 The statues miserable ; not a fold  
 Of drapery well-disposed in all the bevy  
 Of Saints and Bishops and Archbishops old  
 That line the porches gray. But in the nave I  
 Stared at the windows purple, blue, and gold  
 And the perspective’s wonderfully fine  
 When you look down the long columnar line.

By the “carving” I meant the niche work, which is indeed curiously rude at Rheims ; by the “Gothic” the structure and mouldings of arch, which I rightly call “heavy” as compared with later French types ; while the condemnation of the draperies meant that they were not the least like those either of Rubens or Roubilliac. And ten years had to pass over me before I knew better ; but every day between the standing in Rheims porch and by Ilaria’s tomb had done on me some chiselling to the good ; and the discipline from the Fontainebleau time till now had been severe. The accurate

study of tree branches, growing leaves, and foreground herbage, had more and more taught me the difference between violent and graceful lines ; the beauty of Clotilde and Cécile, essentially French-Gothic, and the living Egeria of Araceli, had fixed in my mind and heart, not as an art-ideal, but as a sacred reality, the purest standards of breathing womanhood ; and here suddenly, in the sleeping Ilaria, was the perfectness of these, expressed with harmonies of line which I saw in an instant were under the same laws as the river wave, and the aspen branch, and the stars' rising and setting ; but treated with a modesty and severity which read the laws of nature by the light of virtue.

Another influence, no less forcible, and more instantly effective, was brought to bear on me by my first quiet walk through Lucca.

Hitherto, all architecture, except fairy-finished Milan, had depended with me for its delight on being partly in decay. I revered the sentiment of its age, and I was accustomed to look for the signs of age in the mouldering of its traceries, and in the interstices deepening between the stones of its masonry. This looking for cranny and joint was mixed with the love of rough stones themselves, and of country churches built like Westmoreland cottages.

Here in Lucca I found myself suddenly in the presence of twelfth century buildings, originally set in such balance of masonry, that they could all stand without mortar ; and in material so incorruptible, that after six hundred years of sunshine and rain, a lancet could not now be put between their joints.

Absolutely for the first time I now saw what mediæval builders were, and what they meant. I took the simplest of all façades for analysis, that of Santa Maria Foris-Portam, and thereon literally *began* the study of architecture.

In the third—and, for the reader's relief, last—place in these technical records, Fra Bartolomeo's picture of the "Magdalene, with St. Catherine of Siena," gave me a faultless example of the treatment of pure Catholic tradition by the perfect schools of painting.

And I never needed lessoning more in the principles of the three great arts. After those summer days of 1845, I advanced only in knowledge of individual character, provincial feeling, and details of construction or execution. Of what was primarily right and ultimately best, there was never more doubt to me, and my art-teaching, necessarily, in its many local or personal interests partial, has been from that time throughout consistent, and progressing every year to more evident completion.

The full happiness of that time to me cannot be explained except to consistently hard workers; and of those, to the few who can keep their peace and health. For the world appeared to me now exactly right. Hills as high as they should be, rivers as wide, pictures as pretty, and masters and men as wise—as pretty and wise could be. And I expected to bring everybody to be of my opinion, as soon as I could get out my second volume; and drove down to Pisa in much hope and pride, though grave in both.

For now I had read enough of Cary's "Dante," and Sismondi's "Italian Republics," and Lord Lindsay, to feel what I had to look for in the Campo Santo. Yet at this moment I pause to think what it was that I found.

Briefly, the entire doctrine of Christianity, painted so that a child could understand it. And what a child cannot understand of Christianity, no one need try to.

In these days of the religion of this and that,—briefly let us say, the religion of Stocks and Posts—in order to say a clear word of the Campo Santo, one must first say a firm word concerning Christianity itself. I find numbers, even of the most intelligent and amiable people, not knowing what the word means; because they are always asking how much is true, and how much they like, and never ask, first, what *was* the total meaning of it, whether they like it or not.

The total meaning was, and is, that the God who made earth and its creatures, took at a certain time upon the earth, the flesh and form of man; in that flesh sustained the pain and died the death of the creature He had made; rose again after death into glorious human life, and when the date of the

human race is ended, will return in visible human form, and render to every man according to his work. Christianity is the belief in, and love of, God thus manifested. Anything less than this, the mere acceptance of the sayings of Christ, or assertion of any less than divine power in His Being, may be, for aught I know, enough for virtue, peace, and safety; but they do not make people Christians, or enable them to understand the heart of the simplest believer in the old doctrine. One verse more of George Herbert will put the height of that doctrine into less debatable, though figurative, picture than any longer talk of mine :—

Hast thou not heard that my Lord Jesus died?

Then let me tell thee a strange story.

The God of Power, as he did ride

In his majestic robes of glory,

Resolved to light; and so, one day

He did descend, undressing all the way.

The stars his tire of light, and rings, obtained,

The cloud his bow, the fire his spear,

The heavens his azure mantle gained,

And when they asked what he would wear,

He smiled, and said as he did go,

“He had new clothes a-making, here, below.”

I write from memory; the lines have been my lesson, ever since 1845, of the noblesse of thought which makes the simplest word best.

And the Campo Santo of Pisa is absolutely the same in painting as these lines in word. Straight to its purpose, in the clearest and most eager way; the purpose, highest that can be; the expression, the best possible to the workman according to his knowledge. The several parts of the gospel of the Campo Santo are written by different persons; but all the original frescoes are by men of honest genius. No matter for their names; the contents of this wall-scripture are these.

First, the Triumph of Death, as Homer, Virgil, and Horace thought of death. Having been within sight of it myself, since Oxford days; and looking back already over a little

Campo Santo of my own people, I was ready for that part of the lesson.

Secondly, the story of the Patriarchs, and of their guidance by the ministries of visible angels ; that is to say, the ideal of the life of man in its blessedness, *before* the coming of Christ.

Thirdly, the story of Job, in direct converse with God himself, the God of nature, and without any reference to the work of Christ except in its final surety, " Yet in my flesh I shall see God."

Fourthly, the life of St. Ranier of Pisa, and of the desert saints, showing the ideal of human life in its blessedness *after* the coming of Christ.

Lastly, the return of Christ in glory, and the Last Judgment.

Now this code of teaching is absolutely general for the whole Christian world. There is no papal doctrine, nor antipapal ; nor any question of sect or schism whatsoever. Kings, bishops, knights, hermits, are there, because the painters saw them, and painted them, naturally, as we paint the nineteenth century product of common councilmen and engineers. But they did not conceive that a man must be entirely happy in this world and the next because he wore a mitre or helmet, as we do because he has made a fortune or a tunnel.

Not only was I prepared at this time for the teaching of the Campo Santo, but it was precisely what at that time I needed.

It realized for me the patriarchal life, showed me what the earlier Bible meant to say ; and put into direct and inevitable light the questions I had to deal with, alike in my thoughts and ways, under existing Christian tradition.

Questions clearly not to be all settled in that fortnight. Some, respecting the Last Judgment, such as would have occurred to Professor Huxley,—as for instance, that if Christ came to judgment in St. James's Street, the people couldn't see him from Piccadilly,—had been dealt with by me before now ; but there is one fact, and no question at all, concerning the Judgment, which was only at this time beginning to dawn on me, that men had been curiously judging *themselves* by

always calling the day they expected, "Dies Iræ," instead of "Dies Amoris."

Meantime, my own first business was evidently to read what these Pisans had said of it, and take some record of the sayings; for at that time the old-fashioned ravages were going on, honestly and innocently. Nobody cared for the old plaster, and nobody pretended to. When any dignitary of Pisa was to be buried, they peeled off some Benozzo Gozzoli, or whatever else was in the way, and put up a nice new tablet to the new defunct; but what was left was still all Benozzo, (or repainting of old time, not last year's restoration). I cajoled the Abbé Rosini into letting me put up a scaffold level with the frescoes; set steadily to work with what faculty in outline I had; and being by this time practised in delicate curves, by having drawn trees and grass rightly, got far better results than I had hoped, and had an extremely happy fortnight of it! For as the Triumph of Death was no new thought to me, the life of hermits was no temptation; but the stories of Abraham, Job, and St. Ranier, well told, were like three new—Scott's novels, I was going to say, and will say, for I don't see my way to anything nearer the fact, and the work on them was pure delight. I got an outline of Abraham's parting with the last of the three angels; of the sacrifice of Job; of the three beggars, and a fiend or two, out of the Triumph of Death; and of the conversion of St. Ranier, for which I greatly pitied him.

For he is playing, evidently with happiest skill, on a kind of zithern-harp, held upright as he stands, to the dance of four sweet Pisan maids, in a round, holding each other only by the bent little fingers of each hand. And one with graver face, and wearing a purple robe, approaches him, saying—I knew once what she said, but forget now; only it meant that his joyful life in that kind was to be ended. And he obeys her, and follows, into a nobler life.

I do not know if ever there was a real St. Ranier; but the story of him remained for truth in the heart of Pisa as long as Pisa herself lived.

I got more than outline of this scene: a colored sketch of

the whole group, which I destroyed afterward, in shame of its faults, all but the purple-robed warning figure ; and that is lost, and the fresco itself now lost also, all mouldering and ruined by what must indeed be a cyclical change in the Italian climate : the frescoes exposed to it of which I made note before 1850, seem to me to have suffered more in the twenty years since, than they had since they were painted : those at Verona alone excepted, where the art of fresco seems to have been practised in the fifteenth century in absolute perfection, and the color to have been injured only by violence, not by time.

There was another lovely cloister in Pisa, without fresco, but exquisite in its arched perspective and central garden, and noble in its unbuttressed height of belfry tower ;—the cloister of San Francesco : in these, and in the meadow round the baptistery, the routine of my Italian university life was now fixed for a good many years in main material points.

In summer I have been always at work, or out walking, by six o'clock, usually awake by half-past four ; but I keep to Pisa for the present, where my monkish discipline arranged itself thus. Out, any how, by six, quick walk to the field, and as much done as I could, and back to breakfast at half-past eight. Study bit of Sismondi over bread and butter, then back to Campo Santo, draw till twelve ; quick walk to look about me and stretch my legs, in shade if it might be, before lunch, on anything I chanced to see nice in a fruit shop, and a bit of bread. Back to lighter work, or merely looking and thinking, for another hour and a half, and to hotel for dinner at four. Three courses and a flask of Aleatico, (a sweet, yet rather astringent, red, rich for Italian, wine—provincial, and with lovely basketwork round the bottle). Then out for saunter with Couttet ; he having leave to say anything he had a mind to, but not generally communicative of his feelings ; he carried my sketch-book, but in the evening there was too much always to be hunted out, of city ; or watched, of hills, or sunset ; and I rarely drew,—to my sorrow, now. I wish I knew less, and had drawn more.

Homewards, from wherever we had got to, the moment the

sun was down, and the last clouds had lost their color. I avoided marshy places, if I could, at all times of the day, because I didn't like them; but I feared neither sun nor moon, dawn nor twilight, malaria nor anything else malefic, in the course of work, except only draughts and ugly people. I never would sit in a draught for half a minute, and fled from some sorts of beggars; but a crowd of the common people round me only made me proud, and try to draw as well as I could; mere rags or dirt I did not care an atom for.

As early as 1835, and as late as 1841, I had been accustomed, both in France and Italy, to feel that the crowd behind me was interested in my choice of subjects, and pleasantly applaudive of the swift progress under my hand of street perspectives, and richness of surface decoration, such as might be symbolized by dextrous zigzags, emphatic dots, or graceful flourishes. I had the better pleasure, now, of feeling that my really watchful delineation, while still rapid enough to interest any stray student of drawing who might stop by me on his way to the Academy, had a quite unusual power of directing the attention of the general crowd to points of beauty, or subjects of sculpture, in the buildings I was at work on, to which they had never before lifted eyes, and which I had the double pride of first discovering for them, and then imitating—not to their dissatisfaction.

And well might I be proud; but how much more ought I to have been pitiful, in feeling the swift and perfect sympathy which the "common people"—companion-people I should have said, for in Italy there is no commonness—gave me, in Lucca, or Florence, or Venice, for every touch of true work that I laid in their sight.\* How much more, I say, should it

---

\* A letter, received from Miss Alexander as I correct this proof, gives a singular instance of this power in the Italian peasant. She says:—"I have just been drawing a magnificent Lombard shepherd, who sits to me in a waistcoat made from the skin of a yellow cow with the hairy side out, a shirt of homespun linen as coarse as sailcloth, a scarlet sash, and trousers woven (I should think) from the wool of the black sheep. He astonishes me all the time by the great amount of good advice

have been pitiful to me, to recognize their eager intellect, and delicate senses, open to every lesson and every joy of their ancestral art, far more deeply and vividly than in the days when every spring kindled them into battle, and every autumn was red with their blood : yet left now, alike by the laws and lords set over them, less happy in aimless life than of old in sudden death ; never one effort made to teach them, to comfort them, to economize their industries, animate their pleasures, or guard their simplest rights from the continually more fatal oppression of unprincipled avarice, and unmerciful wealth.

But all this I have felt and learned, like so much else, too late. The extreme seclusion of my early training left me long careless of sympathy for myself ; and that which I gave to others never led me into any hope of being useful to them, till my strength of active life was past. Also, my mind was not yet catholic enough to feel that the Campo Santo belonged to its own people more than to me ; and indeed, I had to read its lessons before I could interpret them. The world has for the most part been of opinion that I entered on the task of philanthropy too soon rather than too late : at all events, my conscience remained at rest during all those first times at Pisa, in mere delight in the glory of the past, and in hope for the future of Italy, without need of my becoming one of her demagogues. And the days that began in the cloister of the Campo Santo usually ended by my getting upon the roof of Santa Maria della Spina, and sitting in the sunlight that transfused the warm marble of its pinnacles, till the unabated brightness went down beyond the arches of the Ponte-a-Mare,—the few footsteps and voices of the twilight fell silent in the streets, and the city and her mountains stood mute as a dream, beyond the soft eddying of Arno.

---

which he gives me about my work ; and always right ! Whenever he looks at my unfinished picture, he can always tell me exactly what it wants."

## CHAPTER VII.

## MACUGNAGA.

When first I saw Florence, in 1840, the great street leading into the Baptistery square from the south had not been rebuilt, but consisted of irregular ancient houses, with far projecting bracketed roofs. I mourned over their loss bitterly in 1845; but for the rest, Florence was still, then, what no one who sees her now could conceive.

For one great feature, an avenue of magnificent cypress and laurel ascended, unbroken, from the Porta Romana to Bellosguardo, from whose height one could then wander round through lanes of olive, or through small rural vineyards, to San Miniato, which stood deserted, but not ruinous, with a narrow lawn of scented herbage before it, and sweet wild weeds about its steps, all shut in by a hedge of roses. The long ascending causeway between smaller cypresses than those of the Porta Romana, gave every conceivably loveliest view of the Duomo, and Cascine forest, and passing away of Arno toward the sunset.

In the city herself, the monasteries were still inhabited, religiously and usefully; and in most of them, as well as among the Franciscans at Fésolo, I was soon permitted to go wherever I liked, and draw whatever I chose. But my time was passed chiefly in the sacristy and choir of Santa Maria Novella, the sacristy of Santa Croce, and the upper passage of San Marco. In the Academia I studied the Angelicos only, Lippi and Botticelli being still far beyond me; but the Ghirlandajos in the choir of Santa Maria Novella, in their broad masses of color, complied with the laws I had learned in Venice, while yet they swiftly and strictly taught me the fine personalities of the Florentine race and art. At Venice, one only knows a fisherman by his net, and a saint by his nimbus. But at Florence, angel or prophet, knight or hermit, girl or goddess, prince or peasant, cannot but be what they are, masque them how you will.

Nobody ever disturbed me in the Ghirlandajo apse. There were no services behind the high altar; tourists, even the most learned, had never in those days heard Ghirlandajo's name; the sacristan was paid his daily fee regularly whether he looked after me or not. The lovely chapel, with its painted windows and companies of old Florentines, was left for me to do what I liked in, all the forenoon; and I wrote a complete critical and historical account of the frescoes from top to bottom of it, seated mostly astride on the desks, till I tumbled off backward one day at the gap where the steps went down, but came to no harm, though the fall was really a more dangerous one than any I ever had in the Alps. The inkbottle was upset over the historical account however, and the closing passages a little shortened,—which saved some useful time.

When the chief bustle in the small sacristy, (a mere cupboard or ecclesiastical pantry, two steps up out of the transept) was over, with the chapel masses of the morning, I used to be let in there to draw the Angelico Annunciation,—about eleven inches by fourteen as far as I recollect, then one of the chief gems of Florence, seen in the little shrine it was painted for, now carried away by republican pillage, and lost in the general lumber of the great pillage-reservoir galleries. The monks let me sit close to it and work, as long as I liked, and went on with their cup-rinsings and cope-foldings without minding me. If any priest of the higher dignities came in, I was careful always to rise reverently, and get his kind look, or bow, or perhaps a stray crumb of benediction. When I was tired of drawing, I went into the Spezieria, and learned what ineffable sweetnesses and incenses were in the herbs and leaves that had gathered the sunbeams of Florence into their life; and bought little bundles of bottles, an inch long, and as thick as a moderately sized quill, with Araby the blest and a spice island or two inside each. Then in the afternoon a bit of street or gallery work, and after dinner, always up either to Fésolo or San Miniato. In those days I think it never rained but when one wanted it to, (and not always then); wherever you chanced to be, if you got tired, and had no

friends to be bothered with, you lay down on the next bank and went to sleep, to the song of the cicadas, which, with a great deal of making believe, might at last, somehow, be thought nice.

I did make one friend in Florence, however, for love of Switzerland, Rudolph Durheim, a Bernese student, of solid bearish gifts and kindly strength. I took to him at first because of a clearly true drawing he had made of his little blue-eyed twelve-years-old simplicity of a goatherd sister; but found him afterward a most helpful and didactic friend. He objected especially to my losing time in sentiment or over-hot vaporization, and would have had me draw something every afternoon, whether it suited my fancy or not. "Ça vaut déjà la peine," said he, stopping on the way to the Certosa, under a group of hillside cottages; it was my first serious lesson in Italian backgrounds; and if we had worked on together, so and so might have happened, as so often aforesaid. But we separated, to our sorrow then, and harm afterward. I went off into higher and vainer vaporization at Venice; he went back to Berne, and under the patronage of its aristocracy, made his black bread by dull portrait-painting to the end of a lost life. I saw the arid remnant of him in his Bernese painting, or daubing, room, many a year afterward, and reproached the heartless Alps, for his sake.

Of other companionship in Florence, except Couttet's, I had none. I had good letters to Mr. Millingen, and of course a formal one to the British Embassy. I called on Mr. Millingen dutifully, but found he knew nothing after the fourth century B.C., and had as little taste for the "Liber Studiorum" as the Abbé Rosini. I waited on the Ambassador, and got him to use British influence enough to let me into the convent of the Magdalen, wherein I have always since greatly praised Perugino's fresco, with a pleasant feeling that nobody else could see it. I never went near the Embassy afterward, nor the Embassy near me, till I sent my P. P. C. card by George, when I was going away, before ten in the morning, which caused Lord ——'s porter to swear fearfully at George and his master both. And it was the last

time I ever had anything to do with Embassies, except through the mediation of pitying friends.

There was yet another young draughtsman in Florence, who lessoned me to purpose—a French youth ;—his family name Dieudonné ; I knew him by no other. He had trained himself to copy Angelico, in pencil tint, wrought with the point, as pure as the down on a butterfly's wing, and with perfect expression : typical engraving in gray, of inconceivable delicacy. I have never seen anything the least approaching it since, but did not then enough know its value. Dieudonné's prices were necessarily beyond those of the water-color copyists, and he would not always work, even when the price was ready for him. He went back to France, and was effaced in the politeness of Paris, as Rudolph in the rudeness of Berne. Hard homes alike, their native cities, to them both.

My own work in Florence, this time, was chiefly thinking and writing—progressive, but much puzzled, and its Epicurean pieties a little too dependent on enamel and gilding. A study in the rose-garden of San Miniato, and in the cypress avenue of the Porta Romana, remain to me, for memorials of perhaps the best days of early life.

Couttet, however, was ill at ease and out of temper in Florence, little tolerant of Italian manners and customs ; and not satisfied that my studies in sacristies and cloisters were wise, or vials of myrrh and myrtle essence as good for me as the breeze over Alpine rose. He solaced himself by making a careful collection of all the Florentine wild-flowers for me, exquisitely pressed and dried,—now, to my sorrow, lost or burned with all other herbaria ; they fretted me by bulging always in the middle, and crumbling, like parcels of tea, over my sketches.

At last the Arno dried up ; or, at least, was reduced to the size of the Effra at Dulwich, with muddy shingle to the shore ; and the gray "pietra serena" of Fésolo was like hot iron in the sun, sprinkled with sand. Also, I had pretty well tired myself out, and, for the present, spent all my pictorial language ;—so that we all of us were pleased to trot over the Apennines, and see the gleam of Monte Rosa again from Pia-

cenza and Pavia. Once it was in sight, I went straight for it, and remember nothing more till we were well afoot in the Val Anzasca.

The afternoon rambles to Fésòle and Bellosguardo, besides having often to stand for hours together writing notes in church or gallery, had kept me in fair training; and I did the twenty miles up hill from Vogogna to Macugnaga without much trouble, but in ever hotter indignation all the way at the extreme dulness of the Val Anzasca, "the most beautiful valley in the Alps"—according to modern guide-books. But tourists who pass their time mostly in looking at black rocks through blue spectacles, cannot be expected to know much about a valley:—on the other hand, ever since the days of Glenfarg and Matlock, I have been a stream-tracker and cliff-hunter, and rank mountains more by the beauty of their glens than the height of their summits: also, it chanced that our three first journeys abroad had shown me the unquestionably grandest defiles of the Alps in succession—first the Via Mala, then the St. Gothard, then the tremendous granites of the Grimsel, then Rosenlauri and Lauterbrunnen, Val d'Aosta and Cormayeur; then the valley of the Inn and precipices of Innsbruck—and at last the Ortlerspitze and descent from the Stelvio to Como; with the Simplon and defile of Cluse, now as well known as Gipsy Hill at Norwood: and the Val Anzasca has no feature whatever in any kind to be matched with any one of these. It is merely a deep furrow through continuous masses of shaly rock, blistered by the sun and rough with juniper, with scattered chestnut-trees and pastures below. There are no precipices, no defiles, no distinct summits on either flank; while the Monte Rosa, occasionally seen at the extremity of the valley, is a mere white heap, with no more form in it than a haycock after a thunder-shower.

Nor was my mind relieved by arrival at Macugnaga itself; I did not then, nor do I yet, understand why the village should have a name at all, more than any other group of half a dozen chalets in a sheltered dip of moorlands. There was a little inn, of which the upper floor was just enough

for the landlord, Couttet, George, and me ;—once, during a month's stay, I remember seeing two British persons with knapsacks at the bottom of the stairs, who must also have slept in the house, I suppose. My own room was about seven feet wide by ten long ; one window, two-feet-six square, at the side, looked straight into the green bank at the bottom of the Monte Moro, and another at the end, looked into vacant sky down the valley. A clear dashing stream, not ice-fed, but mere fountain and rainfall from the Moro, ran past the house just under the side window, and was the chief cause of my stay, and consolation of it. The group of chalets round had no inhabitants, that ever I saw :—the little chapel had a belfry, but I never remember hearing its bell, or seeing anybody go in or come out of it. I don't think even the goats had bells, so quiet the place was. The Monte Rosa glacier, a mile higher up, merely choked the valley ; it seemed to come from nowhere and to be going nowhere ; it had no pinnacles, no waves, no crevasses with action or method of fracture in them ; no icefalls at the top, nor arched source of stream at the bottom ; the sweep of rock above showed neither bedding nor buttressing of the least interest, and gave no impression of having any particular top, while yet the whole circuit of it was, to such poor climbing powers as mine, totally inaccessible, and even unapproachable, but with more trouble than it was worth.

Thus much I made out the first day after arriving, but thought there must be something to see somewhere, if I looked properly about ; also, I had made solemn vows and complex postal arrangements for a month under Monte Rosa, and I stayed my month accordingly, with variously humiliating and disagreeably surprising results.

The first, namely, that mountain air at this height, 4,000 feet for sleeping level, varying to 6,000 or 7,000 feet in the day's walks, was really not good for me, but quickened pulse and sickened stomach, and saddened one's notions alike of clouds, stones, and pastoral life.

The second, that my Florentine studies had not taught me how to draw clouds or stones any better ; that the stream under

my window was no more imitable than the Rhone itself, and that any single boulder in it would take all the month, or it might be, six weeks, to paint the least to my mind.

The third, that Alpine geology was in these high centres of it as yet wholly inscrutable to me.

The fourth, that I was not, as I used to suppose, born for solitude, like Dr. Zimmermann, and that the whole south side of Monte Rosa did not contain as much real and comfortable entertainment for me as the Market Street of Croydon. Nor do I believe I could have stayed out my month at Macugnaga with any consistency, but that I had brought with me a pocket volume of Shakespeare, and set myself for the first time to read, seriously, "Coriolanus" and "Julius Cæsar."

I see that in the earlier passages of this too dimly explicit narrative, no notice is taken of the uses of Shakespeare at Herne Hill, other than that he used to lie upon the table; nor can I the least trace his influence on my own mind or work, except as a part of the great reality and infinity of the world itself, and its gradually unfolding history and law. To my father, and to Richard Gray, the characters of Shakespearian comedy were all familiar personal friends; my mother's refusal to expose herself to theatric temptation began in her having fallen in love, for some weeks, when she was a girl, with Henry the Fifth at the battle of Agincourt; nor can I remember in my own childhood any time when the plots of the great plays were unknown to me, or—I write the word now with more than surprise—misunderstood! I thought and felt about all of them then, just as I think and feel now; no character, small or great, has taken a new aspect to me; and the attentive reading which began first at Macugnaga meant only the discovery of a more perfect truth, or a deeper passion, in the words that had before rung in my ears with too little questioned melody. As for the full contents of any passage, or any scene, I never expected, nor expect, to know them, any more than every rock of Skiddaw, or flower of Jura.

But by the light of the little window at Macugnaga, and by the murmur of the stream beneath it, began the course of

study which led me into fruitful thought, out of the till then passive sensation of merely artistic or naturalist life; and which have made of me—or at least I fain would believe the friends who tell me so—a useful teacher, instead of a vain laborer.

From that time forward, nearly all serious reading was done while I was abroad; the heaviest box in the boot being always full of dictionaries; and my Denmark Hill life resolved itself into the drudgery of authorship and press correction, with infinite waste of time in saying the same things over and over to the people who came to see our Turners.

In calling my authorship drudgery, I do not mean that writing ever gave me the kind of pain of which Carlyle so wildly complains,—to my total amazement and boundless puzzlement, be it in passing said; for he talked just as vigorously as he wrote, and the book he makes bitterest moan over, “Friedrich,” bears the outer aspect of richly enjoyed gossip, and lovingly involuntary eloquence of description or praise. My own literary work, on the contrary, was always done as quietly and methodically as a piece of tapestry. I knew exactly what I had got to say, put the words firmly in their places like so many stitches, hemmed the edges of chapters round with what seemed to me graceful flourishes, touched them finally with my cunningest points of color, and read the work to papa and mamma at breakfast the next morning, as a girl shows her sampler.

“Drudgery” may be a hard word for this often complacent, and entirely painless occupation; still, the best that could be said of it, was that it gave me no serious trouble; and I should think the pleasure of driving, to a good coachman, of ploughing, to a good farmer, much more of dressmaking, to an inventive and benevolent modiste, must be greatly more piquant than the most proudly ardent hours of book-writing have ever been to me, or as far as my memory ranges, to any conscientious author of merely average power. How great work is done, under what burden of sorrow, or with what expense of life, has not been told hitherto, nor is likely to be; the best of late time has been done recklessly or contemptu-

ously. Byron would burn a canto if a friend disliked it, and Scott spoil a story to please a bookseller.

As I have come on the extremely minor question of my own work,\* I may once for all complete all necessary account of it by confession of my evermore childish delight in beginning a drawing; and usually acute misery in trying to finish one. People sometimes praise me as industrious, when they count the number of printed volumes which Mr. Allen can now advertise. But the biography of the waste pencilling and passionately forsaken coloring, heaped in the dusty corners of Brantwood, if I could write it, would be far more pathetically exemplary or admonitory.

And as I transpose myself back through the forty years of desultory, yet careful, reading, which began in my mossy cell of Macugnaga, it becomes a yet more pertinent question to me how much life has been also wasted in that manner, and what was not wasted, extremely weakened and saddened. Very certainly, "Coriolanus" and "Julius Cæsar" did not in the least cheer or strengthen my heart in its Monte-Rosean solitude; and as I try to follow the clue of Shakespearian power over me since, I cannot feel that it has been anywise wholesome for me to have the world represented as a place where, for the best sort of people, everything always goes wrong; or to have my conceptions of that best sort of people so much confused by images of the worst. To have kinghood represented, in the Shakesperian cycle, by Richards II. and III. instead of I., by Henrys IV. and VIII. instead of II.; by King John, finished into all truths of baseness and grief, while Henry V. is only a king of fairy tale; or in the realm of imagination, by the folly of Lear, the cruelty of Leontes, the furious and foul guilt of Macbeth and the Dane. Why must the persons of Iago and Iachimo, of Tybalt and Edmund, of Isabel's brother and Helena's lord, pollute, or wither with their shadows, every happy scene in the loveliest plays; and they, the loveliest, be all mixed and encumbered with languid and common work,—to one's best hope spu-

---

\* *Manner* of work, I mean. How I learned the things I taught is the major, and properly, only question regarded in this history.

rious, certainly, so far as original, idle and disgraceful?—and all so inextricably and mysteriously that the writer himself is not only unknowable, but inconceivable; and his wisdom so useless, that at this time of being and speaking, among active and purposeful Englishmen, I know not one who shows a trace of ever having felt a passion of Shakespeare's, or learnt a lesson from him.

Any way, for good or sorrow, my student's life, instead of mere instinct of rhythmic mimicry, began thus, not till I was six-and-twenty. It is so inconvenient to be always a year behind the Christian date, (and I am really so young of my age!) that I am going to suppose the reader's permission to be only a quarter of a century old at Macugnaga, and to count my years henceforward by the stars instead of the clock.

The month of Rome and Monte Rosa was at least, compared with the days at Florence, a time of rest; and when I got down to Domo d'Ossola again, I was fresh for the expedition in search of Turner's subject at Dazio Grande.

With Couttet and George, and a baggage mule, I walked up the Val Formazza, and across to Airolo; Couttet on this walk first formulating the general principle, "Pour que George aille bien, il faut lui donner à manger souvent; et beaucoup à la fois." I had no objection whatever to this arrangement, and was only sorry my Chamouni tutor could not give the same good report of *me*. But on anything like a hard day's walk, the miles after lunch always seemed to me to become German instead of geographical. And, although, I much enjoyed the Val Formazza all the way up, Airolo next day was found to be farther off than it appeared on the map, and on the third morning I ordered a post-chaise, and gave up my long-cherished idea of making the pedestrian tour of Europe.

The work done at Faido and Dazio Grande is told and illustrated in the fourth volume of "Modern Painters;" it was a little shortened by a letter from J. D. Harding, asking if I would like him to join me at any place I might have chosen for autumn sketching. Very gratefully, I sent word that I

would wait for him at Baveno ; where, accordingly, toward the close of August, we made fraternal arrangements for an Elysian fortnight's floating round Isola Bella. There was a spacious half of seat vacant in my little hooded carriage, and good room for Harding's folios with mine : so we trotted from Baveno to Arona, and from Arona to Como, and from Como to Bergamo, and Bergamo to Brescia, and Brescia to Verona, and took up our abode in the "Two Towers" for as long as we chose.

I do not remember finding in any artistic biography the history of a happier epoch than it was to us both. I am bold to speak for Harding as for myself. Generally, the restlessness of ambition, or the strain of effort, or anxiety about money matters, taint or disturb the peace of a painter's travels : but Harding did not wish, or perhaps think it possible, to do better than, to his own mind, he always did ; while I had no hope of becoming a second Turner, and no thoughts of becoming a thirtieth Academician. Harding was sure of regular sale for his summer's work, and under no difficulty in dividing the hotel bills with me : we both enjoyed the same scenes, though in different ways, which gave us subjects of surprising but not antagonistic talk : the weather was perfect, the roads smooth, and the inns luxurious.

I must not yet say more of Verona, than that, though truly Rouen, Geneva, and Pisa have been the centres of thought and teaching to me, Verona has given the coloring to all they taught. She has virtually represented the fate and the beauty of Italy to me ; and whatever concerning Italy I have felt, or been able with any charm or force to say, has been dealt with more deeply, and said more earnestly, for her sake.

It was only for Harding's sake that I went on to Venice, that year ; and, for the first week there, neither of us thought of anything but the market and fishing boats, and effects of light on the city and the sea ; till, in the spare hour of one sunny but luckless day, the fancy took us to look into the Scuola di San Rocco. Hitherto, in hesitating conjectures of

what might have been, I have scarcely ventured to wish, gravely, that it *had* been. But, very earnestly, I should have bid myself that day keep *out* of the School of St. Roch, had I known what was to come of my knocking at its door. But for that porter's opening, I should (so far as one can ever know what they should) have written, "The Stones of Chamouni," instead of "The Stones of Venice;" and the "Laws of Fésolle," in the full code of them, before beginning to teach in Oxford: and I should have brought out in full distinctness and use what faculty I had of drawing the human face and form with true expression of their higher beauty.

But Tintoret swept me away at once into the "mare maggiore" of the schools of painting which crowned the power and perished in the fall of Venice; so forcing me into the study of the history of Venice herself; and through that into what else I have traced or told of the laws of national strength and virtue. I am happy in having done this so that the truth of it must stand; but it was not my own proper work; and even the sea-born strength of Venetian painting was beyond my granted fields of fruitful exertion. Its continuity and felicity became thenceforward impossible, and the measure of my immediate success irrevocably shortened.

Strangely, at the same moment, another adversity first made itself felt to me,—of which the fatality has been great to many and many besides myself.

It must have been during my last days at Oxford that Mr. Liddell, the present Dean of Christ Church, told me of the original experiments of Daguerre. My Parisian friends obtained for me the best examples of his results; and the plates sent to me in Oxford were certainly the first examples of the sun's drawing that were ever seen in Oxford, and, I believe, the first sent to England.

Wholly careless at that time of finished detail, I saw nothing in the Daguerreotype to help or alarm me; and inquired no more concerning it, until now at Venice I found a French artist producing exquisitely bright small plates, (about four inches square,) which contained, under a lens, the Grand Canal or St. Mark's Place as if a magician had reduced the

reality to be carried away into an enchanted land. The little gems of picture cost a napoleon each ; but with two hundred francs I bought the Grand Canal from the Salute to the Rialto ; and packed it away in thoughtless triumph.

I had no time then to think of the new power, or its meanings ; my days were over-weighted already. Every morning, at six by the Piazza clock, we were moored, Harding and I, among the boats in the fruit-market ; then, after eight o'clock breakfast, he went on his own quest of full subjects, and I to the Scuola di San Rocco, or wherever else in Venice there were Tintorets. In the afternoon, we lashed our gondola to the stern of a fishing-boat, sailing, as the wind served, within or outside the Lido, and sketching the boat and her sails in their varied action,—or Venice, as she shone far away beyond her islands. Back to Danieli's for six-o'clock table d'hôte ; where, after we had got a bit of fish and fillet of any thing, the September days were yet long enough for a sunset walk.

A much regarded friend, Mr. Boxall, R.A., came on to Venice at this time, after finishing at Milan the beautiful drawing from Leonardo's Christ, which was afterward tenderly, though inadequately, engraved. Mrs. Jameson was staying also at Danieli's, to complete her notes on Venetian legends : and in the evening walk we were usually together, the four of us ; Boxall, Harding, and I extremely embarrassing Mrs. Jameson by looking at everything from our pertinaciously separate corners of an equilateral triangle. Mrs. Jameson was absolutely without knowledge or instinct of painting ; and had no sharpness of insight for anything else, but she was candid and industrious, with a pleasant disposition to make the best of all she saw, and to say, compliantly, that a picture was good, if anybody had ever said so before. Her peace of mind was restored in a little while, by observing that the three of us, however separate in our reasons for liking a picture, always fastened on the same pictures to like ; and that she was safe, therefore, in saying that, for whatever other reason might be assigned, other people should like them also.

I got some most refined and right teaching from Mr. Boxall ;

of which I remember as chiefly vital, his swift correction of my misgiven Wordsworth's line—

“So be it when I shall grow old,”

as—

“So shall it be when I grow old.”

I read Wordsworth with better care and profit ever afterward; but there was this much of reason for that particular mistake, that I was perfectly confident in my own heart's love of rainbows to the end, and felt no occasion to wish for what I was so sure would be.

But Mr. Boxall's time, and Harding's, were at end before I had counted and described all the Tintorets in Venice, and they left me at that task, besides trying to copy the Adoration of the Magi on four sheets of brown paper. Things had gone fairly well as long as Harding took me out to sea every afternoon; but now, left to myself, trying to paint the Madonna and Magi in the morning, and peering all the rest of the day into the shadowy corners of chapel and sacristy and palace corridor, beside every narrow street that was paved with waves, my strength began to fail fast. Couttet got anxious, and looked more gravely every morning into my eyes. “Ça ne va pas bien,” said he. “Vous ne le sentirez pas à présent, mais vous le sentirez après.” I finished my list, however, pasted my brown paper into some rude likeness of the picture,—and packed up colors and note-books finally for a rapid run home; when, as so often happens in the first cessation of an overstrain, the day after leaving Venice I was stopped at Padua by a sharp fit of nervous fever.

I call it “nervous,” not knowing what else to call it,—for there was no malarian taint or other malignity in it, but only quick pulse, and depressed spirit, and the nameless ailing of overwearied flesh. Couttet put me to bed instantly, and went out to buy some herb medicines,—which Paduan physicians are wise enough yet to keep,—and made me some tisane, and bade me be patient, and all would be well. And, indeed, next day I was up, in armchair; but not allowed to

stir out of the extremely small back room of the old inn, which commanded view only of a few deep furrowed tiles and a little sky. I sent out George to see if he could find some scrap of picture to hang on the blank wall ; and he brought me a seven-inch-square bit of fifteenth century tempera, a nameless saint with a scarlet cloak and an embossed nimbus, who much comforted me.

I was able to travel in a day or two ; but the mental depression, with some weakness of limb, remained, all across Lombardy, as far as Vogogna, where a frosty morning glittered on the distant Simplon ; and though I could not walk up the pass of Gondo, there was no more sadness in me, afterward, than I suffered always in leaving either Italy or the Alps.

Which, however, in its own kind, became acute again a day or two afterward, when I stopped on a cloudless afternoon at Nyon, where the road branches away for Paris. I had to say good-by to Mont Blanc—there visible in his full cone, through the last gap given by the Chablais mountains as they rise eastward along the lake shore.

Six months before, I had rhymed to his snows in such hope and delight, and assurance of doing everything I wanted, this year at last ; and now, I had only discovered wants that any number of years could not satisfy ; and weaknesses, which no ardor of effort or patience of practice could overcome.

Thus, for the first time, measuring some of the outer bastions of the unconquerable world, I opened my English letters ; which told me that my eldest Croydon cousin, John, in whose prosperity and upward rounding of fortune's wheel all of us had been confident, was dead in Australia.

So much stronger than I, and so much more dutiful, working for his people in the little valley of Wandel, out in the great opposite desolate country ; and now the dust of it laid on him, as on his brother the beach-sand on this side the sea. There was no grief, for me, in his loss, so little had I known, and less remembered, him ; but much awe, and wonder, when all the best and kindest of us were thus struck down, what my own selfish life was to come to, or end in.

With these thoughts and fears fastening on me, as I lost sight first of Mont Blanc, and then of the lines of Jura, and saw the level road with its aisle of poplars in perspective vista of the five days between Dijon and Calais, the fever returned slightly, with a curious tingling, and yet partly, it seemed to me, deadness of sensation, in the throat, which would not move, for better nor worse, through the long days, and mostly wakeful nights. I do not know if diphtheria had been, in those epochs, known or talked of; but I extremely disliked this feeling in the throat, and passed from dislike into sorrowful alarm, (having no Couttet now to give me tisanæ,) and wonder if I should ever get home to Denmark Hill again.

Although the poetical states of religious feeling taught me by George Herbert's rhymes, and the reading of formal petition, whether in psalter or litany, at morning and evening and on Sunday forenoon, were sincere enough in their fanciful or formal ways, no occasion of life had yet put me to any serious trial of direct prayer. I never knew of Jessie's or my aunt's sicknesses, or now of my cousin John's, until too late for prayer; in our own household there had been no instantly dangerous illness since my own in 1835; and during the long threatening of 1841 I was throughout more sullen and rebellious than frightened. But now, between the Campo Santo and Santa Maria Novella, I had been brought into some knowledge of the relations that might truly exist between God and His creatures; and thinking what my father and mother would feel if I did not get home to them through those poplar avenues, I fell gradually into the temper, and more or less tacit offering, of very real prayer.

Which lasted patiently through two long days, and what I knew of the nights, on the road home. On the third day, as I was about coming in sight of Paris, what people who are in the habit of praying know as the consciousness of answer, came to me; and a certainty that the illness, which had all this while increased, if anything, would be taken away.

Certainty in mind, which remained unshaken, through unabated discomfort of body, for another night and day, and

then the evil symptoms vanished in an hour or two, on the road beyond Paris ; and I found myself in the inn at Beauvais entirely well, with a thrill of conscious happiness altogether new to me.

Which, if I had been able to keep!— Another “had been” this, the gravest of all I lost ; the last with which I shall trouble the reader.

That happy sense of direct relation with Heaven is known evidently to multitudes of human souls of all faiths, and in all lands ; evidently often a dream,—demonstrably, as I conceive, often a reality ; in all cases, dependent on resolution, patience, self-denial, prudence, obedience ; of which some pure hearts are capable without effort, and some by constancy. Whether I was capable of holding it or not, I cannot tell ; but little by little, and for little, yet it seemed invincible, causes, it passed away from me. I had scarcely reached home in safety before I had sunk back into the faintness and darkness of the Under-World.

---

## CHAPTER VIII.

### THE STATE OF DENMARK.

The house on Denmark Hill, where my father and mother, in the shortening days of 1845, thankfully received back their truant, has been associated, by dated note-paper, with a quarter of a century of my English life ; and was indeed to my parents a peaceful, yet cheerful, and pleasantly, in its suburban manner, dignified, abode of their declining years. For my father had no possibilities of real retirement in him ; his business was the necessary pride and fixed habit of his soul : his ambition, and what instinct of accumulative gain the mercantile life inevitably begets, were for me only ; but involved the fixed desire to see me moving in the western light of London, among its acknowledged literary orders of merit ; and were totally inconsistent with the thought, faintly and intermittingly haunting my mother and me, that a rose-covered cottage in the dells of Matlock, or the vale of Keswick, might be

nearer the heavenly world, for us, than all the majesty of Denmark Hill, connected though it was, by the Vauxhall Road and convenient omnibuses, with St. James's Street and Cavendish Square.

But the house itself had every good in it, except nearness to a stream, that could with any reason be coveted by modest mortals. It stood in command of seven acres of healthy ground (a patch of local gravel there overlying the London clay); half of it in meadow sloping to the sunrise, the rest prudently and pleasantly divided into an upper and lower kitchen garden; a fruitful bit of orchard, and chance inlets and outlets of woodwalk, opening to the sunny path by the field, which was gladdened on its other side in springtime by flushes of almond and double peach blossom. Scarce all the hyacinths and heath of Brantwood redeem the loss of these to me, and when the summer winds have wrecked the wreaths of our wild roses, I am apt to think sorrowfully of the trailings and climblings of deep purple convolvulus which bloomed full every autumn morning round the trunks of the apple-trees in the kitchen garden.

The house itself had no speciality, either of comfort or inconvenience, to endear it; the breakfast-room, opening on the lawn and farther field, was extremely pretty when its walls were mostly covered with lakes by Turner\* and doves by Hunt; the dining and drawing rooms were spacious enough for our grandest receptions,—never more than twelve at dinner, with perhaps Henry Watson and his sisters in the evening,—and had decoration enough in our Northcote portraits, Turner's "Slave-ship," and, in later years, his "Rialto," with our John Lewis, two Copley Fieldings, and every now and then a new Turner drawing. My own work-room, above the breakfast-room, was only distinct, as being such, in

---

\*Namely, Derwentwater; Lake Lucerne, with the Righi at sunset; the Bay of Uri, with the Rothstock, from above Brunnen; Lucerne itself, seen from the lake; the upper reach of the lake, seen from Lucerne; and the opening of the Lake of Constance, from Constance. Goldau, St. Gothard, Schaffhausen, Coblenz, and Llanthony, raised the total of matchless Turner drawings in this room to eleven.

its large oblong table, occupying so much of the—say fifteen by five and twenty—feet of available space within bookcases, that the rest of the floor virtually was only a passage round it. I always wrote on the flat of the table,—a bad habit, enforced partly by the frequent need of laying drawings or books for reference beside me. Two windows, forming the sides of a bow blank in the middle, gave me, though rather awkwardly crossed, all the light I needed: partly through laziness and make-shiftiness, partly in respect for external symmetry,—for the house had really something of an architectural air at the back,—I never opened the midmost blank wall, though it considerably fretted me: the single window of my bedroom above, looking straight southeast, gave, through the first ten or twelve winters at Denmark Hill, command of the morning clouds, inestimable for its aid in all healthy thought. Papa and mamma took possession of the quiet western rooms, which looked merely into the branches of the cedar on the front lawn.

In such stateliness of civic domicile, the industry of mid-life now began for me, little disturbed by the murmur of London beyond the bridges, and in nowise by any enlargement of neighborly circle on the Hill itself; one family alone excepted, whose affection has not failed me from then till now,—having begun in earlier times, out of which I must yet gather a gleam or two of the tremulous memory.

In speaking of Mr. Dale's school, I named only my younger companions there; of whom Willoughby had gone to Cambridge, and was by this time beyond my ken; but Edward Matson sometimes came yet to dine with us at Denmark Hill, and sometimes carried me down to Woolwich, to spend a day amidst its military displays and arts, with his father, and mother, and two sweet younger sisters. Where I saw, in Major Matson, such calm type of truth, gentleness, and simplicity, as I have myself found in soldiers or sailors only; and so admirable to me that I have never been able, since those Woolwich times, to gather myself up against the national guilt of war, seeing that such men were made by the discipline of it.

But at Mr. Dale's were also two senior pupils, little known to me except, Henry Dart by his large hazel eyes, and Edmund Oldfield by his already almost middle-aged aspect of serene sagacity. When I went to Oxford, I found Dart at Exeter College, where we established poetical friendship, and contended in all honor for the Newdigate, reading our best passages to each other, for improving censure. Dart, very deservedly, won it that year, and gave promise of generous distinction afterward; but the hazel eyes were too bright, and closed, in a year or two, to this world's ambition.

I do not know how it chanced that the art impulse which animated Edmund Oldfield's grave sagacity did not manifest itself to me till much later. He was the elder brother of a large group of clever lads and lasses, amiable in the extreme, yet in a slightly severe and evangelical manner; whose father was in some tangible relation to mine as one of the leading men of business on the Hill; their mother known to us by sight only, as a refined and still beautiful woman,—evangelical *without* severity; both of them occupying, with such of their children as were that way minded, the pew before us in Mr. Burnet's chapel, whereat sometimes in my younger days we went to hear a gloomier divinity than that of my beloved and Anacreontic Doctor Andrews.

We might never have known more of them, unless, among the sacred enthusiasms of Camberwell parish, the fancy had arisen to put a painted window into the east end of the pretty church, just built for it by Mr. Gilbert Scott. Edmund Oldfield, already advanced far beyond me in Gothic art scholarship, was prime mover in the matter, but such rumor as existed in the village of my interest in architecture justified him in expecting some help from me. I had already quite fixed notions of what the color of glass should be, and in these Edmund concurred. The tracery of the east window seemed to us convertible into no dishonoring likeness of something at Rheims or Chartres. Hitherto unconscious of my inability to compose in color, I offered to design the entire window head; and did, after some headstrong toil, actually fill the required spaces with a mosaic presenting

an orthodox cycle of subjects in purple and scarlet, round a more luminous centre of figures adapted from Michael Angelo. Partly in politeness, partly in curiosity, the committee on the window did verily authorize Edmund Oldfield and me to execute this design; and I having fortunately the sense to admit Edmund's representations that the style of Michael Angelo was not exactly adapted to thirteenth century practice, in construction of a vitrail, the central light was arranged by him on more modest lines; and the result proved on the whole satisfactory to the congregation, who thereupon desired that the five vertical lights might be filled in the same manner. I had felt, however, through the changes made on my Michael Angelesque cinquefoil, that Mr. Oldfield's knowledge of Gothic style, and gift in placing color, were altogether beyond mine; and prayed him to carry out the rest of the window by himself. Which he did with perfect success, attaining a delicate brilliancy purer than anything I had before seen in modern glass.

I should have been more crushed by this result, had I not been already in the habit of feeling worsted in everything I tried of original work; while since 1842, I was more and more sure of my faculty of seeing the beauty and meaning of the work of other minds. At this time, I might assuredly have been led by Edmund Oldfield into a study of all the painted glass in England, if only Edmund had been a little more happy in his own power; but I suppose his immediate success was too easy to divert him from the courses of study which afterward gave him his high position in the British Museum, not enough recognized by the public, and, I believe, farther obscured by the ill-humor or temper of Mr. Panizzi. If only—I may still sometimes indulge in a "might have been," for my friends—he had kept to Gothic foils and their glass, my belief is that Edmund Oldfield could have done for England great part of what Viollet le Duc did for France, with the same earnestness, and with thrice the sensibility. But the sensibility taking in him the form of reserve, and the restless French energy being absent, he diffused himself in

serene scholarship till too late, and retired from the collisions and intrigues of the Museum too early.

Our temporary alliance among the tracteries of Camberwell had for immediate consequence to me, an introduction to his family, which broke the monastic laws of Denmark Hill to the extent of tempting me to a Christmas revel or two with his pretty sisters; whereat I failed in my part in every game, and whence I retired in a sack-cloth of humiliation, of which the tissue had at once the weight of a wet blanket, and the sting of horsehair.

I have only once named, among my Christ Church companions, Charles Newton. He was considerably my senior, besides being a rightly bred scholar, who knew his grammar and his quantities; and, while yet an undergraduate, was doing accurately useful work in the Architectural Society. Without rudely depreciating my Proutesque manner of drawing, he represented to me that it did not meet all the antiquarian purposes of that body; and, always under protest, I drew a Norman door for Newton, (as the granite veins of Trewavas Head for Dr. Buckland,) with distinct endeavor to give the substantial facts in each, apparent to the vulgar mind. And if only—once more pardon, good reader, but this is really an “if” that I cannot resist—if only Newton had learnt Irish instead of Greek, Scotch instead of Egyptian, and preferred, for light reading, the study of the Venerable Bede to that of Victor Hugo,—well, the British Museum might have been still habitable; the effigy, as the bones, of Mausolus would have rested in peace; and the British public known more than any Idylls of kings have yet told them, of personages such as Arthur, Alfred, and Charlemagne.

There remained yet some possibilities, even after Charles Newton became Attic and diplomatic, of some heroic attachment between us, in the manner of Theseus and Pirithous. In fact, for some years after my Camberwell window and Campo Santo entanglements, Theseus retained, I believe, some hope of delivering me from those Lethean chains; nor until so late as the year 1850, when, as we crossed the great St. Bernard together, Charles spoke heresies against the Val-

ley of Chamouni, remarking, with respect to its glacial moraines, that "he thought more housemaids were wanted in that establishment," and on the other hand, I expressed myself respecting the virtues of diplomatists, and the value of the opinions of the British Peerage on Art and Science, in a manner which caused Newton to observe (not without foundation) that "there was the making of Robespierre in me,"—not till then, I repeat, did it become clear to either of us that the decisions of Minos were irrevocable.

We yet examined the castle of Verrex together, as once the aisles of Dorchester; and compared in peace, at Milan, the Corinthian graces of St. Lorenzo with the Lombardic monsters of St. Ambrogio. Early the next morning Newton left me, in the *Albergo Reale*, not without inner tears on both sides, and went eastward, I know not where. Ever since, we have been to each other, he as the Heathen, and I as the *Publican*, both of us finding it alike impossible to hear the Church.

The transition to Denmark Hill had, however, in the first pride of it, an advantage also in giving our family Puritanism, promotion to a distinguished pew in *Camden Chapel*, quite near the pulpit. Henry Melvill, afterward Principal of *Haileybury*, was the only preacher I ever knew whose sermons were at once sincere, orthodox, and oratorical on *Ciceronian* principles. He wrote them from end to end with polished art, and read them admirably, in his own manner; by which, though the congregation affectionately expected it, they were always deeply impressed. He arranged his sermon under four or five heads, and brought each in its turn to a vigorously pointed climax, delivering the last words of each paragraph with two or three energetic nods of his head, as if he were hammering that much of the subject into the pulpit cushion with a round-headed mallet.\* Then all the congre-

---

\* The hackneyed couplet of *Hudibras* respecting clerical use of the fist on the pulpit cushion is scarcely understood by modern readers, because of the burlesqued rhythm leaning falsely on the vowel:—

“The pulpit, drum ecclesiastic,  
Is beat with fist instead of a stick.”

gation wiped their eyes, blew their noses, coughed the coughs they had choked over for the last quarter of an hour, and settled themselves to the more devoted acceptance of the next section.

It is the habit of many good men—as it was confessedly, for instance, that of the infant, Samuel, Wilberforce, Bishop of Oxford—not to allow themselves to doubt or question any part of Bible teaching. Henry Melvill, being of the same Episcopal school, and dutifully forbidding himself any dangerous fields of inquiry, explained with accuracy all that was explicable in his text, and argued the inexplicable into the plausible with great zeal and feeling;—always thoroughly convincing himself before he attempted to convince his congregation.

(It may be noted in passing that Dean Stanley, on the other hand, used his plausibility to convince his congregation without convincing himself, or committing himself to anything in particular; while Frederic Maurice secured his audiences' religious comfort, by turning their too thorny convictions the other side up, like railroad cushions.)

---

The couplet, like most of the poem, has been kept in memory more by the humor of its manner than the truth of its wit. I should like myself to expand it into—

The pulpit, drum ecclesiastic,  
Keeps time to truth politely plastic,  
And wakes the Dead, and lulls the Quick,  
As with a death's-head on a stick.

Or, in the longer rhythm of my old diary—

Who, despots of the ecclesiastic drum,  
Roll the rogues' muffled march, to the rogues' "kingdom come."—

For, indeed, since I wrote the paragraph about the pulpit of Torcello, in *The Stones of Venice*, Vol. II., Chap. II., it has become hourly more manifest to me how far the false eloquence of the pulpit—whether Kettledrummle's at Drumclog, with whom it is, in Gibbon's scornful terms, "the safe and sacred organ of sedition," or the apology of hired preachers for the abuses of their day—has excited the most dangerous passions of the sects, while it quenched the refiner's fire and betrayed the reproving power of the gospel.

For the rest, Mr. Melvill was entirely amiable in the Church visitant, though not formidable in the Church militant. There were not many poor in the district to be visited ; but he became at once a kindly and esteemed friend to us, as, for the present, serenely feeding lambs of his flock ; and I shall always remember gratefully the unoffended smile with which one day, when he had called late, and I became restless during his conversation because my dinner was ready, he broke off his talk, and said, "Go to your dinner." I was greatly ashamed of myself for having been so rude ; but went to my dinner,—attended better to Mr. Melvill's preaching ever afterward,—and owe to him all sorts of good help in close analysis, but especially my habit of always looking, in every quotation from the Bible, what goes before it and after.\*

But to these particulars I must return by and by ; for my business in this chapter is only to give account of the materials and mental resources with which, in my new study at Denmark Hill, looking out on the meadow and the two cows, I settled myself, in the winter of 1845, to write, as my father now justly expected me to do without farther excuse, the second volume of "Modern Painters."

It is extremely difficult to define, much more to explain, the religious temper in which I designed that second volume. Whatever I know or feel, now, of the justice of God, the nobleness of man, and the beauty of nature, I knew and felt then, nor less strongly ; but these firm faiths were confused by the continual discovery, day by day, of error or limitation in the doctrines I had been taught, and follies or inconsistencies in their teachers : while for myself, it seemed to me quite sure, since my downfall of heart on last leaving France, that I had no part nor lot in the service or privileges of the saints ; but, on the contrary, had such share only in the things of God, as well-conducted beasts and serenely-minded birds had :

---

\* I have never forgotten his noble sermon, one day, on the folly of reading "Eye hath not seen the things God has prepared for them that love Him," without going on to the end of the verse, "but He hath revealed them unto us by His Spirit."

while, even among the beasts, I had no claim to represent myself figuratively as a lion couchant, or eagle volant, but was, at my best and proudest, only of a doggish and piggish temper, content in my dog's chain, and with my pig's-wash, in spite of Carlyle; and having no mind whatever to win Heaven at the price of conversion like St. Ranier's, or mortification like St. Bruno's.

And that my father much concurred with me in these, partly stubborn, partly modest, sentiments, appeared curiously on the occasion of registering his arms at the Heralds' College for painting, as those of the Bardi, and no more under the Long Acre limitation, "*vix ea nostra*," on the panel of his own brougham. It appeared, on inquiry at the Heralds' Office, that there was indeed a shield appertaining to a family, of whom nothing particular was known, by the name of Rusken: Sable, a chevron, argent, between six lance-heads, argent. This, without any evidence of our relation to the family, we could not, of course, be permitted to use without modification: but the King-at-Arms registered it as ours, with the addition of three crosses crosslets on the chevron, gules, (in case of my still becoming a clergyman!); and we carried home, on loan from the college, a book of crests and mottoes; crests being open to choice in modern heraldry, (if one does not by chance win them,) as laconic expressions of personal character, or achievement.

Over which book, I remember, though too vaguely, my father's reasoning within himself, that a merchant could not with any propriety typify himself by Lord Marmion's falcon, or Lord Dudley's bear; that, though we were all extremely fond of dogs, any doggish crest would be taken for an extremely minor dog, or even puppy, by the public; while vulpine types, whether of heads or brushes, were wholly out of our way; and at last, *faute de mieux*, and with some idea, I fancy, of the beast's resolution in taking and making its own way through difficulties, my father, with the assent, if not support, of my mother and Mary, fixed, forsooth, upon a boar's head, as reasonably proud, without claim to be patrician; under-written by the motto "*Age quod agis*."

Some ten or twelve years, I suppose, after this, beginning to study heraldry with attention, I apprehended that, whether a knight's war-cry, or a peaceful yeoman's saying, the words on the scroll of a crest could not be a piece of advice to other people, but must be always a declaration of the bearer's own mind. Whereupon I changed, on my own seal, the "Age quod agis" into "To-day," tacitly underlined to myself with the warning, "The night cometh, when no man can work."

But as years went on, and the belief in fortune, and fortune-telling, which is finally confessed in "Fors Clavigera," asserted itself more distinctly in my private philosophy, I began to be much exercised in mind as to the fortunate, or otherwise, meaning of my father's choosing a pig for my crest; and that the more, because I could not decide whether it was lawful for me to adopt the Greek mode of interpretation, according to which I might consider myself an assistant of Hercules in the conquest of the Erymanthian boar, or was restricted to the Gothic reading which would compel me to consider myself a pig in personâ,—(as the aforesaid Marmion a falcon, or Albert of Geierstein a vulture,—) and only take pride in the strength of bristle, and curl of tusk, which occasioned, in my days of serious critical influence, the lament of the Academician in *Punch* :

"I paints and paints,  
Hears no complaints,  
And sells before I'm dry,  
Till savage Ruskin  
Sticks his tusk in,  
And nobody will buy."

Inclining, as time went on, more and more to this view of the matter, I rested at last in the conviction that my prototype and patron saint was indeed, not Hercules, but St. Anthony of Padua, and that it might in a measure be recorded also of little me that "il se retira d'abord dans une solitude peu éloignée du bourg de Côme, puis dans un sépulcre fort éloigné de ce bourg, enfin dans les masures d'un vieux château au-dessus d'Héraclée, où il vécut pendant vingt ans. Il

n'est pas possible de raconter tout ce qu'il eut à souffrir dans ces trois retraites, tant par les rigueurs qu'il exerça sur lui-même que par la malice du démon, qui mit tout en œuvre pour le tromper par ses artifices, ou pour l'abattre par ses menaces et ses mauvais traitements, qui allèrent quelquefois jusqu'à le laisser pour mort des coups qu'il lui donna. Antoine triompha de tout ; et ce fut pour le récompenser de tant de combats et de tant de victoires que Dieu le rendit puissant en œuvres et en paroles pour guérir toutes sortes de maladies spirituelles et corporelles, chasser les démons aussi bien des corps que des âmes, sé faire obéir par les bêtes les plus cruelles, par les éléments et les autres créatures les moins soumises à la volonté de l'homme."\*

I must not, however, anticipate the course of this eventful history so far as to discuss at present any manner of the resemblance in my fate, or work, or home companionships, to those of St. Anthony of Padua ; but may record, as immediately significant, the delight which both my mother and I took in the possession of a really practical pigsty in our Danish farmyard, (the coach-house and stables being to us of no importance in comparison ;) the success with which my mother directed the nurture, and fattening, of the piglings ; the civil and jovial character of the piglings so nurtured, indicated especially by their habit of standing in a row on their hind-legs to look over the fence, whenever my mother came into the yard ; and conclusively by the satisfaction with which even our most refined friends would accept a present of pork—or it might be, alas ! sometimes of sucking pig—from Denmark Hill.

The following (p. 317) example of such acknowledgments, addressed to my father, is farther interesting in its post (or side) script, referring to the civil war in Switzerland, and fixing, therefore, the letter, otherwise without date of year, to 1845, when I was beginning to prepare for my first adventurous journey.

---

\* Dictionnaire des Sciences Ecclésiastiques. I assumed, of course, in adopting this patron saint, that he would have the same domestic pets as St. Anthony of the Desert.

“ 47, QUEEN ANN (no street!) West,  
 “ Thursday, 27 Feb.

In the *Times*, sad news from Switzerland.

“ My dear Sir,

“ Have the goodness to offer my respectful thanks to Mrs. Ruskin for the kind present of a part of the little fat friends, & its———\* Portugal onions for stuffing them included, &c., &c. Hoping you are all well,

“ Believe me,

“ Most truly obliged,

“ J. M. W. TURNER.”

“ J. RUSKIN, ESQ.”

Neither do I think it irrelevant, in this place, to foretell that, after twenty years' various study of the piglet character, (see, for instance, the account of the comfort given me by the monastic piglet at Assisi,†) I became so resigned to the adoption of my paternally chosen crest as to write my rhymed travelling letters to Joan ‡ most frequently in my heraldic character of “ Little Pig ;” or, royally plural, “ Little Pigs,” especially when these letters took the tone of confessions, as for instance, from Keswick, in 1857 :—

When little pigs have muffins hot,  
 And take three quarters for their lot,  
 Then, little pigs—had better not.

---

\* Turner always indicates by these long lines the places in his letters where his feelings become inexpressible.

† “ In one of my saddest moods, I got some wholesome peace and refreshment by mere sympathy with a Bewickian little pig. in the roundest and conceitedest burst of pig-blossom.”—Fors, Letter XLVIII.

‡ Now Mrs. Arthur Severn.

And again, on the occasion of over-lunching myself before ascending Red Pike, in the same year :—

As readers, for their minds' relief,  
 Will sometimes double down a leaf,  
 Or rather, as good sailors reef  
 Their sails, or jugglers, past belief,  
 Will con-involve a handkerchief—  
 If little pigs, when time is brief,  
 Will, that way, double up their beef,  
 Then—little pigs will come to grief.

And here is what may, it seems to me, gracefully conclude this present chapter, as a pretty and pathetic Pigwiggian chaunt, from Abbeville, in 1858 :—

If little pigs—when evening dapples,  
 With fading clouds, her autumn sky,—  
 Set out in search of Norman Chapels,  
 And find, instead, where cliffs are high,  
 Half-way from Amiens to Etaples,  
 A castle, full of pears and apples,  
 On donjon floors laid out to dry ;  
 —Green jargonelles, and apples tenny,—  
 And find their price is five a penny,  
 If little pigs, then, buy too many,  
 Spare to those little pigs a sigh.

---

## CHAPTER IX.

### THE FEASTS OF THE VANDALS.

The reader of “to-day” who has been accustomed to hear me spoken of by the artists of to-day as a superannuated enthusiast, and by the philosophers of to-day as a delirious visionary, will scarcely believe with what serious interest the appearance of the second volume of “Modern Painters” was looked for, by more people than my father and mother,—by people even belonging to the shrewdest literary circles, and highest artistic schools, of the time.

In the literary world, attention was first directed to the book by Sydney Smith, in the hearing of my severest and chiefly antagonist master, the Rev. Thomas Dale, who with candid kindness sent the following note of the matter to my father :

“ You will not be uninterested to hear that Mr. Sydney Smith (no mean authority in such cases) spoke in the highest terms of your son’s work, on a public occasion, and in presence of several distinguished literary characters. He said it was a work of transcendent talent, presented the most original views, and the most elegant and powerful language, and would work a complete revolution in the world of taste. He did not know, when he said this, how much I was interested in the author.”

My father was greatly set up by this note, though the form of British prudence which never specifies occasion or person, for fear of getting itself into a scrape, is provokingly illustrated by its imperfect testimony. But it mattered little who the other “ literary characters ” might have been, for Sydney’s verdict was at this time, justly, final, both in general society and among the reviewers ; and it was especially fortunate for me that he had been trained in his own youth, first by Dugald Stewart, and then by the same Dr. Thomas Brown who had formed my father’s mind and directed his subsequent reading. And, indeed, all the main principles of metaphysics asserted in the opening of “ Modern Painters ” had been, with conclusive decision and simplicity, laid down by Sydney himself in lectures he gave on Moral Philosophy at the Royal Institution in the years 1804-5-6, of which he had never enough himself recognized the importance. He amplified and embodied some portions of them afterward in the *Edinburgh Review* ; but “ considering that what remained could be of no farther use, he destroyed several, and was proceeding to destroy the whole, when, entreaty being made by friends that the portions not yet torn up might be spared, their request was granted ; ” \* and those despised fragments, published in 1850 under the title of “ Elementary Sketches of Moral Philosophy,” contain,

---

\* See note to Introduction, in the edition of 1850.

in the simplest and securest terms, every final truth which any rational mortal needs to learn on that subject.

Had those lectures been printed five years sooner, and then fallen in my way, the second volume of "Modern Painters" would either never have been written at all, or written with thankful deference to the exulting wit and gracious eloquence with which Sydney had discerned and adorned all that I wished to establish, twenty years before.

To the modern student, who has heard of Sydney Smith only as a jester, I commend the two following passages, as examples of the most wise, because most noble, thought, and most impressive, because steel-true, language, to be found in English literature of the living, as distinguished from the classic, schools:—

"But while I am descanting so minutely upon the conduct of the understanding, and the best modes of acquiring knowledge, some men may be disposed to ask, 'Why conduct my understanding with such endless care? and what is the use of so much knowledge?' What is the use of so much knowledge?—what is the use of so much life! What are we to do with the seventy years of existence allotted to us? and how are we to live them out to the last? I solemnly declare that, but for the love of knowledge, I should consider the life of the meanest hedger and ditcher as preferable to that of the greatest and richest man here present; for the fire of our minds is like the fire which the Persians burn in the mountains,—it flames night and day, and is immortal, and not to be quenched! Upon something it *must* act and feed,—upon the pure spirit of knowledge, or upon the foul dregs of polluting passions. Therefore, when I say, in conducting your understanding, love knowledge with a great love, with a vehement love, with a love coeval with life, what do I say, but love innocence, love virtue, love purity of conduct, love that which, if you are rich and great, will sanctify the blind fortune which has made you so, and make men call it justice; love that which, if you are poor, will render your poverty respectable, and make the proudest feel it unjust to laugh at the meanness of your fortunes; love that which will comfort you,

adorn you, and never quit you,—which will open to you the kingdom of thought, and all the boundless regions of conception, as an asylum against the cruelty, the injustice, and the pain that may be your lot in the outer world,—that which will make your motives habitually great and honorable, and light up in an instant a thousand noble disdains at the very thought of meanness and of fraud! Therefore, if any young man here have embarked his life in pursuit of knowledge, let him go on without doubting or fearing the event; let him not be intimidated by the cheerless beginnings of knowledge, by the darkness from which she springs, by the difficulties which hover around her, by the wretched habitations in which she dwells, by the want and sorrow which sometimes journey in her train; but let him ever follow her as the Angel that guards him, and as the Genius of his life. She will bring him out at last into the light of day, and exhibit him to the world comprehensive in acquirements, fertile in resources, rich in imagination, strong in reasoning, prudent and powerful above his fellows in all the relations and in all the offices of life.”

“The history of the world shows us that men are not to be counted by their numbers, but by the fire and vigor of their passions; by their deep sense of injury; by their memory of past glory; by their eagerness for fresh fame; by their clear and steady resolution of ceasing to live, or of achieving a particular object, which, when it is *once* formed, strikes off a load of manacles and chains, and gives free space to all heavenly and heroic feelings. All great and extraordinary actions come from the heart. There are seasons in human affairs when qualities, fit enough to conduct the common business of life, are feeble and useless, and when men must trust to emotion for that safety which reason at such times can never give. These are the feelings which led the ten thousand over the Carduchian mountains; these are the feelings by which a handful of Greeks broke in pieces the power of Persia: they have, by turns, humbled Austria, reduced Spain; and in the fens of the Dutch, and in the mountains of the Swiss, defended the happiness, and revenged the op-

pressions of man! God calls all the passions out in their keenness and vigor, for the present safety of mankind. Anger, and revenge, and the heroic mind, and a readiness to suffer;—all the secret strength, all the invisible array of the feelings;—all that nature has reserved for the great scenes of the world. For the usual hopes, and the common aids of man, are all gone! Kings have perished, armies are subdued, nations mouldered away! Nothing remains, under God, but those passions which have often proved the best ministers of His vengeance, and the surest protectors of the world.”

These two passages of Sydney’s express, more than any others I could have chosen out of what I know of modern literature, the roots of everything I had to learn and teach during my own life; the earnestness with which I followed what was possible to me in science, and the passion with which I was beginning to recognize the nobleness of the arts and range of the powers of men.

It was a natural consequence of this passion that the sympathy of the art-circles, in praise of whose leading members the first volume of “Modern Painters” had been expressly written, was withheld from me much longer than that of the general reader; while, on the other hand, the old Roman feuds with George Richmond were revived by it to the uttermost; and although, with amused interest in my youthful enthusiasm, and real affection for my father, he painted a charming water-color of me sitting at a picturesque desk in the open air, in a crimson waistcoat and white trousers, with a magnificent port-crayon in my hand, and Mont Blanc, conventionalized to Raphaellesque grace, in the distance, the utmost of serious opinion on my essay which my father could get from him was “that I should know better in time.”

But the following letter from Samuel Prout, written just at the moment when my father’s pride in the success of the book was fast beguiling him into admission of its authorship, at least in our own friendly circle, expresses with old-fashioned courtesy, but with admirable simplicity and firmness,

the first impression made by my impetuous outburst on the most sensible and sincere members of the true fellowship of English artists, who at that time were doing each the best he could in his own quiet way, without thought either of contention with living rivals, or of comparing their modest work to the masterpieces of former time.

“HASTINGS, *July 2d*, 1843.

“DEAR SIR: I beg to apologize for not sooner acknowledging, with my best thanks, your kindness in adding another to many obligations.

“Please to believe that I am ambitious of meriting your many acts of kind consideration, but I am ashamed and vexed to feel a consciousness of apparent rudeness, and a trial of patience which nothing can extenuate. I much fear that my besetting sin of idleness in letter-writing has been displeasing to you, although your note is politely silent on the subject.

“I am sorry to say that for months together my spirits have sunk so low, that every duty and every kindness have been sadly neglected.

“In consequence of this nervous inactivity, the Water Color Exhibition contains almost all I have been able to accomplish since last year. The drawing of Petrarch's House, which you wished me to make, was finished some time since, but is so unlike what I am sure you expected, that I deferred saying anything about it till another was made. Alas! the things I ought to have done have not been done. I intended bringing it to town with me, and asking the favor that it might remain in your possession till I had made something more worthy. My trip to town has been put off month after month, and I expect the resolution will not awake till the last day of seeing sights. Should you not be in town, both drawings shall be left at Foord's.\*

---

\* The letters quoted in the text of *Præterita* will always be given without omissions even of trivial passages. Of those arranged in *Dialecta*, I give only the portions which seem to me likely to interest

“Permit me to say that I have been indulged with a hasty perusal of a work on art and artists by ‘A Graduate of Oxford.’ I read the volume with intense interest, the sentiments and language riveting my attention to every page. But I mourn lest such splendid means of doing eminent service to art should be lost. Had the work been written with the *courteousness* of Sir Joshua Reynolds’ lectures, it would have been a ‘standard work,’ the author held in high estimation for his learning, and the volume recommended for instruction and usefulness. Perhaps nothing helps more certainly to an accession of influence, and an accumulating power of doing good, than the *language* in which we dictate. We approach an unassuming courteous manner with respect, confidence, and satisfaction, but most persons shrink back from sarcasm. Certainly every author who writes to do good will write with firmness and candor, *cleaving to what is right, but cautious of giving pain or offence.*

“I hope some day to give the book a more careful perusal; *it made me think*, and when I lay hold of it again, I will endeavor to test it by my experience and the judgment of others; and as I have a little *cooled* from the *rage* I felt at first to find my ‘darlings’ set at nought, I trust in spite of its biting bitterness I shall feel more ashamed of myself, and more respect for the opinions of the author.

“Pardon, dear sir, this presuming to tire your patience with my humble opinions; and should it be true what I have just heard, that you know the author, I will rely on your goodness to forgive my objection to opinions in which you are so much interested.

“If it is so, you are indeed honored, and I trust the powerful ‘angel-bright talent’ will be directed to do much good for art and artists. Pray give me credit for sincerity in acknowledging that it is art generally I feel for, and as far as I am individually mentioned, I am pleased to find that I have come off beautifully.

---

the reader; and even take leave to drop superfluous sentences without stars or other note of the omission, but so that the absolute meaning of the writer shall be always kept.

“I did not intend to write so much. Kindly pardon quantity and quality,

“And believe me to remain, dear sir,

“With the greatest respect,

“Yours truly and obliged,

“S. PROUT.

“J. J. Ruskin, Esq.,  
&c., &c., &c.”

I must guard myself, however, very distinctly in giving this letter as an example of the general feeling about the book among the living painters whom it praised, against attributing to them any such admiration of my “angel-bright talent” as that here expressed by my father’s affectionate, and now intimate, friend. The group of landscapists, headed by Copley Fielding, David Cox, and P. de Wint in the old Water Color Society, and by David Roberts and Clarkson Stanfield in the Academy (Turner being wholly exceptional, and a wild meteoric phenomenon in the midst of them, lawless alike and scholarless)—this group of very characteristically English landscape painters had been well grounded, every one of them, more or less, in the orthodox old English faith in Dutch painting; had studied it so as to know the difficulty of doing anything as good in its way; and whether in painting or literature, had studied very little else. Of any qualities or talents “angel-bright,” past or present, except in the rather alarming than dignified explosions round the stable lantern which sometimes take place in a “Rembrandt Nativity,” “Vision to the Shepherds,” or the like, none of them had ever felt the influence, or attempted the conception; the religious Italian schools were as little known at that time, to either artist or connoisseur, as the Japanese, and the highest scholarly criticism with which I had first come to handgrips in *Blackwood*, reached no higher than a sketching amateur’s acquaintance with the manner of Salvator and Gaspar Poussin. Taken as a body, the total group of “Modern Painters” were, therefore, more startled than flattered by my schismatic praise; the

modest ones, such as Fielding, Prout, and Stanfield, felt that it was more than they deserved,—and, moreover, a little beside the mark and out of their way; the conceited ones, such as Harding and De Wint, were angry at the position given to Turner; and I am not sure that any of them were ready even to endorse George Richmond's consoling assurance to my father, that I should know better in time.

But, with all the kindness of heart, and appreciation of domestic character, partly humorous, partly pathetic, which gave its prevailing tone to the British school of the day, led by Wilkie, Leslie, and Mulready, the entire fellowship of artists with whom we were acquainted sympathized with the partly quaint, altogether pure, strong, and always genial, home-life of my father and mother; nor less with their anxious devotion to their son, and the hopes they entertained for him. Nor, I suppose, was my own status at Denmark Hill without something honorably notable to men of the world, in that, refusing to enter my father's business, I yet stayed serenely under his authority, and, in what seemed to me my own proper line of work, did my utmost to please him. And when (I anticipate now the progress of the next four or five years)—when on any, to us, peculiarly festive occasion,—the return from a journey, publication of a new volume, anniversary of a birthday, or the like,—we ventured to ask our artist friends to rejoice with us, most of them came, I believe with real pleasure. The early six o'clock dinner allowed them usually a pleasant glance over the meadow and the Norwood Hill in the evening light; the table was just short enough to let the talk flow round without wandering into eddies, or lingering into confidences; there was no guest whom the others did not honor; there was neither effort, affectation, nor restraint in the talk. If the painters cared to say anything of pictures, they knew they would be understood; if they chose rather to talk of sherry, my father could, and would with delight, tell them more about it than any other person knew in either England or Spain; and when the candles came, and the good jests, over the nuts and olives, there was "frolic wine" in the flask at every right hand,

such as that never Prince Hal nor Jack Falstaff tasted cup of brighter or mightier.

I somewhat admire in myself, at this time, though I perceive it to have been greatly owing to want of imagination, the simplicity of affection with which I kept hold on my Cumberland moors, Calais sands, and French costumes and streets,—as contrasted with the peaks of the Sierra Nevada, the surges of Trafalgar, and the towers of Seville and Granada ; of all which I continually heard as the most beautiful and wonderful scenery and architecture of the European world ; and in the very midst of which—in the heart of Andalusia, and on the very battle-field of Xeres de la Frontera which gave the Arab his dominion in Spain—I might have been adopted by my father's partner to reign over his golden vineyards, and write the histories of the first Caliphs of Arabia and the Catholic Kings of Spain.

It chanced, however,—or mischanced,—for better or worse, that in the meantime I knew no more the histories of either Arabia or Spain than Robinson Crusoe or his boy Xury ; that the absolutely careful and faithful work of David Roberts showed me the inconstructive and merely luxurious character of Spanish and Arab buildings ; and that the painter of greatest power, next to Turner, in the English school, J. F. Lewis, rendered the facts of existing Andalusian life so vividly, as to leave me no hope of delighting or distinguishing myself in any constant relations either with its gayety or its pride.

Looking back to my notice of these and other contemporary artists in the paragraphs added to the first volume of "Modern Painters," when I corrected its sheets at Sestri di Levante, in 1846, I find the display of my new Italian information, and assertion of critical acumen, prevail sorrowfully over the expressions of gratitude with which I ought to have described the help and delight they had given me. Now, too late, I can only record with more than sorrow the passing away from the entire body of men occupied in the arts, of the temper in which these men worked. It is—I cannot count how many years, since, on all our walls of

recklessly ambitious display, I have seen one drawing of any place loved for its own sake, or understood with unselfish intelligence. Whether men themselves, or their buildings, or the scenery in which they live, the only object of the draughtsman, be he great or small, is to overpower the public mind with his greatness, or catch it with his smallness. *My* notions of Rome, says Mr. Alma Tadema ; *Mine* of Venice, says Miss Clara Montalba ; *Ours* of Belgravia and Brighton, say the public and its Graphics, with unanimous egotism ;—and what sensational effects can be wrung out of China or New Zealand, or the miseries and follies of mankind anywhere. Exact knowledge enough—yes, let us have it to fill our pockets or swell our pride ; but the beauty of wild nature or modest life, except for the sake of our own picnics or perquisites, none care to know, or to save.

And it is wholly vain, in this state of the popular mind, to try to explain the phase of art in which I was brought up, and of which—little thinking how soon it was to pass away—I wrote so ungratefully.

Absolutely careful and faithful, I said, David Roberts was, though in his own restricted terms ; fastening on the constant aspect of any place, and drawing that in gray shade, and so much of what might pass for light as enough showed magnitude, distance, and grace of detail. He was like a kind of gray mirror ; he gave the greatness and richness of things, and such height and space, and standing of wall and rock, as one saw to be true ; and with unwearied industry, both in Egypt and Spain, brought home records of which the value is now forgotten in the perfect detail of photography, and sensational realism of the effects of light which Holman Hunt first showed to be possible. The minute knowledge and acute sensation throw us back into ourselves ; haunting us to the examination of points and enjoyment of moments ; but one imagined serenely and joyfully, from the old drawings, the splendor of the aisles of Seville or the strength of the towers of Granada, and forgot one's self, for a time.

The work of John Lewis was a mirror of men only—of

building and scenery as backgrounds for them ; all alike rendered with an intensity of truth to the external life, which nothing has resembled before or since. But it was the external and animal life only. Lewis saw in men and women only the most beautiful of living creatures, and painted them as he did dogs and deer, but with a perception of their nature and race which laughs to scorn all the generic study of the scientific schools. Neither Andalusian nor Arab, Turk nor Circassian, had been painted before his time, any more than described before Byron's ; and the endeavors at representation of Oriental character or costume which accompany the travels of even the best-educated English travellers either during or immediately after the Peninsular war, are without exception the clumsiest, most vulgar, and most ludicrous pieces of work that ever disgraced draughtsman, savage or civil.

No artist that ever I read of was treated with such injustice by the people of his time as John Lewis. There was something un-English about him, which separated him from the good-humored groups of established fame whose members abetted or jested with each other ; feeling that every one of them had something to be forgiven, and that each knew the other's trick of trade. His resolute industry was inimitable ; his color—founded either on the frankness of southern sunlight, or on its subtle reflections and diffusions through latticed tracery and silken tent—resembled nothing that could be composed in a London studio ; while the absence of bravado, sentiment, or philosophy in his subjects—the total subjection alike of the moral and immoral, the heroic and the sensual, to the mere facts of animal beauty, and grace of decoration left him without any power of appeal either to the domestic simplicity or personal pride of the ordinary English mind. In artistic power and feeling he had much in common with Paul Veronese : but Paolo had the existing pomp and the fading religion of Venice to give his work hold on the national heart, and epic unity in its design ; while poor Lewis did but render more vividly with all his industry, the toy contrabandista or matador of my mother's chimney-piece.

He never dined with us as our other painter friends did ;

but his pictures, as long as he worked in Spain, were an extremely important element in both my father's life and mine.

I have not yet enough explained the real importance of my father's house, in its command of that Andalusian wine district. Modern maps of Spain, covered with tracks of railroad, show no more the courses either of Guadalquivir or Guadiana; the names of railway stations overwhelm those of the old cities; and every atlas differs from every other in its placing of the masses of the Sierras,—if even the existence of the mountain ranges be acknowledged at all.

But if the reader will take ten minutes of pains, and another ten of time, to extricate, with even the rudest sketch, the facts of value from the chaos of things inscrutably useless, in any fairly trustworthy map of Spain, he will perceive that between the Sierra Morena on the north, and Sierra Nevada on the south, the Guadalquivir flows for two hundred miles through a valley fifty miles wide, in the exact midst of which sits Cordova, and half-way between Cordova and the sea, Seville; and on the Royal Harbor, Puerto Real, at the sea-shore,—Cadiz; ten miles above which, toward Seville, he will find the “Xeres de la Frontera,” to which, as a golden centre of Bacchic commerce, all the vineyards of that great valley of Andalusia, Vandalusia, or, as Mr. Ford puts it, I believe more probably, land of the west, send down their sun-browned juice; the ground of Macharnudo on Mr. Domecq's estate at Xeres itself furnishing the white wine of strongest body in Europe.

The power which Mr. Domecq had acknowledged in my father, by making him head partner in his firm, instead of merely his English agent, ruled absolutely at Xeres over the preparation of the wines: and, by insisting always on the maintenance of their purity and quality at the highest attainable standard, gave the house a position which was only in part expressed by its standing, until Mr. Domecq's death, always at the head in the list of importers. That list gave only the number of butts of wine imported by each firm, but did not specify their price; still less could it specify the relation of price to value. Mr. Domecq's two or three thousand butts

were, for the most part, old wine, of which the supply had been secured for half a century by the consistent prudence of putting the new vintages in at one end of cellars some quarter of a mile long, and taking the old vintages out at the other. I do not, of course, mean that such transaction was literally observed; but that the vulgar impatience to "turn over" capital was absolutely forsworn, in the steady purpose of producing the best wine that could be given for the highest price to which the British public would go. As a rule, sherry drinkers are soundly-minded persons, who do not choose to spend a guinea a glass on anything; and the highest normal price for Mr. Domecq's "double-cross" sherry was eighty pounds a butt; rising to two hundred for the older wines, which were only occasionally imported. The highest price ever given was six hundred; but this was at a loss to the house, which only allowed wine to attain the age which such a price represented in order to be able to supply, by the mixture of it with younger vintage, whatever quality the English consumer, in any fit of fashion, might desire.

On the whole, the sales varied little from year to year, virtually representing the quantity of wine annually produced by the estate, and a certain quantity of the drier Amontillado, from the hill districts of Montilla, and some lighter and cheaper sherries,—though always pure,—which were purchased by the house for the supply of the wider London market. No effort was ever made to extend that market by lowering quality; no competition was possible with the wines grown by Mr. Domecq, and little with those purchased on his judgment. My father used to fret, as I have told, if the orders he expected were not forthcoming, or if there seemed the slightest risk of any other house contesting his position at the head of the list. But he never attempted, or even permitted, the enlargement of the firm's operations beyond the scale at which he was sure that his partner's personal and equal care, or, at least, that of his head cellarman, could be given to the execution of every order.

Mr. Domecq's own habits of life were luxurious, but never extravagant. He had a house in Paris, chiefly for the sake of

his daughters' education and establishment ; the profits of the estate, though not to be named in any comparison with those of modern mercantile dynasty, were enough to secure annual income to each of his five girls large enough to secure their marriages in the best French circles : they became, each in her turn, baronne or comtesse ; their father choosing their baron or count for them with as much discretion as he had shown in the choice of his own partner ; and all the marriages turned out well. Elise, Comtesse des Roys, and Caroline, Princess Bethune, once or twice came with their husbands to stay with us ; partly to see London, partly to discuss with my father his management of the English market : and the way in which these lords, virtually, of lands both in France and Spain, though men of sense and honor ; and their wives, though women of gentle and amiable disposition, (Elise, indeed, one of the kindest I ever have known,) spoke of their Spanish laborers and French tenantry, with no idea whatever respecting them but that, except as producers by their labor of money to be spent in Paris, they were cumberers of the ground, gave me the first clew to the real sources of wrong in the social laws of modern Europe ; and led me necessarily into the political work which has been the most earnest of my life. But these visits and warnings were not till seven or eight years after the time at present rendered account of, in which, nevertheless, it was already beginning to be, if not a question, at least a marvel with me, that these graceful and gay Andalusians, who played guitars, danced boleros, and fought bulls, should virtually get no good of their own beautiful country but the bunch of grapes or stalk of garlic they frugally dined on ; that its precious wine was not for them, still less the money it was sold for ; but the one came to crown our Vandalic feasts, and the other furnished our Danish walls with pictures, our Danish gardens with milk and honey, and five noble houses in Paris with the means of beautiful dominance in its Elysian fields.

Still more seriously, I was now beginning to contrast the luxury and continual opportunity of my own exulting days, with the poverty, and captivity, or, as it seemed to chance

always, fatal issue of any efforts to escape from these, in which my cousins, the only creatures whom I had to care for, beyond my home, were each and all spending, or ending, their laborious youth.

I must briefly resume their histories, though much apart from mine; but if my heart was cold to them, my mind was often sad for them.

By grotesque freak of Fors, both my aunts married a Mr. Richardson—and each left six children, four boys and two girls.

The Perth children were Mary and Jessie, James, John, William, and Andrew; the Croydon children, Margaret and Bridget, John, William, George, and Charles. None left now but William of Croydon.

The Perth boys were all partly weak in constitution, and curiously inconsistent in element of character, having much of their mother's subtlety and sweetness mixed with a rather larger measure of their father's tannin. The eldest, James, was unlike the other three,—more delicate in feature, and more tractable in temper. My father brought him up to London when he was one- or two-and-twenty, and put him into the counting-house to see what could be made of him: but, though perfectly well-behaved, he was undiligent and effectless—chiefly solicitous about his trousers and gloves. I remember him in his little room, the smaller of the two looking west at top of Herne Hill house, a pleasant, gentle, tall figure of a youth. He fell into rapid decline and died.

Nor long after him, the youngest brother, Andrew, who with fewer palpable follies, had less real faculty than the rest. He learnt farming under a good master in Scotland, and went out to Australia to prove his science; but after a short struggle with the earth of the other side of the world, rested beneath it.

The second brother, John, thus left the head of the family, was a stumpily made, snub- or rather knob-nosed, red-faced, bright-eyed, good-natured simpleton; with the most curiously subtle shrewdnesses, and obstinate faculties, excrescent through his simplicity. I believe he first tried to carry on

his father's business; not prospering in that, after some pause and little-pleased scrutiny of him, he was established by my father as a wine-agent in Glasgow, in which business and town he remained, in a shambling, hand-to-mouth manner, some thirty years, a torment to my father, of an extremely vexatious kind—all the more that he was something of a possession and vestige of his mother all the same. He was a quite first-rate chess-player and whist-player: in business, he had a sort of chess and whist instinct for getting the better of people, as if every dozen of sherry were a hand of cards; and would often, for the mere pleasure of playing a trick, lose a customer without really making a penny by him. Good-natured, as I said, with a rude foundation of honesty at the bottom which made my father put up with him, (indeed, so far as I can find out, no one of all my relations was ever dishonest at heart, and most of them have been only too simple,) he never lied about his sherry or adulterated it, but tried to get little advantages in bargains, and make the customer himself to choose the worst wine at the money, and so on—trying always to get the most he could out of my father in the same way, yet affectionate in a dumb-doggish sort, and not ungrateful, he went scramble-shambling on, a plague to the end, yet through all, a nephew.

William, the third of the Perth boys, had all John's faults of disposition, but greater powers, and, above all, resolution and perseverance, with a rightly foresighted pride, not satisfied in trivial or momentary successes, but knitting itself into steady ambition, with some deep-set notions of duty and principles of conscience farther strengthening it. His character, however, developed slowly, nor ever freed itself from the flaws which ran like a geological cleavage through the whole brotherhood: while his simplicities in youth were even more manifest than theirs, and as a schoolboy, he was certainly the awkwardest, and was thought the foolishest, of the four.

He became, however, a laborious and sagacious medical student, came up to London to walk the hospitals; and on passing his examination for medical practitioner, was esta-

blished by my father in a small shop in the Bayswater Road, when he began—without purchase of any former favor, but camped there like a gipsy by the roadside,—general practice, chiefly among the poor, and not enough to live upon for a year or two (without supplemental pork and apple-sauce from Denmark Hill), but conscientious and earnest, paying largely in gathered knowledge and insight. I shall often have occasion to speak of him hereafter; it is enough to say in advance that after a few years of this discipline he took his diploma of M.D. with credit, and became an excellent physician—and the best chess-player I have ever known.

---

## CHAPTER X.

## CROSSMOUNT.

My best readers cannot but be alike astonished and disappointed that I have nothing set down of the conversation, cordial always, and if George Richmond were there, better than brilliant, which flowed at these above described Vandalic feasts. But it seemed to me that all the sap and bloom of it were lost in deliberate narrative, and its power shorn away if one could not record also the expression of the speaker; while of absolutely useful and tenable resulting sense, there was, to my unsympathetic mind, little to be got hold of. Turner resolutely refused to speak on the subject of art at all, and every one of us felt that we must ask him no questions in that direction; while of what any other painter said, I was careless, regarding them all as limited to their own fields, and unable to help me in mine.

I had two distinct instincts to be satisfied, rather than ends in view, as I wrote day by day with higher-kindled feeling the second volume of "Modern Painters." The first, to explain to myself, and then demonstrate to others, the nature of that quality of beauty which I now saw to exist through all the happy conditions of living organism; and down to the minutest detail and finished material structure naturally pro-

duced. The second, to explain and illustrate the power of two schools of art unknown to the British public, that of Angelico in Florence, and Tintoret in Venice.

I have no knowledge, and can form no conjecture, of the extent to which the book in either direction accomplished its purpose. It is usually read only for its pretty passages; its theory of beauty is scarcely ever noticed,—its praise of Tintoret has never obtained the purchase of any good example of him for the National Gallery. But I permit myself—perhaps with vain complacency—the thought that I have had considerable share in the movement which led to the useful work of the Arundel Society in Italy, and to the enlargement of the National collection by its now valuable series of fourteenth-century religious paintings.

The style of the book was formed on a new model, given me by Osborne Gordon. I was old enough now to feel that neither Johnsonian balance nor Byronic alliteration were ultimate virtues in English prose; and I had been reading with care, on Gordon's counsel, both for its arguments and its English, Richard Hooker's "Ecclesiastical Polity." I had always a trick of imitating, more or less, the last book I had read with admiration; and it farther seemed to me that for the purposes of argument, (and my own theme was, according to my notion, to be argued out invincibly,) Hooker's English was the perfectest existing model. At all events, I did the best I then knew how, leaving no passage till I had put as much thought into it as it could be made to carry, and chosen the words with the utmost precision and tune I could give them.

For the first time in my life, when I had finished the last sentence, I was really tired. In too long readings at Oxford I got stupid and sleepy, but not fatigued: now, however, I felt distinctly that my head could do no more; and with much satisfied thankfulness, after the revise of the last sheet was sent to printer, found myself on the bows of the little steamer, watching their magical division of the green waves between Dover and Calais.

Little steamers they all were, then; nor in the least well

appointed, nor aspiring to any pride of shape or press of speed ; their bits of sails worn and patched like those of an old fishing-boat. Here, for modest specimen of my then proper art style, I give my careful drawing of the loose lashed jib of one of them, as late as 1854.\* The immeasurable delight to me of being able to loiter and swing about just over the bowsprit and watch the plunge of the bows, if there was the least swell or broken sea to lift them, with the hope of Calais at breakfast, and the horses' heads set straight for Mont Blanc to-morrow, is one of the few pleasures I look back to as quite unmixed. In getting a Turner drawing I always wanted another ; but I didn't want to be in more boats than one at once.

As I had done my second volume greatly to my father's and mother's delight, (they used both to cry a little, at least my father generally did, over the pretty passages, when I read them after breakfast,) it had been agreed that they should both go with me that summer to see all the things and pictures spoken of,—Ilaria, and the Campo Santo, and St. Mary's of the Thorn, and the School of St. Roch.

Though tired, I was in excellent health, and proud hope ; they also at their best and gladdest. And we had a happy walk up and down the quiet streets of Calais that day, before four o'clock dinner.

I have dwelt with insistence in last chapter on my preference of the Hotel de Ville at Calais to the Alcazar of Seville. Not that I was without love of grandeur in buildings, but in that kind, Rouen front and Beauvais apse were literally the only pieces that came up to my mark ; ordinary minsters

---

\* In which year we must have started impatiently, without our rubrical gooseberry pie, for I find the drawing is dated "10th May, my father's birthday," and thus elucidated, "Opposite," (*i.e.* on leaf of diary,) "the jib of steamer seen from inside it on the deck. The double curve at the base of it is curious ; in reality the curves were a good deal broken, the sail being warped like a piece of wetted paper. The rings by which it holds, being *alternately* round and edge to the eye, are curious. The *lines* are of course seams, which go to the bottom of the sail ; the brown marks, running short the same way, are stains."

and palaces, however they might set themselves up for sublime, usually hurt me by some manner of disproportion or pretence ; and my best joys were in small pieces of provincial building, full of character, and naturally graceful and right in their given manner. In this kind the little wooden belfry of Evreux, of which Prout's drawing is photographed at page 42 of my "Memoir,"\* is consummate ; but the Calais one, though of far later and commoner style, is also matchless, far or near, in that rude way, and has been a perpetual delight and lesson to me. Prout has a little idealized it in the distance of the drawing of Calais Harbor, page 40 in the same book ; I never tried to draw it myself, the good of it being not in any sculpturesque detail, but in the complex placing of its plain, square-cut props and ties, taking some pretence of pinnacle on them, and being really as structurally useful, though by their linked circling instead of their weight. There was never time in the happy afternoon to do this carefully enough, though I got a color-note once of the church-spire, loved in a deeper way, ("Modern Painters," Vol. IV., Chap. I.) but the belfry beat me. After all, the chief charm of it was in being seen from my bedroom at Desseins, and putting me to sleep and waking me with its chimes.

Calais is properly a Flemish, not French town (of course the present town is all, except belfry and church, built in the seventeenth century, no vestige remaining of Plantagenet Calais) ; it has no wooden houses, which mark the essential French civic style, but only brick or chalk ones, with, originally, most of them, good indented Flemish stone gables and tiled roofs. True French roofs are never tiled, but slated, and have no indented gables, but bold dormer windows rising over the front, never, in any pretty street groups of them, without very definite expression of pride. Poor little Calais had indeed nothing to be proud of, but it had a quaint look of contentment with itself on those easy terms ; some dignity in its strong ramparts and drawbridge gates ; and, better than dignity, real power and service in the half-mile of

---

\* Printed by the Fine Art Society, 1880.

pier, reaching to the low-tide breakers across its field of sand.

Sunset, then, seen from the pier-head across those whispering fringes ; belfry chime at evening and morning ; and the new life of that year, 1846, was begun.

After our usual rest at Champagnole, we went on over the Cenis to Turin, Verona, and Venice ; whereat I began showing my father all my new discoveries in architecture and painting. But there began now to assert itself a difference between us I had not calculated on. For the first time I verily perceived that my father was older than I, and not immediately nor easily to be put out of his way of thinking in anything. We had been entirely of one mind about the carved porches of Abbeville, and living pictures of Vandyck ; but when my father now found himself required to admire also flat walls, striped like the striped calico of an American flag, and oval-eyed saints like the figures on a Chinese teacup, he grew restive. Further, all the fine writing and polite *éclat* of "Modern Painters" had never reconciled him to my total resignation of the art of poetry ; and beyond this, he entirely, and with acute sense of loss to himself, doubted and deplored my now constant habit of making little patches and scratches of the sections and fractions of things in a note-book which used to live in my waistcoat pocket, instead of the former Proutesque or Robertsian outline of grand buildings and sublime scenes. And I was the more viciously stubborn in taking my own way, just because everybody was with him in these opinions ; and I was more and more persuaded every day, that everybody was always wrong.

Often in my other books,—and now, once for all, and finally here,—I have to pray my readers to note that this continually increasing arrogance was not founded on vanity in me, but on sorrow. There is a vast difference—there is all the difference—between the vanity of displaying one's own faculties, and the grief that other people do not use their own. Vanity would have led me to continue writing and drawing what every one praised ; and disciplining my own already

practised hand into finer dexterities. But I had no thought but of learning more, and teaching what truth I knew,—assuredly then, and ever since, for the student's sake, not my own fame's ; however sensitive I may be to the fame, also, afterward.

Meantime, my father and I did not get on well in Italy at all, and one of the worst, wasp-barbed, most tingling pangs of my memory is yet of a sunny afternoon at Pisa, when, just as we were driving past my pet La Spina chapel, my father, waking out of a reverie, asked me suddenly, "John, what shall I give the coachman?" Whereupon, I, instead of telling him what he asked me, as I ought to have done with much complacency at being referred to on the matter, took upon me with impatience to reprove, and lament over, my father's hardness of heart, in thinking at that moment of sublunary affairs. And the spectral Spina of the chapel has stayed in my own heart ever since.

Nor did things come right that year till we got to Chamouni, where, having seen enough by this time of the upper snow, I was content to enjoy my morning walks in the valley with papa and mamma ; after which, I had more than enough to do among the lower rocks and woods till dinner-time, and in watching phases of sunset afterward from beneath the slopes of the Breven.

The last Chamouni entry, with its sequel, is perhaps worth keeping.

"Aug. 23d.—Rained nearly all day ; but I walked to the source of the Arveron—now a mighty fall down the rocks of the Montanvert ;\* note the intense scarlet purple of the shattered larch stems, wet, opposed with yellow from decomposing turpentine ; the elder stems looking much like birch, covered with the white branchy moss that looks like a coral. Went out again in the afternoon toward the Cascade des Peleims ; surprised to see the real rain-clouds assume on the Breven, about one-third of its height, the form of cirri,—long, continuous, and delicate ; the same tendency showing in the

---

\* The rocks over which the Glacier des Bois descends, I meant.

clouds all along the valley, some inclining to the fish-shape, and others to the cobweb-like wavy film."

"Lucerne, Aug. 31st.—The result of the above phenomena was a little lift of the clouds next morning, which gave me some of the finest passages about Mont Blanc I ever beheld; and then, weather continually worse till now. We have had two days' ceaseless rain, this, the third, hardly interrupted, and the lake right into the town."

"There was great joy in helping my mother from the door of the Cygne along a quarter of a mile of extempore plank bridge in the streets, and in writing a rhymed letter in description of the lifted lake and swirling Reuss, to little Louise Ellis (Mr. Telford's niece, at this time one of the happy presences in Widmore), of which a line or two yet remain in my ears, about a market boat moored above the submerged quay:—

"Full of mealy potatoes and marrowfat pease,  
And honey, and butter, and Simmenthal cheese,  
And a poor little calf, not at all at its ease,  
Tied by the neck to a box at its knees.  
Don't you agree with me, dear Louise,  
It was unjustifiably cruel in  
Them to have brought it in all that squeeze  
Over the lake from Fluelen?"

And so home, that year by Troyes, with my own calf's mind also little at its ease, under confused squeeze of Alps, clouds, and architecture; yet finding room still in the waist-coat pocket for notes on the external tracery of St. Urbain, which fixed that church for me as the highest type of Gothic construction, and took me off all Italian models for the next four years. The abstraction, however, though St. Urbain began it, was not altogether that Saint's fault.

The press notices of my second volume had been either cautious or complimentary,—none, to the best of my memory, contemptuous. My friends took much pleasure in it, and the estimate formed of it in the old Scott and John Murray circle was shown by Lockhart's asking me that winter to review Lord Lindsay in the *Quarterly*. I was shy of doing this,

being well aware that Lord Lindsay knew much more about Italian painting than I did ; but I thought no one else likely to do it better, and had another motive to the business,—of an irresistible nature.

The little high-foreheaded Charlotte had by this time become a Scottish fairy, White Lady, and witch of the fatallest sort, looking as if she had just risen out of the stream in Rhymer's Glen, and could only be seen by favoring glance of moonlight over the Eildons. I used to see her, however, sometimes, by the dim lamplight of this world, at Lady Davy's, —Sir Humphry's widow,—whose receptions in Park Street gathered usually, with others, the literary and scientific men who had once known Abbotsford. But I never could contrive to come to any serious speech with her ; and at last, with my usual wisdom in such matters, went away into Cumberland to recommend myself to her by writing a *Quarterly Review*.

I went in the early spring to the Salutation at Ambleside, then yet a country village, and its inn a country inn. But there, whether it was the grilled salmon for breakfast, or too prolonged reflections on the Celestial Hierarchies, I fell into a state of despondency till then unknown to me, and of which I knew not the like again till fourteen years afterward. The whole morning was painfully spent in balancing phrases ; and from my boat, in the afternoons on Windermere, it appeared to me that the water was leaden, and the hills were low. Lockhart, on the first reception of the labored MS., asked me to cut out all my best bits, (just as Keble had done before with my prize poem.) In both cases I submitted patiently to the loss of my feathers ; but was seriously angry and disgusted when Lockhart also intimated to me that a sentence in which I had with perfect justice condemned Mr. Gally Knight's representation "out of his own head" of San Michele at Lucca, could not—Mr. Gally Knight being a *protégé* of Albemarle Street—appear in the *Quarterly*. This first clear insight into the arts of bookselling and reviewing made me permanently distrustful of both trades ; and hearing no word, neither, of Charlotte's taking the smallest interest in the

celestial hierarchies, I returned to town in a temper and state of health in which my father and mother thought that once more the best place for me would be Leamington.

I thought so myself, too; and went penitently again to Jephson, who at once stopped the grilled salmon, and ordered salts and promenade, as before.

It chanced that at this time there was staying at Leamington, also under Jephson's care, the son of an old friend, perhaps flame, of my father's, Mrs. Farquharson,—a youth now of some two or three and twenty, but who seemed to me older than myself, being already a man of some position and influence in Perthshire. A few years before he had come into possession, under trustees, of a large Highland estate, on the condition that he should change his name for that of Macdonald, (properly reduplicate,—Macdonald Macdonald,) considerable sums being reserved in the trustees' hands by the terms of the will, for the purchase of more land. At that time his properties were St. Martin's near Perth, where his mother lived; Rossie Castle, above Montrose; another castle, with much rock and moor around it, name forgotten, just south of Schehallien; and a shooting-lodge, Crossmount, at the foot of Schehallien, between Lochs Rannoch and Tummel. The young Macdonald had come to see us once or twice with his mother, at Denmark Hill, and, partly I suppose at his mother's instigation, partly, the stars know how, took a true liking to me; which I could not but answer with surprised thankfulness. He was a thin, dark Highlander, with some expression of gloom on his features when at rest, but with quite the sweetest smile for his friends that I have ever seen, except in one friend of later year's, of whom in his place.

He was zealous in the Scottish Evangelical Faith, and wholly true and upright in it, so far as any man can be true in any faith, who is bound by the laws, modes, and landed estates of this civilized world.

The thoughtful reader must have noted with some displeasure that I have scarcely, whether at college or at home, used the word "friendship" with respect to any of my companions. The fact is, I am a little puzzled by the specialty and

singularity of poetical and classic friendship. I get, distinctively, attached to places, to pictures, to dogs, cats, and girls: but I have had, Heaven be thanked, many and true friends, young and old, who have been of boundless help and good to me,—nor I quite helpless to them; yet for none of whom have I ever obeyed George Herbert's mandate, "Thy friend put in thy bosom; wear his eyes, still in thy heart, that he may see what's there; if cause require, thou art his sacrifice," etc. Without thinking myself particularly wicked, I found nothing in my heart that seemed to me worth anybody's seeing; nor had I any curiosity for insight into those of others; nor had I any notion of being a sacrifice for them, or the least wish that they should exercise for my good any but their most pleasurable accomplishments,—Dawtrey Drewitt, for instance, being further endeared because he could stand on his head and catch vipers by the tail; Gershom Collingwood because he could sing French songs about the Earthly Paradise; and Alic Wedderburn because he could swim into tarns and fetch out water-lilies for me, like a water-spaniel. And I never expected that they should care much for *me*, but only that they should read my books; and looking back, I believe they liked and like me, nearly as well as if I hadn't written any.

First, then, of this Love's Meinie of my own age, or under it, William Macdonald took to me; and got me to promise, that autumn, to come to him at Crossmount, where it was his evangelical duty to do some shooting in due season.

I went into Scotland by Dunbar; saw again Loch Leven, Glen Farg, Rose Terrace, and the Inch of Perth; and went on, pensive enough, by Killiecrankie, to the clump of pines which sheltered my friend's lodge from the four winds of the wilderness.

After once walking up Schehallien with him and his keepers, with such entertainment as I could find in the mew-ing and shrieking of some seventy or eighty gray hares, who were brought down in bags and given to the poorer tenantry; and forming final opinion that the poorer tenantry might better have been permitted to find the stock of their

hare-soup for themselves, I forswore further fashionable amusement, and set myself, when the days were fine, to the laborious eradication of a crop of thistles, which had been too successfully grown by northern agriculture in one of the best bits of unboggy ground by the Tummel.

I have carelessly omitted noticing till now, that the ambitions in practical gardening, of which the germs, as aforesaid, had been blighted at Herne Hill, nevertheless still prevailed over the contemplative philosophy in me so far as to rekindle the original instinct of liking to dig a hole, whenever I got leave. Sometimes, in the kitchen-garden of Denmark Hill, the hole became a useful furrow; but when once the potatoes and beans were set, I got no outlet nor inlet for my excavatory fancy or skill during the rest of the year. The thistle-field at Crossmount was an inheritance of amethystine treasure to me; and the working hours in it are among the few in my life which I remember with entire serenity—as being certain I could have spent them no better. For I had wise—though I say it—thoughts in them, too many to set down here (they are scattered afterward up and down in “Fors” and “Munera Pulveris”), and wholesome sleep after them, in spite of the owls, who were many, in the clumps of pine by Tummel shore.

Mostly a quiet stream there, through the bogs, with only a bit of step or tumble a foot or two high on occasion; above which I was able practically to ascertain for myself the exact power of level water in a current at the top of a fall. I need not say that on the Cumberland and Swiss lakes, and within and without the Lido, I had learned by this time how to manage a boat—an extremely different thing, be it observed, from steering one in a race; and the little two-foot steps of Tummel were, for scientific purposes, as good as falls twenty or two hundred feet high. I found that I could put the stern of my boat full six inches into the air over the top of one of these little falls, and hold it there, with very short sculls, against the *level*\* stream, with perfect ease for any

---

\* Distinguish carefully between this and a sloping rapid.

time I liked ; and any child of ten years old may do the same. The nonsense written about the terror of feeling streams quicken as they approach a mill weir is in a high degree dangerous, in making giddy water parties lose their presence of mind if any such chance take them unawares. And (to get this needful bit of brag, and others connected with it, out of the way at once), I have to say that half my power of ascertaining facts of any kind connected with the arts, is in my stern habit of doing the thing with my own hands till I know its difficulty ; and though I have no time nor wish to acquire showy skill in anything, I make myself clear as to what the skill means, and is. Thus, when I had to direct road-making at Oxford, I sate, myself, with an iron-masked stone-breaker, on his heap, to break stones beside the London road, just under Iffley Hill, till I knew how to advise my too impetuous pupils to effect their purposes in that matter, instead of breaking the heads of their hammers off, (a serious item in our daily expenses.) I learned from an Irish street crossing-sweeper what he could teach me of sweeping ; but found myself in that matter nearly his match, from my boy-gardening ; and again and again I swept bits of St. Giles' foot-pavements, showing my corps of subordinates how to finish into depths of gutter. I worked with a carpenter until I could take an even shaving six feet long off a board ; and painted enough with properly and delightfully sippy green paint to feel the master's superiority in the use of a blunt brush. But among all these and other such studentships, the reader will be surprised, I think, to hear seriously, that the instrument I finally decided to be the most difficult to manage was the trowel. For accumulated months of my boy's life I watched bricklaying and paving ;\* but when I took the trowel into my own hand, abandoned at once

---

\* Of our pavior friends, Mr. and Mrs. Duprez (*we* always spelt and pronounced Depree), of Langley, near Slough, and Gray's Inn (pronounced Grazeu) Lane, in London (see the seventh number of *Dialecta*). The laying of the proper quantity of sand under the pavement stones being a piece of trowel-handling as subtle as spreading the mortar under a brick.

all hope of attaining the least real skill with it, unless I gave up all thoughts of any future literary or political career. But the quite happiest bit of manual work I ever did was for my mother in the old inn at Sixt, where she alleged the stone staircase to have become unpleasantly dirty, since last year. Nobody in the inn appearing to think it possible to wash it, I brought the necessary buckets of water from the yard myself, poured them into beautiful image of Versailles water-works down the fifteen or twenty steps of the great staircase, and with the strongest broom I could find, cleaned every step into its corners. It was quite lovely work to dash the water and drive the mud, from each, with accumulating splash down to the next one.

I must return for a moment to the clumps of pine at Crossmount, and their company of owls, because—whatever wise people may say of them—I at least myself have found the owl's cry always prophetic of mischief to me; and though I got wiser, as aforesaid, in my field of thistles, yet the Scottish Athena put on against me at that time her closed visor (not that Greek helmets ever have a visor, but when Athena hides her face, she throws her casque forward and down, and only looks through the oval apertures of it). Her adversity to me at this time was shown by my loss of Miss Lockhart, whom I saw for the last time at one of Lady Davy's dinners, where Mr. Hope-Scott took the foot of the table. Lady Davy had given me Miss Lockhart to take down, but I found she didn't care for a word I said; and Mr. Gladstone was on the other side of her—and the precious moments were all thrown away in quarrelling across her, with him, about Neapolitan prisons. He couldn't see, as I did, that the real prisoners were the people outside.

Meantime, restraining the ideals and assuaging the disappointments of my outer world life, the home-work went on with entirely useful steadiness. The admiration of tree-branches taught me at Fontainebleau, led me now into careful discernment of their species; and while my father, as was his custom, read to my mother and me for half-an-hour after breakfast, I always had a fresh-gathered outer spray of a

tree before me, of which the mode of growth, with a single leaf full size, had to be done at that sitting in fine pen outline, filled with the simple color of the leaf at one wash. On fine days, when the grass was dry, I used to lie down on it and draw the blades as they grew, with the ground herbage of buttercup or hawkweed mixed among them, until every square foot of meadow, or mossy bank, became an infinite picture and possession to me, and the grace and adjustment to each other of growing leaves, a subject of more curious interest to me than the composition of any painter's masterpiece. The love of complexity and quantity before noticed as influencing my preference of flamboyant to pure architecture, was here satisfied, without qualifying sense of wasted labor, by what I felt to be the constant working of Omnipotent kindness in the fabric of the food-giving tissues of the earth; nor less, morning after morning, did I rejoice in the traceries and the painted glass of the sky at sunrise.

This physical study had, I find, since 1842, when it began, advanced in skill until now in 1847, at Leamington, it had proceeded into botanical detail; and the collection of material for "Proserpina" began then, singularly, with the analysis of a thistle-top, as the foundation of all my political economy was dug down to, through the thistle-field of Crossmount.

"Analysis" of thistle-top, I say; not "dissection," nor microscopic poring into.

Flowers, like everything else that is lovely in the visible world, are only to be seen rightly with the eyes which the God who made them gave us; and neither with microscopes nor spectacles. These have their uses for the curious and the aged; as stilts and crutches have for people who want to walk in mud, or cannot safely walk but on three legs anywhere. But in health of mind and body, men should see with their own eyes, hear and speak without trumpets, walk on their feet, not on wheels, and work and war with their arms, not with engine-beams, nor rifles warranted to kill twenty men at a shot before you can see them. The use of the great mechanical powers may indeed sometimes be compatible with the due exercise of our own; but the use of instruments for exaggerating the

powers of sight necessarily deprives us of the best pleasures of sight. A flower is to be watched as it grows, in its association with the earth, the air, and the dew ; its leaves are to be seen as they expand in sunshine ; its colors, as they embroider the field, or illumine the forest. Dissect or magnify them, and all you discover or learn at last will be that oaks, roses, and daisies, are all made of fibres and bubbles ; and these, again, of charcoal and water ; but, for all their peeping and probing, nobody knows how.

And far more difficult work than this was on foot in other directions. Too sorrowfully it had now become plain to me that neither George Herbert, nor Richard Hooker, nor Henry Melvill, nor Thomas Dale, nor the Dean of Christ Church, nor the Bishop of Oxford, could in anywise explain to me what Turner meant by the contest of Apollo with the Python, or by the repose of the great dragon above the Garden of the Hesperides.

For such nearer Python as might wreath itself against my own now gathering strength,—for such serpent of Eternity as might reveal its awe to me amidst the sands even of Forest Hill or Addington Heath, I was yet wholly unprepared.

All that I had been taught had to be questioned ; all that I had trusted, proved. I cannot enter yet into any account of this trial ; but the following fragment of 1847 diary will inform the reader enough of the courses of thought which I was being led into beside the lilies of Avon, and under the mounds, that were once the walls, of Kenilworth.

“It was cold and dark and gusty and raining by fits, at two o'clock to-day, and until four ; but I went out, determined to have my walk, get wet or no.

“I took the road to the village where I had been the first day with Macdonald, and about a mile and a half out, I was driven by the rain into a little cottage, remarkable outside for two of the most noble groups of hollyhocks I ever saw—one rose-color passing into purple, and the other rich purple and opposed by a beautiful sulphur yellow one. It was about a quarter to five, and they (the woman and her mother) were taking their tea (pretty strong, and without milk) and white

bread. Round the room were hung several prints of the Crucifixion, and some Old Testament subjects, and two bits of tolerable miniature ; one in what I thought at first was an uniform, but it was the footman's dress of the woman's second son, who is with a master in Leamington ; the other a portrait of a more distingué looking personage, who, I found on inquiry, was the eldest son, cook in the Bush inn at Carlisle. Inquiring about the clergyman of the village, the woman—whose name, I found, was Sabina—said they had lost their best earthly friend, the late clergyman, a Mr. Waller, I think, who had been with them upward of eleven years, and had got them into that cottage ; her husband having been in his service, and he fretted himself, she said, too much, about getting them into it, and never lived to see them in it after all, dying of decline in London. She spoke of him with tears in her eyes. I looked at the books lying on the table, well used all of them, and found three Bibles, three Prayer Books, a treatise on practical Christianity, another on seriousness in religion, and Baxter's "Saint's Rest." I asked her if they read no books but religious ones. "No, sir ; I should be very sorry if there were any others in my house," said she. As I took up the largest Bible, she said "it was a nice print, but sadly tattered ; she wished she could get it bound." This I promised to get done for her, and left her much pleased.

"It had rained hard while I stayed in the cottage, but had ceased when I went on, and presently appeared such a bright bar of streaky sky in the west, seen over the glittering hedges, as made my heart leap again, it put so much of old feelings into me of far-away hills and fountains of morning light ; and the sun came out presently, and every shake of the trees shook down more light upon the grass. And so I came to the village and stood leaning on the churchyard gate, looking at the sheep nibbling and resting among the graves (newly watered they lay, and fresh, like a field of precious seed). One narrow stream of light ran in ups and downs across them, but the shadow of the church fell over most—the pretty little gray church, now one dark mass against the intense golden glittering sky ; and to make it sweeter still, the churchyard

itself rose steeply, so that its own grand line came against this same light at last."

---

## CHAPTER XI.

## L'HÔTEL DU MONT BLANC.

The little inn at Samoens, where I washed the stairs down for my mother, was just behind the group of houses of which I gave a carefully colored sketch to Mrs. John Simon, who, in my mother's old age, was her most deeply trusted friend. She, with her husband, love Savoy even more than I; were kinder to Joseph Couttet to the last, and are so still to his daughter Judith.

The Samoens inn was, however, a too unfavorable type of the things which—in *my* good old times—one had sometimes to put up with, and rather liked having to put up with, in Savoy. The central example of the sort of house one went there to live in, was the Hôtel du Mont Blanc at St. Martin's; to me, certainly, of all my inn homes, the most eventful, pathetic, and sacred. How to begin speaking of it, I do not know; still less how to end; but here are three entries, consecutive, in my diary of 1849, which may lead me a little on my way.

"St. Martin's, evening, July 11th. What a strange contrast there is between these lower valleys, with their overwrought richness mixed with signs of waste and disease, their wild noon-winds shaking their leaves into palsy, and the dark storms folding themselves about their steep mural precipices,—between these and the pastoral green, pure aiguilles, and fleecy rain-clouds of Chamouni; yet nothing could be more divine than (to-day) the great valley of level cornfield; half, smooth close to the ground, yet yellow and warm with stubble; half, laden with sheaves; the vines in massy green above, with Indian corn, and the rich brown and white cottages (in midst of them).

"July 13th. I walked with my father last night up to the vine-covered cottages under the Aiguille de Varens.

“July 15th, Samoens. We had a stony road to traverse in charrs from St. Martin’s yesterday, and a hot walk this morning over the ground between this (Samoens) and Sixt. As I passed through the cornfields, I found they gave me a pleasant feeling by reminding me of Leamington.”

“We” in this entry means only my father and mother and I; poor Mary was with us no more. She had got married, as girls always will,—the foolish creatures!—however happy they might be at home, or abroad, with their own people.

Mary heartily loved her aunt and uncle, by this time, and was sorry to leave them: yet she must needs marry her brother-in-law, a good, quiet London solicitor, and was now deep in household cares in a dull street, Pimlico way, when she might have been gayly helping me to sweep the stairs at Samoens, and gather bluets\* in those Leamington-like cornfields.

The sentence about “noon-wind” refers to a character of the great valleys on the north of the main Alpine chain, which curiously separates them from those of the Italian side. These great northern valleys are, in the main four,—those of the Rhine (the Grisons), of the Reuss (Canton Uri), of the Rhone (Canton Valais), and the Arve (Faucigny),—all of them in ordinary fine summer weather oppressed by quiet heat in the early part of the day, then burst in upon by wild wind blowing up the valley about noon, or later; a diurnal storm which raises the dust in whirlwinds, and wholly prevents the growth of trees in any beautiful forms, their branches being daily tormented into every irregular and fretful curve they can be strained to, and their leaves wrung round on the stalks, so that half their vitality is torn out of them.

Strangely, and, so far as I know, without notice by scientific men of the difference, the Italian valleys are, in the greater number of them, redeemed from this calamitous law. I have not lately been in either Val d’Aosta, or the Valtelline,

---

\* The blue centaury-like five gentians in a level cluster. Among the corn, it teaches, like the poppy, that everything isn’t meant to be eaten.

nor ever stayed in the upper valley of the Adige ; but neither in the Val Anzasca, the Val Formazza, the Val d'Isella, or the southern St. Gothard, is there any trace of the action of malignant wind like this northern one, which I suppose to be, in the essence of it, the summer form of the bise. It arises, too fatally, punctual to the noon, in the brightest days of spring all over western Savoy.

Be that as it may, in the fields neighboring the two villages which mark the eastern and western extremities of the chain of Mont Blanc,—Sallenches, namely, and Martigny, where I have passed many of the most serviceable days of my life,—this noon wind, associated with inundation, is one of the chief agents in producing the character of the whole scene, and in forming the tempers of the inhabitants. Very early my mind became fixed on this their physical distress, issuing finally not in the distortion of growing trees only, but in abortion of human form and mind, while yet the roots of beauty and virtue remained always of the same strength in the race ; so that, however decimated by cretinism, the Savoyard and Valaisan retain to this day their vigorous personal character, wherever the conditions of ordinary health are observed for them.

So earnestly was my heart set on discovering and contending with the neglect and error which were the causes of so great evil to so noble a people, that—I must here anticipate the progress of many years—I was in treaty again and again for pieces of land near the chain of Mont Blanc on which I thought to establish my life, and round which to direct its best energies. I first actually bought the piece of meadow in Chamouni above the chalets of Blaitiere ; but sold it on perceiving what ruin was inevitable in the valley after it became a tourist rendezvous. Next, I entered into treaty with the Commune of Bonneville for the purchase of the whole top of the Brezon ; but this negotiation came to nothing, because the Commune, unable to see why anybody should want to buy a waste of barren rock, with pasturage only for a few goats in the summer, concluded that I had found a gold mine or a coal-bed in it, and raised their price on me till I left the

Brezon on their hands : (Osborne Gordon having also walked up with me to my proposed hermitage, and, with his usual sagacity, calculated the daily expense of getting anything to eat, up those 4,000 feet from the plain.)

Next, I was tempted by a grand, fourteenth century, square-set castle, with walls six feet thick, and four round towers, cone-roofed, at the angles, on the west bank of the Arve, below La Roche : but this baronial residence having been for many years used by the farmer to whom it belonged for his fruit store, and the three floors of it only accessible by ladders through trap-doors in them, and soaked through with the juice of rotten apples and plums ;—so that the most feasible way of making the place habitable would have been to set fire to the whole, and refit the old masonry with an inner lodging of new wood,—(which might as well have been built inside a mountain cave at once as within those six-feet thick of cemented rock,)—I abandoned also the idea of this gloomy magnificence, and remained fancy-free till 1870, when I again was about to enter into treaty for a farm two thousand feet above Martigny, on the ridge separating the Forclaz from the glen of the Trient, and commanding view of the whole valley of the Rhone, westward to Sierre, and northward to Bex. Design ended by my illness at Matlock, and following sorrow ; of which in their due time.

Up to the year with which I am now concerned, however, 1849, when I was just thirty, no plans of this sort had dawned on me : but the journeying of the year, mostly alone, by the Allée Blanche and Col de Ferret round Mont Blanc and then to Zermatt, for the work chiefly necessary to the fourth volume of “Modern Painters,” gave me the melancholy knowledge of the agricultural condition of the great Alpine chain which was the origin of the design of St. George’s Guild ; and that walk with my father at St. Martin’s virtually closed the days of youthful happiness, and began my true work in the world—for what it is worth.

An entry or two from the beginning of the year may be permitted, connecting old times with new.

“April 15th, Wednesday. Left home, stayed at Folkestone,

happy, but with bad cough, and slight feverish feeling, till Monday. Crossed to Boulogne, with desperate cold coming on. Wrote half letter to Miss Wedderburn," (afterward Mrs. Blackburn,) "in carriage, going over:" the carriages, of course, in old times being lashed on the deck, one sat inside, either for dignity or shelter.

"April 24th, Tuesday. To Paris on rail. Next morning, very thankfully changing horses, by as lovely sunshine as ever I saw, at Charenton. Slept at Sens. Thursday, Montbard; Friday, Dijon. All these evenings I was working hard at my last plate of Giotto." (G.'s tower, I meant; frontispiece to "Seven Lamps," first edition.) "Stopped behind in the lovely morning at Sens, and went after my father and mother an hour later.\* It was very cold, and I was driven out by the fires going out, it being in the large room at the back of the yard, with oil pictures only to be got at through my father's bedroom. †

"April 29th, Sunday, was a threatening day at Champagne. We just walked to the entrance of the wood and back, —I colded and coughing, and generally headachy. In the evening the landlady, who noticed my illness, made me some sirup of violets. Whether by fancy, or chance, or by virtue of violet tea, I got better thenceforward, and have, thank God, had no cold since!" (Diary very slovenly hereabouts; I am obliged to mend a phrase or two.)

"Monday, 30th April. To Geneva, through a good deal of snow, by St. Cergues; which frightened my mother, they having a restive horse in their carriage. She got out on a bank near where I saw the first gentians, and got into mine, as far as St. Cergues. It is deserving of record that at this time, just on the point of coming in sight of the Alps—and that for the first time for three years, a moment which I had looked forward to thinking I should be almost fainting with

---

\* They had given me a little brougham to myself, like the hunting doctor's in "Punch," so that I could stop behind, and catch them up when I chose.

† The inn is fully and exquisitely described by Dickens in "Mrs. Lirriper's Lodgings."

joy, and want to lie down on the earth and take it in my arms;—at this time, I say, I was irrecoverably sulky because George had not got me butter to my bread at Les Rousses.

“Tuesday, 1st May. Walked about Geneva, went to Baulttes’, and drew wood anemones.

“Thursday, 3d May, Chambery. Up the hill that looks toward Aix, with my father and mother; had a chat with an old man, a proprietor of some land on the hillside, who complained bitterly that the priests and the revenue officers seized everything, and that nothing but black bread was left for the peasant.\*

“Friday, 4th May. Half breakfasted at Chambery; started about seven for St. Laurent du Pont, thence up to the Chartreuse, and walked down (all of us); which, however, being done in a hurry, I little enjoyed. But a walk after dinner up to a small chapel, placed on a waving group of mounds, covered with the most smooth and soft sward, over whose sunny gold came the dark piny precipices of the Chartreuse hills, gave me infinite pleasure. I had seen also for the third time, by the Chartreuse torrent, the most wonderful of all Alpine birds—a gray, fluttering stealthy creature, about the size of a sparrow, but of colder gray, and more graceful, which haunts the sides of the fiercest torrents. There is something more strange in it than in the sea-gull—that seems a powerful creature; and the power of the sea, not of a kind so adverse, so hopelessly destructive; but this small creature, silent, tender and light, almost like a moth in its low and irregular flight,—almost touching with its wings the crests of waves that would overthrow a granite wall, and haunting the hollows of the black, cold, herbless rocks that are continually shaken by their spray, has perhaps the nearest approach to the look of a spiritual existence I know in animal life.

“Saturday, May 5th. Back to Chambery, and up by

\* Complaints of this kind always mean that you are near a luxurious capital or town. In this case, Aix les Bains.

Rousseau's house to the point where the thunder-shower came down on us three years ago."

I think it was extremely pretty and free-hearted of my mother to make these reverent pilgrimages to Rousseau's house.\*

With whom I must here thankfully name, among my own masters, also St. Pierre : I have shamefully forgotten hitherto the immense influence of "Paul and Virginia" amid my early readings. Rousseau's effective political power I did not know till much later.

Richard Fall arrived that Saturday at Chambéry ; and by way of amends for our lost Welsh tour, (above, p. 241, vol. ii.) I took him to Vevay and Chamouni, where, on May 14th, the snow was still down to the valley ; crisp frost everywhere ; the Montanvert path entirely hidden, and clear slopes down all the couloirs perfectly even and smooth—ten to twenty feet deep of good, compact snow ; no treacherous surface beds that could slip one over the other.

Couttet and I took Richard up to the cabane of the Montanvert, memory of the long snow walks at Herne Hill now mingling tenderly with the cloudless brightness of the Mer de Glace, in its robe of winter ermine. No venturing on that, however, of course, with every crevasse hidden ; and nobody at the cabane yet, so we took Richard back to the first couloir, showed him how to use foot and pole, to check himself if he went too fast, or got head-foremost ; and we slid down the two thousand feet to the source of the Arveron, in some seven or eight minutes ; † Richard vouchsafing his en-

\* "Les Charmettes." So also "un détachement de la troupe" (of his schoolboys) "sous la conduite de Mr. Topffer, qui ne sait pas le chemin, entreprend de gravir le coteau des Charmettes, pour atteindre à l'habitation de Jean-Jacques Rousseau"—in the year 1833 ; and an admirably faithful and vivid drawing of the place, as it then stood (unchanged till 1849, when papa and mamma and their little St. Preux saw it), is given by Mr. Topffer's own hand on p. 17 of his work here quoted, "Voyage à la Grande Chartreuse," (1833).

† Including ecstatic or contemplative rests : of course one goes much faster than 200 feet a minute, on good snow, at an angle of 30°.

ture approval of that manner of progression by the single significant epithet, "Pernicious !"

It was the last of our winter walks together. Richard did not die, like Charles, but he went on the Stock Exchange ; married a wife, very nice and pretty ; then grew rich ; held a rich man's faiths in political economy ; and bought bad prints of clipper packets in green sea ; and so we gradually gave each other up—with all good wishes on both sides. But Richard, having no more winter walks, became too fat and well liking when he was past fifty—and *did* die, then ; to his sister's great surprise and mine. The loss of him broke her heart, and she soon followed him. During her forty-five or fifty years of life, Eliza Fall (had she but been named Elizabeth instead, I should have liked her ever so much better) remained an entirely worthy and unworldly girl and woman, of true service and counsel always to her brother and me ; caring for us both much more than she was cared for ;—to my mother an affectionate and always acceptable, calling and chatting, friend : capable and intelligent from her earliest youth, nor without graceful fancy and rational poetic power. She wrote far better verses than ever I did, and might have drawn well, but had always what my mother called "perjinketty" ways, which made her typically an old maid in later years. I imagine that, without the least unkind severity, she was yet much of a Puritan at heart, and one rarely heard, if ever, of her going to a theatre, or a rout, or a cricket-match ; yet she was brilliant at a Christmas party, acted any part—that depended on whalebone—admirably, and was extremely witty in a charade. She felt herself sorrowfully turned out of her own house and place when her brother married, and spent most of her summers in travel, with another wise old maid for companion. Then Richard and his wife went to live in Clapham Park ; and Eliza stayed, wistfully alone, in her child's home, for a while. The lease expired, I suppose, and she did not care to renew it. The last time I saw her, she was enjoying some sort of town life in New Bond Street.

Little I thought, in clasping Richard's hand on the ridge of the Jaman that spring,—he going down into the Simmenthal,

I back to Vevay,—that our companying together was ended : but I never have known anything of what was most seriously happening to me till afterward ; this—unastrological readers will please to note—being one of the leaden influences on me of the planet Saturn.

My father and mother were waiting for me at Geneva, and we set out, with short delay, for St. Martin's.

The road from Geneva to Chamouni, passing the extremity of the Salève about five miles south of the city, reaches at that point the sandy plateau of Annemasse, where forms of passport had (anciently) to be transacted, which gave a quarter of an hour for contemplation of what the day had to do.

From the street of the straggling village one saw over the undulations of the nearer, and blue level of the distant, plain, a mass of rocky mountains, presenting for the most part their cliffs to the approaching traveller, and tossing their crests back in careless pride, above the district of well inhabited, but seldom traversed, ravines which wind between the lake of Annecy and vale of Sallanches.

Of these the nearest—yet about twelve miles distant—is the before-named Brezon, a majestic, but unterrific, fortalice of cliff, forest, and meadow, with unseen nests of village, and unexpected balm and honey of garden and orchard nursed in its recesses. The horses have to rest at Bonneville before we reach the foot of it ; and the line, of its foundation first, and then of the loftier Mont Vergy, must be followed for seven or eight miles, without hope apparently of gaining access to the inner mountain world, except by footpath.

A way is opened at last by the Arve, which, rushing furiously through a cleft affording room only for road and river, grants entrance, when the strait is passed, to a valley without the like of it among the Alps. In all other avenues of approach to their central crests the torrents fall steeply, and in places appear to be still cutting their channels deeper, while their lateral cliffs have evidently been in earlier time, at intervals, connected, and rent or worn asunder by traceable violence or decay. But the valley of Cluse is in reality a narrow plain between two chains of mountains which have

never been united, but each independently\* raised, shattered, and softened into their present forms; while the river, instead of deepening the ravine it descends, has filled it to an unknown depth with beds of glacial sand, increased annually, though insensibly, by its wandering floods; but now practically level, and for the most part tenable, with a little logwork to fence off the stream at its angles, in large spaces of cultivable land.

In several turns of the valley the lateral cliffs go plumb down into these fields as if into a green lake; but usually, slopes of shale, now forest-hidden, ascend to heights of six or seven hundred feet before the cliffs begin; then the mountain above becomes partly a fortress wall, partly banks of turf ascending around its bastions or between, but always guarded from avalanche by higher woods or rocks; the snows melting in early spring, and falling in countless cascades, mostly over the cliffs, and then in broken threads down the banks. Beautiful always, and innocent, the higher summits by midsummer are snowless, and no glacial moraine or torrent defaces or disturbs the solitude of their pastoral kingdom.

Leaving the carriage at Cluse, I always used to walk, through this valley, the ten miles to St. Martin's, resting awhile at the springs of Maglan, where, close under the cliff, the water thrills imperceptibly through the crannies of its fallen stones, deeper and deeper every instant; till, within three fathoms of its first trickling thread, it is a deep stream of dazzling brightness, dividing into swift branches eager for their work at the mill, or their ministry to the meadows.

Contrary again to the customs of less enchanted vales, this one opens gradually as it nears the greater mountain, its own lateral cliffs rising also in proportion to its width—those on the left, as one approaches St. Martin's, into the vast towers and promontories of the Aiguille de Varens; those on the right into a mountain scarcely marked in any Alpine chart,

---

\* In the same epoch of time, however. See Mr. Collingwood's "Lime stone Alps of Savoy."

yet from which, if one could climb its dangerous turf and mural diadem, there must be commanded precisely the most noble view of Mont Blanc granted by any summit of his sentinel chains.

In the only map of Switzerland which has ever been executed with common sense and intelligence ("Original von Keller's Zweiter Reisekarte der Schweiz," 1844), this peak is, nevertheless, left without distinction from that called the "Croix de Fer," of which it is only a satellite. But there are any quantity of iron crosses on the Western Alps, and the proper name of this dominant peak is that given in M. Dajoz's lithographed "Carte des rives du Lac de Genève," \*—"Mont Fleury;" though the more usual one with the old Chamouni guides was "Montagne des Fours;" but I never heard any name given to its castellated outwork. In Studer's geological map it is well drawn, but nameless; in the Alpine Club's map of South-Western Alps, it is only a long ridge descending from the Mont Fleury, which, there called "Pointe Percée," bears a star, indicating a view of Mont Blanc, as probably of Geneva also, from that summit. But the vision from the lower promontory, which commands the Chamouni aiguilles with less foreshortening, and looks steep down into the valley of Cluse from end to end, must be infinitely more beautiful.

Its highest ridge is just opposite the Nant d'Arpenaz, and might in future descriptions of the Sallenche mountains be conveniently called the "Tower of Arpenaz." After passing the curved rock from which the waterfall leaps into its calm festoons, the cliffs become changed in material, first into thin-bedded blue limestone, and then into dark slates and shales, which partly sadden, partly enrich, with their cultivable ruin, all the lower hillsides henceforward to the very gate of Chamouni. A mile or two beyond the Nant

---

\* Chez Briquet et Fils, éditeurs, au bas de la Cité à Genève, 1860; extremely careful in its delineation of the lower mountain masses, and on the whole the best existing map for the ordinary traveller. The Alpine Club maps give nothing clearly but the taverns and foot paths.

d'Arpenaz the road ascends over a bank of their crumbling flakes, which the little stream, pendent like a white thread over the mid-cliff of the Aiguille de Varens, drifts down before it in summer rain, lightly as dead leaves. The old people's carriage dips into the trough of the dry bed, descends the gentle embankment on the other side, and turns into the courtyard of the inn under one of the thin arches, raised a foot or two above the gap in the wall, which give honorable distinction either to the greater vineyards or open courts, like this one, of hospitable houses. Stableyard, I should have said, not courtyard; no palatial pride of seclusion, like M. Dessein's, but a mere square of irregular stable,—not even coach-house, though with room for a carriage or two: but built only for shelter of the now unknown char-à-banc, a seat for three between two pairs of wheels, with a plank for footing, at a convenient step from the ground. The fourth side of the yard was formed by the front of the inn, which stood with its side to the road, its back to the neglected garden and incorrigible streamlet: a two-storied building of solid gray stone, with gabled roof and garrets; a central passage on the second floor giving access to the three or four bedrooms looking to back and front, and at the end to an open gallery over the road. The last room on the left, larger than the rest, and with a window opening on the gallery, used to be my father's and mother's; that next it, with one square window in the solid wall, looking into the yard, mine. Floors and partitions all of rough-sawn larch; the planks of the passage floor uncomfortably thin and bending, as if one might easily fall through; some pretence of papering, I think, in the old people's state-room. A public room, about the size of my present study, say twelve paces by six within its cupboards, and usually full of flies, gave us the end of its table for meals, and was undisturbed through the day, except during the hour when the diligence dined.

I should have said that my square window looked *over*, rather than *into* the yard, for one could scarcely see anything going on there, but by putting one's head out; the real and prevalent prospect was first into the leaves of the walnut-tree

in the corner ; then of the mossy stable roofs behind them ; then of the delicately tin-mailed and glittering spire of the village church ; and beyond these, the creamy, curdling, overflowing seas of snow on the Mont Blanc de St. Gervais. The Aiguille de Bionnassay, the most graceful buttress ridge in all the Alps, and Mont Blanc himself, above the full fronts of the Aiguille and Dome du Gouté, followed further to the left. So much came into the field of that little four-foot-square casement.

If one had a mind for a stroll, in half a minute's turn to the left from the yard gate one came to the aforesaid village church, the size of a couple of cottages, and one could lean, stooping, to look at it, on the deeply lichened stones of its low churchyard wall, which enclosed the cluster of iron crosses,—floretted with everlastings, or garlands of fresh flowers if it was just after Sunday,—on two sides ; the cart-path to the upper village branching off round it from the road to Chamouni. Fifty yards further, one came to the single-arched bridge by which the road to Sallenche, again dividing from that of Chamouni, crosses the Arve, clearing some sixty feet of strongly-rushing water with a leap of lovely elliptic curve ; lovely, because here traced with the lightest possible substance of masonry, rising to its ridge without a pebble's weight to spare,\* and then signed for sacred pontifical work by a cross high above the parapet, seen from as far as one can see the bridge itself.

Neither line, nor word, nor color, has ever yet given rendering of the rich confusions of garden and cottage through which the winding paths ascend above the church ; walled, not with any notion of guarding the ground, except from passing herds of cattle and goats, but chiefly to get the stones off the surface into narrowest compass, and, with the easy principle of horticulture,—plant everything, and let what can,

---

\* Of course, in modern levelled bridges, with any quantity of over-charged masonry, the opening for the stream is not essentially an arch, but a tunnel, and might for that matter be blown through the solid wall, instead of built to bear it.

grow ;—the under-crops of unkempt pease, potatoes, cabbage, hemp, and maize, content with what sun can get down to them through luxuriantly-branched apple and plum trees, and towering shade of walnuts, with trunks eight or ten feet in girth ; a little space left to light the fronts of the cottages themselves, whose roof and balconies, the vines seem to think, have been constructed for their pleasure only, and climb, wreath, and swing themselves about accordingly wherever they choose, tossing their young tendrils far up into the blue sky of spring, and festooning the balconies in autumn with Correggian fresco of purple, relieved against the pendent gold of the harvested maize.

The absolute seclusion and independence of this manner of rural life, totally without thought or forethought of any foreign help or parsimonious store, drinking its wine out of the cluster, and saving of the last year's harvest only seed for the next,—the serene *laissez faire* given to God and nature, with thanks for the good, and submission to the temporary evil of blight or flood, as due to sinful mortality ; and the persistence, through better or worse, in their fathers' ways, and use of their fathers' tools, and holding to their fathers' names and fields, faithfully as the trees to their roots, or the rocks to their wild flowers,—all this beside us for our Sunday walk, with the gray, inaccessible walls of the Tower of Arpenaz above, dim in their distant height, and all the morning air twice brighter for the glow of the cloudless glaciers, gave me deeper and more wonderful joy than all the careful beauty and disciplined rightness of the Bernese Oberland, or even the stately streets of my dearest cities of Italy.

Here is a little bit of diary, five years later, giving a detail or two of the opposite hillside above Sallenche.

“ St. Martin's, 26th July, 1854. I was up by the millstream this evening, and climbed to the right of it, up among the sloping waves of grass. I never was so struck by their intense beauty,—the masses of walnut shading them with their broad, cool, clearly-formed leafage ; the glossy gray stems of the cherry trees, as if bound round tight with satin, twining and writhing against the shadows ; the tall pollards of oak set

here and there in the soft banks, as if to show their smoothness by contrast, yet themselves beautiful, rugged, and covered with deep brown and bright silver moss. Here and there a chestnut—sharp, and soft, and starry;\* and always the steep banks, one above another, melting † into terraces of pure velvet, gilded with corn; here and there a black—jet-black—crag of slate breaking into a frown above them, and mouldering away down into the gloomy torrent, fringed on its opposite edge, a grisly cliff, with delicate birch and pine, rising against the snow light of Mont Blanc. And opposite always the mighty Varens lost in the cloud its ineffable walls of crag.”

The next following entry is worth keeping, as a sketch of the undisturbed Catholicism among these hills since the days of St. Bernard of Ancey, and Mont Velan.

“Sallenches, Sunday, 10th June (1849). The waitress here, a daughter of the landlord, asked me to-day whether Protestants all said grace before meat, observing me to do so. On this we got into conversation, out of which I have elicited some points worth remembering; to wit, that some of the men only go to confession once a year, and that some of them, to spare their memories, write their sins,—which, however, they cannot deliver on paper to the confessor, but must read them aloud. Louise appeared much horror-struck at the idea which such a procedure admits, of ‘losing one’s sins;’ and of their being found by some one who was not a confessor. She spoke with great pleasure of the Capucins who come sometimes; said they were such delightful confessors, and made ‘des morales superbes,’ and that they preached so well that everybody listened with all their might, so that you might tap them on the back and they would never turn round. Of the Jesuits she spoke with less affection, saying that in their great general confessions, which took several days, two or three command-

\* I meant—the leaves themselves, sharp, the clustered nuts, soft, the arrangement of leaves, starry.

† “Melting”—seeming to flow into the levels like lava; not cut sharp down to them.

ments at a time, they would not allow a *single* sin to be committed by the persons coming to them in the meantime, or else they refused them absolution—refusal which takes place sometimes for less cause. They had a poor old servant, who could only speak patois; the priest couldn't understand her, nor she him, so that he could not find out whether she knew her catechism. He refused absolution, and the poor old creature wept and raved about it, and was in a passion with all the world. She was afterward burned in the great fire here! I went to mass, to hear how they preached: the people orderly, and church perfectly full. The sermon, by a fat stuttering curé, was from the 'Receive not the grace of God in vain,' on the Sacraments. 'Two of these called Sacremens des Morts, because they are received by persons in a state of spiritual death; the five others called Sacramens des Vivants, because they presume, in those who receive them, a state of spiritual life. The three sacraments of Baptism, Confirmation, and Orders, can only be received once; because they impress an indelible seal, and make men what they were not; and what, after they are once, they cannot unmake themselves. Baptism makes people children or subjects of God; Confirmation makes them soldiers of God, or soldiers of His Kingdom; and Orders make them magistrates of the Kingdom. If you have received baptism, you are therefore an "enfant de Dieu." What being an 'enfant de Dieu' meant was not very clear; for the ineffaceability of baptism was illustrated by the instance of Julian the Apostate, who did all he could to efface it—'Mais la mort,' said the preacher, growing eloquent, 'le poursuivit jusqu'à'—(he stopped, for he did not know exactly where *to*)—'la tombe; et il est descendu aux enfers, portant cette marque, qui fera éternellement sa honte et sa confusion.'"

I wonder at the lightness of these entries, now; but I was too actively, happily, and selfishly busy, to be thoughtful, except only in scholarly way; but I got one of the sharpest warnings of my life only a day after leaving papa and mamma at St. Martin's—(cruel animal that I was!—to do geology in the Allée Blanche, and at Zermatt.) I got a chill by stopping, when I was hot, in the breeze of one of the ice streams, in as-

ending to the Col de Bon Homme ; woke next morning in the chalet of Chapiù with acute sore throat ; crossed the Col de la Seigne scarcely able to sit my mule, and was put to bed by Couttet in a little room under the tiles at Courmayeur, where he nursed me as he did at Padua ; gave me hot herb-tea, and got me on muleback again, and over the Col de Ferret, in a day or two ; but there were some hours of those feverish nights which ought to have made my diaries more earnest afterward. They go off, however, into mere geology and school divinity for a while, of which this bit, written the evening after crossing the Col de Ferret, is important as evidence of my beginning to recognize what James Forbes had proved of glacier flow :—

\* “The most magnificent piece of ruin I have yet seen in the Alps is that opposite the embouchure of the lower glacier of the Val de Ferret, near Courmayeur ; the pines are small indeed, but they are hurled hither and thither, twisted and mingled in all conditions of form, and all phases of expiring life, with the chaos of massy rocks, which the glacier has gnashed down, or the opposite mountain hurled. And yet, farther on, at the head of the valley, there is another, in its way as wonderful ; less picturesque, but wilder still,—the remains of the eboulement of the Glacier de Triolet caused by the fall of an aiguille near the Petits Jorasses—the most phrenzied accumulation of moraines I have ever seen ; not dropped one by one into a heap, and pushed forward by the ice ploughshare, but evidently borne down by some mingled torrent of ice and rock and flood, with the swiftness of water and the weight of stone, and thrown along the mountain-side like pebbles from a stormy sea ;—but the ruins of an Alp instead of the powder of a flint bed. The glacier torrent of Triolet is almost lost among them, but that below, coming just from the base of the Jorasses, is exquisite beyond description in the play of its currents, narrow eddies of white nevè round islands of rock—falling in upon each other in deep and eddying pools ; flowing forth again in massy sheets of ice, feeding, not one glacier stream, but cascade above cascade, far into the mountain gulph.”

And so on, of divers matters, through four hundred and fifty pages; not all as good as that, but the core of what I had to learn and teach about gneiss and ice and clouds;—George indefatigably carrying his little daguerreotype box up everywhere, and taking the first image of the Matterhorn, as also of the aiguilles of Chamouni, ever drawn by the sun. A thing to be proud of still, though he is now a justice of peace, somewhere in Australia.

The following entries, in June, of which the two last come in the midst of busy and otherwise happy days, are all with which I permit myself to trouble the reader for this time.

“Chamouni, Sunday, June 17th. Quiet south rain till twelve o'clock. I have been abstracting the book of Revelation (they say the French are beaten again at Rome, and another revolution in Paris); many signs seem to multiply around us, and yet my unbelief yields no more than when all the horizon was clear. I was especially struck with the general appellation of the system of the world as the ‘Mystery of God,’ Chap. x. 7, compared with Hebrews xi. 6, which I read this morning in our usual course.\* Theme enough for the day’s thought.

“Half-past five. Pouring still, but I got out before dinner during a fine blink, which lasted just long enough to let me, by almost running, and leaping all the streams, reach the end of the pine wood next the source of the Arveron. There I had to turn to the left to the wooden bridge, when behold a sight new to me; an avalanche had evidently taken place from the (upper) glacier into the very bed of the great cata-

---

\* Read the 5th, 6th, and 7th verses in succession:—“AND THE ANGEL WHICH I SAW STAND UPON THE SEA AND UPON THE EARTH LIFTED UP HIS HAND TO HEAVEN, AND SWARE BY HIM THAT LIVETH FOR EVER AND EVER, WHO CREATED HEAVEN, AND THE THINGS THAT THERIN ARE, AND THE EARTH, AND THE THINGS THAT THERIN ARE, AND THE SEA, AND THE THINGS WHICH ARE THERIN, THAT THERE SHOULD BE TIME NO LONGER: BUT IN THE DAYS OF THE VOICE OF THE SEVENTH ANGEL, WHEN HE SHALL BEGIN TO SOUND, THE MYSTERY OF GOD SHOULD BE FINISHED, AS HE HATH DECLARED TO HIS SERVANTS THE PROPHETS.”

ract, and the stream was as nearly choked as could be with balls and ellipsoids of ice, from the size of its common stones to that of a portmanteau, which were rolling down with it wildly, generally swinging out and in of the water as it waved ; but when they came to the shallow parts, tumbled and tossed over one another, and then plunging back into the deep water like so many stranded porpoises, spinning as they went down, and showing their dark backs with wilder swings after their plunge,—white, as they emerged, black, owing to their clearness as seen in the water ; the stream itself of a pale clay-color, opaque, larger by one-half than ever I saw it, and running, as I suppose, not less than ten miles an hour ; the whole mass, water and ice, looking like some thick paste full of plums, or ill-made pineapple ice, with quantities of fruit in it, and the whole looking like a solid body ; for the nodules of ice hardly changed their relative position during the quarter of a minute they were severally in sight, going down in a mass thundering and rumbling against the piles of the bridge. It made me giddy to look at it ; and the more, because, on raising the eye, there was always the great cataract itself startling one, as if it had just begun and seeming to increase every instant, bounding and hurling itself hither and thither, as if it was striving to dash itself to pieces, not falling because it could not help it ; and behind there was a fearful storm coming up by the Breven, its grisly clouds warping up, as it seemed, against the river and cataract, with pillars of hail behind. I stayed till it began, and then crept back through the wood, running from one tree to another—there is really now a bit of blue sky over the Pavillon.\*

“ June 18th. Evening, nine o'clock. I must not write much, it is past bed-time ; went to source of Arveron with my father and mother and Miss Dowie ; † never saw it so lovely ; drew afterward near the source, piny sketch, well begun. After tea walked up nearly to my beloved old place on the Breven,

---

\* The green mountain at the base of the Aiguille du Gouté.

† Sybilla. See “ Fors,” Letter 90th, “ Lost Jewels,” p. 103.

and saw a solemn sunset, yet not very bright ; the granulated rosy crags of La Cote especially. Thank God for permitting me to sit on that slope once more thus strong in health and limb.

“Chamouni, day 13th, Monday, June 25th. Up rather late this morning, and lost time before breakfast over camera-lucida ; drove to Argentière with my mother, who enjoyed her drive exceedingly ; back at one o'clock to my usual place (Les Tines, till four) ; out after dinner, rambling about Breven with sketch-book in search of a view of Aiguille du Plan ; didn't find one, but found some wild strawberries, which were a consolation. The day has been fine, with scattered clouds ; in the evening a most curious case of floating cap cloud, *hooding* the Mont Blanc summit without touching it, like gossamer blown upward from a field ; an awning of slender threads waving like weeds in the blue sky, (as weeds in a brook current, I meant,) and drawn out like floss silk as fine as snow. This cloud, that does not *touch* the snow, but hovers over it at a certain height following the convexity of the mountain, has always seemed most unaccountable to me.

“Chamouni, day 14th, Tuesday, June 26th. Heavy, rounded, somewhat dirty clouds on the Pavillon (half-past six) ; but summit bright and clear, and all very promising.

“Get following books if possible—

“‘Mémoires de la Société de Physique et d'Histoire Naturelle de Genève’ (t. iv., p. 209), on the valley of Val Orsine, by M. Necker ; ‘Actes de la Société Helvétique des Sc. Nat.’ 1837, p. 28, 1839, p. 47, on Nagelflue pebbles.

“Evening. After one of the most heavenly walks I ever took in Chamouni among the woods of the Pèlerins, I come in to hear of my poor cousin Mary's death. How well I recollect sitting with her on the slopes of the Breven, and reasoning about the height of La Cote : she knows it now, better than I and thinks it less.

“Chamouni, day 15th, Wednesday, June 27th. One of the heavenly Alpine mornings, all alight : I have been trying to get some of the effect of sunrise on the Montanvert, and

aerial quality of aiguilles,—in vain. Slanting rays now touch the turf by the chalet of Blaitière, as perhaps they touch poor Mary's grave."

---

## CHAPTER XII.

## OTTERBURN.

In blaming myself, as often I have done, and may have occasion to do again, for my want of affection to other people, I must also express continually, as I think back about it, more and more wonder that ever anybody had any affection for *me*. I thought they might as well have got fond of a camera lucida, or an ivory foot-rule: all my faculty was merely in showing that such and such things were so; I was no orator, no actor, no painter but in a minute and generally invisible manner; and I couldn't bear being interrupted in anything I was about.

Nevertheless, some sensible grown up people *did* get to like me!—the best of them with a protective feeling that I wanted guidance no less than sympathy; and the higher religious souls, hoping to lead me to the golden gates.

I have no memory, and no notion, when I first *saw* Pauline, Lady Trevelyan; but she became at once a monitress-friend in whom I wholly trusted,—(not that I ever took her advice!)—and the happiness of her own life was certainly increased by my books and me. Sir Walter, being a thorough botanist, and interested in pure science generally, did not hunt, but was benevolently useful, as a landlord should be, in his county. I had no interests in county business at that time; but used to have happy agricultural or floral chats with Sir Walter, and entirely admired his unambitious, yet dignified stability of rural, and celestial, life, there amidst the Northumbrian winds.

Wallington is in the old Percy country, the broad descent of main valley leading down by Otterburn from the Cheviots. An ugly house enough it was; square set, and somewhat bare

walled, looking down a slope of rough wide field to a burn, the Wansbeck, neither bright nor rapid, but with a ledge or two of sandstone to drip over, or lean against in pools; bits of crag in the distance, worth driving to, for sight of the sweeps of moor round them, and breaths of breeze from Carter Fell.

There were no children of its own in Wallington, but Lady Trevelyan's little niece, Constance Hilliard, nine years old when I first saw her there, glittered about the place in an extremely quaint and witty way; and took to me a little, like her aunt. Afterward her mother and she, in their little rectory home at Cowley (near Hillingdon), became important among my feminine friendships, and gave me, of such petting and teasing as women are good for, sometimes more than enough.

But the dearness of Wallington was founded, as years went on, more deeply in its having made known to me the best and truest friend of all my life; *best* for me, because he was of my father's race, and native town; *truest*, because he knew always how to help us both, and never made any mistakes in doing so—Dr. John Brown. He was staying at Wallington when I stopped there on my way to give my Edinburgh lectures; and we walked together, with little Connie, on the moors: it dawned on me, so, gradually, what manner of man he was.

This, the reader capable of learning at all—(there are few now who can understand a good Scotchman of the old classic breed)—had better learn, straightway, from the record he gave of his own father's life,\* of which I must give here this one passage of his childhood. His father was a young pastor, crowned in perfectness of faithful service, together with his "modest, calm, thrifty, reasonable, happy-hearted" wife, his student-love; this their son, five years old,—just at the age when I look back to the creation of the world, for *me*, in Friar's Crag, of Derwentwater; *my* mother, thrifty and reasonable also, meantime taking care that not more than two

---

\* Letter to Rev. John Cairns. Edmonston and Douglas, 1861.

plums should be in my pie for dinner ; my father, also thrifty and reasonable, triumphing in his travel at Whitehaven, a "wanderer," like the pedler in the "Excursion," selling sherry instead of bobbins ;—all of us as happy as cicadas (and a little more). Now hear Dr. John Brown :

"On the morning of the 28th May, 1816, my eldest sister Janet and I were sleeping in the kitchen-bed with Tibbie Meek, our only servant. We were all three awakened by a cry of pain—sharp, insufferable, as if one were stung. Years after we two confided to each other, sitting by the burnside, that we thought that 'great cry' which arose at midnight in Egypt must have been like it. We all knew whose voice it was, and, in our night-clothes, we ran into the passage, and into the little parlor to the left hand, in which was a closet-bed. We found my father standing before us, erect, his hands clenched in his black hair, his eyes full of misery and amazement, his face white as that of the dead. He frightened us. He saw this, or else his intense will had mastered his agony, for, taking his hands from his head, he said, slowly and gently, 'Let us give thanks,' and turned to a little sofa\* in the room ; there lay our mother, dead. She had long been ailing. I remember her sitting in a shawl,—an Indian one with little dark green spots on a light ground,—and watching her growing pale with what I afterward knew must have been strong pain. She had, being feverish, slipped out of bed, and 'grandmother,' her mother, seeing her 'change come,' had called my father, and they two saw her open her blue, kind, and true eyes, 'comfortable' to us all 'as the day'—I remember them better than those of any one I saw yesterday—and, with one faint look of recognition to him, close them till the time of the restitution of all things."

He had a precious sister left to him ; but his life, as the noblest Scottish lives are always, was thenceforward generously sad,—and endlessly pitiful.

---

\* "This sofa, which was henceforward sacred in the house, he had always beside him. He used to tell us he set her down upon it when he brought her home to the manse."

No one has yet separated, in analyzing the mind of Scott, the pity from the pride; no one, in the mind of Carlyle, the pity from the anger.

Lest I should not be spared to write another "Præterita," I will give, in this place, a few words of Carlyle's, which throw more lovely light on his character than any he has written,—as, indeed, his instantly vivid words always did; and it is a bitter blame and shame to me that I have not recorded those spoken to myself, often with trust and affection, always with kindness. But I find this piece, nearly word for word, in my diary of 25th October, 1874. He had been quoting the last words of Goethe, "Open the window, let us have more light" (this about an hour before painless death, his eyes failing him).

I referred to the "It grows dark, boys, you may go," of the great master of the High School of Edinburgh.\* On which Carlyle instantly opened into beautiful account of Adam's early life, his intense zeal and industry as a poor boy in a Highland cottage, lying flat on the hearth to learn his Latin grammar by the light of a peat fire. Carlyle's own memory is only of Adam's funeral, when he, Carlyle, was a boy of fourteen, making one of a crowd waiting near the gate of the High School, of which part of the old black building of the time of James I. was still standing—its motto, "Nisi Dominus, frustra," everywhere. A half-holiday had been given, that the boys might see the coffin carried by,—only about five-and-twenty people in all, Carlyle thought—"big-bellied persons, sympathetic bailies, relieving each other in carrying the pall." The boys collected in a group, as it passed within the railings, uttered a low "Ah me! Ah dear!" or the like, half sigh or wail—"and he is gone from us then!"

"The sound of the boys' wail is in my ears yet," said Carlyle.

His own first teacher in Latin, an old clergyman. He had

---

\* It was *his* Latin grammar, the best ever composed, which my Camberwell tutor threw aside, as above told, for a "Scotch thing."

indeed been sent first to a schoolmaster in his own village, "the joyfullest little mortal, he believed, on earth," learning his declensions out of an eighteen-penny book! giving his whole might and heart to understand. And the master could teach him nothing, merely involved him day by day in misery of non-understanding, the boy getting crushed and sick, till (his mother?) saw it, and then he was sent to this clergyman, "a perfect sage, on the humblest scale." Seventy pounds a year, his income at first entering into life; never more than a hundred. Six daughters and two sons; the eldest sister, Margaret, "a little bit lassie,"—then in a lower voice, "the flower of all the flock to *me*." Returning from her little visitations to the poor, dressed in her sober prettiest, "the most amiable of possible objects." Not beautiful in any notable way afterward, but "comely in the highest degree." With dutiful sweetness, "the right hand of her father." Lived to be seven-and-twenty. "The last time that I wept aloud in the world, I think was at her death."

Riding down from Craigenputtock to Dumfries,—“a monstrous precipice of rocks on one hand of you, a merry brook on the other side. . . . In the night just before sunrise.”

He was riding down, he and his brother, to fetch away her body,—they having just heard of her death.

A surveyor (?), or some scientific and evidently superior kind of person, had been doing work which involved staying near, or in, her father's house, and they got engaged, and then he broke it off. "They said that was the beginning of it." The death had been so sudden, and so unexpected, that Mary's mother, then a girl of twelve or thirteen, rushed out of the house and up to the cart, \* shrieking, rather than crying, "Where's Peggy?"

I could not make out, quite, how the two parts of the family were separated, so that his sister expected them to bring her back living, (or even well?). Carlyle was so much affected, and spoke so low, that I could not venture to press him on detail.

---

\* "Rushed at the cart," his words. Ending with his deep "Heigh dear," sigh. "Sunt lachrymæ rerum."

This master of his then, the father of Margaret, was entirely kind and wise in teaching him—a Scotch gentleman of old race and feeling, an Andrea Ferrara and some silver-mounted canes hanging in his study, last remnants of the old times.

We fell away upon Mill's essay on the substitution of patriotism for religion.

“Actually the most paltry rag of”—a chain of vituperative contempt too fast to note—“it has fallen to my lot to come in with. Among my acquaintance I have not seen a person talking of a thing he so little understood.” The point of his indignation was Mill's supposing that, if God did not make everybody “happy,” it was because He had no sufficient power, “was not enough supplied with the article.” Nothing makes Carlyle more contemptuous than this coveting of “happiness.”

Perhaps we had better hear what Polissena and the nun of Florence (“Christ's Folk,” IV.) have to say about happiness, of *their* sort; and consider what every strong heart feels in the doing of any noble thing, and every good craftsman in making any beautiful one, before we despise any innocent person who looks for happiness in this world, as well as hereafter. But assuredly the strength of Scottish character has always been perfected by suffering; and the types of it given by Scott in Flora MacIvor, Edith Bellenden, Mary of Avenel, and Jeanie Deans,—to name only those which the reader will remember without effort,—are chiefly notable in the way they bear sorrow; as the whole tone of Scottish temper, ballad poetry, and music, which no other school has ever been able to imitate, has arisen out of the sad associations which, one by one, have gathered round every loveliest scene in the border land. Nor is there anything among other beautiful nations to approach the dignity of a true Scots-woman's face, in the tried perfectness of her old age.

I have seen them beautiful in the same way earlier, when they had passed through trial; my own Joanie's face owes the calm of its radiance to days of no ordinary sorrow—even before she came, when my father had been laid to his rest

under Croydon hills, to keep her faithful watch by my mother's side, while I was seeking selfish happiness far away in work which to-day has come to nought. What I have myself since owed to her,—life certainly, and more than life, for many and many a year,—was meant to have been told long since, had I been able to finish this book in the time I designed it. What Dr. John Brown became to me, is partly shown in the continual references to his sympathy in the letters of “*Hortus Inclusus* ;” but nothing could tell the loss to me in his death, nor the grief to how many greater souls than mine, that had been possessed in patience through his love.

I must give one piece more of his own letter, with the following fragment, written in the earlier part of this year, and meant to have been carried on into some detail of the impressions received in my father's native Edinburgh, and on the northern coast, from Queen's Ferry round by Prestonpans to Dunbar and Berwick.

Dr. Brown goes on :—“A year ago, I found an elderly countrywoman, a widow, waiting for me. Rising up, she said, ‘D'ye mind me?’ I looked at her, but could get nothing from her face ; but the voice remained in my ear, as if coming from the ‘fields of sleep,’ and I said by a sort of instinct, ‘Tibbie Meek!’ I had not seen her or heard her voice for more than forty years.”

The reader will please note the pure Scotch phrase “D'ye mind me?” and compare Meg Merrilies' use of it. “At length she guided them through the mazes of the wood to a little open glade of about a quarter of an acre, surrounded by trees and bushes, which made a wild and irregular\* boundary. Even in winter, it was a sheltered and snugly sequestered spot ; but when arrayed in the verdure of spring, the earth sending forth all its wild flowers ; the shrubs spreading

---

\* It might have been “irregular,” in ground just cut up for building leases, in South Lambeth ; wild, yet as regular as a disciplined army, had it been the pines of Uri. It *was* a waste of blossom, a shade of weeping birches.

their waste of blossom around it, and the weeping birches, which towered over the underwood, drooping their long and leafy fibres to intercept the sun, it must have seemed a place for a youthful poet to study his earliest sonnet, or a pair of lovers to exchange their first mutual avowal of affection. Apparently it now awakened very different recollections. Bertram's brow, when he had looked round the spot, became gloomy and embarrassed. Meg, after muttering to herself, 'This is the very spot,' looked at him with a ghastly side glance,—'D'ye mind it?'

"'Yes,' answered Bertram, 'imperfectly I do.'

"'Ay,' pursued his guide, 'on this very spot the man fell from his horse—I was behind that bourtree \*-bush at the very moment. Now will I show you the further track—the *last time ye travelled it, was in these arms.*'"

That was twenty years before, for Bertram's nurse; (compare Waverley's and Morton's;) Dr. Brown's Tibbie; my own father's Mause; my Anne; all women of the same stamp; my Saxon mother not altogether comprehending them; but when Dr. John Brown first saw my account of my mother and Anne in "Fors," he understood both of them, and wrote back to me of "those two blessed women," as he would have spoken of their angels, had he then been beside them, looking on another Face.

But my reason for quoting this piece of "Guy Mannering" here is to explain to the reader who cares to know it, the difference between the Scotch "mind" for "remember," and any other phrase of any other tongue, applied to the act of memory.

In order that you may, in the Scottish sense, "mind" anything, first there must be something to "mind"—and then, the "mind" to mind it. In a thousand miles of iron railway, or railway train, there is nothing in one rod or bar to distinguish it from another. You can't "mind" which sleeper is which. Nor, on the other hand, if you drive from Chillon

---

\*Elder, in modern Scotch; but in the Douglas glossary, *Bower-bush*.

to Vevay, asleep, can you “mind” the characteristics of the lake of Geneva. Meg could not have expected Bertram to “mind” at what corner of a street in Manchester—or in what ditch of the Isle of Dogs—anything had passed directly bearing on his own fate. She expected him to “mind” only a beautiful scene, of perfect individual character, and she would not have expected him to “mind” even that, had she not known he had persevering sense and memorial powers of very high order.

Now it is the peculiar character of Scottish as distinct from all other scenery on a small scale in north Europe, to have these distinctively “mindable” features. One range of coteau by a French river is exactly like another; one turn of glen in the Black Forest is only the last turn re-turned; one sweep of Jura pasture and crag, the mere echo of the fields and crags of ten miles away. But in the whole course of Tweed, Teviot, Gala, Tay, Forth, and Clyde, there is perhaps scarcely a bend of ravine, or nook of valley, which would not be recognizable by its inhabitants from every other. And there is no other country in which the roots of memory are so entwined with the beauty of nature, instead of the pride of men; no other in which the song of “Auld lang syne” could have been written,—or Lady Nairn’s ballad of “The Auld House.”

. . . . .

I did not in last “Præterita” enough explain the reason for my seeking homes on the crests of Alps, in my own special study of cloud and sky; but I have only known too late, within this last month, the absolutely literal truth of Turner’s saying that the most beautiful skies in the world known to him were those of the Isle of Thanet.

In a former number of “Præterita” I have told how my mother kept me quiet in a boy’s illness by telling me to think of Dash, and Dover; and among the early drawings left for gift to Joanie are all those made—the first ever made from nature—at Sevenoaks, Tunbridge, Canterbury, and Dover. One of the poorest-nothings of these, a mere scrawl in pen

and ink, of cumulus cloud crossed by delicate horizontal bars on the horizon, is the first attempt I ever made to draw a sky,—fifty-five years ago. That same sky I saw again over the same sea horizon at sunset only five weeks ago. And three or four days of sunshine following, I saw, to my amazement, that the skies of Turner were still bright above the foulness of smoke-cloud or the flight of plague-cloud; and that the forms which, in the pure air of Kent and Picardy, the upper cirri were capable of assuming, undisturbed by tornado, unmingled with volcanic exhalation and lifted out of the white crests of ever-renewed tidal waves, were infinite, lovely and marvellous beyond any that I had ever seen from moor or alp; while yet on the horizon, if left for as much as an hour undefiled by fuel of fire, there was the azure air I had known of old, alike in the lowland distance and on the Highland hills. What might the coasts of France and England have been now, if from the days of Bertha in Canterbury, and of Godefroy in Boulogne, the Christian faith had been held by both nations in peace, in this pure air of heaven? What might the hills of Cheviot and the vale of Tweed have been now, if from the days of Cuthbert in Holy Isle, and of Edwin in Edinburgh, the Crosses of St. George and St. Andrew had been borne by brethren; and the fiery Percy and true Douglas laid down their lives only for their people?

FOLKESTONE, 11th October, 1887.

### CHAPTER I.

#### THE GRANDE CHARTREUSE.

##### MONT BLANC REVISITED.

(*Written at Nyon in 1845.*)

O Mount beloved, mine eyes again  
Behold the twilight's sanguine stain  
    Along thy peaks expire.  
O Mount beloved, thy frontier waste  
I seek with a religious haste  
    And reverent desire.

They meet me, 'midst thy shadows cold,—  
Such thoughts as holy men of old  
    Amid the desert found ;—  
Such gladness, as in Him they felt  
Who with them through the darkness dwelt,  
    And compassed all around.

Ah, happy, if His will were so,  
To give me manna here for snow,  
    And by the torrent side  
To lead me as He leads His flocks  
Of wild deer through the lonely rocks  
    In peace, unterrified ;

Since, from the things that trustful rest,  
The partridge on her purple nest,  
    The marmot in his den,

God wins a worship more resigned,  
 A purer praise than He can find  
 Upon the lips of men.

Alas for man ! who hath no sense  
 Of gratefulness nor confidence,  
 But still regrets and raves,  
 Till all God's love can scarcely win  
 One soul from taking pride in sin,  
 And pleasure over graves.

Yet teach me, God, a milder thought,  
 Lest I, of all Thy blood has bought,  
 Least honorable be ;  
 And this, that leads me to condemn,  
 Be rather want of love for them  
 Than jealousy for Thee.

These verses, above noticed (ii., 276), with one following sonnet, as the last rhymes I attempted in any seriousness, were nevertheless themselves extremely earnest, and express, with more boldness and simplicity than I feel able to use now with my readers, the real temper in which I began the best work of my life. My mother at once found fault with the words "sanguine stain," as painful, and untrue of the rose-color on snow at sunset ; but they had their meaning to myself—the too common Evangelical phrase, "washed in the blood of Christ," being, it seemed to me, if true at all, true of the earth and her purest snow, as well as of her purest creatures ; and the claim of being able to find among the rock-shadows thoughts such as hermits of old found in the desert, whether it seem immodest or not, was wholly true. Whatever might be my common faults or weaknesses, they were rebuked among the hills ; and the only days I can look back to as, according to the powers given me, rightly or wisely in entireness spent, have been in sight of Mont Blanc, Monte Rosa, or the Jungfrau.

When I was most strongly under this influence, I tried to trace—and I think have traced rightly, so far as I was then able—in the last chapter of "Modern Painters," the power of

mountains in solemnizing the thoughts and purifying the hearts of the greatest nations of antiquity, and the greatest teachers of Christian faith. But I did not then dwell on what I had only felt, but not ascertained—the destruction of all sensibility of this high order in the populations of modern Europe, first by the fine luxury of the fifteenth century, and then by the coarse lusts of the eighteenth and early nineteenth: destruction so total that religious men themselves became incapable of education by any natural beauty or nobleness; and though still useful to others by their ministrations and charities, in the corruption of cities, were themselves lost—or even degraded, if they ever went up into the mountain to preach, or into the wilderness to pray.

There is no word, in the fragment of diary recording, in last “*Præterita*,” our brief visit to the Grande Chartreuse, of anything we saw or heard there that made impression upon any of us. Yet a word was said, of significance enough to alter the course of religious thought in me, afterward forever.

I had been totally disappointed with the Monastery itself, with the pass of approach to it, with the mountains round it, and with the monk who showed us through it. The building was meanly designed and confusedly grouped; the road up to it nothing like so terrific as most roads in the Alps up to anywhere; the mountains round were simplest commonplace of Savoy cliff, with no peaks, no glaciers, no cascades, nor even any slopes of pine in extent of majesty. And the monk who showed us through the corridors had no cowl worth the wearing, no beard worth the wagging, no expression but of superciliousness without sagacity, and an ungraciously dull manner, showing that he was much tired of the place, more of himself, and altogether of my father and me.

Having followed him for a time about the passages of the scattered building, in which there was nothing to show,—not a picture, not a statue, not a bit of old glass, or well-wrought vestment or jewellery; nor any architectural feature in the least ingenious or lovely, we came to a pause at last in what I suppose was a type of a modern Carthusian's cell, wherein,

leaning on the window-sill, I said something in the style of "Modern Painters," about the effect of the scene outside upon religious minds. Whereupon, with a curl of his lip, "We do not come here," said the monk, "to look at the mountains." Under which rebuke I bent my head silently, thinking however all the same, "What then, by all that's stupid, do you come here for at all?"

Which, from that hour to this, I have not conceived; nor, after giving my best attention to the last elaborate account of Carthusian faith, "La Grande Chartreuse, par un Chartreux, Grenoble, 5, Rue Brocherie, 1884," am I the least wiser. I am informed by that author that his fraternity are *Eremite* beyond all other manner of men—that they delight in solitude, and in that amiable disposition pass lives of an angelic tenor, meditating on the charms of the next world, and the vanities of this one.

I sympathize with them in their love of quiet—to the uttermost; but do not hold that liking to be the least pious or amiable in myself, nor understand why it seems so to them; or why their founder, St. Bruno—a man of the brightest faculties in teaching, and exhorting, and directing; also, by favor of fortune, made a teacher and governor in the exact centre of European thought and order, the royal city of Rheims,—should think it right to leave all that charge, throw down his rod of rule, his crozier of protection, and come away to enjoy meditation on the next world by himself.

And why meditation among the Alps? He and his disciples might as easily have avoided the rest of mankind by shutting themselves into a penitentiary on a plain, or in whatever kind country they chanced to be born in, without danger to themselves of being buried by avalanches, or trouble to their venerating visitors in coming so far up hill.

Least of all I understand how they could pass their days of meditation without getting interested in plants and stones, whether they would or no; nor how they could go on writing books in scarlet and gold—for they were great scribes, and had a beautiful library)—persisting for centuries in the same patterns, and never trying to draw a bird or a leaf rightly—

until the days when books were illuminated no more for religion, but for luxury, and the amusement of sickly fancy.

Without endeavoring to explain any of these matters, I will try to set down in this chapter, merely what I have found monks or nuns like, when by chance I was thrown into their company, and of what use they have been to me.

And first let me thank my dear Miss Edgeworth for the ideal character of Sister Frances, in her story of *Madame de Fleury*, which, read over and over again through all my childhood, fixed in me the knowledge of what a good sister of charity can be, and for the most part is, in France; and, of late, I suppose in Germany and England.

But the first impression from life of the secluded Sisterhoods\* was given me at the Convent of St. Michael, on the summit of the isolated peak of lava at Le Puy, in Auvergne, in 1840. The hostess-sister who showed my father and me what it was permitted to see of chapel or interior buildings, was a cheerful, simple creature, pleased with us at once for our courtesies to her, and admiration of her mountain home, and belief in her sacred life. Protestant visitors being then rare in Auvergne, and still more, reverent and gentle ones, she gave her pretty curiosity free sway; and inquired earnestly of us, what sort of creatures we were,—how far we believed in God, or tried to be good, or hoped to go to heaven? And our responses under this catechism being in their sum more pleasing to her than she had expected, and manifesting, to her extreme joy and wonder, a Christian spirit, so far as she could judge, in harmony with all she had been herself taught, she proceeded to cross-examine us on closer points of Divinity, to find out, if she could, why we were, or unnecessarily called ourselves, anything else than Catholic? The one flaw in our faith which at last her charity fastened on,

---

\* Of the Brotherhoods, of course the first I knew were those of St. Bernard; but these were not secluded for their own spiritual welfare, any more than our coastguardsmen by the Goodwin sands; and are to be spoken of elsewhere, and in quite other relations to the modern world.

was that we were not *sure* of our salvation in Christ, but only hoped to get into heaven,—and were not at all, by that dim hope, relieved from terror of death, when at any time it should come. Whereupon she launched involuntarily into an eager and beautiful little sermon, to every word of which her own perfectly happy and innocent face gave vivid power, and assurance of sincerity,—how “we needed to be *sure* of our safety in Christ, and that everyone might be so who came to Him and prayed to Him; and that all good Catholics were as sure of heaven as if they were already there;” and so dismissed us at the gate with true pity, and beseeching that we would prove the goodness of God, and be in peace. Which exhortation of hers I have never forgotten; only it has always seemed to me that there was no entering into that rest of hers but by living on the top of some St. Michael’s rock too, which it did not seem to me I was meant to do, by any means.

But in here recording the impression made on my father and me, I must refer to what I said above of our common feeling of being, both of us, as compared with my mother, reprobate and worldly characters, despising our birthright like Esau, or cast out, for our mocking ways, like Ishmael. For my father never ventured to give me a religious lesson; and though he went to church with a resigned countenance, I knew very well that he liked going just as little as I did.

The second and fourth summers after that, 1842 and 1844, were spent happily and quietly in the Prière\* of Chamouni, and there of course we all of us became acquainted with the curé, and saw the entire manner of life in a purely Catholic village and valley,—recognizing it, I hope, all of us, in our hearts, to be quite as Christian as anything we knew of, and much pleasanter and prettier than the Sunday services in England, which exhaust the little faith we have left.

Wordsworth, in his continental notices of peasant Catholi-

---

\* Not in the Priory itself, but the Hôtel de l’Union. The whole village is called “The Priory.”

cism, recognizes, also at Chamouni, very gracefully this external prettiness—

“ They, too, who send so far a holy gleam,  
 As they the Church engird with motion slow,  
 A product of that awful mountain seem  
 Poured from its vaults of everlasting snow.  
 Not virgin lilies marshalled in bright row,  
 Not swans descending with the stealthy tide,  
 A livelier sisterly resemblance show  
 Than the fair forms that in long order glide  
 Bear to the glacier band, those shapes aloft descried.”

But on me, the deeper impression was of a continuous and serene hold of their happy faith on the life alike of Sunday and Monday, and through every hour and circumstance of youth and age ; which yet abides in all the mountain Catholic districts of Savoy, the Waldstetten, and the Tyrol, to their perpetual honor and peace ; and this without controversy or malice toward the holders of other beliefs.

Next, in 1845, I saw in Florence, as above told, the interior economy of the monasteries at Santa Maria Novella,—in the Franciscan cloisters of Fesole, and in Fra Angelico's, both at San Domenico and San Marco. Which, in whatever they retained of their old thoughts and ways, were wholly beautiful ; and the monks with whom I had any casual intercourse, always kind, innocently eager in sympathy with my own work, and totally above men of the “ world ” in general understanding, courtesy, and moral sense.

Men of the *outer* world, I mean, of course,—official and commercial. Afterward at Venice I had a very dear, and not at all monastic, friend, Rawdon Brown ; but *his* society were the Venetians of the fifteenth century. The Counts Miniscalchi, at Verona, and Borromeo, at Milan, would have been endlessly kind and helpful to me ; but I never could learn Italian enough to speak to them. Whereas, with my monkish friends, at the Armenian isle of Venice, and in any churches or cloisters through North Italy, where I wanted a niche to be quiet in, and chiefly at last in Assisi, I got on

with any broken French or Italian I could stutter, without minding ; and was always happy.

But the more I loved or envied the monks, and the more I despised the modern commercial and fashionable barbaric tribes, the more acutely also I felt that the Catholic political hierarchies, and isolated remnants of celestial enthusiasm, were hopelessly at fault in their dealing with these adversaries ; having also elements of corruption in themselves, which justly brought on them the fierce hostility of men like Garibaldi in Italy, and of the honest and open-hearted liberal leaders in other countries. Thus, irrespectively of all immediate contest or progress, I saw in the steady course of the historical reading by which I prepared myself to write the "Stones of Venice," that, alike in the world and the Church, the hearts of men were led astray by the same dreams and desires ; and whether in seeking for Divine perfection, or earthly pleasure, were alike disobeying the laws of God when they withdrew from their direct and familiar duties, and ceased, whether in ascetic or self-indulgent lives, to honor and love their neighbor as themselves.

While these convictions prevented me from being ever led into acceptance of Catholic teaching by my reverence for the Catholic art of the great ages,—and the less, because the Catholic art of these small ages can say but little for itself,—I grew also daily more sure that the peace of God rested on all the dutiful and kindly hearts of the laborious poor ; and that the only constant form of pure religion was in useful work, faithful love, and stintless charity.

In which pure religion neither St. Bruno himself nor any of his true disciples failed : and I perceive it finally notable of them, that, poor by a resolute choice of a life of hardship, without any sentimental or fallacious glorifying of "Holy poverty," as if God had never promised full garners for a blessing ; and always choosing men of high intellectual power for the heads of their community, they have had more directly wholesome influence on the outer world than any other order of monks so narrow in number, and restricted in habitation. For while the Franciscan and Cistercian monks be-

came everywhere a constant element in European society, the Carthusians, in their active sincerity, remained, in groups of not more than from twelve to twenty monks in any single monastery, the tenants of a few wild valleys of the north-western Alps; the subsequent overflowing of their brotherhood into the Certosas of the Lombard plains being mere waste and wreck of them; and the great Certosa of Pavia one of the worst shames of Italy, associated with the accursed reign of Galeazzo Visconti. But in their strength, from the foundation of the order, at the close of the eleventh century, to the beginning of the fourteenth, they reared in their mountain fastnesses, and sent out to minister to the world, a succession of men of immense mental grasp, and serenely authoritative innocence; among whom our own Hugo of Lincoln, in his relations with Henry I. and Cœur de Lion, is to my mind the most beautiful sacerdotal figure known to me in history. The great Pontiffs have a power which in its strength can scarcely be used without cruelty, nor in its scope without error; the great Saints are always in some degree incredible or unintelligible; but Hugo's power is in his own personal courage and justice only; and his sanctity as clear, frank, and playful as the waves of his own Chartreuse well.\*

I must not let myself be led aside from my own memories into any attempt to trace the effect on Turner's mind of his visit to the Chartreuse, rendered as it is in the three subjects of the "*Liber Studiorum*,"—from the Chartreuse itself, from Holy Island, and Dumblane Abbey. The strength of it was checked by his love and awe of the sea, and sailor heroism, and confused by his classical thought and passion; but in my own life, the fading away of the nobler feelings in which I had worked in the Campo Santo of Pisa, however much my own fault, was yet complicated with the inevitable discovery of the falseness of the religious doctrines in which I had been educated.

The events of the ten years 1850–1860, for the most part

---

\* The original building was grouped round a spring in the rock, from which a runlet was directed through every cell.

wasted in useless work, must be arranged first in their main order, before I can give clear account of anything that happened in them. But this breaking down of my Puritan faith, being the matter probably most important to many readers of my later books, shall be traced in this chapter to the sorrowful end. Note first the main facts of the successive years of the decade.

1851. Turner dies, while I am at first main work in Venice, for "The Stones of Venice."

1852. Final work in Venice for "Stones of Venice." Book finished that winter. Six hundred quarto pages of notes for it, fairly and closely written, now useless. Drawings as many—of a sort; useless too.

1853. Henry Acland in Glenfinlas with me. Drawing of gneiss rock made; now in the school at Oxford. Two months' work in what fair weather could be gleaned out of that time.

1854. With my father and mother at Vevay and Thun. I take up the history of Switzerland, and propose to engrave a series of drawings of the following Swiss towns: Geneva, Fribourg, Basle, Thun, Baden, and Schaffhausen. I proceed to make drawings for this work, of which the first attempted (of Thun) takes up the whole of the summer, and is only half done then. Definition of Poetry, for "Modern Painters," written at Vevay, looking across lake to Chillon. It leaves out rhythm, which I now consider a defect in said definition; otherwise good,—“The arrangement, by imagination, of noble motive for noble emotion.” I forget the exact words, but these others will do as well, perhaps better.

1855. Notes on Royal Academy begun. The spring is so cold that the hawthorns are only in bud on 5th of June. I get cough, which lasts for two months, till I go down to Tunbridge Wells to my doctor cousin, William Richardson, who puts me to bed, gives me some syrup, cures me in three days, and calls me a fool for not coming to him before, with some rather angry warnings that I had better not keep a cough for two months again. Third volume of "Modern Painters" got done with, somehow, but didn't know what to call it, so called

it "Of Many Things." But none of *these* were "done with," as I found afterward, to my cost.

1856. With my father and mother to Geneva and Fribourg. Two drawings at Fribourg took up the working summer. My father begins to tire of the proposed work on Swiss towns, and to inquire whether the rest of "Modern Painters" will ever be done.

1857. My mother wants me to see the Bay of Cromarty and the Falls of Kilmorock. I consent sulkily to be taken to Scotland with that object. Papa and mamma, wistfully watching the effect on my mind, show their Scotland to me. I see, on my own quest, Craig-Ellachie, and the Lachin-y-Gair forests, and finally reach the Bay of Cromarty and Falls of Kilmorock, doubtless now the extreme point of my northern discoveries on the round earth. I admit, generously, the Bay of Cromarty and the Falls to be worth coming all that way to see; but beg papa and mamma to observe that it is twenty miles' walk, in bogs, to the top of Ben Wevis, that the town of Dingwall is not like Milan or Venice,—and that I think we have seen enough of Scotland.

1858. Accordingly, after arranging, mounting, framing, and cabinetting, with good help from Richard Williams, of Messrs. Foord's, the Turner drawings now in the catacombs of the National Gallery, I determine to add two more Swiss towns to my list, namely, Rheinfelden and Bellinzona, in illustration of Turner's sketches at those places; and get reluctant leave from my father to take Couttet again, and have all my own way. I spent the spring at Rheinfelden, and the summer at Bellinzona. But Couttet being of opinion that these town views will come to no good, and that the time I spend on the roof of "cette baraque" at Bellinzona is wholly wasted, I give the town views all up, and take to Vandyke and Paul Veronese again in the gallery of Turin. But, on returning home, my father is not satisfied with my studies from those masters, and piteously asks for the end of "Modern Painters," saying "he will be dead before it is done." Much ashamed of myself, I promise him to do my best on it without farther subterfuge.

1859. Hard writing and drawing to that end. Fourth volume got done. My father thinks, himself, I ought to see Berlin, Dresden, Munich, and Nuremberg, before the book is finished. He and my mother take their last continental journey with me to those places. I have my last happy walk with my father at Königstein.

1860. I work hard all the winter and early spring—finish the book, in a sort ; my father well pleased with the last chapter, and the engraved drawings from Nuremberg and Rheinfelden. On the strength of this piece of filial duty, I am cruel enough to go away to St. Martin's again, by myself, to meditate on what is to be done next. Thence I go up to Chamouni—where a new epoch of life and death begins.

And here I must trace, as simply and rapidly as may be, the story of my relations with the Working Men's College.

I knew of its masters only the Principal, F. D. Maurice, and my own friend Rossetti. It is to be remembered of Rossetti, with loving honor, that he was the only one of our modern painters who taught disciples for love of them. He was really not an Englishman, but a great Italian tormented in the Inferno of London ; doing the best he could, and teaching the best he could ; but the "could" shortened by the strength of his animal passions, without any trained control, or guiding faith. Of him, more hereafter.

I loved Frederick Maurice, as everyone did who came near him ; and have no doubt he did all that was in him to do of good in his day. Which could by no means be said either of Rossetti or of me : but Maurice was by nature puzzle-headed, and, though in a beautiful manner, *wrong-headed* ; while his clear conscience and keen affections made him egotistic, and in his Bible-reading, as insolent as any infidel of them all. I only went once to a Bible-lesson of his ; and the meeting was significant, and conclusive.

The subject of lesson, Jael's slaying of Sisera. Concerning which, Maurice, taking an enlightened modern view of what was fit and not, discoursed in passionate indignation ; and warned his class, in the most positive and solemn manner, that such dreadful deeds could only have been done in cold

blood in the Dark Biblical ages; and that no religious and patriotic Englishwoman ought ever to think of imitating Jael by nailing a Russian's or Prussian's skull to the ground,—especially after giving him butter in a lordly dish. At the close of the instruction, through which I sate silent, I ventured to inquire, why then had Deborah the prophetess declared of Jael, “Blessed above women shall the wife of Heber the Kenite be?” On which Maurice, with startled and flashing eyes, burst into partly scornful, partly alarmed, denunciation of Deborah the prophetess, as a mere blazing Amazon; and of her Song as a merely rhythmic storm of battle-rage, no more to be listened to with edification or faith than the Norman's sword-song at the battle of Hastings.

Whereupon there remained nothing for *me*,—to whom the Song of Deborah was as sacred as the Magnificat—but total collapse in sorrow and astonishment; the eyes of all the class being also bent on me in amazed reprobation of my benighted views, and unchristian sentiments. And I got away how I could, and never went back.

That being the first time in my life that I had fairly met the lifted head of Earnest and Religious Infidelity—in a man neither vain nor ambitious, but instinctively and innocently trusting his own amiable feelings as the final interpreters of all the possible feelings of men and angels, all the songs of the prophets, and all the ways of God.

It followed, of course, logically and necessarily, that every one of Maurice's disciples also took what views *he* chose of the songs of the prophets,—or wrote songs of his own, more adapted to the principles of the College, and the ethics of London. Maurice, in all his addresses to us, dwelt mainly on the simple function of a college as a collection or collation of friendly persons,—not in the least as a place in which such and such things were to be taught, and others denied; such and such conduct vowed, and other such and such abjured. So the College went on,—collecting, carpentering, sketching, Bible criticising, etc., virtually with no head; but only a clasp to the strap of its waist, and as many heads as it had students. The leaven of its affectionate temper has gone far;

but how far also the leaven of its pride, and defiance of everything above it, nobody quite knows. I took two special pupils out of its ranks, to carry them forward all I could. One I chose; the other chose me—or rather, chose my mother's maid Hannah; for love of whom he came to the College, learned drawing there under Rossetti and me,—and became eventually Mr. George Allen, of Sunnyside; who, I hope, still looks back to his having been an entirely honest and perfect working joiner as the foundation of his prosperity in life. The other student I chose myself, a carpenter of equal skill and great fineness of faculty; but his pride, wilfulness, and certain angular narrownesses of nature, kept him down,—together with the deadly influence of London itself, and of working-men's clubs, as well as colleges. And finally, in this case, and many more, I have very clearly ascertained that the only proper school for workmen is of the work their fathers bred them to, under masters able to do better than any of their men, and with common principles of honesty and the fear of God, to guide the firm.

Somewhat before the date of my farewell to Maurician free-thinking, I had come into still more definite collision with the Puritan dogmata which forbid thinking at all, in a séance to which I was invited, shyly, by my friend, Macdonald,—fashionable séance of evangelical doctrine, at the Earl of Ducie's; presided over by Mr. Molyneux, then a divine of celebrity in that sect; who sate with one leg over his other knee in the attitude always given to Herod at the massacre of the Innocents in mediæval sculpture; and discoursed in tones of consummate assurance and satisfaction, and to the entire comfort and consent of his Belgravian audience, on the beautiful parable of the Prodigal Son. Which, or how many, of his hearers he meant to describe as having personally lived on husks, and devoured their fathers' property, did not, of course, appear; but that something of the sort was necessary to the completeness of the joy in heaven over them, now in Belgrave Square, at the feet—or one foot—of Mr. Molyneux, could not be questioned.

Waiting my time, till the raptures of the converted com-

pany had begun to flag a little, I ventured, from a back seat, to enquire of Mr. Molyneux what we were to learn from the example of the *other* son, not prodigal, who was, his father said of him, "ever with me, and all that I have, thine?" A sudden horror, and unanimous feeling of the serpent having, somehow, got over the wall into their Garden of Eden, fell on the whole company; and some of them, I thought, looked at the candles, as if they expected them to burn blue. After a pause of a minute, gathering himself into an expression of pity and indulgence, withholding latent thunder, Mr. Molyneux explained to me that the home-staying son was merely a picturesque figure introduced to fill the background of the parable agreeably, and contained no instruction or example for the well-disposed scriptural student, but on the contrary, rather a snare for the unwary, and a temptation to self-righteousness,—which was, of all sins, the most offensive to God.

Under the fulmination of which answer I retired, as from Maurice's, from the séance in silence; nor ever attended another of the kind from that day to this.

But neither the Puritanism of Belgravia, nor Liberalism of Red Lion Square, interested, or offended, me, otherwise than as the grotesque conditions of variously typhoid or smoke-dried London life. To my old Scotch shepherd Puritanism, and the correspondent forms of noble French Protestantism, I never for an instant failed in dutiful affection and honor. From John Bunyan and Isaac Ambrose, I had received the religion by which I still myself lived, as far as I had spiritual life at all; and I had again and again proof enough of its truth, within limits, to have served me for all my own need, either in this world or the next. But my ordained business, and mental gifts, were outside of those limits. I saw, as clearly as I saw the sky and its stars, that music in Scotland was not to be studied under a Free Church precentor, nor indeed under any disciples of John Knox, but of Signior David; that, similarly, painting in England was not to be admired in the illuminations of Watts' hymns; nor architecture in the design of Mr. Irons' chapel in the Grove. And here I must take up a thread of my mental history, as yet unfastened.

I have spoken several times of the effect given cheaply to my drawings of architecture by dexterous dots and flourishes, doing duty for ornament. Already, in 1845, I had begun to distinguish Corinthian from Norman capitals, and in 1848, drew the niches and sculpture of French Gothic with precision and patience. But I had never cared for ornamental design until in 1850 or '51 I chanced, at a bookseller's in a back alley, on a little fourteenth century "Hours of the Virgin," not of refined work, but extremely rich, grotesque, and full of pure color.

The new worlds which every leaf of this book opened to me, and the joy I had, counting their letters and unravelling their arabesques as if they had all been of beaten gold,—as many of them indeed were,—cannot be told, any more than—everything else, of good, that I wanted to tell. Not that the worlds thus opening were themselves new, but only the possession of any part in them; for long and long ago I had gazed at the illuminated missals in noblemen's houses (see above, p. 16, vol. i.), with a wonder and sympathy deeper than I can give now; my love of toil, and of treasure, alike getting their thirst gratified in them. For again and again I must repeat it, my nature is a worker's and a miser's; and I rejoiced, and rejoice still, in the mere quantity of chiselling in marble, and stitches in embroidery; and was never tired of numbering sacks of gold and caskets of jewels in the "Arabian Nights;" and though I am generous too, and love giving, yet my notion of charity is not at all dividing my last crust with a beggar, but riding through a town like a Commander of the Faithful, having any quantity of sequins and ducats in saddle-bags (where cavalry officers have holsters for their pistols), and throwing them round in radiant showers and hailing handfuls; with more bags to brace on when those were empty.

But now that I had a missal of my own, and could touch its leaves and turn, and even here and there understand the Latin of it, no girl of seven years old with a new doll is prouder or happier; but the feeling was something between the girl's with her doll, and Aladdin's in a new Spirit-slave to build palaces for him with jewel windows. For truly a well-

illuminated missal is a fairy cathedral full of painted windows, bound together to carry in one's pocket, with the music and the blessing of all its prayers besides.

And then followed, of course, the discovery that all beautiful prayers were Catholic,—all wise interpretations of the Bible Catholic ;—and every manner of Protestant written services whatsoever either insolently altered corruptions, or washed-out and ground-down rags and débris of the great Catholic collects, litanies, and songs of praise.

“But why did not you become a Catholic at once, then?”

It might as well be asked, Why did not I become a fire-worshipper? I *could* become nothing but what I was, or was growing into. I no more believed in the living Pope than I did in the living Khan of Tartary. I saw indeed that twelfth century psalters were lovely and right, and that presbyterian prayers against time, by people who never expected to be any the better for them, were unlovely and wrong. But I had never read the Koran, nor Confucius, nor Plato, nor Hesiod, and was only just beginning to understand my Virgil and Horace. How I ever came to understand *them* is a new story, which must be for next chapter ; meantime let me finish the confessions of this one in the tale of my final apostasy from Puritan doctrine.

The most stern practical precept of that doctrine still holding me,—it is curiously inboud with all the rest,—was the Sabbath keeping ; the idea that one was not to seek one's own pleasure on Sunday, nor to do anything useful. Gradually, in honest Bible reading, I saw that Christ's first article of teaching was to unbind the yoke of the Sabbath, while, *as a Jew*, He yet obeyed the Mosaic law concerning it ; but that St. Paul had carefully abolished it altogether, and that the rejoicing, in memory of the Resurrection, on the Day of the Sun, the first day of the week, was only by misunderstanding, and much wilful obstinacy, confused with the Sabbath of the Jew.

Nevertheless, the great passages in the Old Testament regarding its observance held their power over me, nor have ceased to do so ; but the inveterate habit of being unhappy

all Sunday did not in any way fulfil the order to call the Sabbath a delight.

I have registered the year 1858 as the next, after 1845, in which I had complete guidance of myself. Couttet met me at Basle, and I went on to Rheinfelden with great joy, and stayed to draw town and bridges completely (two of the studies are engraved in "Modern Painters").

I think it was the second Sunday there, and no English church. I had read the service with George, and gone out afterward alone for a walk up a lovely dingle on the Black Forest side of the Rhine, where every pretty cottage was inscribed, in fair old German characters, with the date of its building, the names of the married pair who had built it, and a prayer that, with God's blessing, their habitation of it, and its possession by their children, might be in righteousness and peace. Not in these set terms, of course, on every house, but in variously quaint verses or mottoes, meaning always as much as this.

Very happy in my Sunday walk, I gathered what wild flowers were in their first springing, and came home with a many-colored cluster, in which the dark-purple orchis was chief. I had never examined its structure before, and by this afternoon sunlight did so with care; also it seemed to me wholly right to describe it as I examined; and to draw the outlines as I described, though with a dimly alarmed consciousness of its being a new fact in existence for me, that I should draw on Sunday.

Which thenceforward I continued to do, if it seemed to me there was due occasion. Nevertheless, come to pass how it might, the real new fact in existence for me was that my drawings did not prosper that year, and, in deepest sense, never prospered again. They might not have prospered in the course of things,—and indeed, could not without better guidance than my own; nevertheless, the crisis of change is marked at Rheinfelden by my having made there two really pretty color-vignettes, which, had I only gone on doing the like of, the journey would have been visibly successful in everybody's sight. Whereas, what actually followed those

vignettes at Rheinfelden was a too ambitious attempt at the cliffs of the Bay of Uri, which crushed the strength down in me ; and next, a persistently furious one to draw the entire town, three fortresses, and surrounding mountains of Bellinzona, gradually taming and contracting itself into a meekly obstinate resolve that at least I would draw every stone of the roof right in *one* tower of the vineyards,—cette baraque, as Couttet called it.

I *did* draw every stone, nearly right, at last in that single roof ; and meantime read the “Plutus” of Aristophanes, three or four times over in two months, with long walks every afternoon, besides. Total result on 1st of August—general desolation, and disgust with Bellinzona,—cette baraque,—and most of all with myself, for not yet knowing Greek enough to translate the “Plutus.” In this state of mind, a fit took me of hunger for city life again, military bands, nicely-dressed people, and shops with something inside. And I emphasized Couttet’s disapproval of the whole tour, by announcing to him suddenly that I was going, of all places in the world, to Turin !

I had still some purpose, even in this libertinage, namely, to outline the Alpine chain from Monte Viso to Monte Rosa. Its base was within a drive ; and there were Veroneses in the Royal gallery, for wet days. The luxury of the Hôtel de l’Europe was extremely pleasant after brick floors and bad dinners at Bellinzona ;—there was a quiet little opera-house, where it was always a kindness to the singers to attend to the stage business ; finally, any quantity of marching and manœuvring by the best troops in Italy, with perfect military bands, beautifully tossing plumes, and pretty ladies looking on. So I settled at Turin for the autumn.

There, one Sunday morning, I made my way in the south suburb to a little chapel which, by a dusty roadside, gathered to its unobserved door the few sheep of the old Waldensian faith who had wandered from their own pastures under Monte Viso into the worldly capital of Piedmont.

The assembled congregation numbered in all some three or four and twenty, of whom fifteen or sixteen were gray-

haired women. Their solitary and clerkless preacher, a somewhat stunted figure in a plain black coat, with a cracked voice, after leading them through the languid forms of prayer which are all that in truth are possible to people whose present life is dull and its terrestrial future unchangeable, put his utmost zeal into a consolatory discourse on the wickedness of the wide world, more especially of the plain of Piedmont and city of Turin, and on the exclusive favor with God, enjoyed by the between nineteen and twenty-four elect members of his congregation, in the streets of Admah and Zebaim.

Myself neither cheered nor greatly alarmed by this doctrine, I walked back into the condemned city, and up into the gallery where Paul Veronese's Solomon and the Queen of Sheba glowed in full afternoon light. The gallery windows being open, there came in with the warm air, floating swells and falls of military music, from the courtyard before the palace, which seemed to me more devotional, in their perfect art, tune, and discipline, than anything I remembered of evangelical hymns. And as the perfect color and sound gradually asserted their power on me, they seemed finally to fasten me in the old article of Jewish faith, that things done delightfully and rightly, were always done by the help and in the Spirit of God.

Of course that hour's meditation in the gallery of Turin only concluded the courses of thought which had been leading me to such end through many years. There was no sudden conversion possible to me, either by preacher, picture, or dulcimer. But that day, my evangelical beliefs were put away, to be debated of no more.

---

## CHAPTER II.

### MONT VELAN.

I was crowded for room at the end of last chapter, and could not give account of one or two bits of investigation of the Vaudois character, which preceded the Queen of Sheba

crash. It wasn't the Queen herself,—by the way,—but only one of her maids of honor, on whose gold brocaded dress, (relieved by a black's head, who carried two red and green parrots on a salver,) I worked till I could do no more ;—to my father's extreme amazement and disgust, when I brought the petticoat, parrots, and blackamoor, home, as the best fruit of my summer at the Court of Sardinia ; together with one lurid thunderstorm on the Rosa Alps, another on the Cenis, and a dream or two of mist on the Viso. But I never could make out the set of the rocks on the peak of Viso ; and after I had spent about a hundred pounds at Turin in grapes, partridges, and the opera, my mother sent me five, to make my peace with Heaven in a gift to the Vaudois churches. So I went and passed a Sunday beneath Viso ; found he had neither rocks nor glaciers worth mentioning, and that I couldn't get into any pleasant confidences with the shepherds, because their dogs barked and snarled irreconcilably, and seemed to have nothing taught them by their masters but to regard all the rest of mankind as thieves.

I had some pious talk of a mild kind with the person I gave my mother's five pounds to : but an infinitely pleasanter feeling from the gratitude of the overworn ballerina at Turin, for the gift of as many of my own. She was not the least pretty ; and depended precariously on keeping able for her work on small pittance ; but did that work well always ; and looked nice,—near the footlights.

I noticed also curiously at this time, that while the drawings I did to please myself seemed to please nobody else, the little pen-and-ink sketches made for my father, merely to explain where I was, came always well ;—one, of the sunset shining down a long street through a grove of bayonets, which he was to imagine moving to military music, is pleasant to me yet. But, on the whole, Turin began at last to bore me as much as Bellinzona ; so I thought it might be as well to get home. I drove to Susa on the last day of August, walked quietly with Couttet over the Cenis to Lans-le-bourg next day ; and on 2d September sent my mother my love, by telegram, for breakfast-time, on her birthday, getting answer

of thanks back before twelve o'clock ; and began to think there might be something in telegraphs, after all.

A number of unpleasant convictions were thus driven into my head, in that 1858 journey, like Jael's nail through Sisera's temples ; or Tintoret's arrow between St. Sebastian's eyes :—I must return a moment to Mr. Maurice and Deborah before going on to pleasanter matters. Maurice was not, I suppose, in the habit of keeping a skull on his chimney-piece, and looking at it before he went to sleep, as I had been, for a long while before that talk ; or he would have felt that whether it was by nail, bullet, or little pin, mattered little when it was ordained that the crowned forehead should sink in slumber. And he would have known that Jael was only one of the forms of "Dira Necessitas"—she, Delilah, and Judith, all the three of them ; only we haven't any record of Delilah's hymn when she first fastened Samson's hair to the beam : and of Judith, nobody says any harm ;—I suppose because she gave Holofernes wine, instead of milk and butter. It was Byron, however, not Deborah, who made *me* understand the thing ; the passage he paraphrased from her, in the "Giaour," having rung in my ears ever since I wrote the Scythian banquet-song—

"The drowsy camel-bells are tinkling,  
His mother looked from her lattice high," etc.

And I felt now that I had myself driven nails enough into my mother's heart, if not into my father's coffin ; and would thankfully have taken her home a shawl of divers colors on both sides, and a pretty damsel or two, in imitation of Sisera : but she always liked to choose her damsels for herself.

It was lucky, in her last choosing, she chanced on Joan Agnew ; but we are a far way yet from Joanie's time, I don't quite know how far. Turner died, as I said, in 1851 : Prout had left us still earlier ; there could be no more sharing of festivities on my birthday with *him*. He went home to De-Crespigny Terrace from Denmark Hill one evening, seeming perfectly well and happy ;—and we saw him no more.

And my dog Wisie, was he dead too ? It seems wholly

wonderful to me at this moment that he should ever have died. He was a white spitz, exactly like Carpaccio's dog in the picture of St. Jerome ; and he came to me from a young Austrian officer, who had got tired of him,—the Count Thun, who fell afterward at Solferino. Before the dog was used enough to us, George and I took him to Lido to give him a little sea bath. George was holding him by his fore-paws upright among the little crisp breakers. Wisie snatched them out of his hands, and ran at full speed—into Fairyland, like Frederick the Great at Mollwitz. He was lost on Lido for three days and nights, living by petty larceny, the fishermen and cottagers doing all they could to catch him ; but they told me he “ran like a hare and leaped like a horse.”

At last, either overcome by hunger, or having made up his mind that even *my* service was preferable to liberty on Lido, he took the deep water in broad daylight, and swam straight for Venice. A fisherman saw him from a distance, rowed after him, took him, tired among the weeds, and brought him to me—the Madonna della Salute having been propitious to his repentant striving with the sea.

From that time he became an obedient and affectionate dog, though of extremely self-willed and self-possessed character. I was then living on the north side of St. Mark's Place, and he used to sit outside the window on the ledge at the base of its pillars greater part of the day, observant of the manners and customs of Venice. Returning to England, I took him over the St. Gothard, but found him entirely unappalled by any of the work of Devils on it—big or little. He saw nothing to trouble himself about in precipices, if they were wide enough to put his paws on ; and the dog who had fled madly from a crisp sea wave, trotted beside the fall of the Reuss just as if it had been another White Dog, a little bigger, created out of foam.

Reaching Paris, he considered it incumbent upon him to appear unconscious of the existence of that city, or of the Tuileries gardens and Rue Rivoli, since they were not St. Mark's Place ;—but, half asleep one evening, on a sofa in the entresol at Meurice's, and hearing a bark in the street which

sounded Venetian—sprang through the window in expectation of finding himself on the usual ledge—and fell fifteen feet\* to the pavement. As I ran down, I met him rushing up the hotel stairs, (he had gathered himself from the stones in an instant,) bleeding and giddy; he staggered round and round two or three times, and fell helpless on the floor. I don't know if young ladies' dogs faint, really, when they are hurt. He, Wisie, did not faint, nor even moan, but he could not stir, except in cramped starts and shivers. I sent for what veterinary help was within reach, and heard that the dog might recover, if he could be kept quiet for a day or two in a dog-hospital. But my omnibus was at the door, for the London train. In the very turn and niche of time I heard that Macdonald of St. Martin's was in the hotel, and would take charge of Wisie for the time necessary. The poor little speechless, luckless, wistfully gazing doggie was tenderly put in a pretty basket, (going to be taken where? thinks the beating heart,) looks at his master to read what he can in the sad face—can make out nothing; is hurried out of the inexorable door, downstairs; finds himself more nearly dead next day, and among strangers. (*Two miles away from Meurice's, along the Boulevard, it was.*)

He takes and keeps council with himself on that matter. Drinks and eats what he is given, gratefully; swallows his medicine obediently; stretches his limbs from time to time. There was only a wicket gate, he saw, between the Boulevard and him. Silently, in the early dawn of the fourth or fifth day, I think, he leaped it, and along two miles of Parisian Boulevard came back to Meurice's.

I do not believe there was ever a more wonderful piece of instinct certified. For Macdonald received him, in astonishment,—and Wisie trusted Macdonald to bring him to his lost master again. The Schehallien chief brought him to Denmark Hill; where of course Wisie did not know whether

---

\* Thirteen feet nine, I find, on exact measurement, coming back to Meurice's to make sure. It is the height of the capitals of the piers in the Rue Rivoli.

something still worse might not befall him, or whether he would be allowed to stay. But he was allowed, and became a bright part of my mother's day, as well as of mine, from 1852 to 1858, or perhaps longer. But I must go back now to 1854-56.

1854. The success of the first volume of "Modern Painters" of course gave me entrance to the polite circles of London; but at that time, even more than now, it was a mere torment and horror to me to have to talk to big people whom I didn't care about. Sometimes, indeed, an incident happened that was amusing or useful to me;—I heard Macaulay spout the first chapter of Isaiah, without understanding a syllable of it;—saw the Bishop of Oxford taught by Sir Robert Inglis to drink sherry cobbler through a straw;—and formed one of the worshipful concourse invited by the Bunsen family, to hear them "talk Bunsenese" (Lady Trevelyan), and see them making presents to—each other—from their family Christmas tree, and private manger of German Magi. But, as a rule, the hours given to the polite circles were an angering penance to me,—until, after I don't know how many, a good chance came, worth all the penitentiary time endured before.

I had been introduced one evening, with a little more circumstance than usual, to a seated lady, beside whom it was evidently supposed I should hold it a privilege to stand for a minute or two, with leave to speak to her. I entirely concurred in that view of the matter; but, having ascertained in a moment that she was too pretty to be looked at, and yet keep one's wits about one, I followed, in what talk she led me to, with my eyes on the ground. Presently, in some reference to Raphael or Michael Angelo, or the musical glasses, the word "Rome" occurred; and a minute afterward, something about "Christmas in 1840." I looked up with a start; and saw that the face was oval,—fair,—the hair, light brown. After a pause, I was rude enough to repeat her words, "Christmas in 1840!—were you in Rome *then*?" "Yes," she said, a little surprised, and now meeting my eyes with hers, inquiringly.

Another tenth of a minute passed before I spoke again.

“Why, I lost all that winter in Rome in hunting *you!*”

It was Egeria herself! then Mrs. Cowper-Temple. She was not angry; and became from that time forward a tutelary power,—of the brightest and happiest; differing from Lady Trevelyan’s, in that Lady Trevelyan hadn’t all her own way at home; and taught me, therefore, to look upon life as a “Spiritual combat;” but Egeria always had her own way everywhere—thought that I also should have mine,—and generally got it for me.

She was able to get a good deal of it for me, almost immediately, at Broadlands, because Mr. Cowper-Temple was at that time Lord Palmerston’s private secretary: and it had chanced that in 1845 I had some correspondence with the government about Tintoret’s Crucifixion;—not the great Crucifixion in the Scuola di San Rocco, but the bright one with the grove of lances in the Church of St. Cassan, which I wanted to get for the National Gallery. I wrote to Lord Palmerston about it, and believe we should have got it, but for Mr. Edward Cheney’s putting a spoke in the wheel for pure spite. However, Lord Palmerston was, I believe, satisfied with what I had done; and, now perhaps thinking there might be some trustworthy official qualities in me, allowed Mr. Cowper-Temple to bring me, one Saturday evening, to go down with him to Broadlands. It was dark when we reached the South-Western station. Lord Palmerston received me much as Lord Oldborough receives Mr. Temple in “Patronage;”—gave me the seat opposite his own, he with his back to the engine. Mr. Cowper-Temple beside me;—Lord Palmerston’s box of business papers on the seat beside *him*. He unlocked it and looked over a few,—said some hospitable words, enough to put me at ease, and went to sleep, or at least remained quiet, till we got to Romsey. I forget the dinner, that Saturday; but I certainly had to take in Lady Palmerston; and must have pleased her more or less, for on the Sunday morning Lord Palmerston took me himself to the service in Romsey Abbey: drawing me out a little in the drive through the village; and *that* day at dinner he put me

on his right hand, and led the conversation distinctly to the wildest political theories I was credited with,\* cross-examining me playfully, but attending quite seriously to my points; and kindly and clearly showing me where I should fail, in practice. He disputed no principle with me, (being, I fancied, partly of the same mind with me about principles,) but only feasibilities; whereas in every talk permitted me more recently by Mr. Gladstone, *he* disputes *all* the principles before their application; and the application of all that get past the dispute. D'Israeli differed from both in making a jest alike of principle and practice; but I never came into full collision with him but once. It is a long story, about little matters; but they had more influence in the end than many greater ones,—so I will write them.

I never went to official dinners in Oxford if I could help it; not that I was ever really wanted at them, but sometimes it became my duty to go, as an Art Professor; and when the Princess of Wales came, one winter, to look over the Art Galleries, I had of course to attend, and be of what use I could: and then came commands to the dinner at the Deanery,—where I knew no more how to behave than a marmot pup! However, my place was next but one to D'Israeli's, whose head, seen close, interested me; the Princess, in the centre of the opposite side of the table, might be glanced at now and then,—to the forgetfulness of the evils of life. Nobody wanted *me* to talk about anything; and I recovered peace of mind enough, in a little while, to hear D'Israeli talk, which was nice; I think we even said something to each other, once, about the salmon. Well—then, presently I was aware of a little ripple of brighter converse going round the table, and saw it had got at the Princess, and a glance of D'Israeli's

---

\* The reader will please remember that the "Life of the Workman" in the "Stones of Venice," the long note on Education at the end of first volume of "Modern Painters," and the fierce vituperation of the Renaissance schools in all my historical teaching, were at this time attracting far more attention, because part of my architectural and pictorial work, than ever afterward the commercial and social analyses of "Unto This Last."

made me think it must have something to do with *me*. And so it had, thus:—It had chanced either the day before, or the day before that, that the Planet Saturn had treated me with his usual adversity in the carrying out of a plot with Alice in Wonderland. For, that evening, the Dean and Mrs. Liddell dined by command at Blenheim: but the girls were not commanded; and as I had been complaining of never getting a sight of them lately, after knowing them from the nursery, Alice said that she thought, perhaps, if I would come round after papa and mamma were safe off to Blenheim, Edith and she might give me a cup of tea and a little singing, and Rhoda show me how she was getting on with her drawing and geometry, or the like. And so it was arranged. The night was wild with snow, and no one likely to come round to the Deanery after dark. I think Alice must have sent me a little note, when the eastern coast of Tom Quad was clear. I slipped round from Corpus through Peckwater, shook the snow off my gown, and found an armchair ready for me, and a bright fireside, and a laugh or two, and some pretty music looked out, and tea coming up.

Well, I think Edith had got the tea made, and Alice was just bringing the muffins to perfection—I don't recollect that Rhoda was there; (I never did, that anybody else was there, if Edith was; but it is all so like a dream now, I'm not sure)—when there was a sudden sense of some stars having been blown out by the wind, round the corner; and then a crushing of the snow outside the house, and a drifting of it inside; and the children all scampered out to see what was wrong, and I followed slowly;—and there were the Dean and Mrs. Liddell standing just in the middle of the hall, and the footmen in consternation, and a silence,—and—

“How sorry you must be to see us, Mr. Ruskin!” began at last Mrs. Liddell.

“I never was more so,” I replied. “But what's the matter?”

“Well,” said the Dean, “we couldn't even get past the parks; the snow's a fathom deep in the Woodstock Road. But never mind; we'll be very good and quiet, and keep out

of the way. Go back to your tea, and we'll have our dinner downstairs."

And so we did; but we couldn't keep papa and mamma out of the drawing-room when they had done dinner, and I went back to Corpus, disconsolate.

Now, whether the Dean told the Princess himself, or whether Mrs. Liddell told, or the girls themselves, *somehow* this story got all round the dinner table, and D'Israeli was perfect in every detail, in ten minutes, nobody knew how. When the Princess rose, there was clearly a feeling on her part of some kindness to me; and she came very soon, in the drawing-room, to receive the report of the Slade Professor.

Now, in the Deanery drawing-room, everybody in Oxford who hadn't been at the dinner was waiting to have their slice of Princess—due officially—and to be certified in the papers next day. The Princess,—knowing whom she had to speak to,—*might* speak to, or mightn't, without setting the whole of Oxford by the ears next day, simply walked to the people she chose to honor with audience, and stopped, to hear if they had anything to say. I saw my turn had come, and the revolving zodiac brought its fairest sign to me: she paused, and the attendant stars and terrestrial beings round, listened, to hear what the marmot-pup had to say for itself.

In the space of, say, a minute and a half, I told the Princess that Landscape-painting had been little cultivated by the Heads of Colleges,—that it had been still less cultivated by the Undergraduates, and that my young-lady pupils always expected me to teach them how to paint like Turner, in six lessons. Finding myself getting into difficulties, I stopped: the Princess, I suppose, felt I was getting *her* into difficulties too; so she bowed courteously, and went on—to the next Professor, in silence.

The crowd, which had expected a compliment to Her Royal Highness of best Modern Painter quality, was extremely disappointed; and a blank space seemed at once to form itself round me, when the door from the nurseries opened; and—enter Rhoda—in full dress!

Very beautiful! But just a snip too short in the petti-

coats,—a trip too dainty in the ankles, a dip too deep of sweet-briar red in the ribands. Not the damsel who came to hearken, named Rhoda,—by any means;—but as exquisite a little spray of rhododendron ferrugineum as ever sparkled in Alpine dew.

D'Israeli saw his opening in an instant. Drawing himself to his full height, he advanced to meet Rhoda. The whole room became all eyes and ears. Bowing with kindly reverence, he waved his hand, and introduced her to—the world. “*This is, I understand, the young lady in whose art-education Professor Ruskin is so deeply interested!*”

And there was nothing for *me* but simple extinction; for I had never given Rhoda a lesson in my life, (no such luck!); yet I could not disclaim the interest,—nor disown Mr. Macdonald's geometry! I *could* only bow as well as a marmot might, in imitation of the Minister; and get at once away to Corpus, out of human ken.

This gossip has beguiled me till I have no time left to tell what in proper sequence should have been chiefly dwelt on in this number,—the effect on my mind of the Hospice of St. Bernard, as opposed to the Hermitage of St. Bruno. I must pass at once to the outline of some scenes in early Swiss history, of which the reader must be reminded before he can understand why I had set my heart so earnestly upon drawing the ruined towers of Fribourg, Thun, and Rheinfelden.

In the mountain kingdom of which I claimed possession by the law of love, in first seeing it from the Col de la Faucille, the ranges of entirely celestial mountain, the “everlasting clouds” whose glory does not fade, are arranged in clusters of summits definitely distinct in form, and always recognizable, each in its own beauty, by any careful observer who has once seen them on the south and north. Of these, the most beautiful in Switzerland, and as far as I can read, or learn, the most beautiful mountain in the world, is the Jungfrau of Lauterbrunnen. Next to her, the double peaks of the Wetterhorn and Wellhorn, with their glacier of Rosenlauri; next to these, the Aiguille de Bionnassay, the buttress of Mont

Blanc on the south-west ; and after these loveliest, the various summits of the Bernese, Chamouni, and Zermatt Alps, according to their relative power, and the advantage of their place for the general observer. Thus the Blumlis Alp, though only ten thousand feet high, has far greater general influence than the Mont Combin, which is nearly as high as Mont Blanc, but can only be seen with difficulty, and in no association with the lowlands.

Among subordinate peaks, five,—the Tournette of Annecy, the Dent du Midi of Bex, the Stockhorn, south of Thun, Mont Pilate at Lucerne, and the High Sentis of Appenzell,—are notable as outlying masses, of extreme importance in their effect on the approaches to the greater chain. But in that chain itself, no mountain of subordinate magnitude can assert any rivalry with Mont Velan, the ruling alp of the Great St. Bernard.

For Mont Velan signals down the valley of the Rhone, past St. Maurice, to Vevay, the line of the true natural pass of the Great St. Bernard, from France into Italy by the Valley of Martigny and Val d'Aosta ; a perfectly easy and accessible pass for horse and foot, through all the summer ; not dangerous even in winter, except in storm ; and from the earliest ages, down to Napoleon's, the pass chosen by the greatest kings, and wisest missionaries. The defiles of the Simplon were still impassable in the twelfth century, and the Episcopate of the Valais was therefore an isolated territory branching up from Martigny ; unassailable from above, but in connection with the Monastery of St. Bernard and Abbey of St. Maurice, holding alike Burgundian, Swiss, and Saracen powers at bay, beyond the Castle of Chillon.

And I must remind the reader that at the time when Swiss history opens, there was no such country as France, in her existing strength. There was a sacred "Isle of France," and a group of cities,—Amiens, Paris, Soissons, Rheims, Chartres, Sens, and Troyes,—essentially French, in arts, and faith. But round this Frank central province lay Picardy, Normandy, Brittany, Anjou, Aquitaine, Languedoc, and Provence, all of them independent national powers : and on the east of the

Côte d'Or,\* the strong and true *kingdom* of Burgundy, which for centuries contended with Germany for the dominion of Switzerland, and, from *her* Alpine throne, of Europe.

This was, I have said, at the time "when Swiss history opens"—*as such*. It opens a century earlier, in 773, as a part of all Christian history, when Charlemagne convoked his Franks at Geneva to invade Italy, and dividing them there into two bodies, placed Swiss mountaineers at the head of each, and sending one division by the Great St. Bernard, under his own uncle, Bernard,† the son of Charles Martel, led the other himself over the Cenis. It was for this march over the Great St. Bernard that Charlemagne is said to have given the foresters of the central Alps their three trumpets—the Bull of Uri, the Cow of Unterwald, and the horn of Lucerne; and, without question, after his Italian victories, Switzerland became the organic centre of civilization to his whole empire. "It is thus," says M. Gaullieur, "that the heroic history of old Zurich, and the annals of Thurgovie and Rhétie, are full of the memorable acts of the Emperor of the West, and among other traditions the foundation of the Water-church, (Wasserkirche,) at Zurich, attaches itself to the sight of a marvellous serpent, who came to ask justice of the Emperor, in a place where he gave it to all his subjects, by the Limmat shore."

I pause here a moment to note that there used to be indeed harmless water serpents in the Swiss waters, when perfectly pure. I myself saw those of the Lac de Clède, in the year 1833, and had one of them drawn out of the water by the char-à-banc driver with his whip, that I might see the yellow ring round its neck. The color of the body was dark green. If the reader will compare the account given in "Eagle's Nest" of one of the serpents of the Giesbach, he will understand at once how easily the myths of antiquity would attach

---

\* The eastern boundary of France proper is formed by the masses of the Vosges, Côte d'Or, and Monts de la Madeleine.

† Don't confuse *him* with St. Bernard of Ancey, from whom the pass is named; nor St. Bernard of Ancey with St. Bernard of Dijon, the Madonna's chosen servant.

themselves among the Alps, as much to the living serpent as to the living eagle.

Also, let the reader note that the *beryl*-colored water of the Lake of Zurich and the Limmat gave, in old days, the perfectest type of purity, of all the Alpine streams. The deeper blue of the Reuss and Rhone grew dark at less depth, and always gave some idea of the presence of a mineral element, causing the color; while the Aar had soiled itself with clay even before reaching Berne. But the pale aquamarine crystal of the Lake of Zurich, with the fish set in it, some score of them—small and great—to a cube fathom, and the rapid fall and stainless ripple of the Limmat, through the whole of its course under the rocks of Baden to the Reuss, remained, summer and winter, of a constant, sacred, inviolable, supernatural loveliness.

By the shore of the Limmat then, sate Charlemagne to do justice, as Canute by the sea:—the first “Water church” of the beginning river is his building; and never was St. Jerome’s rendering of the twenty-third Psalm sung in any church more truly: “*In loco pascue, ibi collocavit me, super aquam refectiois educavit.*” But the Cathedral Minster of Zurich dates from days no longer questionable or fabulous.

During the first years of the tenth century, Switzerland was disputed between Rodolph II., King of Burgundy, and Bourcard, Duke of Swabia. The German duke at last defeated Rodolph, near Winterthur; but with so much difficulty, that he chose rather thenceforward to have him for ally rather than enemy; and gave him, for pledge of peace, his daughter BERTHA, to be Burgundian queen.

Bertha, the daughter of the Duke Bourcard and Regilinda, was at this time only thirteen or fourteen. The marriage was not celebrated till 921,—and let the reader remember that marriage,—though there was no Wedding March played at it, but many a wedding prayer said,—for the beginning of all happiness to *Burgundy, Switzerland, and Germany*. Her husband, in the first ten years after their marriage, in alliance with Henry the Fowler of Germany, drove the Saracen

and Hungarian nomad armies out of the Alps : and then Bertha set herself to efface the traces of their ravages ; building, everywhere through her territories, castles, monasteries, walled towns, and towers of refuge ; restoring the town and church of Soleure in 930, of Moutiers in the Jura, in 932 ; in the same year endowing the canons of Amsoldingen at Thun, and then the church of Neuchâtel ; finally, toward 935, the church and convent of Zurich, of which her mother Regilinda became abbess in 949, and remained abbess till her death ;—the Queen Bertha herself residing chiefly near her, in a tower on Mount Albis.

In 950 Bertha had to mourn the death of her son-in-law Lothaire, and the imprisonment of her daughter Adelaide on the Lake of Garda. But Otho the Great, of Germany, avenged Lothaire, drove Berenger out of Italy, and himself married Adelaide, reinstating Conrad of Burgundy on the throne of Burgundy and Switzerland : and then Bertha, strong at once under the protection of the king her son, and the emperor her son-in-law, and with her mother beside her, Abbess of the Convent des Dames Nobles of Zurich, began her work of perfect beneficence to the whole of Switzerland.

In the summer times, spinning from her distaff as she rode, she traversed—the legends say, with only a country guide to lead her horse, (when such a queen's horse would need leading!)—all the now peaceful fields of her wide dominion, from Jura to the Alps. My own notion is that an Anne-of-Geierstein-like maid of honor or two must have gleamed here and there up and down the hills beside her ; and a couple of old knights, perhaps, followed at their own pace. Howsoever, the queen verily *did* know her peasants, and their cottages and fields, from Zurich to Geneva, and ministered to them for full twelve years.

In 962, her son Conrad gave authority almost monarchic, to her Abbey of Payerne, which could strike a coinage of its own. Not much after that time, her cousin Ulrich, Bishop of Strasbourg, came to visit her ; and with him and the king her son, she revisited all the religious institutions she had founded, and finally, with them both, consecrated

the Church of Neuchâtel to the Virgin. The Monastery of the Great St. Bernard was founded at the same time.

I cannot find the year of her death, but her son Conrad died in 993, and was buried beside his mother at Payerne.

And during the whole of the 11th century, and more than half of the 12th, the power of Bertha's institutions, and of the Church generally, increased in Switzerland ; but gradually corrupted by its wealth of territory into a feudal hierarchy, against which, together with that of the nobles who were always at war with each other, Duke Berthold IV., of Zæhringen, undertook, in 1178, the founding of FRIBOURG in Uchtland.

The culminating point of the new city above the scarped rocks which border the Sarine (on the eastern bank ?) was occupied by the Château de Tyr (Tyrensis), ancient home of the Counts of that country, and cradle, it is believed, of the house of Thierstein. Berthold called his new town Freyburg, as well as that which existed already in his states of Breisgau, because he granted it in effect the same liberties, the same franchises, and the same communal charter (Handfeste) which had been given to the other Fribourg. A territory of nine leagues in circumference was given to Fribourg in Uchtland, a piece which they still call "the old lands." Part of the new colonists came from Breisgau, Black Forest people ; part from the Roman Pays de Vaud. The Germans lived in the valley, the others on the heights. Built on the confines of France and Germany, Fribourg served for the point of contact to two nations until then hostile ; and the Handfeste of Fribourg served for a model to all the municipal constitutions of Switzerland. Still, at this day, the town is divided into two parts, and into two languages.

This was in 1178. Twelve years later, Berthold V., the greatest and the best of the Dukes of Zæhringen, made, of the village of Burgdorf in the Emmenthal, the town of Berthoud, the name given probably from his own ; and then, in the year 1191, laid the foundations of the town of BERNE.

He chose for its site a spot in the royal domain, for he intended the new city to be called the Imperial city ; and

the place he chose was near a manor which had served in the preceding century for occasional residence to the Rodolphian kings. It was a long high promontory, nearly an island, whose cliff sides were washed by the Aar. The Duke of Zæhringen's Marshal, Cuno of Babenberg, received orders to surround with walls the little island on which stood the simple hamlet of Berne, now become the powerful city of Berne, praiseworthy at first in the democratic spirit of its bourgeois, and afterward in its aristocracy, whose policy, at once elevated, firm, consistent, and ambitious, mingled itself in all the great affairs of the neighboring countries, and became a true power, upon which the sovereigns of the first order had sometimes to count.

Lastly, Berthold built the Castle of Thun, where the Aar issues out of its lake; castle which, as may be seen at the present day, commanded the whole level plain, opening to Berne, and the pass into the Oberland.

Thus the three towns Fribourg, Berne, and Thun, form, at the close of the twelfth century, the triple fortress of the Dukes of Zæhringen, strengthened by a body of burghers to whom the Dukes have granted privileges till then unknown; this Ducal and Civic allied power asserting itself in entire command of Switzerland proper, against the Counts of Savoy in the south, the Burgundian princes in the east, and the ecclesiastical power of Italy, vested in the Bishops of Sion, in the Valais,—thence extending from the mouth of the Rhone into the Pays de Vaud, and enthroned there at Payerne by the bequests of Queen Bertha. The monks of her royal abbey at Payerne, seeing that all the rights they possessed over the Pays de Vaud were endangered by the existence of Fribourg, opposed the building of the Church of St. Nicholas there, asserting that the ground assigned to it and its monastery belonged to the Abbey of Payerne. Berthold IV. was on the point of attacking the monks on their own rock when the nobles of the Vaud interfered, as mediators.

Four of them—Amé, Count of Geneva, Vauthier of Blonay, Conrad of Estaveyer, and Rodolph of Montagny—compelled Berthold to ratify the privileges, and resign the lands, of the

monks of Payerne, by a deed signed in 1178 ; the church and monastery of St. Nicholas being founded at Fribourg under their rule. And this constitution of Fribourg, whether the Dukes of Zæhringen foresaw it or not, became the fecund germ of a new social order. The "Commune" was the origin of the "Canton," "and the beneficent æra of communal liberty served for *acheminement* to the constitutional liberties and legislative codes of modern society."

Thus far M. Gaullieur, from whose widow I leased my own chalet at Mornex, and whose son I instructed, to the best of my power, in clearing land of useless stones on the slope of the Salève,—under the ruins of the old Château de Savoie, the central castle, once, of all Savoy ; on the site of which, and summit of its conical hill-throne, seated himself, in his pleasure villa, all the summer long, my very dear friend and physician, old Dr. Gosse of Geneva ; whose mountain garden, about three hundred feet above mine, was indeed enclosed by the remaining walls and angle towers of the Castle of Savoy, of which the Doctor had repaired the lowest tower so as to serve for a reservoir to the rain rushing down the steep garden slopes in storm,—and to let none of it be wasted afterward in the golden Salève sunshine.

"C'était une tour de guerre," said the Doctor to me triumphantly, as he first led me round the confines of his estate. "Voyez. C'était une tour de guerre. J'en ai fait une bouteille !"

But that walk by the castle wall was long after the Mont Velan times of which I am now telling ;—in returning to which, will the reader please note the homes of the four Vaudois knights who stood for Queen Bertha's monastery : Amé of Geneva, Vauthier of Blonay, Conrad of Estaveyer, and Rodolph of Montagny ?

Amé's castle of Geneva stood on the island, where the clock tower is now ; and has long been destroyed : of Estaveyer and Montagny I know nothing ; but the Castle of Blonay still stands above Vevay, as Chillon still at the head of her lake ; but the château of Blonay has been modified gradually into comfort of sweet habitation, the war towers of it sustaining

timber-latticed walls, and crowned by pretty turrets and pinnacles in cheerful nobleness—trellised all with fruitage or climbing flowers; its moats now all garden; its surrounding fields all lily and meadowsweet, with blue gleamings, it may be of violet, it may be of gentian; its heritage of human life guarded still in the peacefully scattered village, or farm-house, here and there half hidden in apple-blossom, or white with fallen cherry-blossom, as if with snow.

I have already told how fond my father was of staying at the *Trois Rois* of Vevay, when I was up among the *aiguilles* of Chamouni. In later years, I acknowledged his better taste, and would contentedly stay with him at Vevay, as long as he liked,—myself always perfectly happy in the fields and on the hillsides round the *Château Blonay*. Also, my father and mother were quite able at any time to get up as far as *Blonay* themselves; and usually walked so far with me when I was intent on the higher hills,—waiting, they, and our old servant, *Lucy Tovey*, (whom we took abroad with us sometimes that she might see the places we were always talking of,) until I had done my bit of drawing or hammering, and we all went down together, through the vineyards, to four o'clock dinner; then the evening was left free for me to study the *Dent d'Oche* and chains of crag declining southward to Geneva, by sunset.

Thus Vevay, year after year, became the most domestic of all our foreign homes. At Venice, my mother always thought the gondola would upset; at Chamouni, my father, that I should fall into the *Mer de Glace*; at Pisa, he would ask me, "What shall I give the coachman?" and at Florence, dispute the delightfulness of *Cimabue*. But at Vevay, we were all of a mind. My father was professionally at home in the vineyards,—sentimentally in the *Bosquet de Julie*; my mother liked apple orchards and narcissus meads as much as I did; and for me, there was the *Dent du Midi*, for eternal snow, in the distance; the *Rochers de Naye*, for climbing, accessibly near; *Chillon* for history and poetry; and the lake, in the whole breadth of it from *Lausanne* to *Meillerie*, for Turnerian mist effects of morning and Turnerian sunsets at evening; and moonlights,—as if the moon were one radiant glacier of

frozen gold. Then if one wanted to go to Geneva for anything, there were little steamers,—no mortal would believe, now, how little; one used to be afraid an extra basket of apples would be too much for them, when the pier was full of market people. They called at all the places along the north shore, mostly for country folks; and often their little cabins were quite empty. English people thought the lake of Geneva too dull, if they had ever more than an hour of it.

It chanced so, one day, when we were going from Vevay to Geneva. It was hot on the deck, and we all went down into the little cabin, which the waves from the paddle wheels rushed past the windows of, in lovely wild masses of green and silver. There was no one in the cabin but ourselves (that is to say, papa, mamma, old Anne, and me), and a family whom we supposed, rightly, to be American, of the best sort. A mother with three daughters, and her son,—he in charge of them all, perhaps of five or six and twenty; his sisters younger; the mother just old enough to *be* their mother; all of them quietly and gracefully cheerful. There was the cabin table between us, covered with the usual Swiss news about nothing, and an old caricature book or two. The waves went on rushing by; neither of the groups talked, but I noticed that from time to time the young American cast somewhat keen, though entirely courteous, looks of scrutiny at my father and mother.

In a few minutes after I had begun to notice these looks, he rose, with the sweetest quiet smile I ever saw on any face (unless, perhaps, a nun's, when she has some grave kindness to do), crossed to our side of the cabin, and addressing himself to my father, said, with a true expression of great gladness, and of frank trust that his joy would be understood, that he knew who we were, was most thankful to have met us, and that he prayed permission to introduce his mother and sisters to us.

The bright eyes, the melodious voice, the perfect manner, the simple, but acutely flattering, words, won my father in an instant. The New Englander sat down beside us, his mother and sisters seeming at once also to change the steamer's

cabin into a reception room in their own home. The rest of the time till we reached Geneva passed too quickly ; we arranged to meet in a day or two again, at St. Martin's.

And thus I became possessed of my second friend, after Dr. John Brown ; and of my first real tutor, Charles Eliot Norton.

---

## CHAPTER III.

### L'ESTERELLE.

SALLENCHES, SAVOY, *9th September, 1888.*

The meeting at St. Martin's with Norton and his family was a very happy one. Entirely sensible and amiable, all of them ; with the farther elasticity and acuteness of the American intellect, and no taint of American ways. Charles himself, a man of the highest natural gifts, in their kind ; observant and critical rather than imaginative, but with an all-pervading sympathy and sensibility, absolutely free from envy, ambition, or covetousness : \* a scholar from his cradle, not only now a *man* of the world, but a *gentleman* of the world, whom the highest born and best bred of every nation, from the Red Indian to the White Austrian, would recognize in a moment, as of their caste.

In every branch of classical literature he was my superior ; knew old English writers better than I,—much more, old French ; and had active fellowship and close friendship with the then really progressive leaders of thought in his own country, Longfellow, Lowell, and Emerson.

All the sympathy, and all the critical subtlety, of his mind had been given, not only to the reading, but to the trial and

---

\* I mean, covetousness of beautiful things, the only sort that is possible to people like Charles Norton or me. He gave me his best Greek "Fortune," a precious little piece of flying marble, with her feet on the world, engraved with hexagonal tracery like a honeycomb. We both love its honey—but best, given by each other.

following out of the whole theory of "Modern Painters;" so that, as I said, it was a real joy for him to meet me, and a very bright and singular one for both of us, when I knocked at his door in the Hôtel du Mont Blanc at five in the morning; and led him, as the roselight flushed the highest snow, up the winding path among the mountain meadows of Salenches.

I can see them at this moment, those mountain meadows, if I rise from my writing-table, and open the old barred valves of the corner window of the Hotel Bellevue;—yes, and there is the very path we climbed that day together, apparently unchanged. But on what seemed then the everlasting hills, beyond which the dawn rose cloudless, and on the heaven in which it rose, and on all that we that day knew, of human mind and virtue,—how great the change, and sorrowful, I cannot measure, and, in this place, I will not speak.

That morning gave to me, I said, my first tutor;\* for Dr. John Brown, however far above me in general power, and in the knowledge proper to his own profession, yet in the simplicity of his affection liked everything I wrote, for what was true in it, however imperfectly or faultfully expressed: but Norton saw all my weaknesses, measured all my narrownesses, and, from the first, took serenely, and as it seemed of necessity, a kind of paternal authority over me, and a right of guidance;—though the younger of the two,—and always admitting my full power in its own kind; nor only admitting, but in the prettiest way praising and stimulating. It was almost impossible for him to speak to anyone he cared for, without some side-flash of witty compliment; and to me, his infinitely varied and loving praise became a constant motive to exertion, and aid in effort: yet he never allowed me in the slightest violation of the laws, either of good writing, or social prudence, without instant blame or warning.

I was entirely conscious of his rectorial power, and affectionately submissive to it; so that he might have done any-

---

\* Gordon was only my master in Greek, and in common sense; he never criticised my books, and, I suppose, rarely read them.

thing with me, but for the unhappy difference in our innate, and unchangeable, political faiths.

Since that day at Sallenches it has become a matter of the most curious speculation to me, what sort of soul Charles Norton would have become, if he had had the blessing to be born an English Tory, or a Scotch Jacobite, or a French Gentilhomme, or a Savoyard Count. I think I should have liked him best to have been a Savoyard Count; say, Lord of the very Tower of Sallenches, a quarter of a mile above me at the opening of the glen,—habitable yet, and inhabited; it is half hidden by its climbing grapes. Then, to have read the “*Fiorretti di San Francesco*,” (which *he* found out, New Englander though he was, before I did,) in earliest boyhood; then to have been brought into instructively grievous collision with Commerce, Liberty, and Evangelicalism at Geneva; then to have learned Political Economy from Carlyle and me; and finally devoted himself to write the History of the Bishops of Sion! What a grand, happy, consistent creature he would have been,—while now he is as hopelessly out of gear and place, over in the States there, as a runaway star dropped into Purgatory; and twenty times more a slave than the blackest nigger he ever set his white scholars to fight the South for; because all the faculties a black has may be fully developed by a good master (see Miss Edgeworth’s story of the grateful Negro),\*—while only about the thirtieth or fortieth part of Charles Norton’s effective contents and capacity are beneficially spent in the dilution of the hot lava, and fructification of the hot ashes, of American character;—which are overwhelming, borne now on volcanic air,—the life of Scotland, England, France, and Italy. I name Scotland first, for reasons which will be told in next “*Præterita*,”—“*Joanna’s Care*.” Mean-

---

\* I showed the valley of Chamouni, and the “*Pierre-a-Bot*” above Neuchâtel, to Mrs. Beecher Stowe and her pretty little daughter Georgie,—when Georgie was about sixteen, and wouldn’t let me say a word against Uncle Tom; howbeit, that story of the Grateful Negro, Robinson Crusoe, and Othello, contain, any of the three, more, more, alike worldly and heavenly, wisdom than would furnish three “*Uncle Tom’s Cabins*.”

time, here is the last letter I have from Norton, showing how we have held hands since that first day on Geneva lake.

“SHADY HILL, *April 9th*, 1887.

“It is very good of you, my dearest Ruskin, to send me such a long, pleasant letter, not punishing me for my silence, but trusting to—

‘My thought, whose love for you,  
Though words come hindmost, holds his rank before.’

You are doing too much, and your letter gives me a fear lest, out of care for me, you added a half-hour of effort to the work of a too busy day. How long it is since I first began to preach prudence to you! and my preaching has availed about as much as the sermons in stones avail to convert the hard-hearted. Well, we are glad to take each other as we are, you ever imprudent, I ever—(I leave the word to your mercy).

“The last number of ‘*Præterita*’ pleased me greatly. There was a sweet tone in it, such as becomes the retrospect of a wise man as he summons the scenes of past life before his eyes; the clearness, the sharp-cut outline of your memories is a wonder, and their fulness of light and color. My own are very different. I find the outlines of many of them blurred, and their colors faint. The loss that came to me fifteen years ago included the loss of vividness of memory of much of my youth.

“The winter has been long and hard with us. Even yet there are snow banks in shady places, and not yet is there a sign of a leaf. Even the snowdrops are hardly venturing out of the earth. But the birds have come back, and to-day I hear the woodpeckers knocking at the doors of the old trees to find a shelter and home for the summer. We have had the usual winter pleasures, and all my children have been well, though Lily is always too delicate, and ten days hence I part with her that she may go to England and try there to escape her summer cold. She goes out under Lowell’s charge, and will be with her mother’s sister and cousins in England. My three girls have just come to beg me to go out

with them for a walk. So, good-by. I will write soon again. Don't you write to me when you are tired. I let my eyes rest for an instant on Turner's sunset, and your sunrise from Herne Hill, which hang before me; and with a heart full of loving thanks to you,

"I am ever

"Your affectionate,

"C. E. N.

"My best love to Joan,—to whom I mean to write."

Somewhat more of Joan (and Charles also) I have to tell, as I said, in next "Præterita."

I cannot go on, here, to tell the further tale of our peace and war; for the fates wove for me, but a little while after they brought me that friend to Sallenches glen, another net of Love; in which alike the warp and woof were of deeper colors.

Soon after I returned home, in the eventful year 1858, a lady wrote to me from—somewhere near Green Street, W.,—saying as people sometimes did, in those days, that she saw I was the only sound teacher in Art; but this farther, very seriously, that she wanted her children—two girls and a boy—taught the beginnings of Art rightly; especially the younger girl, in whom she thought I might find some power worth developing: would I come and see her? I thought I should rather like to; so I went, to near Green Street; and found the mother—the sort of person I expected, but a good deal more than I expected, and in all sorts of ways. Extremely pretty still, herself, nor at all too old to learn many things; but mainly anxious for her children. Emily, the elder daughter, wasn't in; but Rosie was,—should she be sent for to the nursery? Yes, I said, if it would not tease the child, she might be sent for. So presently the drawing-room door opened, and Rosie came in, quietly taking stock of me with her blue eyes as she walked across the room; gave me her hand, as a good dog gives its paw, and then stood a little

back. Nine years old on 3d January, 1858, thus now rising toward ten ; neither tall nor short for her age ; a little stiff in her way of standing. The eyes rather deep blue at that time, and fuller and softer than afterward. Lips perfectly lovely in profile ; a little too wide, and hard in edge, seen in front, the rest of the features what a fair, well-bred Irish girl's usually are ; the hair, perhaps, more graceful in short curl round the forehead, and softer than one sees often ; in the close-bound tresses above the neck.

I thought it likely she *might* be taught to draw a little, if she would take time ; I did not expect her to take *pains*, and told her mother so, at once. Rosie says never a word, but we continue to take stock of each other. "I thought you so ugly," she told me afterward. She did not quite mean that ; but only, her mother having talked much of my "greatness" to her, she had expected me to be something like Garibaldi, or the Elgin Theseus ; and was extremely disappointed.

I expressed myself as ready to try what I could make of Rosie ; only I couldn't come every other day all the way in to Green Street. Mamma asked what sort of a road there was to Denmark Hill ? I explained the simplicity and beauty of its ramifications round the Elephant and Castle, and how one was quite in the country as soon as one got past the triangular field at Champion Hill. And the wildernesses of the Obelisk having been mapped out, and determined to be passable, the day was really appointed for first lesson at Denmark Hill—and Emily came with her sister.

Emily was a perfectly sweet, serene, delicately-chiselled marble nymph of fourteen, softly dark-eyed, rightly tender and graceful in all she did and said. I never saw such a faculty for the arrangement of things beautifully, in any other human being. If she took up a handful of flowers, they fell out of her hand in wreathed jewellery of color and form, as if they had been sown, and had blossomed, to live together so, and no otherwise. Her mother had the same gift, but in its more witty, thoughtful, and scientific range ; in Emily it was pure wild instinct. For an Irish girl, she was not witty, for she could not make a mistake ; one never laughed at what she said,

but the room was brighter for it. To Rose and me she soon became no more Emily, but "Wisie," named after my dead Wisie. All the children, and their father, loved animals;—my first sight of papa was as he caressed a green popinjay which was almost hiding itself in his waistcoat. Emily's pony, Swallow, and Rosie's dog, Bruno, will have their day in these memoirs; but Emily's "Bully" was the perfectest pet of all;—he used to pass half his day in the air, above her head, or behind her shoulders, holding a little tress of her long hair as far out as he could, on the wing.

That first day, when they came to Denmark Hill, there was much for them to see;—my mother, to begin with, and she also had to see them; on both sides the sight was thought good. Then there were thirty Turners, including the great Rialto; half-a-dozen Hunts; a beautiful Tintoret; my minerals in the study; the loaded apple trees in the orchard; the glowing peaches on the old red garden wall. The lesson lost itself that day in pomiferous talk, with rustic interludes in the stables and pigsty. The pigs especially, it was observed were highly educated, and spoke excellent Irish.

When next they came, lessons began duly, with perspective, and the analysis of the essential qualities of triangles! I must state here, generally, that ever since the year I lost in efforts to trisect an angle myself, education, both in drawing and ethics, has been founded by me on the *pleasant* and pretty mysteries of trigonometry! the more resolutely, because I always found ignorance of magnitudes at the root of modern bad taste and frivolity; and farther, because all the grace, and much of the sentiment, both of plant and mountain form, depends on the angle of the cone they fill with their branches, or rise into with their cliffs.

These geometrical lessons are always accompanied, when I have girls to teach, by the most careful pencil study of the forms of leaves as they grow, whether on ground or branch.

In botanical knowledge, and perception of plant-character, my eldest Irish pupil, mamma, was miles and miles my superior; and in powers of design, both the children were so; but the fine methods of measurement and delineation

were new to all of them ; nor less the charm of faithfully represented color, in full daylight, and in the open air. Having Turner's mountain drawings of his best time beside us, and any quantity of convolvuluses, hollyhocks, plums, peaches, and apples, to bring in from the garden, the afternoon hours went fast ; but so much more in talk than work, that I soon found, if either triangles or bindweeds were to come to anything, it must be under the governess's superintendence, not mamma's : and that I should have to make my way to Green Street, and up to the school-room, after all, on at least two out of three of the lesson days. Both the children, to my extreme satisfaction, approved of this arrangement, and the final order was that whenever I happened to go through Green Street, I should pay them a visit in the nursery. Somehow, from that time, most of my London avocations led me through Green Street.

It chanced above all things well for me that their governess was a woman of great sense and power, whom the children entirely loved, and under whom mamma put herself, in the school-room, no less meekly than they ; partly in play, but really also a little subdued by the clear insight of the fearlessly frank preceptress into her own faults. I cannot call them "foibles," for her native wit and strength of character admitted none.

Rosie had shortly expressed her sense of her governess's niceness by calling her "Bun ;" and I had not been long free of the school-room before she wanted a name for me also, significant of like approval. After some deliberation, she christened me "Crumpet ;" then, impressed by seeing my gentleness to beggars, canonized me as "Saint Crumpet," or, shortly and practically, "St. C.,"—which I remained ever afterward ; only Emily said one day to her sister that the C. did in truth stand for "Chrysostom."

The drawing, and very soon painting, lessons went on meantime quite effectively, both the girls working with quick intelligence and perfect feeling ; so that I was soon able, with their mother's strong help, to make them understand the essential qualities both of good painting and sculpture. Rose

went on into geology; but only far enough to find another play-name for me—"Archegosaurus." This was meant partly to indicate my scientific knowledge of Depths and Ages; partly to admit me more into family relations, her mother having been named, by her cleverest and fondest friend, "Lacerta"—to signify that she had the grace and wisdom of the serpent, without its poison.

And things went on,—as good girls will know how, through all that winter;—in the spring, the Fates brought the first whirlpool into the current of them, in that (I forget exactly why) it was resolved that they should live by the Cascine of Florence in the spring, and on the Lung' Arno, instead of in the Park by the Serpentine. But there was the comfort for me that Rosie was really a little sorry to go away; and that she understood in the most curious way how sorry *I* was.

Some wise, and prettily mannered, people have told me I should not say anything about Rosie at all. But I am too old now to take advice, and I won't have this following letter—the first she ever wrote me—moulder away, when I can read it no more, lost to all loving hearts.

NICE, *Monday, March 18th.*

DEAREST ST. CRUMPET,—I am so sorry—I couldn't write before, there wasn't one bit of time—I am so sorry you were disappointed—I only got yr letter yesterday (Sunday), & we only got to Nice late on Saturday afternoon—So I have got up so early this morning to try & get a clear hour before breakfast to write to you, which you see I'm doing—So you thought of us, dear St. Crumpet, & we too thought so much of you—Thank you very much for the Diary letter; it was so nice of you to write so long a one—I have so much to tell you too Archigosaurus so I will begin from Dover, & tell what befel us up to Nice—Emily asks me to say that she did a picture at Dover of Dover Castle in a fog—I think it was to please you—Well we had a roughish passage, but we \*

---

\* I leave pauses where the old pages end.—J. R.

sat on deck & didn't mind—We thought & talked about you—Every great wave that came we called a ninth wave and we thought how pleasant it w<sup>d</sup> be to sit in a storm and draw them, but I think if you had wanted it done I'd have tried to do it S<sup>t</sup>. Crumpet—There was what do you think at the prow of our steamer—yr brother Archigosaurus, an alligator, and we said it was you—Well so we got to Calais, breakfasted at the Table d'Hôte there, and then began that weary railroad journey from Calais to Paris—The scenery was just the same all the way—I suppose you know it—Those long straight rows of poplars cut even at the tops & flat uninteresting country. I drew the pop<sup>l</sup>ars in perspective for you S<sup>t</sup>. Crumpet—We got to Paris on Friday evening & stayed till

Wednesday—No, I couldn't I tell you, there wasn't one bit of time or do you think I would not have seized it directly for I know yr thinking why didn't she write—Its too long to say all we did & didn't do in Paris, so I'll only tell about the Louvre and Notre Dame. We went to the Louvre. Oh S<sup>t</sup>. Crumpet how we thought of you there—How we looked and talked about the Titians you told us to look at particularly the glass ball one & the white Rabbit—Yes we looked so much at them and we did, all of us, think them so very beautiful—I liked two portraits of Titian's of two dark gentlemen with earnest eyes better than any I think. We thought his skins (I mean the skins he made his picture-people have) so very beautifully done & we looked at the pinks at the corners of the eyes & thought of the Portrait of Lord Bute's & you again S<sup>t</sup>. Crumpet. We liked the picture of Paul Veronese

of the children playing with the dog very much I think one of them the most prominent with dark eyes & not looking at the dog is very beautiful. Why does Paul Veronese put his own family in the pictures of sacred subjects, I wonder? I liked the little puppy in the boys arms trying to get away—The statues in the Louvre I think most beautiful. Is it wrong S<sup>t</sup>. Crumpet to like that noble Venus Victrix as well as Titian If it is, am I a hardened little tinner? Oh, but

they are so beautiful those statues there's one of a Venus leaning against a tree with a Lacerta running up it—Notre Dame they are spoiling as quick as they can by colouring those grand old pillars with ugly daubs of green and yellow etc. Is not that "light" in the French? \* It's a bore saying all we thought of Paris, I must get on to the mountains not to say Alps—Don't be Kinfishery † dear S<sup>t</sup>. Crum-pet; how good it was of you to give yr Turners that you love so much to the Oxford Museum From Paris we started early on Wednesday morning & travelled all day & all the night in the train—Yes you would have said "Poor Posie" I was bored But we got over it very well—It was so pleasant to be running after the sun to the south (Dont be Kingfishery) & awaking at about 5 in the morning to see long plains of grey-headed silvery olives and here and there pink perky peach trees dancing among them—And there were groups of dark cool cypress trees pointing upwards, & hills & grey rocks sloping to the sea—the Mediterranean So we shook off our sleepiness, at least Papa Mama and I did for Emily & Adèle still slept; & saw behind those peaks of craggy hills a pink smile coming in the sky telling us that the morning had come really at last So we watched & suddenly there rose (popped w<sup>d</sup> be a better word for it really rose in one instant) such a

sun—"nor dim, nor red" (you know the verse) & then dipped back again below the hills It was so beautiful—But I shocked Mama by saying "Jack in the box" which awoke Emily who declared of course she had been wide awake and had seen it all. Why do people always do that, S<sup>t</sup>. Crum-pet? This was just before we came to Marseilles. It had been snowing the day before & it was nice to go to sleep & wake up in the summer—We got to Toulon and there we spent the day & oh Archigosaurus we saw so many Lacertas there; again we

---

\* Referring to a debate over Mrs. Browning's poem in defence of them; the one in which she says, rightly, that they are no more "light" than a rifle-ball is.

† *Kingfishery*. Sitting sulkily on a branch.

thought of you—How can you wish to be a parrot\*—are you not our saint—You wouldn't look a bit nice in a gold laced cap ; don't you know blue is the colour you should wear. At Toulon it was like July—I don't like such heat—Transplantation & scorching is too much for an Irish rose—But I

sat with Mama and Emily on a rock & sketched Toulon Harbour (or rather tried to) for you S<sup>t</sup>. Crumpet. Then the next we posted, the country was so beautiful some of it & towards evening we saw snowy peaks, they were the mountains of Savoy. I was pretty tired that night & we had to sleep at Frejus such a disagreeable place. The next day we had six horses to our carriage for it was a hilly road. We walked about two hours of the way over the hills † You know what sort of a view there was at the top, S<sup>t</sup>. Crumpet & how one stands & stares & says nothing because the words of Grand Glorious, Beautiful etc cannot in one quarter express what one thinks. You the author of M-Ps c<sup>d</sup> describe it Irish roses can't. But I can tell you how my cousins the moorland roses nodded at me as I passed and how they couldn't understand why Irish hedge roses bloomed in July instead of March

I can tell you how the fields were white with Narcissi, how the roads were edged with mauve-coloured anemones & how the scarlet anemones stood up in the meadows tantalizing me in the carriage so much because I wanted to feel them And there were myrtles (wild) growing close to the blue Mediterranean & Mama lay down on them by the seaside at Cannes while Papa and I were talking to a perfectly deaf old French fisherman who gave his ‡ to me as he caught them putting them half alive into my hands, oh, you w<sup>d</sup> have been alive

---

\* I suppose I had not expressed this farther condition, of being her father's parrot.

† The pass of the Esterelle, between Frejus and Nice ; more beautiful, always, to me, than all the groves and cliffs of the Riviera.—J. R., 1839.

‡ “ Fish ” to be understood ; also that the fisherman was not “ perfectly ” deaf, for papa could not have talked with his eyes only, as Rose could.

there Archigosaurus. How I wish you had been there. Well we got here (Nice) on Saturday evening & we climbed up an old Roman Ampitheatre and saw of all sunsets the most glorious. We said it was like Light in the West, Beauvais, and again we thought of you Oh St. Crumpet I think of you so much & of all your dearnesses to me I wish so very much

that you were happy—God can make you so—We will try not to forget all you taught us—It was so nice of you. Thank you so much from both of us.—Mama is very glad you went to Dr. Ferguson She says you must not give him up. How very kind of you to see & talk to our old man Certainly the name is not beautiful We have all read your letter & we all care for it. That was indeed a “dear Irish labourer.” I like him so much ; such a nice letter. I hope Mr & Mrs Ruskin are well now. Will you give them our love please & take for yourself as much as ever you please. It will be a great deal if you deign to take all we send you. I like Nice but I don’t much like being transplanted except going home. I am ever your rose.

*Postscript.*

Yes, write packets—trunks, & we shall like them so much. Indeed I couldn’t write before, I’ll try to write again. You must see how we think of you & talk of you—rose posie.

---

CHAPTER IV.

JOANNA’S CARE.

The mischances which have delayed the sequence of “Præterita” must modify somewhat also its intended order. I leave Rosie’s letter to tell what it can of the beginning of happiest days ; but omit, for a little while, the further record of them,—of the shadows which gathered around them, and increased, in my father’s illness ; and of the lightning which struck him down in death—so sudden, that I find it extremely

difficult, in looking back, to realize the state of mind in which it left either my mother or me. My own principal feeling was certainly anxiety for her, who had been for so many years in every thought dependent on my father's wishes, and withdrawn from all other social pleasure as long as she could be *his* companion. I scarcely felt the power I had over her, myself; and was at first amazed to find my own life suddenly becoming to her another ideal; and that new hope and pride were possible to her, in seeing me take command of my father's fortune, and permitted by him, from his grave, to carry out the theories I had formed for my political work, with unrestricted and deliberate energy.

My mother's perfect health of mind, and vital religious faith, enabled her to take all the good that was left to her, in the world, while she looked in secure patience for the heavenly future: but there was immediate need for some companionship which might lighten the burden of the days to her.

I have never yet spoken of the members of my grandmother's family, who either remained in Galloway,\* or were associated with my early days in London. Quite one of the dearest of them at this time, was Mrs. Agnew, born Catherine Tweddale, and named Catherine after her aunt, my father's mother. She had now for some years been living in widowhood; her little daughter, Joan, only five years old when her father died, having grown up in their pretty old house at Wigtown,† in the simplicity of entirely natural and contented life: and, though again and again under the stress of domestic sorrow, untellable in the depth of the cup which the death-angels filled for the child, yet in such daily happiness as her own bright and loving nature secured in her relations with all those around her; and in the habits of childish play, or education, then common in the rural towns of South Scotland:

---

\* See "Præterita," vol. i., p. 62.

† Now pulled down and the site taken for the new county buildings. The house as it once stood is seen in the centre of the wood-cut at page 6 of Gordon Fraser's Guide, with the Stewartry hills in the distance. I have seldom seen a truer rendering of the look of an old Scottish town.

of which, let me say at once that there was greater refinement in them, and more honorable pride, than probably, at that time, in any other district of Europe;\* a certain pathetic melody and power of tradition consecrating nearly every scene with some past light, either of heroism or religion.

And so it chanced, providentially, that at this moment, when my mother's thoughts dwelt constantly on the past, there should be this child near us,—still truly a child, in her powers of innocent pleasure, but already so accustomed to sorrow, that there was nothing that could farther depress her in my mother's solitude. I have not time to tell of the pretty little ways in which it came about, but they all ended in my driving to No. 1, Cambridge Street, on the 19th April, 1864 :

---

\* The following couple of pages, from "Redgauntlet," put in very few words the points of difference between them and the fatally progressive follies and vanities of Edinburgh :—

“ ‘Come away, Mr. Fairford ; the Edinburgh time is later than ours,’ said the Provost.

“ ‘And come away, young gentleman,’ said the Laird : ‘I remember your father weel, at the Cross, thirty years ago. I reckon you are as late in Edinburgh as at London ; *four* o'clock hours, eh?’

“ ‘Not quite so degenerate,’ replied Fairford ; ‘but certainly many Edinburgh people are so ill-advised as to *postpone their dinner* till three, that they may have full time to answer their London correspondents.’

“ ‘London correspondents!’ said Mr. Maxwell ; ‘and pray, what the devil have the people of Auld Reekie to do with London correspondents?’

“ ‘The tradesmen must have their goods,’ said Fairford.

“ ‘Can they not buy our own Scottish manufactures, and pick their customers' pockets in a more patriotic manner?’

“ ‘Then the ladies must have fashions,’ said Fairford.

“ ‘Can they not busk the plaid over their heads, as their mothers did? A tartan screen, and once a year a new cockernony from Paris, shou'd serve a countess ; -but ye have not many of *them* left, I think. Mareschal, Airley, Winton, Wemyss, Balmerino—ay, ay, the countesses and ladies of quality will scarce take up too much of your ball-room floor with their quality hoops nowadays.’

“ ‘There is no want of crowding, however, sir,’ said Fairford ; ‘they begin to talk of a new Assembly Room.’

“ ‘A new Assembly Room!’ said the old Jacobite Laird. ‘Umph—I mind quartering three hundred men in the Assembly Room you *have*. But, come, come : I'll ask no more questions—the answers all smell of new lords, new lands.’”

where her uncle (my cousin, John Tweddale) brought her up to the drawing-room to me, saying, "This is Joan."

I had seen her three years before, but not long enough to remember her distinctly: only I had a notion that she would be "nice,"\* and saw at once that she *was* entirely nice, both in my mother's way, and mine; being now seventeen years and some—well, for example of accuracy and conscience—forty-five days, old. And I very thankfully took her hand out of her uncle's, and received her in trust, saying—I do not remember just what,—but certainly *feeling* much more strongly than either her uncle or she did, that the gift, both to my mother and me, was one which we should not easily bear to be again withdrawn. I put her into my father's carriage at the door, and drove her out to Denmark Hill. Here is her own account of what followed between my mother and her:—

"I was received with great kindness by the dear old lady, who did not inspire *me*, as she did so many other people, with a feeling of awe! We were the best of friends, from the first. She, ever most considerate of what would please *me*, and make me happy; and I, (ever a lover of old ladies!) delighted to find it so easily possible to please *her*.

"Next morning she said, 'Now tell me frankly, child, what you like best to eat, and you shall have it. Don't hesitate; say what you'd really like,—for luncheon to-day, for instance.' I said, truthfully, 'Cold mutton, and oysters'; and this became a sort of standing order (in months with the letter *r*!)—greatly to the cook's amusement.

"Of course I respectfully called the old lady '*Mrs. Ruskin*'; but in a day or two, she told me she didn't like it, and would I call her 'Aunt' or 'Auntie'? I readily did so.

"The days flew in that lovely garden, and as I had only been invited to stay a week, until Mr. Ruskin should return home,† I felt miserable when he did come, thinking I must

---

\* And the word means more, with me, than with Sydney Smith (see his Memoirs); but it means *all* that *he* does, to begin with.

† I must have been going away somewhere the day after I brought her to Denmark Hill.

go back to London streets, and noise ; (though I was always very happy with my good uncle and aunts).

“So, when the last evening came, of my week, I said, with some hesitation, ‘Auntie, I had better go back to my uncle’s to-morrow!’

“She flung down her netting, and turned sharply round, saying, ‘Are you unhappy, child?’ ‘Oh no!’ said I, ‘only my week is up, and I thought it was time——’

“I was not allowed to finish my sentence. She said, ‘Never let me hear you say anything again about going ; as long as you are happy here, stay, and we’ll send for your clothes, and make arrangements about lessons, and everything else here.’

“And thus it came about that I stayed *seven years!*—till I married ; going home now and then to Scotland, but always getting pathetic little letters there, telling me to ‘come back as soon as my mother could spare me, that I was much missed, and nobody could ever fill my place.’ And auntie was very old then (not that she ever could bear being called *old*, at ninety!), and I could not ever bear the thought of leaving her!”

Thus far Joanie ; nor virtually have she and I ever parted since. I do not care to count how long it is since her marriage to Arthur Severn ; only I think her a great deal prettier now than I did then : but other people thought her extremely pretty then, and I am certain that everybody *felt* the guileless and melodious sweetness of the face. Her first conquest was almost on our threshold ; for half an hour or so after we had reached Denmark Hill, Carlyle rode up the front garden, joyfully and reverently received as always ; and stayed the whole afternoon ; even, (Joan says) sitting with us during our early dinner at five. Many a day after that, he used to come ; and one evening, “in describing with some rapture how he had once as a young man had a delightful trip into Galloway, ‘where he was most hospitably entertained in the town of Wigtown by a Mr. Tweddale,’ I (Joan) said quietly, ‘I *am* so glad ! That was my grandfather, and Wigtown is my native place !’ He turned in a startled, sudden way, saying, ‘Bless

the child, is that so?' adding some very pretty compliments to my place and its people, which filled my heart with great pride. And, on another occasion, after he had been to meet the Queen at Dean Stanley's, in describing to us some of the conversation, he made us laugh by telling how, in describing to Her Majesty the beauty of Galloway, that 'he believed there was no finer or more beautiful drive in her kingdom than the one round the shore of the Stewartry, by Gatehouse of Fleet,' he got so absorbed in his subject that, in drawing his chair closer to the Queen, he at last became aware he had fixed it on her dress, and that she could not move till he withdrew it! Do you think I may say farther" (Of course, Joanie), "that Carlyle as a young man often went to my great aunt's (Mrs. Church) in Dumfriesshire; and he has several times told me that he considered *her* one of the most remarkable and kindest women he had ever known. On one occasion while there, he went to the little Cummertrees Church, where the then minister (as a joke sometimes called 'Daft Davie Gillespie') used to speak his mind very plainly from the pulpit, and while preaching a sermon on 'Youth and Beauty being laid in the grave,' something tickled Carlyle, and he was seen to smile; upon which Mr. Gillespie stopped suddenly, looked with a frown at Carlyle (who was sitting in my aunt's pew), and said, 'Mistake me not, young man; it is *youth alone* that *you* possess.' This was told to me, (Joan,) by an old cousin of mine who heard it, and was sitting next Carlyle at the time."

I am so glad to be led back by Joanie to the thoughts of Carlyle, as he showed himself to her, and to me, in those spring days, when he used to take pleasure in the quiet of the Denmark Hill garden, and to use all his influence with me to make me contented in my duty to my mother; which he, as, with even greater insistence, Turner, always told me was my first;—both of them seeing, with equal clearness, the happiness of the life that was possible to me in merely meeting my father's affection and hers, with the tranquil exertion of my own natural powers, in the place where God had set me.

Both at the time, and ever since, I have felt bitter remorse

that I did not make Carlyle free of the garden, and his horse of the stables, whether we were at home or not; for the fresh air, and bright view of the Norwood hills, were entirely grateful and healing to him, when the little back garden at Cheyne Row was too hot, or the neighborhood of it too noisy, for his comfort.

And at this time, nearly every opportunity of good, and peace, was granted in Joan's coming to help me to take care of my mother. She was perfectly happy, herself, in the seclusion of Denmark Hill; while yet the occasional evenings spent at George Richmond's, or with others of her London friends, (whose circle rapidly widened) enabled her to bring back to my mother little bits of gossip which were entirely refreshing to both of us; for I used to leave my study whenever Joanie came back from these expeditions, to watch my mother's face in its glittering sympathy. I think I have said of her before, that although not witty herself, her strong sense gave her the keenest enjoyment of kindly humor, whether in saying or incident; and I have seen her laughing, partly *at* Joanie and partly *with* her, till the tears ran down her still brightly flushing cheeks. Joan was never tired of telling her whatever gave her pleasure, nor of reading to her, in quieter time, the books she delighted in, against which, girls less serenely,—nay, less religiously, bred, would assuredly have rebelled,—any quantity, for instance, of Miss Edgeworth and Richardson.

(I interrupt myself for a moment to express, at this latter time of life, the deep admiration I still feel for Richardson. The follies of modern novel writing render it impossible for young people to understand the perfection of the human nature in his conception, and delicacy of finish in his dialogue, rendering all his greater scenes unsurpassable in their own manner of art. They belong to a time of the English language in which it could express with precision the most delicate phases of sentiment, necessarily now lost under American, Cockney, or scholastic slang.)

Joanie herself had real faculty and genius in all rightly girlish directions. She had an extremely sweet voice, whether

in reading or singing ; inventive wit, which was softly satirical, but never malicious ; and quite a peculiar, and perfect, sense of clownish humor, which never for an instant diminished her refinement, but enabled her to sing either humorous Scotch, or the brightest Christy Minstrel carols, with a grace and animation which, within their gentle limits, could not be surpassed. She had a good natural faculty for drawing also, not inventive, but realistic ; so that she answered my *first* lessons with serviceable care and patience ; and was soon able to draw and paint flowers which were a great deal liker the flowers themselves than my own elaborate studies ;—no one said of them, “What wonderful drawing !” but everybody said, “How like a violet, or a buttercup !” At that point, however, she stayed, and yet stays, to my sorrow, never having advanced into landscape drawing.

But very soon, also, she was able to help me in arranging my crystals ; and the day divided itself between my mother's room, the mineral room, the garden, and the drawing-room, with busy pleasures for every hour.

Then, in my favorite readings, the deep interest which, in his period of entirely central power, Scott had taken in the scenery of the Solway, rendered everything that Joanie could tell me of her native bay and its hills, of the most living interest to me ; and although, from my father's unerring tutorship, I had learned Scott's own Edinburgh accent with a precision which made the turn of every sentence precious to me, (and, I believe, my own rendering of it thoroughly interesting, even to a Scottish listener,)—yet every now and then Joanie could tell me something of old, classic, Galloway Scotch, which was no less valuable to me than a sudden light thrown on a chorus in *Æschylus* would be to a Greek scholar ;—nay, only the other day I was entirely crushed by her interpreting to me, for the first time, the meaning of the name of the village of Captain Clutterbuck's residence,—Kennaquhair.\*

---

\* “Ken na' where” ! Note the cunning with which Scott himself throws his reader off the scent, in the first sentence of “The Monastery,” by quoting the learned Chalmers “for the derivation of the word ‘*Quhair*,’ from the winding course of the stream ; a definition which

And it has chiefly been owing to Joan's help,—and even so, only within the last five or six years,—that I have fully understood the power, not on Sir Walter's mind merely, but on the character of all good Scotchmen, (much more, good Scotchwomen,) of the two lines of coast from Holy Island to Edinburgh, and from Annan to the Mull of Galloway. Between them, if the reader will glance at any old map which gives rivers and mountains, instead of railroads and factories, he will find that all the highest intellectual and moral powers of Scotland were developed, from the days of the Douglases at Lochmaben, to those of Scott in Edinburgh,—Burns in Ayr,—and Carlyle at Ecclefechan, by the *pastoral* country, everywhere habitable, but only by hardihood under suffering, and patience in poverty; defending themselves always against the northern Pictish war of the Highlands, and the southern, of the English Edwards and Percys, in the days when whatever was loveliest and best of the Catholic religion haunted still the—then *not* ruins,—of Melrose, Jedburgh, Dryburgh, Kelso, Dumblane, Dundrennan, New Abbey of Dumfries, and, above all, the most ancient Cave of Whithorn,—the Candida Casa of St. Ninian; while perfectly sincere and passionate forms of Evangelicalism purified and brightened the later characters of shepherd Cameronian life, being won, like all the great victories of Christianity, by martyrdoms, of which the memory remains most vivid by those very shores where Christianity was first planted in Scotland,—Whithorn is, I think, only ten

---

coincides in a remarkable degree with the serpentine turns of the Tweed"! ("It's a *serpentine turn* of his own, I think!" says Joanie, as I show her the sentence,) while in the next paragraph he gives an apparently historical existence to "the village of which we speak," by associating it with Melrose, Jedburgh, and Kelso, in the "splendor of foundation by David I.," and concludes, respecting the lands with which the king endowed these wealthy fraternities, with a grave sentence, perhaps the most candid ever written by a Scotsman, of the centuries preceding the Reformation: "In fact, for several ages the possessions of these Abbeys were each a sort of Goshen, enjoying the calm light of peace and immunity, while the rest of the country, occupied by wild clans and marauding barons, was one dark scene of confusion, blood, and unremitted outrage."

miles south of Wigtown Bay ; and in the churchyard of Wigtown, close to the old Agnew burying-ground, (where most of Joanie's family are laid,) are the graves of Margaret MacLachlan, and Margaret Wilson, over which in rhythm is recorded on little square tombstones the story of their martyrdom.

It was only, I repeat, since what became practically my farewell journey in Italy in 1882, that I recovered the train of old associations by revisiting Tweedside, from Coldstream up to Ashestiel ; and the Solway shores from Dumfries to Whitehorn ; and while what knowledge I had of southern and foreign history then arranged itself for final review, it seemed to me that this space of low mountain ground, with the eternal sublimity of its rocky seashores, of its stormy seas and dangerous sands ; its strange and mighty crags, Ailsa and the Bass, and its pathless moorlands, haunted by the driving cloud, had been of more import in the true world's history than all the lovely countries of the South, except only Palestine. In my quite last journey to Venice I was, I think, justly and finally impressed with the sadness and even *weakness* of the Mediterranean coasts ; and the temptation to human nature, there, to solace itself with debasing pleasures ; while the very impossibility of either accumulating the treasures, or multiplying the dreams, of art, among those northern waves and rocks, left the spirit of man strong to bear the hardships of the world, and faithful to obey the precepts of Heaven.

It is farther strange to me, even now, on reflection—to find how great the influence of this double ocean coast and Cheviot mountain border was upon Scott's imagination ; and how salutary they were in withdrawing him from the morbid German fancies which proved so fatal to Carlyle : but there was this grand original difference between the two, that, with Scott, his story-telling and singing were all in the joyful admiration of that past with which he could re-people the scenery he gave the working part of his day to traverse, and all the sensibility of his soul to love ;\* while

---

\* Yet, remember, so just and intense is his perception, and so stern his condemnation, of whatever is *corrupt* in the Scottish character, that

Carlyle's mind, fixed anxiously on the future, and besides embarrassed by the practical pinching, as well as the unconfessed shame, of poverty, saw and felt from his earliest childhood nothing but the faultfulness and gloom of the present.

It has been impossible, hitherto, to make the modern reader understand the vastness of Scott's true historical knowledge, underneath its romantic coloring, nor the concentration of it in the production of his eternally great poems and romances. English ignorance of the Scottish dialect is at present nearly total; nor can it be without very earnest effort, that the melody of Scott's verse, or the meaning of his dialogue, can ever again be estimated. He must now be read with the care which we give to Chaucer; but with the greater reward, that what is only a dream in Chaucer, becomes to us, understood from Scott, a consummate historical morality and truth.

The first two of his great poems, "The Lay of the Last Minstrel" and "Marmion," are the re-animation of Border legends, closing with the truest and grandest battle-piece that, so far as I know, exists in the whole compass of literature\*;—the absolutely fairest in justice to both contending nations, the absolutely most beautiful in its conceptions of both. And that the palm in that conception remains with the Scotch, through the sorrow of their defeat, is no more than accurate justice to the national character, which rose from the fraternal branches of the Douglas of Tantallon and the Douglas of Dunkeld. But,—between Tantallon and

---

while of distinctly evil natures—Varney, Rashleigh, or Lord Dalgarno—he takes world-wide examples,—the unpardonable baseness of so-called respectable or religious persons, and the cruelties of entirely selfish soldiers, are always Scotch. Take for the highest type the Lord Lindsay of "The Abbot," and for the worst, Morton in "The Monastery," then the terrible, *because* at first sincere, Balfour of Burleigh in "Old Mortality"; and in lower kind, the Andrew Fairservice and MacVittie of "Rob Roy," the Peter Peebles of "Redgauntlet," the Glossin of "Guy Mannering," and the Saddletree of the "Heart of Midlothian."

\* I include the literature of all foreign languages, so far as known to me: there is nothing to approach the finished delineation and flawless majesty of conduct in Scott's Flodden.

Dunkeld,—what moor or mountain is there over which the purple cloud of Scott's imagination has not wrapt its light, in those two great poems?—followed by the entirely heroic enchantment of "The Lady of the Lake," dwelling on the Highland virtue which gives the strength of clanship, and the Lowland honor of knighthood, founded on the Catholic religion. Then came the series of novels, in which, as I have stated elsewhere, those which dealt with the history of other nations, such as "Ivanhoe," "Kenilworth," "Woodstock," "Quentin Durward," "Peveril of the Peak," "The Betrothed" and "The Crusaders," however attractive to the general world, were continually weak in fancy, and false in prejudice; but the literally *Scotch* novels, "Waverley," "Guy Mannering," "The Antiquary," "Old Mortality," "The Heart of Midlothian," "The Abbot," "Redgauntlet," and "The Fortunes of Nigel," are, whatever the modern world may think of them, as faultless, throughout, as human work can be: and eternal examples of the ineffable art which is taught by the loveliest nature to her truest children.

Now of these, observe, "Guy Mannering," "Redgauntlet," a great part of "Waverley," and the beautiful close of "The Abbot," pass on the two coasts of Solway. The entire power of "Old Mortality" rises out of them, and their influence on Scott is curiously shown by his adoption of the name "Ochiltree" for his bedesman of Montrose, coming not from the near hills, as one at first fancies, but from the Ochiltree Castle, which in Mercator's old map of 1637 I find in the centre of the archbishopric, then extending from Glasgow to Wigtown, and correspondent to that of St. Andrew's on the east,—the subordinate bishopric of Candida Casa, answering to that of Dunkeld, with the bishoprics of the isles Sura, Mura, and Isla. It is also, Mercator adds in his note, called the "bish-opic of Galloway."

"Even I," says Joanie, again, "remember old people who knew the real 'Old Mortality.' He used to come through all the Galloway district to clean and re-cut the old worn gravestones of the martyrs; sometimes, I have been told, to the long since disused kirkyard of Kirkchrist, the place where

my great aunt, Mrs. Church (Carlyle's friend, of whom I have spoken) began her married life. Kirkchrist is just on the opposite side from Kirkeudbright, overlooking the River Dee."

I must go back to a middle-aged map of 1773, to find the noble river rightly traced from its source above Kenmure Castle to the winding bay which opens into Solway, by St. Mary's Isle; where Kirkchrist is marked as Christ K, with a cross, indicating the church then existing.

I was staying with Arthur and Joan, at Kenmure Castle itself in the year 1876, and remember much of its dear people: and, among the prettiest scenes of Scottish gardens, the beautiful trees on the north of that lawn on which the last muster met for King Charles; "and you know," says Joanie, "the famous song that used to inspire them all, of 'Kenmure's on and awa, Willie!'"\* The thoughts come too fast upon me, for before Joanie said this, I was trying to recollect on what height above Solway, Darsie Latimer pauses with Wandering Willie, in whom Scott records for ever the glory,—not of Scottish music only, but of all *Music*, rightly so called,—which is a part of God's own creation, becoming an expression of the purest hearts.

I cannot pause now to find the spot,† and still less the churchyard in which, at the end of Wandering Willie's tale, his grandsire wakes: but, to the living reader, I have this to say very earnestly, that the whole glory and blessing of these sacred coasts depended on the rise and fall of their eternal sea, over sands which the sunset gilded with its withdrawing glow, from the measureless distances of the west, on the ocean horizon, or veiled in silvery mists, or shadowed with

---

\* "Lady Huntley plays Scotch tunes like a Highland angel. She ran a set of variations on 'Kenmure's on and awa,' which I told her were enough to raise a whole country-side. I never in my life heard such fire thrown into that sort of music."—*Sir Walter writing to his daughter Sophia. Lockhart's "Life,"* vol. iv., page 371.

† It is on the highest bit of moor between Dumfries and Annan. Wandering Willie's "parishine" is only thus defined in "Redgauntlet"—"They ca' the place Primrose Knowe."

fast-flying storm, of which nevertheless every cloud was pure, and the winter snows blanched in the starlight. For myself, the impressions of the Solway sands are a part of the greatest teaching that ever I received during the joy of youth:—for Turner, they became the most pathetic that formed his character in the prime of life, and the five *Liber Studiorum* subjects, “Solway Moss,” “Peat Bog, Scotland,” “The Falls of Clyde,” “Ben Arthur,” and “Dunblane Abbey,” remain more complete expressions of his intellect, and more noble monuments of his art, than all his mightiest after work, until the days of sunset in the west came for *it* also.

As “Redgauntlet” is, in its easily readable form, inaccessible, nowadays, I quote at once the two passages which prove Scott’s knowledge of music, and the strong impression made on him by the scenery between Dumfries and Annan. Hear, first, of Darsie Latimer’s escape from the simplicity of his Quaker friends to the open downs of the coast which had formerly seemed so waste and dreary. “The air I breathed felt purer and more bracing; the clouds, riding high upon a summer breeze, drove in gay succession over my head, now obscuring the sun, now letting its rays stream in transient flashes upon various parts of the landscape, and especially upon the broad mirror of the distant Frith of Solway.”

A moment afterward he catches the tune of “Old Sir Thom a Lyne,” sung by three musicians cosily niched into what you might call a *bunker*,\* a little sand-pit, dry and snug, surrounded by its banks, and a screen of furze in full bloom. Of whom the youngest, Benjie, “at first somewhat dismayed at my appearance, but calculating on my placability, almost in one breath assured the itinerants that I was a grand gentleman, and had plenty of money, and was very kind to poor folk, and informed *me* that this was Willie Steenson, ‘Wandering Willie, the best fiddler that ever kittled thairm (cat-gut) with horsehair.’ I asked him if he was of this country. ‘This country!’ replied the blind man, ‘and of every country

---

\* This is a modern word, meaning, first, a large chest; then, a recess scooped in soft rock.

in broad Scotland, and a wee bit of England to the boot. But yet I am in some sense of this country, *for I was born within hearing of the roar of Solway.*' "

I must pause again to tell the modern reader that no word is ever used by Scott in a hackneyed sense. For three hundred years of English commonplace, *roar* has rhymed to *shore*, as *breeze* to *trees*; yet in this sentence the word is as powerful as if it had never been written till now! for no other sound of the sea is for an instant comparable to the breaking of deep ocean, as it rises over great spaces of sand. In its rise and fall on a rocky coast, it is either perfectly silent, or, if it strike, it is with a crash, or a blow like that of a heavy gun. Therefore, under ordinary conditions, there may be either *splash*, or *crash*, or *sigh*, or *boom*; but not *roar*. But the hollow sound of the countless ranks of surfy breakers, rolling mile after mile in ceaseless following, everyone of them with the apparent anger and threatening of a fate which is assured death unless fled from,—the sound of this approach, over quicksands, and into inextricable gulfs of mountain bay, this, heard far out at sea, or heard far inland, through the peace of secure night—or stormless day, is still an eternal voice, with the harmony in it of a mighty law, and the gloom of a mortal warning.

"The old man preluded as he spoke, and then taking the old tune of 'Galashiels' for his theme, he graced it with a wildness of complicated and beautiful variations; during which it was wonderful to observe how his sightless face was lighted up under the conscious pride and heartfelt delight in the exercise of his own very considerable powers.

" 'What think you of that now, for threescore and twa?'"

I pause again to distinguish this noble pride of a man of unerring genius, in the power which all his life has been too short to attain, up to the point he conceives of,—from the base complacency of the narrow brain and dull heart, in their own chosen ways of indolence or error.

The feeling comes out more distinctly still, three pages forward, when his wife tells him, "The gentleman is a gentleman, Willie; ye maunna speak that gate to him, hinnie."

“The deevil I mauuna !” said Willie, \* “and what for mauuna I? If he was ten gentles, he *canna draw a bow like me, can he?*”

I need to insist upon this distinction, at this time in England especially, when the names of artists, whose birth was an epoch in the world's history, are dragged through the gutters of Paris, Manchester, and New York, to decorate the last puffs written for a morning concert, or a monthly exhibition. I have just turned out of the house a book in which I am told by the modern picture dealer that Mr. A., B., C., D., or F. is “the Mozart of the nineteenth century”; the fact being that Mozart's birth wrote the laws of melody for all the world as irrevocably as if they had been set down by the waves of Solway; and as widely as the birth of St. Gregory in the sixth century fixed to *its* date forever the establishment of the laws of musical expression. Men of perfect genius are known in all centuries by their perfect respect to all law, and love of past tradition; their work in the world is never innovation, but new creation; without disturbing for an instant the foundations which were laid of old time. One would have imagined—at least, anyone but Scott would have imagined—that a Scottish blind fiddler would have been only the exponent of Scottish feeling and Scottish art; it was even with astonishment that I myself read the conclusion of his dialogue with Darsie Latimer: “Are ye in the wont of

---

\* Joanie tells me she has often heard the fame of the *real* Wandering Willie spoken of: he was well known in travel from the Border right into Galloway, stopping to play in villages and at all sorts of out-of-the-way houses, and, strangely, succeeded by a *blind woman* fiddler, who used to come led by a sister; and the chief singing lessons in Joanie's young days were given through Galloway by a *blind man*, who played the fiddle to perfection; and his ear was so correct that if in a class of fifty voices one note was discordant, he would stop instantly, tap loudly on the fiddle with the back of his bow, fly to the spot where the wrong note came from, pounce on the person, and say, “It was *you*, and it's no use denying it; if I can't *see*, I can *hear!*” and he'd make the culprit go over and over the phrase till it was conquered. He always opened the class with a sweeping scale, dividing off so many voices to each note, to follow in succession.

drawing up wi' all the gangrel bodies that ye meet on the high road, or find cowering in a sand-bunker upon the links?' demanded Willie.

" 'Oh, no! only with honest folks like yourself, Willie,' was my reply.

" 'Honest folks like me! How do ye ken whether I am honest, or what I am? I may be the deevil himsell for what ye ken; for he has power to come disguised like an angel of light; and besides, he is a prime fiddler. He played a sonata to *Corelli*, ye ken.' "

This reference to the simplest and purest writer of Italian melody being not for the sake of the story, but because Willie's own art had been truly founded upon him, so that he had been really an angel of music, as well as light to him. See the beginning of the dialogue in the previous page. " 'Do you ken the Laird?' said Willie, interrupting an overture of *Corelli*, of which he had whistled several bars with great precision."

I must pause again, to crowd together one or two explanations of the references to music in my own writings hitherto, which I can here sum by asking the reader to compare the use of the voice in war, beginning with the cry of Achilles on the Greek wall, down to what may be named as the two great instances of modern choral war-song: the singing of the known Church-hymn \* at the Battle of Leuthen ("Friedrich," vol. ii., p. 259), in which "five-and-twenty thousand victor voices joined:"

" Now thank God one and all,  
With heart, with voice, with hands,  
Who wonders great hath done  
To us and to all lands; "—

and, on the counter side, the song of the Marseillaise on the march to Paris, which began the conquests of the French Revolution, in turning the tide of its enemies. Compare these, I say, with the debased use of modern military bands

---

\* *Psalm*, I believe, rather; but see my separate notes on St. Louis' Psalter (now in preparation).

at dinners and dances, which inaugurate such victory as *we* had at the Battle of Balaclava, and the modern no-Battle of the Baltic, when our entire war fleet, a vast job of iron-mongers, retreated, under Sir C. Napier, from before the Russian fortress of Cronstadt.

I preface with this question the repetition of what I have always taught, that the Voice is the eternal musical instrument of heaven and earth, from angels down to birds. Half way between them, my little Joanie sang me yesterday, 13th May, 1889, "Farewell, Manchester," and "Golden Slumbers," two pieces of consummate melody, which can only be expressed by the voice, and belonging to the group of like melodies which have been, not invented, but inspired, to all nations in the days of their loyalty to God, to their prince, and to themselves. That Manchester has since become the funnel of a volcano, which, not content with vomiting pestilence, gorges the whole rain of heaven, that falls over a district as distant as the ancient Scottish border,—is not indeed wholly Manchester's fault, nor altogether Charles Stuart's fault; the beginning of both faults is in the substitution of mercenary armies for the troops of nations *led* by their *kings*. Had Queen Mary led, like Zenobia, at Langside; had Charles I. charged instead of Prince Rupert at Naseby; and Prince Edward bade Lochiel follow *him* at Culloden, we should not to-day have been debating who was to be our king at Birmingham or Glasgow. For the rest I take the bye-help that Fors gives me in this record of the power of a bird's voice only.\*

---

\* "An extraordinary scene is to be witnessed every evening at Leicester in the freemen's allotment gardens, where a nightingale has established itself. The midnight songster was first heard a week ago, and every evening hundreds of people line the roads near the trees where the bird has his haunt. The crowds patiently wait till the music begins, and the bulk of the listeners remain till midnight, while a number of enthusiasts linger till one and two o'clock in the morning. Strange to say, the bird usually sings in a large thorn bush just over the mouth of the tunnel of the Midland main line, but the songster is heedless of noise, and smoke, and steam, his stream of song being uninterrupted for four or five hours every night. So large has been the throng of

But the distinction of the music of Scotland from every other is in its association with sweeter natural sounds, and filling a deeper silence. As Fors also ordered it, yesterday afternoon, before Joanie sang these songs to me, I had been, for the first time since my return from Venice, down to the shore of my own lake, with her and her two youngest children, at the little promontory of shingle thrown out into it by the only mountain brook on this eastern side, (Beck Leven,) which commands the windings of its wooded shore under Furness Fells, and the calm of its fairest expanse of mirror wave,—a scene which is in general almost melancholy in its perfect solitude; but, when the woods are in their gladness, and the green—how much purer, how much softer than ever emerald!—of their unsullied spring, and the light of dawning summer, possessing alike the clouds and mountains of the west,—it is, literally, one of the most beautiful and strange remnants of all that was once most sacred in this British land,—all to which we owe, whether the heart, or the voice, of the Douglas “tender and true,” or the minstrel of the Eildons, or the bard of Plynlimmon, or the Ellen of the lovely Isle,—to whose lips Scott has entrusted the most beautiful Ave Maria that was ever sung, and which can never be sung rightly again until it is remembered that the harp is the true ancient instrument of Scotland, as well as of Ireland.\*

---

listeners that the chief constable has drafted a number of policemen to maintain order and prevent damage.”—*Pall Mall Gazette*, May 11th, 1889.

\* Although the violin was known as early as 1270, and occurs again and again in French and Italian sculpture and illumination, its introduction, in superseding both the voice, the golden bell, and the silver trumpet, was entirely owing to the demoralization of the Spanish kingdom in Naples, of which Evelyn writes in 1644, “The building of the city is, for the size, the most magnificent in Europe. To it belongeth three thousand churches and monasteries, and those best built and adorned of any in Italy. They greatly affect the Spanish gravity in their habit, delight in good horses, the streets are full of gallants on horseback, and in coaches and sedans, from hence first brought into England by Sir Sanders Duncomb; the country people so jovial, and addicted to music, that the very husbandmen almost universally play

I am afraid of being diverted too far from Solway Moss, and must ask the reader to look back to my description of the Spirit of music in the Spanish chapel at Florence ("The Strait Gate," pages 134 and 135), remembering only this passage at the beginning of it, "After learning to reason, you will learn to sing: for you will want to. There is much reason for singing in the sweet world, when one thinks rightly of it. None for grumbling, provided always you *have* entered in at the strait gait. You will sing all along the road then, in a little while, in a manner pleasant for other people to hear."

I will only return to Scott for one half page more, in which he has contrasted with his utmost masterhood the impressions of English and Scottish landscape. Few scenes of the world have been oftener described, with the utmost skill and sincerity of authors, than the view from Richmond Hill sixty years since; but none can be compared with the ten lines in "The Heart of Midlothian," edition of 1830, page 374. "A huge sea of verdure, with crossing and intersecting promontories of massive and tufted groves, was tenanted by numberless flocks and herds, which seemed to wander unrestrained, and unbounded, through the rich pastures. The Thames, here turreted with villas, and there garlanded with forests, moved on slowly and placidly, like the mighty monarch of the scene, to whom all its other beauties were but accessories, and bore on his bosom a hundred barks and skiffs, whose white sails and gayly fluttering pennons gave life to the whole.

---

on the guitar, singing and composing songs in praise of their sweet-hearts, and will commonly go to the field with their fiddle,—they are merry, witty, and genial, all which I attribute to the excellent quality of the air."

What Evelyn means by the *fiddle* is not quite certain, since he himself, going to study "in Padua, far beyond the sea," there learned to play on "ye theorba, taught by Signior Dominico Bassano, who had a daughter married to a doctor of laws, that played and sung *to nine* several instruments, with that skill and adresse as few masters in Italy exceeded her; she likewise composed divers excellent pieces. I had never seen any play on the *Naples viol* before."

“As the Duke of Argyle looked on this inimitable landscape, his thoughts naturally reverted to his own more grand and scarce less beautiful domains of Inverary. ‘This is a fine scene,’ he said to his companion, curious perhaps to draw out her sentiments; ‘we have nothing like it in Scotland.’ ‘It’s braw rich feeding for the cows, and they have a fine breed o’ cattle here,’ replied Jeanie; ‘but I like just as weel to look at the craigs of Arthur’s Seat, and the sea coming in ayont them, as at a’ thae muckle trees.’”

I do not know how often I have already vainly dwelt on the vulgarity and vainness of the pride in mere magnitude of timber which began in Evelyn’s “*Sylva*,” and now is endlessly measuring, whether Californian pines or Parisian towers,—of which, though they could darken continents, and hide the stars, the entire substance, cost, and pleasure are not worth one gleam of leafage in Kelvin Grove, or glow of rowan tree by the banks of Earn, or branch of wild rose of Hazeldean;—but I may forget, unless I speak of it here, a walk in Scott’s own haunt of Rhymer’s Glen,\* where the brook is narrowest in its sandstone bed, and Mary Ker stopped to gather a wild rose for me. Her brother, then the youngest captain in the English navy, afterward gave his pure soul up to his Captain,

---

\* “Captain Adam Ferguson, who had written, from the lines of Torres Vedras, his hopes of finding, when the war should be over, some sheltering cottage upon the Tweed, within a walk of Abbotsford, was delighted to see his dreams realized; and the family took up their residence next spring at the new house of Toftfield, on which Scott then bestowed, at the ladies’ request, the name of *Huntley Burn*;—this more harmonious designation being taken from the mountain brook which passes through its grounds and garden,—the same famous in tradition as the scene of Thomas the Rhymer’s interviews with the Queen of Fairy.

“On completing this purchase, Scott writes to John Ballantyne:—‘Dear John,—I have closed with Usher for his beautiful patrimony, which makes me a great laird. I am afraid the people will take me up for coining. Indeed these novels, while their attractions last, are something like it. I am very glad of your good prospects. Still I cry, *Prudence! Prudence!* Yours truly, W. S.’”—*Lockhart’s “Life,”* vol. iv., page 82.

Christ,—not like banished Norfolk, but becoming a monk in the Jesuits' College, Hampton.

And still I have not room enough to say what I should like of Joanie's rarest, if not, chiefest merit, her beautiful dancing. *Real* dancing, not jumping, or whirling, or trotting, or jigging, but dancing,—like Green Mantle's in "Redgauntlet," winning applause from men and gods, whether the fishermen and ocean Gods of Solway, or the marchmen and mountain Gods of Cheviot.\* Rarest, nowadays, of all the gifts of cul-

---

\* I must here once for all explain distinctly to the most matter-of-fact reader, the sense in which throughout all my earnest writing of the last twenty years I use the plural word "gods." I mean by it, the totality of spiritual powers, delegated by the Lord of the universe to do, in their several heights, or offices, parts of His will respecting men, or the world that man is imprisoned in;—not as myself knowing, or in security believing, that there are such, but in meekness accepting the testimony and belief of all ages, to the presence, in heaven and earth, of angels, principalities, powers, thrones, and the like,—with genii, fairies, or spirits ministering and guardian, or destroying or tempting; or aiding good work and inspiring the mightiest. For all these, I take the general word "gods," as the best understood in all languages, and the truest and widest in meaning, including the minor ones of seraph, cherub, ghost, wraith, and the like; and myself knowing for an indisputable fact, that no true happiness exists, nor is any good work ever done by human creatures, but in the sense or imagination of such presences. The following passage from the first volume of "Fors Clavigera" gives example of the sense in which I most literally and earnestly refer to them:—

"You think it a great triumph to make the sun draw brown landscapes for you! That was also a discovery, and some day may be useful. But the sun had drawn landscapes before for you, not in brown, but in green, and blue, and all imaginable colors, here in England. Not one of you ever looked at them, then; not one of you cares for the loss of them, now, when you have shut the sun out with smoke, so that he can draw nothing more, except brown blotches through a hole in a box. There was a rocky valley between Buxton and Bakewell, once upon a time, divine as the vale of Tempe; you might have seen the gods there morning and evening,—Apollo and all the sweet Muses of the Light, walking in fair procession on the lawns of it, and to and fro among the pinnacles of its crags. You cared neither for gods nor grass, but for cash (which you did not know the way to get). You thought you could get it by what the *Times* calls 'Railroad Enterprise.' You enterprised

tivated womankind. It *used* to be said of a Swiss girl, in terms of commendation, she “prays well and dances well ;” but now, no human creature can pray at the pace of our common prayers, or dance at the pace of popular gavottes,—more especially the last ; for however fast the clergyman may gabble, or the choir-boys yowl, their psalms, an earnest reader can always *think* his prayer, to the end of the verse ; but no mortal footing can give either the right accent, or the due pause, in any beautiful step, at the pace of modern waltz or polka music. Nay, even the last quadrille I ever saw well danced, (and would have given half my wits to have joined hands in,) by Jessie and Vicky Vokes, with Fred and Rosina, was in truth *not* a quadrille, or four-square dance, but a beautifully flying romp. But Joanie could always dance everything *rightly*,\* having not only the brightest light and warmth of heart, but a faultless foot ; faultless in freedom—

---

a railroad through the valley, you blasted its rocks away, heaped thousands of tons of shale into its lovely stream. The valley is gone, and the gods with it ; and now, every fool in Buxton can be at Bakewell in half-an-hour, and every fool in Bakewell at Buxton ; which you think a lucrative process of exchange, you Fools everywhere !”

\* Of *right* dancing, in its use on the stage, see the repeated notices in “Time and Tide.” Here is the most careful one :—“She did it beautifully and simply, as a child ought to dance. She was not an infant prodigy ; there was no evidence, in the finish or strength of her motion, that she had been put to continual torture through half her eight or nine years. She did nothing more than any child, well taught, but painlessly, might do. She caricatured no older person,—attempted no curious or fantastic skill. She was dressed decently,—she moved decently,—she looked and behaved innocently,—and she danced her joyful dance with perfect grace, spirit, sweetness, and self forgetfulness. And through all the vast theatre, full of English fathers and mothers and children, there was not one hand lifted to give her sign of praise but mine.

“Presently after this came on the forty thieves, who, as I told you, were girls ; and there being no thieving to be presently done, and time hanging heavy on their hands, arms, and legs, the forty thief girls proceeded to light forty cigars. Whereupon the British public gave them a round of applause.

“Whereupon I fell a-thinking ; and saw little more of the piece, except as an ugly and disturbing dream.”

never narrowed, or lifted into point or arch by its boot or heel, but level, and at ease; small, *almost* to a fault, and in its swiftest steps rising and falling with the gentleness which only Byron has found words for—

“Naked foot,  
That shines like snow—and falls on earth as mute.”

The modern artificial ideal being, on the contrary, expressed by the manner of stamp or tap, as in the Laureate's line—

“She tapped her tiny silken sandalled foot.”

From which type the way is short, and has since been traversed quickly, to the conditions of patten, clog, golosh, and high-heeled bottines, with the real back of the foot thrown behind the ankle like a negress's, which have distressed alike, and disgraced, all feminine motion for the last quarter of a century,—the slight harebell having little chance enough of raising its head, once well under the hoofs of our proud maidenhood, decorate with dead robins, transfixed humming-birds, and hothouse flowers,—for its “Wedding March by Mendelssohn.” To think that there is not enough love or praise in all Europe and America to invent one other tune for the poor things to strut to!

I draw back to my own home, twenty years ago, permitted to thank Heaven once more for the peace, and hope, and loveliness of it, and the Elysian walks with Joanie, and Paradaical with Rosie, under the peach-blossom branches by the little glittering stream which I had paved with crystal for them. I had built behind the highest cluster of laurels a reservoir, from which, on sunny afternoons, I could let a quite rippling film of water run for a couple of hours down behind the hayfield, where the grass in spring still grew fresh and deep. There used to be always a cornerake or two in it. Twilight after twilight I have hunted that bird, and never once got glimpse of it: the voice was always at the other side of the field, or in the inscrutable air or earth. And the little stream had its falls, and pools, and imaginary

lakes. Here and there it laid for itself lines of graceful sand ; there and here it lost itself under beads of chalcedony. It wasn't the Liffey, nor the Nith, nor the Wandel ; but the two girls were surely a little cruel to call it "The Gutter!" Happiest times, for all of us, that ever were to be ; not but that Joanie and her Arthur are giddy enough, both of them yet, with their five little ones, but they have been sorely anxious about me, and I have been sorrowful enough for myself, since ever I lost sight of that peach-blossom avenue. "Eden-land" Rosie calls it sometimes in her letters. Whether its tiny river were of the waters of Abana, or Euphrates, or Thamesis, I know not, but they were sweeter to my thirst than the fountains of Trevi or Branda.

How things bind and blend themselves together! The last time I saw the Fountain of Trevi, it was from Arthur's father's room—Joseph Severn's, where we both took Joanie to see him in 1872, and the old man made a sweet drawing of his pretty daughter-in-law, now in her schoolroom ; he himself then eager in finishing his last picture of the Marriage in Cana, which he had caused to take place under a vine trellis, and delighted himself by painting the crystal and ruby glittering of the changing rivulet of water out of the Greek vase, glowing into wine. Fonte Branda I last saw with Charles Norton,\* under the same arches where Dante saw it.

---

\* I must here say of Joanna and Charles Norton this much farther, that they were mostly of a mind in the advice they gave me about my books ; and though Joan was, as it must have been already enough seen, a true-bred Jacobite, she curiously objected to my early Catholic opinions as roundly as either Norton or John P. Robinson. The three of them—not counting Lady Trevelyan or little Connie, (all together *five* opponent powers)—may be held practically answerable for my having never followed up the historic study begun in Val d'Arno, for it chanced that, alike in Florence, Siena, and Rome, all these friends, tutors, or enchantresses were at different times amusing themselves when I was at my hardest work ; and many happy days were spent by all of us in somewhat luxurious hotel life, when by rights I should have been still under Padre Tino in the sacristy of Assisi, or Cardinal Agostini at Venice, or the Pope himself at Rome, with my much older friend than any of these, Mr. Rawdon Brown's perfectly faithful and loving

We drank of it together, and walked together that evening on the hills above, where the fireflies among the scented thickets shone fitfully in the still undarkened air. *How* they shone! moving like fine-broken starlight through the purple leaves. How they shone! through the sunset that faded into thunderous night as I entered Siena three days before, the white edges of the mountainous clouds still lighted from the west, and the openly golden sky calm behind the Gate of Siena's heart with its still golden words, "Cor magis tibi Sena pandit," and the fireflies everywhere in sky and cloud rising and falling, mixed with the lightning and more intense than the stars.

BRANTWOOD,

*June 19th, 1889.*

---

servant Antonio. Of Joanna's and Connie's care of *me* some further history will certainly, if I live, be given in No. VII., "The Rainbows of Giesbach"; of Charles Norton's visit to me there also.
